Orchids—Orchids

We Collect, Buy, Import, Export, Grow and Sell this class of plants exclusively.

We supply Amateurs, Florists, Parks and Botanical Gardens anywhere and we hereby respectfully solicit your patronage.

Safe arrival of our plants is assured by the most careful packing.

Price lists of Imported Orchids and Catalogues of Established Orchids may be had on application.

We solicit your inspection of our exhibits in Horticultural Hall, Philadelphia, Pa., during the Convention of the S. A. F.

LAGER & HURRELL SUMMIT, N. J.

Special Notice to Advertisers

THE PHILADELPHIA CONVENTION

The Florists' Exchange, in its issues of August 24 and August 31, will contain full and complete reports of the Proceedings of the Convention of the S. A. F. and O. H. at Philadelphia, August 20 to 23.

Keen advertisers should avail themselves of the excellent opportunity which these two editions offer of making an impression on the trade at this season which marks the opening of Fall business.

All in all here are offered two most interesting weeks in which to reach Trade Buyers.

These editions will possess more than average interest, as every reader is anxious to know just what was done, who was there, what firms made exhibits, what new goods were shown, how the election of officers went, the next place of meeting, and the current news and gossip.

Advertisements received until Wednesday noon in each week.

Recognizing the special value of these issues of August 24 and 31, some of our advertisers have already taken extra space therein; we solicit further enlarged and new business from those whose advertising would be timely.

THE FLORISTS' EXCHANGE

Nos. 2 to 8 Duane St.,

P. O. Box 1697,

New York City

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Indianapolis, Ind.

BEERTEEMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

H. Bayersdorfer & Company.

The firm of H. Bayersdorfer & Company, whose headquarters are located at 1129 Arch street, Philadelphia, Pa., needs no introduction to those attending a S. A. F. convention, for the concern never fails to make its large and attractive exhibit of florists' supplies, containing always many things new and novel in this line, at every annual meeting of the society. This year will be no exception to the rule, the house having planned to make what will probably be the most extensive display of its kind in the exhibition hall.

Our illustration shows the store of H. Bayersdorfer & Company as it was decorated on the occasion of the recent convention of Elks held in the City of Brotherly Love.

numerous Ramblers and Wichuraianas which are being placed on the market, the climbing section bids fair to become as numerous as the dwarfier roses. It is only fair to the raisers to admit that most of these new additions are of decided merit, but this has apparently blinded the eyes of nurserymen to the fact that most amateurs can only find room for say one climbing rose in proportion to a score dwarfs, so that however good the newcomers may be, it would be wise for the trade to exercise a healthy discretion both as to the number of novelties added to their lists, and the quantity of each sort to be worked; otherwise we shall have a period of over production with ruinous price cutting or the bonfire to follow.—Horticultural Advertiser, England.

So far no complaint of over production of this class of roses has been heard on this side of the Atlantic. In fact, new uses for them are materializing from time to time, especially along retail florist lines.

Store of H. Bayersdorfer & Company, Philadelphia, as it was decorated during recent Elks' Convention.

During the gathering of the S. A. F. the firm will hold open house, and all visitors will be made especially welcome. One of the social features of the convention will be a luncheon, provided by this concern on Thursday afternoon on the roof garden of its spacious building, lasting from the adjournment of the morning session on that day until 4 p. m.

CLIMBING ROSES.—Recent calls at nurseries have convinced us that we are getting far too many climbing roses. What with sports from older kinds, and the

EDELWEISS IN PARIS.—Edelweiss, which this year is more fashionable than ever, is mostly grown near Copenhagen and exported to Switzerland, where the flower is so rare now that it is strictly forbidden to gather it. Not to be outdone, Paris gardeners are cultivating edelweiss in the suburbs, and have recently exhibited specimens. Large quantities will appear at the next greenhouse exhibition, and soon the Swiss gardeners will sell only Parisian products.—N. Y. Herald.

CHANGES IN BUSINESS.

PANA, ILL.—R. O. Henderson of Madison, Wis., has leased the Shaffer greenhouses here and will operate them from now on.

DES MOINES, IA.—The Alpha Flower Company has concluded a lease for the corner store room at Seventh and Walnut, formerly occupied by Kromer & Walters. The company gives up the store room adjoining.

CHICAGO.—The Garfield Park Flower Company has passed out of existence and the store at 1688 West Madison street abandoned the business, wholesale only, to continue in the name of Frank Oechslein at 2572 West Adams street.

MARION, IND.—Gunnar Tellmann, the well-known florist, has added to his possessions by purchasing the Bernard greenhouse at Washington and Seventeenth streets, paying therefor \$2,500. Mr. Tellmann will operate the new purchase in connection with his greenhouse on the Huntington pike.

CATALOGUES RECEIVED.

J. P. BEDRO, Lochvitz, Russia.—Price List of Stocks for Fruit Trees.

MOHICAN PEONY GARDENS, Sinking Springs, Pa.—Price List of Peonies. Illustrated.

W. W. BARNARD COMPANY, Chicago, Ill.—Florists' Wholesale List of Bulbs and Seeds for Fall Planting. 1907. Illustrated.

CEDAR HILL NURSERY AND ORCHARD COMPANY, Winchester, Tenn.—Wholesale Price List of Fruit and Ornamental Trees, Privet, Evergreens, etc.

GEORGE H. PETERSON, Fair Lawn, N. J.—Illustrated Price List of Peonies. A neatly printed Catalogue, containing much interesting information concerning Peonies, and furnishing directions for their successful cultivation.

BUSINESS DIFFICULTIES.

DETROIT, MICH.—George W. Davis, florist at Warren and Lincoln avenues, has filed a petition in bankruptcy, giving his debts as \$2,013.87. His assets are an equity in the real estate, valued at \$1,000 and claimed as exempt, and \$150 worth of household goods, also exempt. Davis encountered financial difficulties two or three years ago.

GROW MUSHROOMS

If you do not know how, procure that simple but complete and practical book called "How to Grow Mushrooms." The price is ten cents and it can be secured from this office.

Special rates will be made to the trade who wish to supply their customers.

METROPOLITAN MATERIAL CO.

Greenhouse Wreckers

1388-1408 Metropolitan Avenue, BROOKLYN, N. Y.

The S. A. F. of the P. M. Co.

SERVICE. Great stress is laid on the accurate filling of orders. Telegrams, phones, messages of all kinds, written or verbal, receive the careful attention of competent heads of departments so that no one need feel any hesitation in forwarding hurry up orders. The organization and service are so complete that it is almost impossible for any hitch to occur.

The PENNOCK-MEEHAN CO.

business combines all important qualifications: organization and equipment; service and knowledge; quantity and quality of stock; and offers itself confidently to the whole country both for the grower to market his products and the buyer to procure his supply of cut flowers, plants and florists' supplies of all kinds.

RIBBON AND SUPPLY DEPARTMENT.

The business of this department has been increasing yearly and is now the best equipped of any wholesale florists in the country. New styles, new fabrics, new inventions are constantly being added to the staples so as to bring the stock thoroughly up to date in all respects.

S. S. PENNOCK-MEEHAN CO.

The Wholesale Florists of Philadelphia

1608, 1610, 1612, 1614, 1618, 1620 LUDLOW STREET

The S. A. F. epitomizes the spirit of mutual co-operation which has made it possible for the florists' business to have reached its present high state of development.

The PENNOCK-MEEHAN CO., with its modern organization for the distribution of the florists' products, epitomizes no less the same spirit—mutual co-operation being the guiding star that has kept the business on it steady upward progress from small beginnings to its present commanding position. This spirit

combined with a thorough knowledge of the customer and his wants, and a sympathetic willingness to help him out in emergencies, affects every detail of the business and accounts largely for its popularity and success.

ABILITY. The ability of the organization has been developed along practical lines through years of experience and has been brought by selection and elimination as near perfection as possible. Constant vigilance is the watchword in this department to the end that every employee may by fair but firm treatment show the best that he is capable of not only for his own sake but that of his employer and the public—the interests of all being in the long run identical.

FACILITIES. The company has the largest and most modernly equipped outfit of any wholesale florists' establishment in the world. The buildings are centrally located being within a stone's throw of Broad Street Station five blocks from Horticultural Hall where the convention will be held this year and having at its command an experience of over twenty years in knowing how to make the best of these facilities for the benefit of both growers and customers. A cordial invitation is extended to all visitors to make this their headquarters during their stay.

CARNATION SPECIALISTS

A cordial invitation is extended to visitors at all times.
TWO NEW CARNATIONS FOR 1908

DEFIANCE SCARLET

THE MOST BEAUTIFUL SCARLET CARNATION EVER PLACED UPON THE MARKET. A GLORIOUS SHADE LONG SOUGHT AFTER BY HYBRIDISTS. SURE TO BE A WINNER, BOTH AS AN EXHIBITION AND COMMERCIAL VARIETY. STRONG, HEALTHY AND OF GOOD HABIT.

E. F. Winterson, the Chicago Wholesaler, who has sold the product of the stock of these two varieties for the past season says: "They were by far the best selling carnations I handled last winter, selling at a good price when other varieties were glutted and commanding from fifty to one hundred per cent. more than any other variety when the demand was good. Most of the season I could not get enough of them to supply regular standing daily orders."

\$12.00 per 100 PLACE YOUR ORDERS NOW \$100.00 per 1000

SINCERITY SALMON PINK

A PLEASING NEW SHADE AMONG SUCCESSFULLY COMMERCIAL CARNATIONS. AS A NOVELTY EVERY GROWER SHOULD CULTIVATE IT AS IT IS BOUND TO BE POPULAR. VERY PROFITABLE AND POSSESSING ALL THE REQUISITE QUALIFICATIONS OF THE UP-TO-DATE CARNATION.

It is never too late and here is the chance:

Aristocrat.....\$12.00 per 100
White Enchantress..... 12 00 per 100
Rose Pink Enchantress... 8.00 per 100

Strong plants sent direct from the introducers.

Chrysanthemum Novelties a Specialty

MADISON, N. J.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

REVIEW OF THE MARKET

NEW YORK.—The cut flower market is in a very quiet state, there being very little doing in any line. New crop roses are coming in, but, in the main, they are short-stemmed and when sold bring very low figures. Carnations are much scarcer now than they have been for many months. Asters are extremely plentiful and can be bought in large lots very cheap. The supply of lilies is plentiful for all demands, though there has been no change in values since last week. Gladiolus are plentiful, and while some of the finer varieties are held at 3c. and 4c. each there are plenty of ordinary kinds that can be bought at figures below \$1 per 100. Green material of all kinds is in very poor demand just now. Some orchids are coming in; and the supply of lily of the valley is regular, but there is not much demand for either. Lilies from outdoors are becoming quite numerous, there being a large supply at present of speciosum and auratum.

CHICAGO.—The market here has seen but little change, the quietude of the past few weeks still pervading the florists' headquarters. The aster glut has been evident, especially in white, for a week or more and colored sorts are but very little better off. Roses and carnations are little spoken of, in fact there is very little of the stock that is worth consideration. The best judges give us hope by saying that we are passing through the worst season and hold out optimistic views of two weeks hence.

W. K. W.

INDIANAPOLIS.—A mass of flowers which had accumulated at the week's beginning was gracefully disposed of upon the arrival of numerous funeral orders at the close. Foliage plant decorations, more numerous than common, at times nearly deplete the conservatories of their summer stock. Asters still command the cut flower field at 50c. to \$1.50 per 100; the local stores are enabled to dispose of only a minor portion, so frequent shipments are made to surrounding towns. Harrisii and auratum lilies are numerous; they sell well at \$15 per 100. Japanese rubrum and album lilies are readily accepted at \$8 per 100, short; \$10 per 100 long.

The window displays of Golden Glow and Shasta daisies are truly excellent. Gladiolus at \$1.50 to \$4 per 100 are prominent in the flower quarters. Carnations, now entirely out of the market, are not forgotten by the public; asters are a satisfactory substitute. Roses are very plentiful and the quality is much improved; the best Kaiserin Augusta Victoria and Liberty bring \$5 to \$7 per 100. Long American Beauty, of course, are not to be had; medium wholesale at \$15 to \$20 per 100; short at \$5 to \$10 per 100.

The supply of flowers at Tomlinson Hall market, because of the rainy season, is more profuse than general. Business is reported satisfactory.

I. B.

ST. LOUIS.—The cut flower trade has not changed much since last week, and nothing like an improvement is looked for until September 1, when society folks generally return for the opening of the schools. Good stock continues very scarce, especially roses and carnations. At the retail establishments things look dull during the afternoons; the mornings are generally taken up with funeral work.

Roses bring from \$2 to \$4 per 100, all varieties. American Beauty, fancy long, are very scarce; shorts are coming in and sell at \$2 to \$5 per 100. Carnations are very poor and hardly bring over \$1 per 100; fancy stock is out of the question. Asters are very plentiful and some really fine stock can be had at \$4 per 100; others at from 50c. to \$1.50 per 100. Gladiolus bring \$3 and tube roses \$5 per 100.

Fine smilax can be obtained at \$12.50 per 100; fancy ferns, \$2 per 1000. Adiantum and asparagus are in plenty.

ST. PATRICK.

WASHINGTON, D. C.—Business opened up a little dull at the beginning of the week, but was stimulated by funeral work toward the end. There is a superfluity of rain just now in this section which is improving the quantity and quality of stock received at the stores. Field crops have also improved very much during the last fortnight.

W. B. Shaw of Deanwood, D. C., is sending in some fine water lilies of both the night and day blooming classes, also excellent lotus.

J. L. C.

BOSTON.—Asters are now the most plentiful flowers in the market. The quality is good, but there is a raft of them and prices have dropped. Roses

remain about the same as last reported, but the weather has been such the past week that little has been done. Carnations are perhaps not so plentiful as they have been, but then there is little demand for them. Gaillardias and several other hardy flowers are seen in limited quantities and are used for special purposes. Lilies are in limited supply; L. speciosum are making their appearance. Sweet peas seem as plentiful as ever, but the flowers are smaller, showing the effect of dry weather.

J. W. D.

New York.

S. A. F. Convention Matters.

So far Secretary John Young has not received the names of many persons who intend attending the convention of the S. A. F. in Philadelphia next week. If we are to have a special car to take us there next Tuesday morning, every one who intends going should at once notify Mr. Young, as it is imperative that the railroad company be informed as to how many people are going if a special car is to be provided. As mentioned last week, the starting time Tuesday morning will be 9.55 a. m. from West Twenty-third and Desbrosses streets, and 10 a. m. from Cortlandt street. The journey will be made over the Pennsylvania railroad, and we understand that the chairman of the commissariat department, John B. Nugent, Jr., is making elaborate preparations to entertain the party en route, and it goes without saying that the delegates will arrive in Philadelphia neither hungry nor thirsty, as Mr. Nugent is a pastmaster in catering to the wants of the inner man. Tickets for the journey can be purchased at any of the Pennsylvania railroad offices, but when making such purchases one should be sure to ask for a certificate so as to get the benefit of the lower fare for the return journey.

The Week's News.

Charles Schenck of the firm of Traendly & Schenck is back from his European trip, and reports having had a most enjoyable time. He and Mrs. Schenck visited Paris, Berlin, Lucerne, London, Sheffield and other places, and enjoyed cool weather from the beginning to the end of their travels; in fact, in Switzerland snow storms were encountered and winter clothing was in order.

A. Hanig, one of the Brooklyn florists who hails from Roumania, and who but recently joined the order of Elks, is so imbued with the secret signs of the order that he recognizes them at every turn. Recently, while driving along Broadway and coming to a crossing, a policeman raised his right hand as a signal for Hanig to stop and wait for the cross-town traffic to get clear. Hanig raised his right hand also and proceeded to cross over, when the policeman ordered him from his wagon and placed him under arrest. On being taken before the magistrate and asked why he did not stop when the policeman signalled, he said he noticed the officer raise his hand, but thought it was one of the secret signals, so he gave the reply signal and was going on his way when he was arrested. The explanation appeared so funny to the magistrate that he discharged Hanig.

Three beautiful gladiolus were seen in W. F. Sheridan's store this week, namely: Princeps, the new, large, scarlet variety; Mrs. Francis King, a very large flower, not so bright a scarlet as Princeps, and America, the pink sort that is becoming so well known.

It is understood that Harry A. Bunyard is to be sergeant-at-arms at the meetings of the coming convention of the S. A. F. O. H. Harry knows every florist in the country almost, and no more popular man could have been found for that office. He has just returned from a very successful Western trip, and will leave for the convention on Monday to stage the exhibit of A. T. Roddington.

Wilson's Plant Oil is gaining favor among growers as an insecticide, and the manufacturer, Andrew Wilson,

ARTHUR COWEE, Gladiolus Specialist,

MEADOWVALE FARM, BERLIN, N. Y.

Summit, N. J., is gratified at the testimonials received from growers who have given his new insecticide a trial.

Victor Dorval, the well-known florist of Woodside, L. I., is, we are very sorry to say, very ill at present with an attack of nervous prostration.

A. J. Guttman left on Tuesday afternoon by boat for Yarmouth, St. John, N. B., and Portland, Me.; he intends to return in time to attend the convention in Philadelphia.

At the third annual interborough fair of the Richmond County Agricultural Society, which will be held at the fair grounds near Midland Beach, S. I., about \$2,000 in prizes will be offered in three classes; professional, open to all; Richmond Borough professionals and Richmond Borough amateurs, equal prizes being offered in all the three classes. Those seeking information regarding this annual fair should address A. C. Nellis, Manager, West New Brighton, N. Y. It will take place September 2-7 inclusive.

Arthur W. Brooks, who for some time had worked for John N. Champion, florist of New Haven, Conn., as caretaker for his kennels (Mr. Champion being a dog fancier in addition to his florist business), committed suicide by taking cyanide of potassium in the Ashland House on Saturday, August 10. From letters and pawn tickets found on his clothing it was shown that he had stolen several hundred dollars worth of jewelry belonging to Mrs. Champion before coming to the city.

Stump & Walter Company, 50 Barclay street, are putting in a new front to their store and making other alterations in the interior that will give them much additional floor space. A new electric elevator is also being installed, and when all the improvements under way are completed, the company will have better facilities than ever for attending to their increasing business.

The seventy-sixth fair of the American Institute will be held in the Berkeley Lyceum Building, 19 and 21 West Forty-fourth street, this city, September 24 to 26. Premiums will be awarded for plants, flowers, fruits, vegetables and farm crops. The schedule calls for classes of dahlias, gladiolus, ornamental plants, roses, carnations and violets, in addition to fruits and vegetables.

The Institute has also distributed the schedule of prizes to be awarded at the chrysanthemum exhibition which will be held in the same rooms, November 6, 7 and 8. The Chrysanthemum Society of America will hold its annual exhibition in conjunction with the American Institute, at that time.

Governor Hughes has appointed Professor W. G. Johnson of the American Agriculturist trustee of the State Experiment Station in place M. H. Olin, deceased.

A daughter arrived at the home of John F. Johnston, superintendent of

C. EISELE, 11th & Roy Streets, PHILADELPHIA, PA.

the Dana Estate, Dorosis, Glen Cove, L. I., last week.

The ninth annual picnic of the Gardeners and Florists' Union No. 11984 A. F. of L. was held August 8 at Zelter's Park and Casino, 170 street and Third avenue, New York City. The affair was certainly a success, bringing together the craft of the whole Department of Parks of New York City. The gardeners from Manhattan borough were more fortunate than their brethren from the Brooklyn and Queens or Bronx departments, because Commissioner Moses Herman granted the Manhattan borough gardeners a half-day leave of absence. Much credit must be given the officers—President James Mooney; vice-president, Alex Hoog; financial secretary, O. Lundt; secretary, Ed. Cooley; treasurer, James Coyle; sergeant-at-arms, C. Dorie; guardian, W. B. Schneider, and the arrangement committee—Henry Mackie, John McCarty, Thomas Evans, James Coyle and Wm. B. Schneider—for the "hybridization of good feeling" that existed at this affair.

J. F. Huss of Hartford, Conn., was a visitor this week.

The schedule of prizes for the Summer show of the Southampton (L. I.) Horticultural Society has been issued. The exhibition will be held in Agawam Hall, Southampton, on September 4, 1907. There are 211 classes, three premiums in each class. Copies of the prize list may be obtained from Secretary B. C. Palmer.

The New York offices of F. O. Pierce Company, manufacturers of paints, mastic, etc., having been entirely destroyed by fire, temporary offices have been established at the firm's factory, 30 Tiffany place, Brooklyn, N. Y. All communications should be addressed as formerly, P. O. Box, 294, New York city. All orders will be promptly executed from the factory as heretofore.

Philip Breitmeyer, Detroit, is expected here this week.

Philadelphia.
All Ready for the Convention.

We are all ready for the convention. Let all come who can; they will be glad, and long remember the twenty-third annual convention of the S. A. F. When you arrive come to Horticultural Hall, Broad street below Locust, and register. At all the railroad stations on Monday and Tuesday there will be members of our reception committee to direct you to your hotels. The registration quarters will be open after Monday noon.

In this city, Treasurer H. B. Beatty is talked of for president, with J. F. Wilcox, Council Bluffs, Ia., as second choice.

We understand that the mayor of Niagara Falls will be on hand.

The trade exhibition hall is filling up well; some goods are already being staged.

Joseph Heacock has gone to search for his son, Edward R. Heacock, who it is feared was drowned while canoeing on Gold River, in southwestern Canada. The spot at which the accident occurred is in the heart of a wilderness, and it is thought to be hardly possible for Mr. Heacock to succeed in his mission.

DAVID RUST.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

Indianapolis. News Notes. The dedication of the K. of P. flatiron building called for several plant decorations. The business centers are well decorated with the lodge colors. John Grande is shipping thousands of asters to the Cincinnati commission dealers. Miss Kramer of Bertermann's has returned from a pleasant vacation. Arrangements were completed for a permanent athletic organization at the meeting held at A. Wiegand & Sons, Wednesday, August 7. Ben Pritchard, Sydney Smith and Homer Wiegand are much elated over the prospects, as there were twenty-five charter members enrolled. The next assemblage is scheduled for early in September. Bertermann Brothers Company are to have an outing for their employees and families on August 17. John Bertermann is to be master of ceremonies at the Cumberland farm, and a nice time is assured. Now for the convention at Philadelphia: the Indianapolis delegation is very enthusiastic over it. Visitors: Herbert Heller, S. Wertheimer and E. G. Hill. I. B.

Washington, D. C. Trade News. But little can be said of the market conditions of the past week. Funeral work kept some of the stores busy a few days, and outside of this, business was sluggish. August is about the dull-est month of the year for florists, and this condition usually prevails until September when people commence returning to the city. As a general rule the best customers do not return until the humid days of September have passed and prices begin to improve. Flowers are scarce. P. H. Dorsett, who for several years was engaged in experimental work for the Department of Agriculture at its station in California, resigned May 1, and has accepted the position of manager for J. L. Loosé at Alexandria, Va. The houses over which Mr. Dorsett has supervision cover about two acres, and the stock is in good condition. Rain which had been so badly needed for over a month fell the first of last week, affording much relief to suffering crops. Florists' Club Meeting. Tuesday night, August 6, was the regular monthly meeting night of the club, and in conjunction therewith a fine display of gladioli was on exhibition. The flowers embraced every shade from the lighter colors to the dark velvety reds, and were highly praised. Arthur Cowee, John Lewis Childs, and F. H. Kramer were the exhibitors. For a warm night in August, there was an unusually large attendance. W. A. Manda has written, donating the prize money he won at the convention to membership fees in club. A letter of thanks from H. J. Webber, for honorary membership, has also been received. The entire meeting was mingled throughout with words of praise for the committee, consisting of George Shaffer, chairman, Chas. McCauley, and F. H. Kramer, who so ably managed the florists' outing at Great Falls on July 25, and the arrangement of plans for the coming chrysanthemum show in November. William F. Gude, in his usual able and fluent manner, called special attention to the praiseworthy manner in which the entertainment committee had handled the outing, and moved that a unanimous vote of thanks be given; the motion was carried. W. W. Kimmel then offered a resolution, which was equally acceptable, that the same committee assume control of a similar outing next year. An additional vote of thanks was extended to Mr. Shaffer by the club, for the decoration of the cars which carried the florists and their friends to the Falls, and which was done at the expense of that gentleman. George H. Cooke submitted a schedule of awards for the chrysanthemum show, covering 134 classes. The schedule as presented was very attractive, and met with the hearty approval of the club; but as all arrangements have not been fully perfected, the entire matter was handed back to the committee in charge, consisting of George H. Cooke, chairman, F. H. Kramer, George Fields, augmented by William F. Gude, Charles McCauley, and George Shaffer, with full authority and instructions to act, perfect the plans, get the schedules printed and distributed to the various exhibitors as soon as possible. The show dates are November 12, 13, and 14, unless subsequently notified of change. JAS. L. CARBERRY. LOCK HAVEN, PA.—E. W. Carlson has purchased a nice tract of land in Normal Glen on which he is busy erecting some new greenhouses for roses, carnations and general stock. The houses are to be of a very substantial nature. All the outer walls as well as the inner bench walls are of concrete. The greenhouses operated up to the present time by Mr. Carlson are on leased land. These will not be continued. J. M.

into a generous side pocket. The proprietor was quietly informed of the fact and approaching the shop lifter took a seat on the counter beside him and engaging him in conversation began a little sleight of hand work, regaining not only the violets appropriated from him, but three bunches more supposedly purloined elsewhere. The thief after making a small purchase departed, but what he said when he found out that the would-be biter was bitten has never been disclosed.

The increased cost in living is becoming evident in our line as all sorts of supplies, paper, twine, fertilizers, and greenhouse material are steadily advancing in price, and in some directions we are told the end is not yet reached or in sight.

The Foley Manufacturing Company has placed on the market an important labor-saving device in the form of a roof and show window brush of simple construction and working on the principle of a self-feeder, the handle being made of joints of iron pipe, which can be adjusted to any length, to the lower end of which a hose may be attached, and when the water is turned on it is delivered through the brush in a continuous supply and washing continued uninterruptedly to the length of the hose. Those who have tried it pronounce it a success.

Peter Reinberg is eligible to membership in the Florists' Automobile Club having purchased the Columbia auto in which the demonstrator conveyed the Reinberg party recently on a flying trip to Salem, Wis.

J. Hess of Hess & Swoboda, Omaha, Neb., visited Chicago last week.

Byron H. Ives of Albuquerque, New Mexico, spent a short time in this city, stopping over on his return from an Eastern visit.

Archie Spencer has been missed at Peter Reinberg's salesroom while he has been taking his annual vacation, indulging in yachting and fishing in the vicinity of Antioch, Ill.

The A. Dietrich Company has installed considerable new machinery to enable them to keep up with the requirements of their constantly increasing trade.

The two new seedling carnations on which W. N. Rudd has been at work for several years, bringing them to a condition to place with confidence upon the market, and which this coming season will be distributed jointly by Jensen & Dekema and the originator, have been christened Defiance and Sincerity for the scarlet and salmon-pink or Daybreak pink, respectively. If the flowers meet with the same success elsewhere that the limited supply did in this market last Winter the future of these varieties is assured.

Joe Straus, bookkeeper for the A. L. Randall Company, and Henry Payne of Hinsdale, left last week for an outing among the lakes of Northern Wisconsin and a box of piscatorial prizes which reached the Randolph street headquarters on Saturday morning gave visible proof of the sport they were having.

H. F. Halle is erecting a small conservatory adjoining his new store on Evanston avenue.

Messrs. Thompson and Hartman of South Haven crossed the lake last week.

COUNCIL BLUFFS, IA.—The disposition of the experimental station of the Iowa State College to recognize the importance of the southwestern part of the State in horticultural production is likely to result in the establishment of an experimental station in this city some time next year for advanced work in horticultural experiment.

The work of such a station would, it is understood by local fruit growers, be directed to a determination as to the varieties of different fruits best adapted to the conditions prevalent in this part of the State, the best methods for their propagation and care, and to experiments in the destruction of pests common to this section, such as the codling-moth.

Professor J. W. Jones of Ames, in charge of the horticultural work of the experimental station, was in Council Bluffs and vicinity recently in conference with local horticulturists regarding the matter. He visited the principal fruit farms within a radius of several miles. At the Keeline and Reno orchards Professor Jones conducted experiments in spraying, and the results of these were being watched.

Boston.**News Notes.**The Garden Committee of the
Massachusetts Horticultural Society vis-
ited the estate of Morton F. Plant at
Groton, Conn., on Friday of last week.
This estate is entered for the H. H.
Hunnewell triennial premium, and this
is the third season it has been visited
by members of the committee.The Boston party will start for the
Philadelphia convention on Monday af-
ternoon, via the Providence line. Vice-
President Peirce is trying to complete
arrangements whereby they will join the
New York party in that city.W. W. Rawson & Company expect to
show some fine seedling gladiolus at the
Philadelphia convention, of the strain
that is being grown by B. Hammond
Tracy and flowers of which were su-
perior to any others exhibited at the
Boston shows last year.Henry A. Stevens has bought a piece
of land on Washington street, Dedham,
and has begun the erection of green-
houses; he will make a specialty of
growing carnations.Stanley Fisher, eldest son of Peter
Fisher, the carnation specialist, is en-
joying his vacation in Europe, the
last heard of him being from France.Mrs. W. H. Elliott was injured in
an electric car collision in Maine on
Thursday of last week. Although still
confined to bed, we are glad to note
that the accident was not so serious as
at first supposed, and at last reports
Mrs. Elliott, who is at their Summer
home at Madbury, N. H., is recovering
nicely.U. G. Scollay of Brooklyn, N. Y.,
was a visitor this week.

J. W. DUNCAN.

St. Louis, Mo.**News Notes.**Visitors in town the past week
included S. Wertheimer, the ribbon
man from New York, working his way
to the convention city. Mrs. A. C. Can-
field of Springfield, Ill., spent a day
visiting the trade here. George M. Kel-
logg of Pleasant Hill, Mo., also spent
Monday in the city, and reports that he
will go ahead of the Missouri delegates
to the convention. Charles Ford of
Philadelphia, who travels for A. Hermann
of New York, is here this week in the
interest of his firm; he is on his way
home to meet his friends at the conven-
tion.Charles D. Hecht of Clayton, St.
Louis County, is building two large
houses for carnations and violets and
will grow for this market.Miss Schnell of the East Side left
for a trip through the East, and will
wind up at Philadelphia during conven-
tion.A. Berdan, who grew lily of the val-
ley for this market at Kirkwood, has
sold out his place to G. D. Hoog, and
will reside at Hackensack, N. J.George Augermuller, W. C. Smith,
Charles Schoenle and John Burke will
spend the next week camping out in the
Ozark Mountains.F. W. Bruening, South St. Louis,
has a fine place at Columbia, Ill., where
he is building a number of new houses
to grow cut stock for his own use. At
present he is consigning a nice lot of
Hydrangea paniculata grandiflora to
Smith & Company.J. J. Beneke, who is on the commit-
tee on sports at Philadelphia, will leave
in company with his wife for the con-
vention city, Sunday noon, with the St.
Louis delegation, ready for a hard day's
work during the bowling session.Mr. and Mrs. Henry Berning will at-
tend the S. A. F. convention at Phila-
delphia. Mrs. Berning who has not been
well for the past year expects to be
greatly benefited by this trip.As the time draws near for the open-
ing of the S. A. F. convention, W. C.
Young, the State vice-president, is
working hard for a big delegation from
here, and reports that he has promises
enough to fill the special car that the
Pennsylvania railroad has set aside. A
correct list of those going cannot as yet
be given. St. Louis will not be repre-
sented by a bowling team, but a few
will take part in the individual games.
There are few shooters among the trade,
Will Young being the only one, and he
says he will take part in that pastime.

FOR SALE

These are bargains. Speak quick. One Ideal No. 2-31 S. Steam Boiler, manufactured by the American Radiator Co., capacity 1,275 sq. ft., price f.o.b. New York One hundred and thirty-five (\$135.00) dollars. In use only one season.

One No. 334 Ideal Steam Boiler, made by same company, capacity 500 sq. ft., price Fifty (\$50.00) dollars. This boiler was in use less than two (2) years. Both are absolutely in perfect condition. Taken out owing to increase in size of system.

John A. Scollay,
24-6 Myrtle Ave., Brooklyn, N. Y.

Boston

A Correction.

My attention has been called to an error in my notes regarding the Gardeners and Florists' Club picnic in issue of August 3. Credit is there given to the private gardeners, under the leadership of James Wheeler, beating the commercial men at baseball, when as a matter of fact it was the park and public grounds gardeners, under the leadership of W. B. Fischer, with a sprink-

ling of private gardeners thrown in, who were the winners.

The Gardeners and Florists' Club will hold an outing at the Bay State Nurseries, North Abington, on August 31. This should prove a very interesting outing, when can be inspected the fine stock of trees, shrubs and herbaceous plants that are grown by W. W. Wyman.

J. W. DUNCAN.

Utica, N. Y.

News Notes.

Peter Crowe and family have returned from Thousand Island Park on the St. Lawrence where they have been stopping for some time.

Marklove Lowery has purchased the interest of his partner, Frank J. Baker, in the florist business conducted by F. J. Baker & Company on Sunset avenue. Mr. Lowery will continue the industry alone raising flowers for the wholesale market exclusively.

Roses are good for this season of the year. Carnations are practically gone; but asters of fine quality are coming in. Sweet peas are good; some lilies are to be had. It looked the fore part of the season as if there would be a surplus of carnation plants, but the cry now is, Where can I get some plants? While they are good, it looks as if there will be more planted; about everyone is planting an extra bench or two or a house more than last year. QUIZ.

WHITE MARSH, MD.—The members of Ebenezer Church, Chase, Md., will hold, under the auspices of the Ladies' Aid Society, a Harvest Home Festival and Fair in Richard Vincent, Jr. & Sons Company's warehouse at Cowenton, B. & O. R. R., September 17 to 20. The following special days have also been arranged: Tuesday, September 17, Gardeners' Club Day; Wednesday, 18, Visitors' Day; Thursday, 19,

Heating.

Growers' Problems Solved by U. G. Scollay.

We send a rough sketch of our houses. We have 3,670 feet of 2-inch pipe and 1,725 feet of 1½-inch. Please advise us the best way to distribute same for heating (hot water). Also if there will be enough pipe to maintain a temperature as marked five below zero. Please state size of main required and best means of coupling boilers together and taking supply off main for houses. B. F. COMPANY, New Jersey.

—The problem you present is like a great many others, that is, using a lot of small pipe, which I would discard in my practice. I refer to the 1½-inch size; but as you desire to use it I would suggest the following: In each house eight runs of 2-inch and three runs of 1½-inch. If you have enough 1½-inch increase it to four, for with that friction and many other contingencies it will not be a bad idea. In house No. 1 you can place eight 2-inch, four under each side bench and hang on to the solid bed with one flow and two returns 1½-inch. In house No. 2 place five lines of 2-inch under the east bench, three 2-inch on the west wall, and hang the three 1½-inch on solid bed. In house No. 3 hang four 2-inch pipes on each side, and the 1½-inch on solid bed. In house No. 4 place four 2-inch under the bench, hang four 2-inch on the west side wall, and 1½-inch on the solid bed. As you state that the smilax house is properly arranged for, I presume that you will know how to connect that house to the improved system.

Your boiler pit shows that your four boilers take up the whole width of the No. 2 house. I do not know the size of these boilers, for you do not mention it, so I cannot tell whether you have enough capacity with four, but assume you will have. You will require, to run this plant economically, a total of at least 3,500 feet of 4-inch rating boiler capacity. I would not put in less. I would advise running a 5-inch flow and return main across No. 2 house, and reduce same to 4-in. in No. 3, and 3-inch in No. 4. In the other direction going toward No. 1, not less than 3-inch. As the four boilers are located, so that you will have to connect them all up into the 5-inch main, I would suggest that you be governed by the capacity that I have mentioned in total for boiler power. If the boilers are about right for that total, connect them up with such openings as the manufacturers have provided. If the three boilers that you have marked as square on your plan are for about eight or nine hundred feet, 4-inch pipe, one 3-inch flow and return will do from them. If the sectional boiler has a capacity of, say, at least 1,500 feet, I recommend that you use two flows and returns, not any smaller than those mentioned. You will get the best results if you connect these boilers separately to the 5-inch main; I mean by this that you do not buckle two of them up together. I would recommend two new boilers of proper capacity to run this plant, but if you feel that you will persist in using the four that you mark, I think that it would be a good idea for you to have a gate valve on all flow and return connections between boiler and mains, for then if one boiler got into any trouble it could be shut off and the remaining boilers perform the work until repairs were made.

In putting valves on these connections between boiler and mains, I always advocate that the valves are to be left wide open, and the wheels chained up and locked or removed and put away under lock and key. I have known valves in this position to be closed and serious trouble resulted therefrom.

The other details in this layout you will probably be familiar with from the many other articles that I have written in The Florists' Exchange—I mean gate valves, circulations, air vents, proper connections for expansion tank, etc. U. G. SCOLLAY.

HAMMONTON, N. J.—As active almost as a person half his age, William F. Bassett, the oldest male resident of this place, celebrated his eighty-seventh birthday on August 11. Mr. Bassett came here many years ago from New England when Hammonton was a wilderness. He began business as a florist, in which he is still engaged.

WINONA, MINN.—The old Central greenhouses at the corner of Howard and Washington streets which have been vacant for more than a year past since Mrs. Siebrecht removed to the Fourth ward, are now being torn down.

KILL YOUR SCALE

If you want to Kill Scale on your plants Absolutely,
there is only one preparation.

WILSON'S PLANT OIL

Take a can of this preparation, dilute to four times its bulk with water, and wash or spray your palms, ferns, aspidistras, smilax or any plants subject to bugs or vermin and your plants will be clean. No alkali. Nothing deleterious. Dries at once.

READ WHAT OTHERS SAY OF IT:

We have thoroughly tried your Plant Oil with very striking results. We may say that this is the first insecticide we have tried on our palms that will remove the scale with the first application. We would like to say this is one of the few things that the florist cannot afford to go without especially those who are growing palms and decorative plants. After one application of the oil the plants take on an entirely new appearance. We would be pleased to have prospective buyers visit our nurseries and inspect the palms on which we have used your oil. Rutherford, N. J., June 28, 1906.

Mr. Andrew Wilson:—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants. New York Botanical Gardens, Bronx Park, New York City, September 5, 1906. Yours very truly, GEO. A. SKENE.

PRICES: ½ pint cans, 25c; pints, 40c; quart, 75c; 2 quarts, \$1.25; gallon, \$2.00; 5 gallons, \$9.00. Cash with order.

ANDREW WILSON, Dept. 7, Summit, N. J.

AND

VAUGHAN'S SEED STORE, Chicago and New York,

Buffalo, N. Y.

News Notes.

J. Benson Stafford of Palmer's whose talent for the stage has made him well known in this vicinity, has left the florist business to take up the more lucrative profession of acting. Ben, as he is known among the florists, will no doubt make good, as he has had considerable experience in the line of acting, besides being the composer of several small sketches which have been used in vaudeville with success. He has the best wishes of the craft for a successful stage career.

The old guard and a few of the new will make a trip to the convention at Philadelphia.

S. A. Anderson and family are spending a couple of weeks at Port Maitland, Ont.

Albert Reickert of W. J. Palmer &

Son has resigned his position with that firm to take an active part in his father's and brother's business. Owing to a great increase in the number of palm decorations, etc., they need the help of another experienced man.

W. A. Adams and family have been spending a part of their vacation at Dunkirk, N. Y.

John Kramer of the Washington market has just returned from a three weeks' canoeing trip to Albany. He and his party were fortunate in passing Syracuse but a few hours before the break occurred; the whirlpool caused by the break had a tendency to suck all boats into it.

Edward Walther has been spending his vacation at Crystal Beach.

Roland Cloudsley of the Wm. Scott Company is on a trip up the St. Lawrence river.

Arthur Beyers is spending his vacation on the Erie Canal in his fine launch which has plenty of speed.

W. H. G.

MOBERLY, MO.—J. H. Meyers, the florist of Roberts street, who is visiting his daughter and family, in Hobart, Okla., has bought six lots in that thriving town. Mr. Meyers selected his property well and expects to realize handsomely on his investment. He is well pleased with Hobart and its prospects and feels his lots will double in value within a year.

CHEYENNE, WYO.—A terrific hail storm swept this part of the country on July 31; among the damage done was the breaking of the glass in the Union Pacific greenhouses.

LARGEST MANUFACTURERS OF

FLOWER POTS and FLORISTS' WARE

JERSEY CITY

PHILADELPHIA

LONG ISLAND CITY

Los Angeles, Cal.

One of the nurseries of Southern California that is a credit to it is The Palm, owned by Edward H. Rust, located at South Pasadena. The lath houses cover four acres of ground and in them are grown about everything that will flourish in this State. There are six greenhouses provided with heating apparatus for artificial heat during our Winter season. To be sure, the cold is not severe, but the temperature is too low for the successful development of tender plants. Mr. Biggs, the superintendent, is growing a lot of several thousand *Pittisporum undulatum* seedlings this season under glass, and the condition of the plants shows the advantage over the old method of cultivation in the open. Ninety days from the time the seeds were sown his stock is six inches high, in 4-inch pots, with bright, clean foliage seldom seen on young plants. This is one of our most beautiful evergreen trees if given room for development. The flowers are produced in great profusion and fill the atmosphere of a city block with their delightful fragrance. As a street tree, in the cramped quarters between curb and sidewalk, they have proved unsatisfactory.

Field-grown stock at this place is grown by a novel, yet wonderfully successful method. The ground is covered to a depth of four inches with shavings from the planing mill, which does away with cultivation and hoeing, and is a saving of about twenty-five per cent. in the water bill. Any one who lives in an arid country where irrigation must be kept up without fail for six months of the year, under an almost cloudless sky during all that time, to produce luxuriant vegetation, will appreciate the value of any device to save labor and money in the application of the water.

Magnolia grandiflora trees have made this season to date, August 6, four feet of clean healthy growth—a remarkable record for this tree in this climate.

Because of the proven adaptability of *Ceratonia siliqua* to climatic conditions as they exist here, this nursery as well as all others in this part of the State, are propagating it in large numbers.

P. D. B.

CALIFORNIA NOTES.—Wm. N. Campbell, who resigned the secretaryship of the Park Nursery Company, Pasadena, seven years ago to accept a position with Vaughan's Seed Store, New York, has returned to this coast, as he says "no more to roam," and has bought an interest in J. W. Ross' seed store, 148 West Colorado street, Pasadena.

Pere Mequail, gardener to Mr. Homer Laughlin, has succeeded in raising *Lilium auratum*, and *L. rubrum* this year in the open—perfect specimens of both varieties. These are the first the writer has ever seen grown to perfection in this part of the State. The bulbs were planted last November in a bed of fertile soil on the north side of the house, among tropical foliage plants, the leaves of which afforded a dense shade and kept up an even humid atmosphere continually. Previous attempts have been made repeatedly to grow these lilies outside, failure attending every effort until this year, and under the conditions named. Other gardeners have tried them in slat houses, both in and out of pots, but all with the same result—failure. Now that one man has succeeded we may hope for better things in the future with this beautiful class of flowers P. D. B.

FULTON, ILL.—John E. Kirman has bought a third interest in the Hills Brothers cucumber business and the firm name will hereafter be known as Hills Brothers & Kirman.

With increased capital the new company formulated plans for the erection of five new greenhouses, each 20 feet wide by 150 feet long with a propagating house 20 by 60 feet. The new building will be used exclusively for growing cucumbers while the old one will be utilized for the cultivation of hot-house tomatoes. Aside from growing cucumbers and tomatoes the firm gives some attention to the cultivation of ferns.

The business was founded about two years ago by E. O. Hills and L. G. Mackenzie under the name of Hills & Mackenzie. A few months later Fred A. Hills purchased the interest of Mr. Mackenzie and since that time the industry has been very successfully conducted by Hills Brothers.

H AND C

Bought Your VENTILATING Apparatus Yet?

Then you are in luck, for now you can get such a machine as an up-to-date florist should have, an H. & Co. OIL-ITSELF GEAR. But don't put all the stress on the oil-itself part, that simply makes your work a good sight easier. But if the construction and adjustment were not what they are, the little strength you now have to put on the hand wheel would have to be many times increased. It is more than a mere ventilating apparatus—it is a powerful, built-to-last machine that stands up to any strain you will put upon it.

SEE US AT THE CONVENTION

We'll have an exhibit there and want to meet all of our friends. If you are going be sure and call on us as we want to meet every florist who owns a greenhouse & ever expects to build one and we will have some interesting things to show you. Then look over our model house too. We'll be glad to talk with you and we will try to make your visit pleasant—it may be worth money to you when you want to build again.

If you get warm while
in the convention hall
get one of our fans
and keep cool.

"If you don't go send for our catalog anyway."

JOHN C. MONINGER CO.

CHICAGO

115 E. Blackhawk Street.

REMEMBER! FLORISTS, REMEMBER.

That we manufacture Steam and Hot Water Boilers.

That we contract for and erect Heating Apparatus.

That we make a specialty of curing defective apparatus.

That our staff of Heating Engineers is reliable and competent.

That our Mechanics—pipe fitters—boiler makers, etc., are all first-class.

That it will pay you to get our suggestions and estimates.

Established Nearly 50 Years

Boston, - - Mass.

TO THE MAN WHO SMILES

HAVE you ever talked hard and long to a man, putting all your force and argument into a thing and then backing it up by your own tried out experience in the matter, and all through the

talk had that man look pleasant and seem likely any minute to say: "You are dead right—enough said, I am a convert, body, boots and baggage"? But he didn't, he only kept on smiling and went on his way wrapped up, and still smiling, in his own hidebound ignorance. Very exasperating such men, and there are lots of them. We get them every day, on the boiler question. Now isn't it the strangest thing how every smiling man of them will declare he "hasn't any money to burn" and still he goes on burning up his money every year in a boiler that is not a greenhouse boiler made for greenhouse work, but just simply a boiler?

When that man buys even so small a thing as glazing points, he wouldn't think of taking anything but *greenhouse* points. Why use so much common sense with points costing only a few cents, and

get clear off the track when hundreds of dollars are involved in a boiler? The "Burnham," as it stands today, represents a full half century of greenhouse boiler making. It is the only sectional boiler absolutely designed to meet greenhouse conditions, and that meets them with anything like the economy.

If you are one of the "smiling brand," it is time you woke up. It is a good deal better to wake up now than to be kept awake nights next winter.

That catalog is just from the printers, and is filled with a lot of mighty interesting material—things you have always wanted to know but didn't know where to find out.

Write your name and address below the catalog, cut it out, catalog and all, mail to us. That is all you need to do; we will see that you get the catalog.

GERANIUMS

We have 100,000 in 2-inch pots ready for immediate shipment at prices running from \$2.00 per 100 Standard varieties up to novelties at 50c. each. We will send one thousand in twenty good varieties, our selection, single and double, for \$18.00, or five hundred, twenty-five each of twenty good varieties, for \$9.25.

Below we give some idea of how our varieties and prices run. Our special Geranium catalogue will be sent you for the asking; it has descriptions and prices of 175 and over of different varieties.

DAGATA. Beautiful shade of rose mauve, the Premier of Bruant's 1905 novelties, large semi-double flowers; strong robust grower. 50c. each.

PAMELA. Cannell's 1905 novelty, single

TIFFIN. Single bedder, rich glowing scarlet crimson. 1906 introduction by Lewis Ullrich, Tiffin, Ohio. \$2.00 per doz.; \$10.00 per 100.

BERTHE DE PRESLEY. A beautiful

large pure white center, followed with shading of rose lake and bold outer margins of reddish scarlet. 50c. each.

EUGENE SUE (Lemoine 1905). Single; brilliant orange scarlet; white eye, splendid large trusses, stands the sun well and is an excellent bedder. 20c. each; \$1.50 per doz.

ALLIANCE. 1905 novelties, an Ivy and Zonal hybrid, has the habit of a

Zonal and the flower of an Ivy. Lilac white upper petals blotched crimson maroon. \$1.50 per doz.; \$10.00 per 100.

DOUBLE GEN. GRANT. Bright vermilion scarlet. 40c. per doz.; \$2.00 per 100.

LA PILOTE. Semi-double; brilliant scarlet. 40c. per doz.; \$2.00 per 100.

JEAN VIAUD. Semi-double, brilliant rose pink, with white throat, strong robust grower. 40c. per doz.; \$2.00 per 100.

HARDY ENGLISH IVY Extra strong, \$2.00 per 100; \$18.00 per 1000.

Visitors always welcome. Cash with Order.

R. VINCENT, JR. & SONS CO., White Marsh, Md.

Special Offer of NOVELTIES

To introduce the newer varieties and to give an opportunity to have them thoroughly tested we will for a short time send one each of 50 varieties of the 1905 and 1906 novelties, our selection, for \$5.00 cash. This collection will include those of such noted introducers as Bruant, Lemoine, Rozain-Bouchard and H. Cannell & Sons and represent one of the finest collections of geranium novelties ever offered in this country.

All stock is in A No. 1 condition and from 2-in. pots, unless otherwise stated.

FLEUVE BLANC. A pure white semi-double of the Bruant type, strong, vigorous, but dwarf grower. \$1.50 per doz.; \$10.00 per 100.

MRS. E. G. HILL. The standard light salmon single. 40c. per doz.; \$2.00 per 100.

S. A. NUTT. More used than any other dark red Geranium, the standard either as a bedder or a pot plant. 40c. per doz.; \$2.00 per 100.

PELARGONIUMS In Good Variety. \$1.50 per doz.; \$8 per 100.

SWAINSONA ALBA \$2.00 per 100.

Boddington's Bulbs Bloom!

We offer the following for immediate delivery, all stocks scarce this season.

Don't Delay LILIES

LILIAM HARRISII (True Bermuda Easter Lily) Boddington's Quality Brand Pure Harrisii.
5 to 7-inch, 400 bulbs in a case, doz. \$8c., 100 \$5.50, 1000 \$50.00.
6 to 7-inch, 335 bulbs in a case, doz. \$1.00, 100 \$7.00, 1000 \$65.00.
7 to 9-inch, 200 bulbs in a case, doz. \$1.50, 100 \$10.50, 1000 \$95.00.
We can supply cheaper grades of regular Harrisii at "meet competition" prices.

LILIAM CANDIDUM. The thick-petaled kind. We offer only the largest size, Northern-grown, 22 centimeters and up in circumference. You should plant some of these. They are excellent for cutting in May and June. \$4.50 per 100, \$40 per 1000. About 250 in a case.

LILIAM JAMESII. The new Bermuda Lily. A hybrid between L. longiflorum and L. Harrisii.
5 to 7-inch, 400 bulbs in a case, doz. \$8c., 100 \$5.50, 1000 \$50.00.
7 to 9-inch, 200 bulbs in a case, doz. \$1.50, 100 \$10.50, 1000 \$95.00.

Paper White Narcissus Grandiflora

Bulbs running 12 centimeters and up only, about 1550 to a case, 100 \$1.00, 1000 \$9.00, case \$14.75.

Calla Lilies

These bulbs have been selected with great care and are sound and free from rot and all with eyes.
1 1/2 to 1 3/4 inches in diameter, 100 \$4.75, 1000 \$45.00.
1 3/4 to 2 inches in diameter, 100 \$5.75, 1000 \$55.00.
2 to 2 1/2 inches in diameter, 100 \$10.00, 1000 \$95.00.
Monster bulbs, 100 \$12.00.

Freesias

French Grown

Bulbs, 3-8 to 1-2 in. in diameter, 100 75c., 1000 \$6.00.
Mammoth bulbs, 1-2 to 3-4 inch in diameter, 100 85c., 1000 \$7.50.
Monster bulbs, 3-4 inch and up in diameter, 100 \$1.50, 1000 \$12.00.

The Grand New Freesia, Purity (True)

A grand acquisition to the Freesia, and for the florist as a cut-flower or pot-plant, and no one should be without a few bulbs of this delightful novelty. Flowers which are snowy white, of large size, are borne in great profusion on long stems which grow upright and stiff; are excellent for cut-flower purposes. Good stock, 100 \$2.00, 1000 \$18.00. Mammoth bulbs \$5. per 100.

Dutch Bulbs to arrive soon, send for Catalogue to-day, it's free.

Seed Trade Report.

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

SEATTLE, WASH.—The Woodland Seed and Floral Company has been incorporated with a capital of \$12,000 by Alfred Peterson, Ed. Marriott, J. Anthon, and A. L. Abing.

DES MOINES, IA.—F. C. Graves of this city was arrested on Monday, August 12, by the federal authorities on a charge of using the United States mails to defraud. Graves run a mail order seed house and it is claimed he has bought large quantities of seeds from dealers all over the country and has not paid for them.—Des Moines Daily News.

NEW YORK.—James J. Comont, representing James Carter, Dunnett & Beale, seedsmen, London, England, arrived in the city last week on his annual trip to the United States. Owing to a slight accident on board the steamer (the Mesaba), Mr. Comont will not be able to get about for a little while.

George H. Dicks, son of S. B. Dicks, representing Cooper, Taber & Company, seed growers and merchants, London, Eng., arrived in New York on Sunday, August 11. This is Mr. Dick's fifth trip to the United States, he is taking the place of his father this year, who remains at home to enjoy a well earned rest.

NEW YORK.—Ralph M. Ward, importer and exporter, 12 West Broadway, returned recently from Japan where he went to inspect the bulb fields. Through the ravages of plant lice, together with cold and unfavorable Spring weather, it is believed that the supply of Japanese bulbs this season will be very short. Cable messages received this week from the Japanese exporters corroborate this statement. Mr. Ward went to Japan via San Francisco and Honolulu and returned by way of Vladivostok, Moscow, the Siberian railway and Europe, and reports having had a most enjoyable trip. He was very much impressed with the elaborate and up-to-date retail florists' stores as he saw them in Moscow, Russia.

H. Frank Darrow sailed for New York on August 15, per steamer "Deutschland" from Hamburg, after visiting the various foreign firms for which he is the American agent.

The total value of the seeds exported from the United States during the fiscal year ending June 30, 1907, was \$10,094,609, as against \$8,912,662 in 1906.

DETROIT, MICH.—Coroner Parker and Factory Inspector McLeod examined the elevator in the D. M. Ferry & Co. warehouse last week and found that the cause of the recent accident, which cost one life and several injuries to two other persons, was that the cable had become separated from the winding drum, causing the elevator to shoot down with such force as to snap the cable.

ADVANCE IN PRICES OF SEED.—Seeds are experiencing some changes in their quotations, a big boost in clovers taking place in the local market, says the Grand Rapids (Mich.) Herald. Medium and mammoth clover both jumped one dollar, landing at the \$11 mark.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

while alfalfa went up in the same proportion, reaching the same point. Alsike which has been quoted at \$9 for months jumped proportionately to \$10, making the whole list correspondingly up. Crimson clover is in the market and is selling rapidly. It is quoted at \$5.50. The general rise in market is due to speculation, and perhaps indirectly to weather conditions. October clover was valued at \$10.25 in the Toledo market August 10, and December and November stood 90 cents below the October quotation. Little seed is expected in October, so the dealers say.

JEFFERSONVILLE, IND.—The growers of orchard grass seed in this county decided not to heed the request of the growers' combine in Kentucky to hold for higher prices, but the crop is being disposed of for \$1.50 per bushel of fourteen pounds.

ERFURT SEED CROPS.—We thought last season an unusually late one, but the present bids fair to eclipse it in this respect. A cold, late and dry Spring gave everything a bad start, and low temperature, little sunshine and plenty of rain have caused vegetation, in popular phraseology, to take two steps backward to every step forward. We are now quite three weeks behind a normal season, and the result is that it is very difficult, at the present date, to make any sort of estimate as to how the various crops will turn out.

The cabbage tribe, owing to heavy stocks, was not largely planted, and looks only middling, except kales, which are flourishing. Of lettuce there is a good acreage which looks well up to date. Garden carrots are poor, but field carrots promise much better. Onions are fair, but want sun badly to bring them on. Cauliflowers are likely to turn out well, as far as we can see. Peas have suffered a little from the weather, but may yet yield satisfactorily. Beets look fairly well, and mangolds are coming on strongly. Swedes will be a bad crop. Parsley is all right, but parsnip and leek only moderate. This is of course only a rough idea from present appearances, and a week or two hence it will be possible to make a much more accurate forecast.

The flower fields are not looking so gay as they usually do at the end of July. Perennials and biennials are off bloom, and the annuals are only coming on very tardily to take their places. Annual poppies, larkspurs, phlox, Indian pinks, nasturtiums, etc., are only straggling into bloom, and the last-named are running too much to leaf. Sweet peas have made a strong growth and are flowering well. A large acreage is out and the critical time of the pod setting is now at hand. "Hope springs eternal in the seed-growers' breast." Asters are very backward and absolutely nothing can be said now as to their prospects. Of pansies a good crop is unfortunately hardly to be hoped for, as the moist and cloudy weather causes so many of the best flowers to drop off without setting. An army of employees is hard at work gathering each pod as it ripens and growers are yearning for some genial solar rays to ensure them some reward for their labors. Meanwhile orders are pouring in and stocks of most of the varieties are quite exhausted. On the stages stocks look an average crop. Carnations are just peeping out, while large-flowering petunias are now at their best. Cineraria, cyclamen, calceolaria and primulas have all been seeding fairly well.—Horticultural Trade Journal.

CHICAGO.—Reports though varying indicate that the prospect is not favorable to a good corn yield. At present

the weather is all that could be desired, but for some reason, possibly the bad start, the ears do not promise a good development.

C. P. Guelf, representing the Jerome B. Rice Company, after a tour through the seed growing sections of Michigan and Wisconsin, spent a few days in Chicago last week.

IMPORTS OF SEEDS, ETC.—August 13.—Peter Henderson & Company, 40 bags grass seed. August 14.—A. Musica, 10 packages plants, etc.; W. P. Clyde & Company, one case onion seed; F. B. Vandegrift & Company, 39 packages seed, etc. August 15.—T. C. Pollock, 200 bushels clover seed; Henry & Lee, 126 cases bulbs; R. M. Ward & Company, 105 cases bulbs, one crate bulbs. August 17 and 18.—Int. Merc. Marine Company, 100 bags seed; A. H. Post & Company, 200 bushels clover seed.

THE SEED CROPS IN FRANCE.—According to a report in the Bulletin des Cultivateurs de Graines, the trade in the last season was satisfactory, and the warehouses having been nearly cleared of old seeds, especially of cabbage seed, higher prices are hoped for. A good harvest is anticipated, more especially in the South, where the climatical conditions have been favorable. In the North and central departments more rain fell than was good for seeds, but improvement followed at the end of the rainy period. The sowings for 1908 have, in general, been satisfactory, and the weather favorable to growth. The harvest for the present year, so far as an opinion may now be formed for the various crops, will be as follows: Seed of mangold wurzel will fetch medium prices. The crops in the neighborhood of Paris are as yet in good condition. Beets in the central districts of France have developed vigorously; but in the South growth is slow and aphides have already made their appearance. Seeds of table carrots and cattle-feeding carrots should fetch good prices. With the exception of certain crops in Central France, where the rainfall worked mischief, the condition of the seed crops leaves nothing to be desired. Cabbages promise well. The crops of Hearting cabbage seed in the vicinity of Paris and in Central France are somewhat deficient; but in the South, on the contrary, the harvest will be excellent. The crop of Brussels sprouts is safe, and that of cauliflower in Italy will be excellent. Kohlrabi is everywhere good. Cucumber and gherkin seed came up badly in the North and centre owing to wet, cool weather at the period of seed-sowing. In the South the plants suffered much less. Beans germinated badly, and the quantity sown in the South was inconsiderable. Cabbage lettuce and Summer and Winter endive are expected to yield normal crops. Onions promise a good crop, but the promise may be spoilt at the last moment. Of the chief variety, "Vertus," several cultures in Central France are diseased, while about Paris and in the South the condition of the plants is extraordinarily fine. Leeks are excellent, but land occupied by this crop is limited in extent; the demand will about be covered, and medium prices obtained. Parsley showed well for seed, and a good harvest is expected. Peas will be plentiful, and as the demand is constantly increasing, dealers are expecting to get good prices. The harvest commenced early in July. Salsify and scorzonera promise good crops in France and Holland, but the amount of land under these crops is not great.—Gardener's Chronicle, Eng.

My HARRISII LILY blooms have a splendid reputation in the Philadelphia Market. Have a few cases of bulbs left of my Choicest Broad. Price 5 to 7, \$5.00 per 100; 7 to 9, \$10.00 per 100.

AZORE FREESIAS Pure White, largest bulbs, 80c. per 100; \$7.00 per 1000.

WHITE CALLA BULBS Sound and full size. 4 in. \$4.50 per 100; 5 in. \$6.00; 6 in. \$7.50; 8 in. \$10.00.

PAPER WHITE NARCISSUS True Grandiflora, 13 ctm. \$8.50 per 1000; 14 " 11.00 per 1000.

WHITE ROMANS 11 to 12 ctm. 20.00 per 1000; 12 to 15 " 22.50 per 1000.

PINK ROMANS 23.00 per 1000.

BLUE ROMANS 21.00 per 1000.

LET ME QUOTE YOU ON OTHER BULBS.

Stokes Seed Store
219 Market Street, PHILADELPHIA.

NOTES FROM HOLLAND.—Now that both the tulip and hyacinth crops have been harvested and warehoused, it may be said that on an average the results are more satisfactory than were at first expected. The hyacinth crop in general is very fine with the exception of only a few varieties. Considering the much smaller acreage planted out this season, this must be considered rather fortunate, as under these circumstances it is likely that the supply will be able to meet the demand, which would not have been the case if the crop had been a poor one. Nevertheless, as the season is at least ten days backward it is quite evident that shipments will also be later than usual and the present fine dry weather is certainly a great boon to the growers to secure perfect curing of the bulbs just out of the grounds.

As was at first expected, the crocus crop is a poor one and the quantities on hand will not be sufficient to meet the demand; but narcissus promise a good crop all round, although the quantities to dispose of are considerably less than last season and no surplus is likely to remain on the hands of any of the growers.

Gladiolus Colvillei are generally looking weak and poorly, and good stock free from disease is likely to be scarce and therefore higher in price.—Horticultural Trade Journal.

PETER HENDERSON & COMPANY

35 & 37 Cortlandt St., NEW YORK

Des Moines, Ia.

News Notes.

A severe thunder storm visited the city on the evening of the 15th, accompanied by hail, breaking about 2,000 square feet of glass for the Iowa Seed Company. A few lights were broken in the local plant, owned by Vaughan's Seed Store; otherwise no damage was done.

The Iowa Seed Company are faring badly with storms this year. About a month ago lightning struck the large brick smoke stack and damaged it considerably. It was immediately repaired by the insurance company.

At Vaughan's greenhouses the roses are all planted and are doing finely. Mr. McAniff, the manager, is now preparing for carnations.

Marshall's greenhouses are busy housing carnations. His stock is fine, much better than the ordinary, but that's to be expected, as Marshall is a specialist in that line.

Wm. Trillow, who for four years was superintendent of the Iowa Seed Company's greenhouses, but who recently leased the Lambert greenhouses on Woodland avenue, has had a busy time repairing and painting. His chrysanthemums and roses are growing fine and he is now busy housing carnations and potting Boston ferns.

Joseph Milton, who leased the Brantman greenhouses, reports things progressing favorably.

The Alpha Floral Company are to move into their new quarters September 1. They have secured the choicest corner store and also the most costly in Des Moines. The rent is reported to be about \$4,000 a year.

Asters and gladiolus are about the only local flowers to be procured now and are of excellent quality.

This will be a busy week for the craft preparing for the State Fair, which opens Monday. There are some valuable premiums to be offered, which will create considerable rivalry.

W. T.

To the Editors of "THE FLORISTS' EXCHANGE."

2 to 8 Duane Street, New York, N. Y.
Gentlemen.—Under the heading "Cuttings" we see in the "Horticultural Advertiser" of July 24th, taken from the "Florists' Review" the following mistake or falsehood:

"A number of the nurseries at Oudenbosch, Holland, have pooled their interests in the "American Trade, combining to conduct the rapidly increasing American Trade together under the title of the Union Nurseries. H. W. Van der Bom, of the Alma Nursery, is "Director."

Very truly yours,
P. J. LOOYMANS & ZONEN,
Oudenbosch, Holland.

DENIAL!!

THE undersigned, all members of the Oudenbosch Association of Nurserymen, wish to state herewith they are not aware of the existence of any Pool or Combine of Nurserymen at Oudenbosch, as stated (we hope by mistake) in some American and English Horticultural Papers.

The party mentioned as being the Director of the new pool, erroneously spoken of as "of the Alma Nursery," has nothing whatever to do with the concern mentioned nor with any of the firms whose names follow:

P. J. LOOYMANS & ZONEN,
The Holland Royal Nurseries.
JOHN G. VAN DER BOM, American Nurseries.
B. W. DIRKEN.
H. W. VAN DER BOM & CO., Alma Nurseries.
M. GIELEN.
IGNACE VAN DER BOM,
Hoeven near Oudenbosch.

Seasonable Notes.

Lonicera Heckrothi belongs to the section in which are included the English woodbine and the Belgian honeysuckle. The flowers are borne in the end of the shoots of the same season's growth; they are pink in the bud, becoming yellowish white when open, and they possess the sweet odor for which the other two mentioned are famed.

Common altheas show great variation in their time of flowering. Some kinds bloom in July, others not until September. Nurserymen have a way of planting one each of all kinds in their show grounds, thus affording the opportunity of selecting sorts for succession of bloom throughout the season.

The heads of *Catalpa Bungei* as well as those of other standard or weeping trees, are sometimes partly broken in storms. In such cases when Winter comes prune the whole head back as far as where the breaks are, then a new, uniform growth follows, re-establishing a good head.

Wax myrtle is well named—wax for the substance which covers its berries, and myrtle for its leaves, which both in appearance and fragrance remind one of those of the true myrtle of Southern Europe, *Myrtus communis*. *Myrica cerifera* is the name of the wax myrtle; it is a valuable evergreen in many respects.

The desire to have something better than before leads nurserymen to procure the newer kinds of fruits for their customers, who continually ask for these new things. One who sells strawberry plants in great numbers says the Gandy is still one of the best, old as it is; and in the way of grapes the same can be said of Moore's Early.

It seems strange that the paulownia is not reliably hardy in England, when it is entirely so here where our cold is of a zero nature every Winter. But it shows what thorough ripening of the wood will do, for this is what our hot Summers bring about; and it is a hint to plant everything of questionable hardiness in situations where ripening of the growth will have every chance.

Besides being the last shrub of the season to flower, its blossoms not expanding until October, the *Hamamelis virginica*, or witch hazel, is interesting because of its habit of throwing its seeds such a distance when its pods burst open, often as far as 25 feet from the shrub.

A boundary line of the red twigged dogwood, *Cornus alba*, is an interesting object in the Winter season. The red of the twigs is more intense in Winter than at any other time, and the line of color, often when snow is on the ground, attracts much attention.

Value of the Sweet Pepper Bush.

All who are acquainted with shrubs know how bare of flowers most collections of them are in the months of August and September. It is but a few of the later flowering sorts that bloom then; and were it not for the wealth of flowers displayed by annuals, perennials and bedding plants the paucity of shrub blooms would be more noticed than it is. A shrub often overlooked is the sweet pepper bush, *Clethra alnifolia*, which makes its display from the close of July until early September. It is sometimes met with, but rarely seen at its best, because it is not planted in wet ground—a position it prefers to all others. When on dry ground the flower spikes are but half the size they attain when it is well suited; besides this, the leaves are not nearly as healthy an appearance. It is a native shrub, found on the borders of lakes and pools; and its presence is made known often before the plant is seen by the fragrance of its flowers. These flowers are white and are borne in spikes resembling in shape those of the spiræas, which bear their blossoms in upright spikes.

Cold Storage of Nursery Stock.

Year by year the nurserymen of the colder States are becoming owners of a cold storage house in which to keep in dormant condition the stock they desire for distant shipping. The convenience and profit of such a structure is so pronounced that those who have these buildings wonder how they ever got along without them. It is not alone that it enables the holding back of stock for late shipments, but it also admits of the making of early consignments to States the seasons of which are in advance of those of the shippers.

This is the season to prepare such houses, that the stock may be dug and housed in advance of the setting in of Winter. The construction of such houses has to be of a nature to keep out both cold and heat, for the nearer the temperature is to 34 degrees the better for

Trellis, 100 Feet Long, of Dorothy Perkins Rose in Second Year, at Establishment of Joseph Heacock Company, Wyncote, Pa.

the stock. In fact, if well bedded in sand a few degrees of frost does not hurt the stock through the Winter; and the covering of the roots well with moist sand is a point not to be overlooked.

Every nurseryman knows the worry consequent on not being able to ship stock promptly in Spring. Often while customers are clamoring for stock the ground is frozen too hard to admit of the digging of it. With stock in storage the Southern customer can get what he wants at any time desired before his season starts and the Northern one can procure his as late as he chooses.

Aside from the opportunity afforded of shipping at any time desired, think of the relief afforded the digging squad in Spring through having the stock already dug!

When packing the stock away in the storage house in Autumn, it should be tied in bundles of a certain number when practicable, to facilitate the work of Spring shipping; everything to ease the work in Spring.

JOSEPH MEEHAN.

English Horticultural Notes.

THE SWEET PEA SEASON is now (July 24) at its meridian; and despite a season of sunless days, chilly winds and showery weather, the sweet peas have grown and blossomed excellently. The National Sweet Pea Society held its seventh annual exhibition in the Royal Horticultural Hall on July 16, and was once more a great success. There were 3,217 bunches, being 1,250 in advance of the previous show; and 797 entries in 87 classes. No less than 151 novelties were before the floral committee, but only seven were considered worthy of the distinction of an award of merit, no first-class certificates or silver medal being granted. The society repeated its mistake of last year in having accorded certificates before the committee had seen the varieties at the trial ground, Reading, Berkshire. This is deplorable. The society expressly goes to the trouble and expense of having scores of varieties grown side by side at the University College Garden, Reading, under the direction of the assistant director of horticulture, Charles Foster, in order to prove their merits. At the least, a deputy, or say, Mr. Foster himself ought to advise the committee about the condition of the novelties, if the full floral committee is unable to go and see them prior to the exhibition day, when the awards are made. The groups of peas grown in the trials number 310. The varieties are contributed by sweet pea specialists, as being their strain of the variety, or their novelty or selection as the case may be; and all received exactly the same treatment. A catalogue for the use and guidance of the members when visiting the trials, was prepared, and was arranged with columns for the number of row, name of sender, name of variety and color. A page was left vacant opposite the list, for any remarks. Many of the varieties were badly fixed, no less than 80 out of the 300 odd sorts being quite mixed. Of these about 60 were named varieties. It can be well imagined what disappointment follows the purchasing of these unfixed sweet peas. The society does an excellent work in testing the novelties and so advising or cautioning growers about them. The committee has also prepared a list of synonymous and too-much-alike sorts, which is not before time, as the saying is. The list will probably, most likely indeed,

be published in the "Year Book" for 1908.

I believe that the sweet pea is unquestionably the favorite flower with the great English public at the present time. Every year sees the love of it spreading wider and deeper. Even to the north of Scotland and to many parts of Ireland, the humblest artisans are taking up its cultivation with the greatest enthusiasm. Go where one may, one meets working men as well as leisured wealthy amateurs, who grow sweet peas; and what is more, they know their names and all their qualities. It therefore follows that this must reflect to the benefit of the seedsmen and the specialists. People are educated up to that standard that they must have only the best. Woe be to that salesman who supplies a badly fixed or an untrue stock! He may do so quite innocently believing his strain to be equal to the best, but the test comes when the grower, whose peas are from his seeds, comes to try conclusions against rivals in the exhibition hall. Poor or untrue types of a named variety may mean the loss of a valuable trophy or prize.

Some of the American sweet pea growers have been over here, keeping themselves posted in that which pertains to the flower. You, and they will be glad to know that the only sweet pea obtaining a first-class certificate this year, was Messrs. Morse & Company's (San Francisco) Helen Pierce. It is a lovely pea and so very different from anything else—a white ground, veined and flushed with rich deep blue. It is a "marbled" flower—descriptive of the way it is colored. The stock is quite fixed, and the plants are vigorous. The society's silver medal might deservedly have been awarded to it.

Of the other varieties, Mrs. Collier is the best yellow; Nora Unwin, the best wavy white, (but does not beat Dorothy Eckford on color); the best stock of John Ingman may be taken to be Breadmore's "George Herbert." By that I mean that George Herbert is just the best form of John Ingman, and whether one calls George Herbert by that name or by the other, it is the better of the two peas. Breadmore's Helen Lewis is grand; Eckford's Helen Pierce is unbeaten; Dobbie's Princess Victoria (new) is meritorious in every way, quite fixed, and of a charming pink color with white base, and is wavy. It was named by our Queen Alexandra. Sutton & Sons of Reading, by the way, have a novelty called "Our Queen," of a beautiful cream and soft pink color. It is fixed, but may not be offered for another year. Dobbie's "Menie Christie" (rose-pink) deserves attention. Bakers' (Wolverhampton) stock of Charles Breadmore is the finest, as also their Mrs. Chas. Foster, Watkins & Simpson's (Covent Garden, London), Frank Dolby stands first.

These are just a few facts about existing kinds, already known.

Among the few of this year's new things are: Evelyn Hemus, cream and rose; Saint George, rich fiery orange; Princess Victoria, pink and white; Elsie Herbert, white, red, picotee-edge; Rosie Adams, large, rose-purple; The Marquis, rose-lavender; Silas Cole, deep blackish-purple; Nancy Perkins, a glorified Henry Eckford; Nora Unwin, white; Prince Olaf, white flaked soft blue; and Lord Nelson, medium blue. These, with Helen Pierce, have each received awards.

J. HARRISON DICK.

ROSES

Plants benched early in the season should now be making a good strong growth. If not overwatered it will be found that the roots are getting very near the surface of the soil; scratching therefore must be discontinued, and to remove the green scum, which is bound to appear, especially after a few dark days, merely rub the surface of the benches over with the palm of the hand. A light coating of air-slaked lime will prove very beneficial. Put it on when the soil is fairly dry, rub it in well and soak the beds thoroughly; otherwise a hard crust will form, which prevents a free circulation of air in the soil, thus tending to sour it. As the plants advance they will soon have to receive a little extra nourishment in the form of a light mulch of well rotted cow manure. This should now be procured, if not already on hand, and prepared by turning it over several times in order to pulverize it as it should be put on very thin; in fact, if in suitable shape it can be put through a coarse screen and will then be in fine condition. The idea of affording this early mulch is, principally, to cover the roots near the surface of the soil. If old manure cannot be obtained get fresh, and mix it with soil left over from the compost heap, using about half of each; turn it over frequently. This will soon make fairly good material for the purpose.

As the nights begin to grow cooler do not close the ventilators unless the temperature drops below 56 degrees; leave them open and harden the plants, so that they will be in better shape for the dark days which usually follow later on.

Syringe only on clear days from now on and then only in the forenoon, so that the foliage and the air in the houses may get dry. A little lime blown around with a bellows, just before night will prove very beneficial. Before syringing make sure that the benches are not too dry, otherwise the plants will scald very badly, especially on a hot day. Give the plants a light dusting of sulphur once a week on clear days as a preventive against mildew where it is apt to attack the plants; though, if handled properly, they should show no trace of this pest as yet.

As soon as the buds are to be shipped to market, the use of tobacco stems for fumigating must be discontinued, and growers must resort to some other method to keep green fly in check; but whether tobacco extract, powder, or papers be used, remember that light doses, now frequently applied, are better than heavier ones given further apart, for the young aphids are easily killed while the old timers with wings, seem to enjoy one's efforts to exterminate them. PENN.

PETER REINBERG
No. 51 Wabash Avenue CHICAGO

(17) **Pink Pond Lilies.**—Are there any pink pond lilies grown, or are they artificially colored, and with what? Mass.

—There is no artificial coloring used for pond lilies that we know of. The pink varieties can be obtained as easily as the white ones. Henry A. Dreer, Inc., of Philadelphia, can no doubt supply these upon request.

(18) **Compost.**—I would like to know something about a compost I made. I took half sod and half fresh cow manure and mixed them together about the 15th of May; have chopped it over three times. Can I mix in the soil used last year in the greenhouse, and in about what proportion, for carnations? New York.

BEGINNER.
—If there is not enough of the compost we certainly would not add to it any soil that had been used in the greenhouse last year, but rather would get some fresh soil from a pasture, or plowed field if the pasture is not available, and mix that in equal proportions with the compost heap already formed. Afterward, if some fertilizer is needed in the soil, it can be supplied either by a mulch of manure or an occasional feeding with liquid manure.

(19) **Paint for Greenhouse Pipe.**—Kindly inform me what paint is best to use on greenhouse pipes, and the color. P. B.

New York.
—The best paint for use on greenhouse pipes we know of is one made with lamp black and linseed oil, mixed to the proper consistency and painted on the pipes in the same way as ordinary paint is put on. This gives off no smell and keeps the pipes looking clean at all times.

(20) **Clearing Land of Plum and Oak Sprouts.**—I have a lot of plum and oak sprouts to clear out of the ground. Is there any quick way to do it? Grubbing them is slow and laborious; can it be done by cutting off the tops and applying some kind of acid or alkali to kill the juices of the roots? Florida. A. J. B.

—The only way to rid the land of the plum and oak sprouts is to dig them out thoroughly. This might be slow and laborious, but is the only practical way to make a good job of clearing the land.

(21) **Blight on Egg Plant and Tomatoes.**—What is considered the best preventive of blight on egg plants and tomatoes? Is there any cure after they have been attacked? A. J. B. Florida.

—We know of nothing that can be used as a preventive against blight on egg plants and tomatoes. This disease seems to be more climatic than anything else, and comes suddenly, attacking plants however strong and vigorous they may be.

(22) **Insects on Sunflower.**—The insect which you send in the small box is one of the tortoise beetles. It has been named the five-dotted tortoise beetle (*Physonota unipunctata*). Many years ago, while a student at Cornell University, I found this species breeding on wild sunflower (*Helianthus*). It is not a rare species but decidedly local. I do not know of its occurrence on any other plant than *Helianthus*. I presume that this lot of specimens was sent in by a correspondent and I would like to know if it was found attacking wild or cultivated sunflower.

I will always be glad to answer your inquiries in regard to insects injurious to ornamental plants, but would like to suggest that in future the exact locality be furnished, as we desire such data for our permanent record showing the distribution of insects.

PEONIES St. Louis Gold Medal Peonies PEONIES

We offer for Fall sales more than 30,000 salable named plants of our own growing. We have over six acres of PEONIES, densely planted.

We have been growing PEONIES since 1869, years before some growers were born, and claim to know something about them.

WE always give satisfaction with the size of our plants, and the correctness of names when they come into bloom speaks for us. We do not claim to have 1,000 or 1,200 varieties, as this number is non-existent, one variety frequently doing duty under 20 different names. This occurs even among the new, high-priced kinds.

All our plants have young roots, and not shelly-barked, thin ones. Please send for our price list of same.

We also offer THE NEW DOUBLE DWARF WHITE BABY RAMBLER, CATHERINE ZEIMET. This rose is a beauty, field-grown, own root plants, for Fall delivery. ANNY MULLER, The New Pink Dwarf Baby Rambler, field-grown, own root plants, for Fall delivery. ANCHUSA ITALICA, Dropmore variety, very strong, blooming plants. The finest, pure blue plant extant. Please send for price lists.

GEO. J. HUGHES, Berlin, N. J.

Johnstown, Pa.

W. Schrader has a new place at Mount Hope and is considered one of the best growers in the city. His greenhouses, boiler room and outbuildings are quite attractive, situated as they are on an eminence a couple of miles out of the city. Until four years ago Mr. Schrader was associated with W. Schmidt in business. When the partnership dissolved each one decided to do business separately. Mr. Schmidt has a fine range of new greenhouses in exactly the opposite end of the city from Mr. Schrader, and a more picturesque spot could hardly be found anywhere. The greenhouses overlook the entire Johnstown valley, and are reached by an incline railroad the declivity of which is awe-inspiring to one accustomed to seeing things upon the level. Both Mr. Schrader and Mr. Schmidt enjoy good business and each one has a city store.

T. Malbrant is reputed to be the best hustler in the trade at Johnstown. He is up-to-date in all matters and produces most of his own stock at his greenhouses at Barron avenue. His store is at all times attractive.

Miss Akers conducts a cut flower store in the city as she says to assist her grower to dispose of his stock. They at present operate about 5,000 feet of glass and Miss Akers is very anxious to sell her greenhouses and retire temporarily from business. The greenhouses will be sold without the property to anyone desirous of moving them elsewhere; or if the intending purchaser prefers, the land on which the greenhouses are situated can be purchased also.

Herman Niesner is one of the pioneer florists of Johnstown. His greenhouses are situated on Poplar street in the business part of the city. Mr. Niesner is an ardent plant lover; in his conservatory are found many choice plants not always seen in a commercial place. These he grows for his own pleasure. His conservatory would do credit to the grounds of any of the very well-to-do; it is arranged on lines similar to those of the private order. Orchids, tree ferns, banks of rex begonias and walks of ferns make his display house very attractive. During the memorable flood the water stood 16 feet high over the top of this conservatory. J. M.

NATIONAL PLANT CO., Dayton, O.

What are you seeking, brothers mine? Is it to learn where plants are fine? Look at my Araucarias fair— We searched the world to bring them here. Excelsa glauca, look at these, They make you think of those strange trees That grew in Eden long ago, With perfect form and lustrous glow. Of Nephrolepis I've a lot, Boston Whitman and Scott; Elegatissima and Barrows! 'tis as well, I of this beauty need not tell; Fronds green like grass when Spring is here, As bridal veils o'er faces dear. Plants in general we grow Of perfect shape; before all they bow. Our palms with healthy, glossy leaves— Come see them all, I am the chief. Warmly I hope that while you are here, Each hour may yield a pleasure dear.

1907 is the twelfth anniversary of our very successful career in the importation, growing and shipping of that well-known and much admired evergreen decorative plant, the Araucaria Excelsa, Compacta, Robusta and the Glauca. Now is your chance and the time to fill your empty houses and make money fast, as the plants will grow into money while you sleep.

ARAUCARIA Excelsa, 5 in. pots, 10-12 in. high, 3 tiers, 2 years old, 60c. each; larger sizes, 5-6 1/2 and 6 in. pots, 2-3-4 years old, 60c.-75c.-\$1.00 to \$1.25 each.

ARAUCARIA Compacta Robusta, 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each.

ARAUCARIA Glauca, 2-4-6 tiers, 2-3-4 years old, 10-12-15-18 to 20 in. high, 6 in. pots, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each. Specimen plants, Compacta Robusta, of last year, Spring, 1906 importation, 5 years old, 20 in. high, 7 in. pots. (something fine), 6 tiers (perfect), \$2.50 to \$3.00 each.

Please state if plants are to be shipped with or without the pots. Cash with order please.

THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

Gardening at Girard College Grounds, Philadelphia

The bedding in the grounds connected with this institution is very nearly all seen at a glance on entering the lodge, which is seen to the right of the picture marked Number 1.

The prevailing colors are reds in the various shades, and yellows, with some white and grey. The nearest to a pink shade we have here is in the Dryden zonal pelargonium, which has little or no blue in its color composition. We have avoided using the magenta pink as seen in the profuse blooming zonal Mme. Thibaut, as this shade of color when associated with bright reds or scarlets, jars on most people's nerves, as not being harmonious. "Concordant discords" may be allowable in music, but it is unwise to use clashing colors in floral arrangements.

The center of the long beds on each side of the walk leading to the main building, one bed of which is shown in picture Number 2, is planted with the popular double red flowering zonal pelargonium S. A. Nutt, which makes a very brilliant showing at this writing; the one line of white as noticeable is the variety La Favorite. A double edging to these beds is planted with the dark garnet colored, Iresine or Achyrantes Lindenii, and the grey artemisia—I found here under the name of Stelleriana—but which has been pronounced incorrect. These two, by the way, are used to represent the Girard College colors—namely, "steel and garnet," and are employed as a double edging around all the zonal pelargonium beds.

The border surrounding both the long beds is composed of Coleus Verschaffeltii and Golden Gem in diagonal alternations.

The oval bed seen in photograph Number 2 is planted principally with Croton Queen Victoria, which is one of the most satisfactory varieties we have here for bedding purposes. The center plant is one of the date palms—Phoenix canariensis. It is not as large a plant

1. Gardening at Girard College, Philadelphia—General View of Bedding.

as I would like to have occupying that position, but it is the largest date palm we have here. Immediately around the date palm is canna King Humbert, and next to that is the yellow flowering canna, Buttercup; and then we have Croton Queen Victoria as before stated, which is edged with Croton Faciatum, and the white lines so conspicuously seen in the picture are formed by Abutilon Savitzii, a most useful plant where definite effects are aimed at. The edging is Coleus Pfitzerii and the spaces between the last two named are planted with Iresine Lindenii, all of which produce a striking contrast. Coleus Pfitzerii—I believe this is its correct name—possesses a sturdy grace which lends itself admirably to this class of work.

The oval bed marked Number 3 is similar to the Number 2 in all respects, excepting that an effort was made in the planting to define lines from the points toward the center, by using Croton Faciatum, the prevailing color of which is yellow. The effect is much more apparent in the planting than is shown in the picture.

The smaller croton bed, as shown in Number 4, is planted with Dayspring which renders a good account of itself here generally; this is edged with C. Wisemanii. In the planting of croton beds, an effort is made to use two varieties only, the main body of the bed being of one variety and the variety used for edging, both in form, as well as in coloring. All croton plants in the smaller beds are this year's propagation. The cuttings were put in the second week in January. The plants used for edging are put in the sand from three to four weeks later than the first batch. In addition to the varieties named we have beds of Baronne de Rothschild, which does well here as to growth and coloring, but it is inclined to grow somewhat irregular, some plants growing much taller than others, and it is rather too long jointed. We have one here called ovalifolium; its style of growth is erect and its coloring is mainly yellow, but Faciatum is decidedly the best in this class of coloring; it is more sensitive at lifting time, consequently losing more of its leaves than do any of the other varieties.

We plant the second week in June, when the soil has become somewhat warm, but this year owing to the backward Spring, the ground was not so warm as I had hoped it would be, consequently, some of the leaves dropped, but not enough to seriously interfere with their effectiveness for outdoor bedding.

We aim to plant sufficiently close, without crowding, to give immediate effect, as crotons do not spread much; what growth is made has an upward tendency.

Beds of zonal pelargoniums we have here besides those named are John Doyle, double scarlet, Dennison's Seedling, a single scarlet, and a rich colored single crimson with large flowers. This was received here without a name.

Two beds of Julia Marlow have not bloomed at all satisfactorily since we had a dashing rain storm a short time ago. It was very fine early in the season, but at present it is a great disappointment.

EDWIN LONSDALE.

2. Long Beds Composed of Geraniums S. A. Nutt and La Favorite, edged with Iresene Lindenii and the grey Artemisia, bordered with Coleus Verschaffeltii and C. Golden Gem alternating.

Oval Bed of Crotons Queen Victoria and Faciatum with centerpiece of Phoenix canariensis, surrounded by Cannas King Humbert and Buttercup; the white lines seen are formed by Abutilon Savitzii; edging Coleus Pfitzerii, intervening plants Iresene Lindenii.

Gardening at Girard College, Philadelphia.

A HOME-MADE PIPE COVERING can be made from asbestos paper and links of wood, it is stated, as follows: First wrap the pipe with asbestos paper and then lay strips of wood lengthwise along the pipe, using five to ten of these, according to the size of the pipe, and binding them with wire or cord. Finally, wrap roofing paper around the strips. The spaces between the strips form a dead air space, which, of course, is a nonconductor of heat. At flanges room enough may be left to give access to the bolts and the space afterward filled up with hair felt. Tarred paper may be used for the outside wrapping where the paper is exposed to the weather.—Metal Worker.

Bulb Growing in America.

I notice the United States Government is establishing a number of experimental farms for the purpose of testing various districts as to whether the climate and soil are suitable for commercial bulb growing on a large scale in competition with the Dutch grown hyacinths, tulips, narcissus, etc. I presume from the reports I have received that these farms are selected quite indiscriminately as to their absolute suitability for the purpose for which they are intended, and I gather no expert bulb grower's opinion has been taken as to whether soil, climate, drainage, sub-soil, etc., are suitable for the proper growth of commercial bulbs. In my opinion and according to the various experiments in different parts of England and other European countries which have come under my notice, trials conducted under such conditions are more or less a waste of money and certainly the longest way round to gain the desired end; and it will be more a matter of chance and good luck if a suitable farm and district are found than the result of practical knowledge of what is required to make the cultivation a success.

A practical man who has been a grower for any length of time, and is intimately acquainted with climatic conditions prevailing in Holland, Guernsey the English fens, Ireland, and other bulb districts, would be able to fairly accurately judge whether any particular district was suitable without the expense and length of time required by a two or three-year experiment. I think I am fairly correct in stating, at least as far as hyacinths and tulips are concerned, that bulbs cannot be grown to the highest state of perfection except under such conditions as prevail in the bulb districts of Holland and in a lesser degree in Ireland and some small districts of England. This has been abundantly proved by the many attempts to grow them in all parts of the British Isles, the results being practically always the same—hyacinths and tulips generally a failure, and narcissus resulting in a totally different type of growth and quality from that produced in the more suitable districts.

There are probably very many districts in the United States that will grow daffodils and narcissus, but I should imagine the quality and type of bulb will be only such or similar to such, as are grown in many districts of England and the Channel Islands; that is, a bulb much smaller and much more solid than a first class Dutch grown bulb. The blooms also are much smaller and produced in greater abundance and possibly of not quite such a rich color. The nature of the bulb is also much more ready to split up and reproduce itself in offsets. These small-sized, very solid bulbs, in my experience, are the product of rather heavier soil, or, at least, soil deficient in moisture, humus, potash, etc. A dry air, with clear hot suns and a minimum of moisture during the principal growing period, that time between flowering and going to rest or ripening off, tend to form a bulb of very solid and firm texture. It is when a bulb has reached its maximum degree of solidity that it produces offsets, and this is probably the reason Dutch grown daffodils and narcissus reach a larger size, yet do not produce so many blooms, although of a larger and finer quality than those produced in other drier districts, the damper climate and more congenial means of the bulb obtaining a supply of water tending "to blow them out," as a Guernsey writer puts it. Therefore, although the bulb grown in Holland has reached a large size, it still has to gain solidity before nature demands it should produce offsets; and it is only the act of producing such offsets that causes a bulb to produce more than one bloom; therefore the larger Dutch grown bulb, being still all in one circle as it were, produces still only blooms from the center of the bulb, and having a larger substance of bulb to support it and the whole strength and food material stored in the bulb being transmitted to the one center growth, naturally that growth and resulting blooms are stronger and of better quality than those from a bulb which is smaller and yet produces more flowers and leaves, numerically speaking.

3. Similar to Number 2; an effort is made to define lines from the points toward the center by using Croton Faciatum, the prevailing color of which is yellow.

Gardening at Girard College, Philadelphia.

As to the bulbs from one district forcing earlier under the same treatment than those from another district do, this is only a question of how soon they can be induced to go to rest. Before a bulb will force or, in other words, proportionately respond in growth to excessive heat, it must have a certain length of time to rest, according to its nature. This no doubt accounts for Guernsey and French grown bulbs forcing earlier than the Dutch, the drier and warmer climate of those districts maturing and ripening the growth much earlier than those from Holland. And it is not altogether, as might be supposed, simply a question of a warmer atmosphere which causes a bulb to ripen, but here again moisture and rarity and dryness of the air and soil enter largely into the question, as I have known instances of bulbs grown in England at very high levels and under dry atmospherical conditions to force every bit as early as those grown further south, or even in the Channel Islands. On the other hand, in some of the damp, humid districts of the West of England and Ireland bulbs are even later in their ripening than in Holland, and proportionately later in forcing; and it is probably well known that these districts although damper than others are very warm and much warmer than any other part of England or Holland.

As to soil and drainage, narcissus are not so particular, but tulips and hyacinths will not grow in just any soil. To obtain the best results the soil should be of a sandy or, at least, a distinct porous nature. The districts in which bulbs are grown in Holland are for the most part a sort of coarse sand, heavily enriched through successive generations with manure, watered from below and at all times of the year water can be obtained a few feet below the surface. By this it will be seen that, although so near to the level of water, the bulbs are not actually in it or even on it, but the roots in penetrating downward can easily reach a plentiful supply of moisture while the soil round the bulb is comparatively dry and by rapid percolation is always

sweet and pure with a total absence of any humus actually coming in contact with the bulb. It is therefore obvious that it is necessary, in choosing a situation for a bulb farm, it should be very close to the level of water or "sock," as it is termed in England, taking care the surface soil is sufficiently light and porous. Such conditions as these prevail in Holland and in a greater or less degree in Ireland in the districts in which bulbs are successfully grown there. The Lincolnshire and Cambridgeshire (Eng.) bulb farms are mostly situated on what are known as light silt soils which are generally located in low lying districts over which many years ago the sea in some instances washed. These districts are, as a rule, very rich in plant food of every description and particularly phosphates, probably the result of centuries of marine deposits.

Bulbs of most sorts are, to a certain extent, more or less of an aquatic nature and during the time they are in active growth they prefer a soil for the roots to work in that is full of moisture, while they dislike moisture to be continuously above and around the actual bulb. To a certain extent an explanation of this remark can be gathered while growing hyacinths in water. The water in the glasses, to grow the bulbs successfully, should not quite reach them, and yet during the whole time of growth the roots are freely working actually in water; while if too much water is contained in the glasses so that it reaches above or even around the bulb, rot will soon set in, and the resulting growth will be more or less a failure.

Of course, in these notes a description is given of only such conditions as will be suitable for growing every class of what are known as Dutch bulbs, to the fullest perfection, but there is no doubt that for ordinary purposes of cut bloom; more especially daffodils and some sections of tulips most districts have plots of ground that would grow them more or less successfully. But whatever the soil or wherever the district, manure in some shape or form will need to be applied, as under successful growth the bulb is one of the grossest feeding subjects it is possible to grow.

P. W.

AUGUSTA, GA.—The Georgia State Horticultural Society elected officers as follows: President, P. J. Berckmans, Augusta; secretary, J. B. Wright, Cairo; treasurer, L. A. Berckmans; M. B. Jones, J. S. Stranahan, R. E. Park, Z. T. Walker and Dr. Neil McInnes, vice-presidents. Cornelia, Ga., was chosen as the next meeting place, the second week in August of next year. P. J. Berckmans and Professor Hugh N. Sterns were appointed delegates to the National Fruit Growers' convention.

Pyrus Japonica as a Hedge Plant.

For ornamental and defensive purposes the *Pyrus japonica* makes a good hedge. It is often seen in gardens where a hedge or a line of shrubs of some sort is desired. The flowers are what give it its attraction in Spring, and its thorns form its defensive properties. There are many colors of the pyrus. The old scarlet has companions now in pink, red, white, and other shades; and in hedge planting the colors can be alternated or massed, used as fancy may dictate.

4. Bed of Croton Dayspring edged with C. Wisemanii.
Gardening at Girard College, Philadelphia.

JENSEN & DEKEMA

No 674 West Foster Ave. - - - CHICAGO

FIELD GROWN CARNATIONS

We have a few thousand plants of the following varieties, ready for immediate delivery.
Clean, healthy plants, medium large.

ENCHANTRESS	- - -	\$6.00 per 100, \$50.00 per 1,000
PINK LAWSON	- - -	5.00 " 45.00 "
BOSTON MARKET	- - -	5.00 " 40.00 "

We are now booking orders for our two novelties to be sent out next season.

"DEFIANCE"

The ideal scarlet, it possesses all the good qualities of a first-class commercial variety and is destined to be the standard in the scarlet class.

"SINCERITY"

Has also all the ear marks of a good commercial variety; it is a color that we have not got in our standard varieties, a beautiful shade of salmon pink, a splendid grower and very productive.

Let us book your order for the above varieties, Jan. 1st, delivery, 1908 **\$12.00 per 100**
\$100.00 per 1000

"ARISTOCRAT"

SELLS ON ITS MERITS

Here are a few good points to consider in buying carnations:

Color, Form, Stem, Substance and Productiveness. "Aristocrat" has them all and more.

"Aristocrat" is a beautiful cerise, with an ideal, perfect form: a stem that is good at all times of the year, coming long and wiry right from the start. The keeping qualities are of the best; absolutely the best shipper and keeper of any. Productiveness is one of the most important points. "Aristocrat" is the best producer of any carnation to-day as it comes early and continues in heavy crop the entire season; the quickest grower of them all.

A nice lot of field-grown plants in a good, healthy condition; never has had any disease. Ready for immediate shipment. \$12.00 per 100: \$100.00 per 1000.

Send for our list of other varieties before they are all sold.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIETH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

The Star Blooming "Bouquet Bulb Plant."

Editor Florists' Exchange:

On reading the advertisement of the Liverpool, (England) Cypress Geranium Company in The Florists' Exchange some weeks ago, I cut it out and sent it to a friend in England for information. I have received from him the enclosed picture of the plant which happened to be in flower in his greenhouse at the time. He wrote approvingly of it and very kindly sent me the photograph.

Now, how is it that our enterprising dealers and our enterprising Florists' Exchange have nothing to tell us (so far as I know) about this "best seller" of the times? I enclose the picture and the accompanying description ("color of flowers bright scarlet") in hope that it may be of interest to you.

Conn.

J. THORNILEY.

[The illustration (herewith shown) is of the plant *Hemantthus*. These are bulbous plants, most of which which are indigenous to the Cape of Good Hope, though a few are found in warmer parts of Africa. The flowers of most of the cultivated species have a singular appearance, being composed of a large quantity of filaments forming large, globular heads supported on comparatively short, stout, fleshy stems, which rise from the bulbs in the way usual with other Amaryllidaceous plants. The flowers, varying in color from pure white to red and crimson, are very showy, the heads being in the case of some of the species as large as double peonies; they are produced at various periods of the year according to the time the bulbs are started. Among the varieties are *H. albidus*, flowers white; *H. carinatus*, pink; *H. coccineus*, red; *H. pumilio*, pink; and *H. sanguineus*, crimson. All the above are from the Cape of Good Hope. There are also *H. insignis*, crimson, from Natal; *H. magnificus*, scarlet, Africa; and *H. multiflorus*, scarlet, Sierra Leone. The three last-named require stove heat, but in other respects the treatment given for the cooler kinds will answer for them.—Ed. F. E.]

Hemantthus Var.

A Remedy for Cut Worms.

Editor Florists' Exchange:

Thoroughly mix one peck wheat bran with one tablespoonful Paris Green, then add a quart strong New Orleans molasses. Rub all the ingredients together thoroughly until the mass becomes of the same consistency throughout and crumbles easily. Scatter lightly among the plants where the cut worms are feeding and you will have no further trouble there. This remedy also destroys soails, sow bugs, etc; it never fails and is the simplest remedy we have ever tried for this class of insects. We pity the man who stays up nights to pick these insects by hand.

BAUR FLORAL CO.

Canadian Horticultural Association.

The following is the official program of the tenth annual convention of the Canadian Horticultural Association, to be held at London, Ont., August 28 and 29, 1907, in the Board of Trade Building, Richmond street.

FIRST DAY.

WEDNESDAY, AUGUST 28, 1907. OPENING SESSION, 2 P. M.

"Up-to-date Retail Management,"

Mr. Brown, Manager The Rosery, Toronto

"What is the Best Way to Get at the Cost of Production of Greenhouse Stock?"

Wm. Gammage, London.

"What Are the Advantages of Connected Houses Over Single Houses?" Geo. Robinson, Outremont, Que.;

F. R. Pierson, Tarrytown, N. Y.

Unfinished Business. Election of Officers.

Final Committee Reports.

TRADE EXHIBIT.

Trade exhibits must be staged in City Hall before 11 a. m., August 28, when judging will begin. The local committee will give exhibits from a distance every attention. Address communications to Wm. Gammage, 207 Dundas street, London, Ont. Certificates of merit, diplomas and honorable mentions will be given to worthy exhibits.

RAILWAY RATES.

Arrangements have been made with the Eastern Canadian Passenger Association (all Canadian railways east of Port Arthur) whereby delegates to the C. H. A. convention purchasing a first-class single fare ticket to London will be returned for one-third single fare, if fifty or more in attendance hold standard certificates which must be procured from the agent issuing ticket at starting point. These certificates must be handed to the C. H. A. secretary at the convention hall for his signature and a special agent of the Eastern Canadian Passenger Association will attach a validation pasteur charging 25 cents therefor.

Officers for 1907 are: President, W. J. Lawrence, Eglinton; first vice-president, J. Walsh, Montreal; second vice-president, E. Dale, Brampton; secretary, A. H. Ewing, Woodstock; treasurer, H. Simmers, Toronto.

Executive Committee: One year, A. Pinoteau, Taylor, E. Annandale; two years, J. Suckling, J. Eddy, J. Campbell; three years, F. Dicks, A. G. Stephens, W. Kehoe.

The August 10, 1907, number of Möller's Deutsche Gärtner Zeitung contains a most interesting illustrated account of the celebrated French plantsman, Victor Lemoine and his horticultural achievements.

American Association of Park Superintendents

John F. Cowell, Buffalo, N. Y.,
Elected President for 1908.

St Paul and Minneapolis Next Year's Meeting
Places.

The ninth annual convention of the American Association of Park Superintendents was held in Toronto, Ont., on August 15, 16 and 17, and was without doubt the best attended and most successful in the history of the organization. Byron Worthen of Manchester, N. H., the president of the association, was unable to be present, but his place was ably filled by Vice-President John Chambers of Toronto, who acted as chairman during the sessions.

The three days of convention were divided between business sessions and drives and tours of inspection through the various parks of the city. Thursday afternoon was devoted to a carriage drive under the guidance of Park Superintendent Chambers and other city officials, the following places being visited: Queen's Park, University grounds, Alexandra Park, Exhibition Park and High Park, where lunch was served.

Thursday evening a business session was held, and a very able paper read by Theodore Wirth of Minneapolis on "Band Concerts in Parks." A lengthy discussion followed on this and other pertinent subjects.

Friday morning was entirely taken up with business. The secretary read his annual report showing a satisfactory condition of affairs financially and otherwise. The following new members were elected: James W. Boone, Fredk. Wessler, and Chas. L. Seybold, Baltimore; D. Henry Sullivan, and R. W. Curtis, Boston; Wm. Donaldson, Buffalo; H. W. Busch, Detroit; C. A. Bosan, Minneapolis; J. C. Morley, Los Angeles; Edw. R. Mack, Wilmington, Del.; and D. F. Roy, Malden, Mass.

Walter Hubbard of Meriden, Conn., was elected an honorary member.

Selection of Next Meeting Place.

St. Paul and Minneapolis were selected as the places of next year's convention, the dates to be arranged by the executive committee.

Election of Officers.

The following officers were elected for the ensuing year: President, John F. Cowell, Buffalo, N. Y.; vice-presidents, John Chambers, Toronto, Can.; G. X. Amrhyn, New Haven, Conn.; J. W. Rodgers, Cincinnati, O.; John Dunbar, Rochester, N. Y.; J. W. Thompson,

John F. Cowell,
President-Elect American Association of
Park Superintendents.

Seattle, Wash.; Jackson Dawson, Boston; secretary-treasurer, F. L. Mulford, Harrisburg, Pa.

Friday afternoon was devoted to a visit to Island Park, a beautiful recreation ground on the lake, and here in a tent erected for the purpose the city officials again entertained their guests at luncheon.

Friday evening a business session was again held and an able paper on "Some Suggestions for Making Our Parks more Popular," was read by Dr. Baker of the Zoological Park, Washington, D. C.

John Dunbar of Rochester also read a very instructive paper on "Some Trees and Shrubs for Park Planting, New or Little Known." This paper called forth a lively and lengthy discussion, so that it was a late hour when the meeting adjourned.

Saturday morning an automobile ride around the city was taken, the following parks being visited: Riverdale Zoological, Rosedale Ravine, Reservoir Park and the Upper Canada College. A short business session was held on the return to the city when resolutions of thanks to the city officials of Toronto were adopted.

The President-Elect.

JOHN F. COWELL, the newly-elected president of the organization, was born on a farm in Eastern Massachusetts 55 years ago and has been actively connected with horticultural pursuits all his life, as he began the study of civil engineering and landscape gardening after leaving school. He was a teacher of botany for about ten years, and is very familiar with all our native flora. Eleven years ago he was appointed superintendent of South Park and Director of the Botanic Garden of Buffalo. He has been a member of the association almost since its inception, is very popular with the members, and under his guiding hand many improvements for the benefits of the organization are looked for.

The Secretary-Treasurer.

F. L. MULFORD of Harrisburg, Pa., has been re-elected secretary-treasurer for the first time, but as that official he is doing wonderful work which bids fair to his being incumbent of the office for some time to come.

Those Present.

Among those attending the meeting were: E. A. Kanst, Chicago; E. P. Adams, Omaha; J. B. Shea, and J. W. Duncan, Boston; A. G. Chambers, and Chas. Chambers, Toronto; Edward R. Mack, Wilmington, Del.; John Dunbar, Rochester, N. Y.; W. M. Shepardson, Naugatuck, Conn.; G. X. Amrhyn, New Haven, Conn.; J. S. Pearce, London, Ont.; H. W. Busch, Detroit, Mich.; Chas. A. Whittet and wife, Lowell, Mass.; Dr. Frank Baker, Washington, D. C.; Theodore Wirth, Minneapolis, Minn.; Fred. Nussbaumer, St. Paul, Minn.; C. E. Keith, Bridgeport, Conn.; A. Pinoteau and J. Henderson, Montreal, Can.; Henry Frost and wife, Haverhill, Mass.; John Chambers, Toronto, Can.; W. L. Cukerski, Grand Rapids, Mich.; John F. Cowell and daughters, Buffalo, N. Y.; E. H. Perry, Niagara Falls, N. Y.; Isaac Kelley, Lawrence, Mass.; J. W. Rodgers, Cincinnati, O.; Wm. H. Donaldson, Buffalo, N. Y.; Arthur Hay, Springfield, Ill.; H. W. Busch, Detroit, Mich.; J. C. Morley, Los Angeles, Cal.; and F. L. Mulford, Harrisburg, Penna.

American Association of Park Superintendents at Toronto Meeting, August 15-17, 1907.

H. B. BEATTY - - - - Treasurer

THE OPENING SESSION

Tuesday, August 20, 1907

Under the most favorable auspices—delightful weather, probably a little too warm for some, a large and enthusiastic attendance, perhaps one of the largest in the history of the organization—the twenty-third annual convention of the S. A. F. O. H. opened at Philadelphia, Pa., at 2:40 p. m. on Tuesday, August 20, 1907. The sessions were held in the Broad street theater, opposite Horticultural Hall, which the local club had decorated very artistically. The platform front was banked with palms, ferns, gladiolus, lilies, etc.; large palms were placed in fitting positions on the platform, the stage scene—a flower garden, in which a fountain was playing, surrounded by a pool of water, standing out in relief against shrubbery and trees—forming a most appropriate background.

Seated on the platform, in addition to the officers of the society, were the following former presidents; Messrs. Craig, Hill, Smith, Dean, Lonsdale, O'Mara, Gude, Breitmeyer, Vaughan and Kasting; also Messrs. Hallock, Wirth, Farquhar and Traendly of the executive committee; Vice-President Westcott and Colonel Castle.

Immediately above the president's desk was an electric-lighted sign bearing the inscription "Welcome S. A. F." with the year "1907" in the center of the representation of the society's badge—the rose leaf.

The meeting was opened by Vice-President Westcott, who, in the course of his remarks, stated that the society again met in Philadelphia after a lapse of twenty-one years. Just twenty-one years ago to-day the association was the guest of that noble gentleman, George W. Childs at Wootton. On that occasion Mr. Childs had made the remark that he was proud of the delegation; that he never had seen a more orderly, more intelligent or nicer body of men than the florists, and what Mr. Childs said he no doubt meant. Mr. West-

cott then went on to tell that many familiar faces were in the audience, and many more were absent, some of whom had crossed the bourn. He was proud, he said, to have the privilege of welcoming the society to Philadelphia. He had been called a "sport," but he believed that all boys and girls after they had finished their work should have enjoyment. He spoke of the good that the society was doing on behalf of mankind; it was assisting in the obtaining of better fruits, flowers and vegetables, and its chief aim was to make the world happy.

Mr. Westcott then introduced Samuel S. Pennock, president of the Philadelphia Florists' Club, who read a letter from the secretary of Governor Stuart at Harrisburg, Pa., expressing regret that a prior official engagement of the Governor prevented his attendance at the convention.

Mr. Westcott next introduced the Hon. John E. Reymann, Mayor of Philadelphia, who welcomed the delegates to the city. The statement of Mr. Westcott about a "sport" had, he said, suggested the thought that the society represented the cultivation, the bringing out and the development of the beautiful—plants, trees, shrubs and vines. The members were engaged in a laudable work, bringing into the homes of the people these beautiful things. As chief magistrate of the city and as a citizen of Philadelphia, he bade the visitors welcome. Philadelphia was sometimes called a plain city; that was true. The streets were somewhat narrow, and some of them a little plain, but there were many things about Philadelphia of which its citizens were proud. He was sure that all would enjoy their visit. Philadelphia was the first in the art in which they were engaged with its Bartram and others who, 100 years ago, had left their impress on it and in whose footsteps the present generation was following, just as future generations would follow in the footsteps of those now engaged in that work, which was simply the development of an ideal. The Mayor then went on to speak of the beauties of Fairmount Park, a public ground second to none in the country. (Applause).

Mr. Westcott also had a good word to say in favor of Philadelphia's beautiful breathing spot, and informed the visitors that they would enjoy its scenery on the Friday of the convention.

Colonel W. W. Castle of Boston, on behalf of the society, presented His Honor with a fine bunch of American Beauty roses, after which Mr. Castle eloquently responded to the address of welcome, telling of the hospitality accorded by Philadelphia to the soldier boys from the West on their way to the battle fields in the neighborhood; also of that same hospitality having been shown to those who returned battle-scarred, faint and weary from the scenes of conflict. He stated that every little city had its idiosyncrasies; Boston had been styled the "Hub," but if Boston was the "Hub," Philadelphia was the axle. (Applause). The speaker then went on to tell of the large extent of the territory from which the delegates present had been drawn—from the rock-ribbed coast of New England; from the Savannahs of the South, from across the Great Divide, and from there clear down to the golden sands of the Occident. The Society of American Florists was not a society of one or two localities, but of the whole nation. He was glad to have been called upon to respond to

His Honor's eloquent and hearty welcome, and on behalf of the organization he tendered its thanks.

Vice-President Westcott then introduced the president of the society, William J. Stewart, who read his address as under. Mr. Stewart, on rising, received a grand ovation and was again heartily applauded at the termination of his remarks.

President's Address.

Fellow Members and Guests:—The occasion which we inaugurate so auspiciously today is a notable event in the life of the organization whose passing years these annual conventions mark. Contemplating the horticultural advancement in this country since the founding of the Society of American Florists we can feel justly proud that in all the high achievements which adorn and signalize this period as one of unprecedented progress in the science and practice of horticulture this society has had an honorable participation. From the start its roll-book has borne the signatures of the leading spirits in the craft to whose uplifting it has been pledged, and in whatever community it has presented itself it has invariably been accorded a welcome and high place in the public esteem.

Standing here in this fair city where horticulture has ever been honored and beloved, where from the day of its birth this society has been steadfastly championed—a community, the home of not a few illustrious exponents of our art in the days gone by, a community which can boast horticulturists, florists, plant growers, seed establishments and nurseries second to none in the world today, a people wide-awake and enterprising, yet warm-hearted and companionable—here, in this City of Brotherly Love, as we voice our gratitude to the pioneers and extend our hand to the coming generation, we may well stop and take a survey of our field, note conditions as we find them, lay plans and invoke continued success for our society and all that it represents.

The Mission of the Horticulturist.

To clothe the earth with loveliness, to cooperate with Nature in her most beautiful functions, to instill into the affections of the people an appreciation of our art and a zeal for his products and to serve them and gratify this desire is the mission of the horticulturist. The materials in which he deals were once classed among the luxuries of life, but the world is fast coming to recognize them as necessities of healthful and rational living and, as this sentiment grows, so also will grow the importance and influence of the horticulturist in the public eye.

The Mission of the Society.

To aid the horticulturist through the influence and power of concentration, by the gathering together, moulding and assimilating of the concrete wisdom of the many, and to bring the profession to a lively sense of their duties and privileges and a better realization of what is possible through the medium of a well-supported central organization

is the task of this society. Its aim and its purpose have ever been to stimulate emulation, to broaden the channels of business, to promote the fraternal spirit, to help the gardener and florist in making for himself an honored position in the commonwealth and to inspire the profession with a more correct understanding and better appreciation of the nobility of their calling which, as Downing tells us, "is intrinsically the parent and superior of them all," because agriculture is the basis of all wealth and horticulture is the refined essence of agriculture.

The Field and Its Cultivation.

Agreeably to custom it becomes my duty to ask your attention at this time to such suggestions and advice as seem to me sound and wise and conducive to the growth and continued efficiency of this society. First let us take a look at the situation. We find a vast country possessing the widest range of climate, topography and soil, affording homes for ever-multiplying millions of people ambitious, enterprising and prosperous and now reaching that stage where the finer sentiments begin to develop and the desire for beautiful home environment commences to kindle.

To the extent that the gardener and florist grasp the situation and act upon the opportunity thus presented depends much of the future welfare of our horticultural industries and of gardening art. One thing is indisputable; if the horticulturist is to do his part in directing and developing the garden-hunger of the people he must first make good use of every means to fit himself to do this intelligently. These are times of unprecedented rush and enterprise. Timorousness and parsimony have little part in the policies that lead to success now-a-days, and he who would excel must follow modern methods, taking full advantage of the horticultural literature of the day and of personal intimacy with his fellows in the societies and clubs; he must travel, visit exhibitions,—in short, he must use every avenue of publicity and every opportunity to sharpen his wits and enlarge his knowledge. The day when a paying business can be done with untidy grounds, neglected store windows, decrepit greenhouses, badly grown plants, misrepresented trees and shrubs, and haphazard financial methods has gone forever.

Garden-Hunger and the Horticulturists' Opportunity.

Modern suburban transportation facilities have given a tremendous impetus to the rural home idea. It is to the man skilled in horticulture that the home-maker will turn for advice, assistance and material needed and for those who grasp the opportunity in the right spirit there will be found abundant scope and full recompense for cultural knowledge and artistic talent. Nothing comparable to the present demand for hardy garden material has ever been experienced in this country, and no horticultural enterprise intelligently and diligently conducted can fail of success if existing conditions are understood and provided for. Tender material, also will get its full share of the prosperity if used with better discretion as to its adaptations and limitations. For the ambitious, earnest young man, blessed with an artistic temperament, no department of horticulture offers brighter emolument or higher honor than that of outdoor gardening in all its branches. Within the scope of our vision today the field seems practically unlimited and the young generation may safely go into training for large responsibilities—every one will be needed. Under pressure of exigencies prevailing in the past the gardener has in too many instances been acquiring a one-sided experience and some of our most talented indoor growers find themselves badly handicapped through deficient education in the fundamental operations of general gardening. The horticulturist who makes his mark in the future will not have these limitations, but will combine a thorough equipment for outdoor planting, grading, management and executive ability, with a fine knowledge of indoor operations and proficiency in the production of flowers and fruits under glass that will stand the test of comparison with the products of the specialist. Several of the agricultural colleges are doing good work on this order and turning out trained young men from whom we may expect much.

Room for Improvement.

Too many greenhouses are devoted to crops for which neither the houses nor their owners are competent. We see acres of nursery space filled with antiquated stock; well-grown flowers sacrificed through careless handling or through inefficiency in the sales department; the once-prosperous flower-shipping business prostrated by short-sighted methods; the trade subjected to criticism because of the

trumpeting of undeserving novelties. Our exhibitions are crude in method, faulty in manner of making awards or interesting the public. In every branch of activity there is room for better system. The arrangement of flowers, the planting of garden beds or the larger operations of beautifying an estate or creating a landscape picture, in many of which as we see them from day to day the qualities of originality and artistic intelligence in form and color harmony are conspicuously lacking show conclusively the need for study and self-education in artistic taste before we are properly fitted to instruct the public. It is the province of the florists' club to seek out and apply the remedy for all these deficiencies and it becomes the duty of the craftsman in justice to himself and his fellows to uphold in every possible way his local organization and do his share toward the general advancement which is sure to follow the fraternizing of congenial spirits whose material interests are identical.

Support the Societies.

No better evidence of progressiveness in a given locality or in any special branch of our industries can be adduced than full representation on the society roll books and at the regular meetings, yet how pitifully small in the aggregate is the proportion of the horticultural craft represented in the membership of all our local or national bodies. The power of organization when all stand behind it, for whatever is just and right, the tremendous advantage in being able to command unity of sentiment and action when any evil menaces, is a lesson that is being learned with exasperating slowness.

Forest Protection.

While on the subject of societies it may not be amiss to call attention to the efforts that are making for the protection of what is left of our forests—a heritage of greater intrinsic value to the health and prosperity of our country than all the gold mines on the continent. Devastation by soil erosion, floods and droughts, bird extermination, insect plagues, and many other evils are following in the wake of the wanton forest destruction which has been going on. Few interests are more seriously affected by all this than is horticulture and every movement, local, state or national, for forest preservation, should have our zealous support individually and collectively.

Educating the Public; the School Garden Movement.

Chief among the instrumentalities for the upbuilding of our industries is the education of the public to a fuller appreciation of our products. The majority of American homes fall short of the home ideal in their lack of any setting of living green. Consider the possibilities—the millions of house plants, the hundreds of thousands of porch and window boxes for both Summer and Winter, the innumerable little table ferneries, the tons of lawn and flower seeds, the cargoes of Spring and Summer bulbs, the garden implements, the vast quantities of evergreens and shrubbery and border and bedding plants for which a demand can be created, not to mention the conservatories and conservatory plants, or the small fruits and products of the kitchen garden which every home lover likes to indulge in, once the appetite of the people for such things has been thoroughly aroused. Large as the demand already is, numerous and prosperous as we know the craft to be, yet who can say that our country is not well able to furnish business sufficient for many times the present number of our commercial establishments and employment for good gardeners in far greater numbers than they can be supplied today? With these facts in view I know of nothing which promises so rich a return as the school garden movement. In addition to its services in the cause of good citizenship it must be obvious to all that activity on this line is also good business policy and assures the interest of the coming generation in parks and gardens, tree-lined highways, horticultural exhibitions and plants and flowers everywhere.

Education by Example.

Again, every florist's home should be a shining object lesson. Show neighbors and passers-by the possibilities with Spring bulbs, with easily-grown plants in bed and border, in piazza box and window, excite their dormant perceptions with rose and clematis on a honeysuckle-bowered porch and pillar; impress them with the dignifying effect of ornamental trees and shrubbery, the cheery picture of evergreens in Winter time. See that they are wisely instructed in the selection, planting and care of material and that they realize that the time is probably not far distant when bare yards and flowerless windows will pass as an evidence of ignorance and squalor within. The public are in the mood to welcome

such activity on the part of the florist, the newspapers are at all times disposed to assist, and the more the florist does in this direction the higher position he will occupy in the esteem of his townsmen.

How the Society Can Help.

Having thus hastily scanned our field in a few of its many phases the question comes as to what part this society should assume conformably to its avowed aims and through what channels best results can be reached. It is the business of an organization such as this to help men to help themselves and then to conserve and safeguard the results of their work, so that those who come after them shall have as their heritage the sum total of the efforts of their predecessors.

Our Relations With Other Organizations.

It has been my conviction for a long time that there is nothing more to be desired to place this organization in a position of greatest usefulness than some system of direct affiliation with existing or prospective special and local organizations. Far from regarding these societies as a possible menace I look upon their multiplication as distinctly to our advantage. The field is practically limitless and we can well afford to nourish any and all well-meant efforts to build up horticulture in any of its branches. There is an infinity of specialized detail and local work which the smaller and more compact bodies can care for with an efficiency far beyond the reach of a society constituted as this is. Let them do it if they will and wherever and whenever the time comes that they find their burden heavy and the road rough let us put our big shoulder to the wheel and help them. On the other hand, there are movements where a successful consummation is only possible under the capacious mantle of a large national organization. Events of the past year have indicated to us how at any moment we may be called upon to champion the cause of some branch of the trade where strength of numbers and national incorporation become elements of great strength and where the existence of a powerful representative body serves as a restraint and defence against corporate plunder. I believe we should keep working on this problem of closer relations until some feasible plan of permanent affiliation and intelligent cooperation has been evolved and a system of specialized work established through these auxiliary bodies.

Plant Registration.

A well-regulated system of plant nomenclature is needed. It would be an element of great stability if all registration of varietal names could be recorded in one universally recognized bureau. Whether this should be done direct by the owner or first pass the scrutiny of a specialized society, where such exists, is of little consequence provided it finally comes into the custody of a central authority having the power to follow up infringement and extend the fullest protection within the law to the originator or owner. This central authority, I believe, should be the Society of American Florists and Ornamental Horticulturists.

Two Important Duties of the Society.

The time seems now ripe for us to insist that horticulture be made a regular course in our public school system. There can be no question of the wisdom of this society taking an advanced position on this matter and fostering liberally all movements for the dissemination of garden knowledge through this means. Every argument on physical, mental and moral grounds is on our side.

As a society we should lend aid and encouragement to any investigation or experimentation for the purpose of stimulating the production of any horticultural material for which we have hitherto been obliged to depend upon foreign sources of supply. "Made in America" is an inscription too seldom seen on horticultural goods. How can this organization best assist to that end? In the case of those goods which we must import, there is room for a better system and improved facilities in the appraisers' department, and I hope our legislative committee will give this question the attention it should have.

Parcels Post Needed.

The project of a parcels post is a reform worthy of our hearty support. A cheaper and more reliable means of distribution for packages of limited size and weight, such as is employed in most European countries, would greatly benefit the plant and bulb trade and provide the means for supplying the public

at small cost with plants of a size that might be seen without the aid of a microscope and might be nurtured into lusty specimens without the use of an incubator. Were it not for the express companies a parcels post would have been a reality long ago—so we are told. The express companies and the S. A. F. have been making one another's acquaintance of late and find they don't think alike on some things.

State Vice-President; Out-Door Exhibitions.

I am satisfied that the present system of selecting State vice-presidents to represent this society sectionally might be improved upon and would suggest that you consider the adoption of some system whereby, in those localities where any organization exists, we might through mutual arrangement confer upon the presiding officer the honor of representing the S. A. F. in his territory during his term of office.

It is much to be regretted that the Executive Board found conditions so unpropitious for an outdoor exhibition of planted material in connection with this convention that the project had to be abandoned. It was hoped by many that the humble beginning made in Dayton might be followed up and that in time an outdoor exhibit might be made a regular feature of our conventions, but in a large city the difficulties seem almost insurmountable. Wherever circumstances permit I believe it will be good policy to provide at least for a planting of such novelties as cannot be properly presented in an indoor exhibition.

National Flower Show.

As the National Flower Show project will be reported on at the proper time by the very competent committee of fifty under the chairmanship of my predecessor I will not take up your time now with any reference to it other than to submit that it would be a grave mistake to make any change from the time-honored date for holding our annual convention. If it is thought wise to have a meeting at Chicago at the time of the exhibition let it be a special meeting called as provided for in the by-laws. The proposition to merely meet formally in August so as to comply with the constitutional requirements and then adjourn over until the time set for the flower show would, I firmly believe, very seriously affect the prosperity of the society.

The Society's Good Record.

The birth of the Society of American Florists was the outcome of a conviction on the part of its promoters that the horticultural interests of America were ready to get together for mutual advantage and the uplifting of their art. The young society found the commercial florist, as a rule, isolated and provincial because of the lack of opportunity for any but the most limited intercourse and interchange of opinion and experience. Not one society, club or periodical devoted primarily to the interests of floriculture existed on this continent. The best test of the wisdom of the founding of any institution is what it has been able to accomplish. Do you not think that the seed sown 23 years ago has borne pretty good fruit? The yield might have been increased many fold had every one in the profession who needed just this help taken advantage of it; still it is not too much to say that the S. A. F. has been the underlying force which has in this brief period placed American floriculture on an eminence where it commands the respect of the world and that the splendid confidence of its founders in the future magnitude of their profession has been well justified. The spirit of progress which prompted them to break the shackles of past isolation and secretiveness and throw wide open the doors for a general intellectual and material advancement is still our best asset. We must allow free scope to the mighty reserve forces of American horticulture and be constantly on the alert to see and act upon every opening for strengthening our hold upon the heart-strings of the profession.

The Winning Combination.

Unselfish, hard-working loyalty to the organization and its principles, on the part of every member, is the winning combination in all club and society affairs and this I would especially plead for at this time, as we near the close of my official labors. My dearest ambition during these many years has been to contribute with all my heart toward making this society the great leader in every work tending to the ennobling and enriching of our profession. I know, by intimate contact with those associated with me in the society's service, how faithfully they have done their duty and how unselfishly the members generally responded when called upon for any assistance. These are the qualities that make for success in any organization and I earnestly hope they will be continued and strengthened in the years to come.

What Conventions Are Good For.

The society is to be congratulated on the magnificent attendance at this meeting. Conventions are always an incentive and encouragement. They give zest to work, feed the intellect, enrich our literature. They are a unifying force, establishing and cementing friendships and bringing into advantageous contact those who, although widely separated, are actuated by a common purpose in life. I pity the man who sees nothing to interest him here and finds no inspiration in such gatherings, no strength to help him surmount the daily recurring difficulties which are our common lot, no advantage in the opportunity to inspect this great industrial exhibition. Little he realizes how great is his loss.

Business First, Pleasure Afterward.

And now let us proceed to business. We have diversions innumerable, entertainment after entertainment awaiting our pleasure; the bowlers and their henchmen are eager to pounce upon that tempting aggregation of honor and silverware, but with all their vociferation they are among the best promoters in the society's service; the ladies, indispensable always, have organized a little side auxiliary of their own; a magnificent exhibition across the way justly claims much of our attention. But with all these allurements let us not forget that the eye of the world is upon us and that important business awaits our attention first.

The report of the secretary was then read by Mr. Hauswirth.

Secretary's Report.

As your secretary I submit this my first annual report for your consideration:

TRANSFER OF OFFICE.—By instructions of the Executive Committee I proceeded to Boston the first week in January to have the property of the Society transferred to me by my predecessor. It was to be expected that a vast amount of material had accumulated in the number of years that the position of secretary was held by our president, William J. Stewart and the committee instructed me to destroy all documents that were of no value to the Society.

TRANSPORTATION.—Considerable difficulty was encountered this year to procure reduced rates from the various passenger associations on account of the enactment of a two-cent rate in a number of States. This was especially true in the territory governed by the Western and Central Passenger Associations and they refused to grant us the usual concession. The rate of a fare and a third was granted by the following Associations:—Trunk Line Association, New England Passenger Association, South Eastern Passenger Association, Eastern Canadian Association.

The Central Passenger Association granted us card orders that empowered their agents to sell through round trip tickets to Philadelphia at the rate of two cents a mile each way in the territory controlled by them and the rate of one and one-third fare in the territory controlled by the associations that granted us the latter rate. This concession enabled a member to procure a round trip ticket that would only have to be validated at the ticket office when he was ready to return, within the time limit of his ticket.

The Western Passenger Association would not grant any concession but referred us to the one-way tourist rates in effect in their territory to St. Louis and Chicago and advised our members to buy tickets to those points and then use card orders. In addition to the above, the cheap rates from all points to the Jamestown Exposition and the merchants' rate to New York with very liberal stopover were in effect.

BADGE BOOK.—The Executive Committee at Philadelphia instructed me to continue the badge book, provided same could be supplied to the members at an expense not to exceed seventy-five dollars. I could not procure same at that price and therefore did not issue the book.

MEMBERSHIP.—The membership statistics as they appear on the books to January 1, 1907, are as follows:
Total number of Life Members.....124
Total number of Annual Members....696

Total	810
Accredited to the following States:	
Alabama	8
California	5
Colorado	8
Connecticut	14
Delaware	1
District of Columbia	7
Florida	4
Georgia	1
Illinois	7
Indiana	2
Iowa	10
Kansas	1
Kentucky	3
Louisiana	9
Maine	1
Maryland	2

Massachusetts	19	43
Michigan	9	30
Minnesota	3	9
Mississippi	1	1
Missouri	8	29
Nebraska	4	2
New Hampshire	4	4
New Jersey	8	20
New York	22	102
North Carolina	2	5
Ohio	8	82
Oregon	1	1
Pennsylvania	17	96
Rhode Island	8	8
South Carolina	1	1
South Dakota	1	1
Tennessee	1	1
Texas	1	1
Virginia	1	5
West Virginia	1	4
Washington	1	1
Wisconsin	1	16
Canada	7	7
Holland	1	1

Totals 124 696

The question of how to retain our membership after getting their names enrolled is one that needs our attention. In looking over the records of past years I find that a great number have allowed themselves to be dropped from membership that ought to be numbered on our list. The various vice-presidents can accomplish considerable in retaining these names, and I am pleased to note that a number of them have made efforts in that direction.

MEMBERS LOST BY DEATH.—Since the last report we have lost five members by death, three being life and two annual members: Lewis Ulrich, Tifton, O., October 29, 1906; J. L. Dillon, Bloomsburg, Pa., October 30, 1906; Jas. Braik, Buffalo, N. Y., January 16, 1907; J. F. Kretschmar, Flatbush, N. Y., June 8, 1907; Samuel Henshaw, W. New Brighton, N. Y., July 23, 1907.

NEW PLANTS REGISTERED.—Since last report the following new plants' names have been registered:

September 29, 1906—Cannas, Sunburst, Topeka, by Central Park Nursery, Topeka, Kan.

October 27, 1906—Rose, Rosa rugosa magnifica, by Dingee & Conard Company, West Grove, Pa.

October 27, 1906—Cannas Meteor and New York, by Dingee & Conard Company, West Grove, Pa.

October 27, 1906—Laelio-Cattleya Washington A. Roebing, second, by C. G. Roebing, Trenton, N. J.

November 24, 1906—Carnation Torador, by H. Weber & Sons Company, Oakland, Md.

November 24, 1906—Chrysanthemum Weber's Chadwick, by H. Weber & Sons Company, Oakland, Md.

September 22, 1906—Canna Magnificent, by Central Park Nursery Company, Topeka, Kan.

February 6, 1907—Chrysanthemum Golden Dome, by John A. Macrae, Providence, R. I.

February 28, 1907—Sweet Peas Le Marquis, Mrs. George Lewis, Mrs. A. Zvolanek, Mrs. Charles H. Totty, by A. C. Zvolanek, Bound Brook, N. J.

March 18, 1907—Rose White Killarney, by Waban Conservatories, Natick, Mass.

August 10, 1907—Rambler Rose Newport Fairy, by Julius Roehrs Company, Rutherford, N. J.

August 17, 1907—Rose President Roosevelt, by Dingee & Conard Company, West Grove, Pa.

In closing I desire to state that having assumed the office of secretary after January 1, 1907, several of the subjects covered were during the term of my predecessor. P. J. HAUSWIRTH, Secretary.

In regard to the registration of Rosa rugosa magnifica, a member pointed out that the firm registering that rose should be Conard & Jones Company, instead of Dingee & Conard Company, of West Grove, Pa. The secretary said he would investigate the matter.

Treasurer H. B. Beatty then read his report as follows:

Treasurer's Report.

Life Membership Fund, Dec. 31, 1906.	
Balance as per Treasurer's Report of 1905....	\$3,731.52
Gross Receipts for year 1906.....	556.24
Total	\$4,287.76
Balance on Deposit, Germania Savings Bank, December 31, 1906.....	\$4,287.76

Report of General Fund for 1906.	
1906.	
Jan. 1, Balance, ...	\$3,482.96

CITIZENS' BANKING COMPANY.

Oil City, Pa., February 28, 1907.

H. B. Beatty, Treasurer,

Society of American Florists and
Ornamental Horticulturists,
Pittsburgh, Pa.

Dear Sir:

I hereby certify that there was on deposit with this bank in the account of the above named Society, on January 1, 1907, twenty-three hundred ninety dollars and ninety-one cents (\$2,390.91).

Respectfully yours,

(Signed) Fred. C. McGill.
Cashier.

GUARANTEE TITLE AND TRUST COMPANY.

Pittsburgh, February, 28, 1907.

Mr. H. B. Beatty, Treasurer,

Society of American Florists,
Pittsburgh, Pa.

Dear Sir:

Your Balance, according to our books, at the close of business, January 1, 1907, was \$1,324.43, this account being transferred from the Home Trust Company of Pittsburgh.

Yours very truly,

(Signed) R. J. Davidson,
Vice-President.

GERMANIA SAVINGS BANK.

Pittsburgh, Pa., Feb. 28, 1907.

Mr. H. B. Beatty, Treas.,
City.

Dear Sir:

The balance to the credit of the Society of American Florists and Ornamental Horticulturists, Jan. 1st, 1907, on savings account, Bank Book No. 28412, was \$4,237.76. This included \$31.17 interest which was credited on that date.

Very truly yours,

Germania Savings Bank,
(Signed) C. F. Gardner,
Asst. Secretary.

State Vice-Presidents' Reports.

The secretary reported that the State vice-presidents from the following States had handed in their reports: Ohio (north), New York (east), Missouri (west), Virginia, Illinois (north), Illinois (south), Michigan (north), Connecticut, Colorado, Iowa, Missouri (west), Wisconsin, Georgia, Louisiana, Maryland, New Hampshire, New Jersey, District of Columbia and Massachusetts.

On motion of Mr. Wallace, a committee was appointed by the president to read the reports through and present to the convention, at a future session, any points contained therein requiring the consideration of the society.

Benjamin Hammond of Fishkill-on-the-Hudson, N. Y., chairman of the legislative committee, then made the following report:

Legislative Committee's Report.

Greenhouse Glass—The Import Duty as it Affects Florists.

At the S. A. F. O. H. convention held at Dayton, O., President Kasting's address brought out matters which led to a discussion on the high cost of greenhouse glass, and that the tariff thereon had a marked effect in keeping up the very high cost.

How many millions of square feet of glass are used by the florists of the United States I am unable to say, but all men who have greenhouses or cold frame plants, are greatly interested in the cost of this important commodity.

In the discussion which ensued at the time, it was stated that if there was to be anything done in the modification of the present tax on glass, some action must be taken, otherwise nothing would ever be accomplished. The matter, after debate, was referred to a committee of which the writer is a member, and to give a correct status of the present rate on glass, application was made to the Commissioner of Commerce and Labor.

Prior to the Spanish war (so-called), the rate on glass used by the greenhouse men was as follows:

"On all sizes not exceeding 10x15 inches square, the import duty was 1c. per pound; on sizes above 10x15 inches square, and not exceeding 16x24 inches square, 1½c. per pound; above 16x24 inches square, and not exceeding 24x30 inches square, 1¾c. per pound."

It will be noted that the tariff is not placed upon the square foot, nor is it an ad valorem rate, the valuation

being placed at the net weight of glass in boxes, which are 50 feet, or as near as may be, and glass will approximate 50 to 80 pounds net in a box, according to thickness. Such was the rate in existence in 1896.

In 1897 the tariff was changed, and it is under this tariff that the glass now used in the United States is protected. The paragraph which governs that duty is as follows:

"Glass not exceeding 10x15 inches square at 1 3-8c. per pound; above that and not exceeding 16x24 inches square at 1 7-8c. per pound, and not exceeding 24x30 inches square at 2 3-8c. per pound."

Provided, that the duties shall be according to the actual weight of the glass. The reader will see at a glance the substantial increase in the cost of each box of glass, which this protection gives over and above 1896 and previous. In 1896 the volume imported of the cylinder, crown and common window glass was \$34,189,854.13 and for 1905 it was \$17,933,028.50.

The question before the greenhouse men of the country is, whether it is worth while to make an effort to procure less duty on glass, to bring before the proper authorities the sense that the time is ripe and should be carried into effect of modifying for the general good the high rates of the present duties?

Of course this matter affects not only greenhouse people, but every builder and sash maker in the land.

It was suggested at the Dayton convention that the florists of the United States should make known their interest in the matter by direct statement. The committee to whom this matter was referred would be glad to hear of the public expression, looking to a proper presentation of the matter in such shape that it will command the attention of the proper Congressional committees.

Following the S. A. F. convention your committee took up this matter with the Honorable Seno E. Payne, chairman of the Ways and Means Committee of the House of Representatives, and also with Congressman Ames of Massachusetts. These gentlemen advised of the condition of the case as it stood in the last Congress indicated that no action was ripe for change in tariff on glass at that time.

Mr. Hammond here read Congressman Payne's letter, which has already appeared in these columns; also the letter of Congressman Ames which was of the tenor already set forth.

Mr. Hammond, in closing his remarks, stated that he believed it was almost a hopeless task to expect any change in the tariff until after the next general election.

The report was the subject of an animated discussion, participated in by Messrs. Lenker, Fahrenwald and O'Mara, who stated that if anything was to be done, it would, he thought, be necessary to present to the congressional tariff committee some statistics as to the cost of the manufacture of American glass as compared with that of foreign countries.

The letters of the Congressmen who had replied to the society's committee were characterized as sharp, political documents. Others who participated in the discussion were Messrs. Kift, Kasting, Beatty, Hill, Fulmer, Beck and Hallock. It was shown by the discussion that the price of glass had increased from \$2.92 a box a year or two ago to about \$4 at the present time. The tariff was said by some to be responsible for this, but Mr. Beatty informed the audience that the cost of some materials to the manufacturers had increased considerably during that time.

Mr. Hallock was of the opinion that if the society's committee was to prosecute the matter further, it should be along specific lines, urging that the glass used for greenhouses was for manufacturing purposes, different entirely from window glass, used for homes, and such like. He facetiously remarked that some materials for manufacturing purposes were admitted free, and the members might live to see the day when glass would be similarly treated. (Laughter). As the discussion seemed to be productive of no helpful information to the legislative committee, it was, on motion of Mr. Burton, closed.

On motion of A. H. Langjahr, Messrs. O'Mara and Hill were added to the present legislative committee.

The meeting then adjourned.

The President's Reception.

The president's reception was held in the foyer of Broad street theater on Tuesday evening at 8 o'clock. President Stewart was assisted by the other officers of the organization, ex-Presidents W. F. Kasting, Robert Craig and William R. Smith; J. D. Carmody, and several ladies.

After the reception a vaudeville performance was enjoyed, at the close of which ice cream and cake were served by the Philadelphia Florists' Club. The whole affair was thoroughly enjoyed by a large number of the delegates.

Wednesday

Morning Session.

The delegates were somewhat tardy in assembling this morning, and it was after ten o'clock before the convention got down to business.

The paper of Alois E. Frey on "Bedding Plants, Where and How to use Them" was, in the absence of the author, read by Wilfred Wheeler of Boston, Mass. A vote of thanks was tendered Mr. Frey.

Samuel C. Moon of Morrisville, Pa., read his paper on "Hardy Shrubs, How to Plant and Treat Them." This was a very practical paper, provoking some discussion.

(The above papers are reproduced on another page.)

In answer to a question by Mr. Cushman, Euclid, O., Mr. Moon said he did not think it necessary to root prune most shrubs; if a big root gets broken or mutilated in any way it is better off than on. If the roots were in good condition, and the plants properly handled, Mr. Moon said he would rather cut off the tops. There are, of course, exceptions to this rule.

Mr. Lenker, Freeport, R. I., spoke a good word for the Parsons hybrid rhododendron, which succeeded well in his soil—a sandy loam—afforded no protection whatever. He also spoke of the possibilities of the Himalaya Mountain rhododendrons, if good stock of these could be procured. Most of these plants were now received from Holland, but they were cheap and not of the best quality.

Mr. Moon endorsed the remarks of Mr. Lenker concerning the hardness of the Parsons hybrids, but if every planter were to insist on getting these sorts, one half of the demand could not be supplied. If the more tender varieties are to be planted, favorable conditions for them must be provided. A great many rhododendrons are panted in places unsuited to their requirements.

Answering a question by Mr. Palmer, Brookline, Mass., as to the stock on which most of the varieties from Holland were grafted, Mr. Moon stated that he believed R. ponticum was nearly always used for that purpose. It is hardly any sapum pro 'Ammon' sup in best roots of any rhododendron for transplanting surpassing in this respect R. maximum. The plants are grafted low, the graft being generally below the ground, so that the tender rhododendron roots seldom suffer from frost here, if properly planted. A vote of thanks was tendered Mr. Moon for his instructive paper and subsequent remarks.

The president appointed the following gentlemen a committee to read the reports of the State vice-presidents for any matters therein contained requiring the society's consideration Messrs. R. Vincent, Jr., George A. Kuhl and John G. Esler.

It was announced that Ernest Hemming, who was to prepare a paper on "The Effective Arrangement of Hardy Perennial Plants," was unavoidably unable to do so.

Selection of Meeting Place.

Niagara Falls, N. Y., was selected as the meeting place for 1908; an eloquent plea on behalf of that city having been made by former Mayor W. W. Cutler, who, by the by, has become a member of the S. A. F. this year. The claims of Detroit, Mich., were well presented by Philip Breitmeyer, and others but that city was ultimately withdrawn from the contest. A. Poehlmann, Chicago, left it to the discretion of the delegates as to whether they should hold the next convention there, (which he invited them to do), in view of the fact of the American Rose Society's exhibition and meeting, and the proposed National Flower show taking place in that city in 1908. On motion of John G. Esler the convention voted unanimously to go to Niagara Falls.

Report of the Judges.

The judges were Charles H. Vick, Rochester, N. Y.; F. E. Palmer, Brookline, Mass.; and A. Gude, Washington, D. C.

Certificates of Merit.

Childs, John Lewis, Floral Park, N. Y., for seedling gladiolus Number 27, white, with a slight blush tint in throat.

Manda, W. A., South Orange, N. J., for Dracena Mandaiana, red, good habit, fine foliage (cross between D. Youngii and D. terminalis).

Hart, George B., Rochester, N. Y., for handy handle (for flower baskets.)

Honorable Mention.

Conard & Jones Company, West Grove, Pa., for canna William Saunders, dark foliage, large spike scarlet; canna New York, dark foliage, large flower, scarlet. (Canna Uncle Sam, from the same firm, was judged as having "no apparent merit.")

Pierson, F. R., Company, Tarrytown, N. Y., for Nephrolepis superbissima, heavy dark upright compact fronds.

The Philadelphia S. A. F. O. H. Convention.

When the complete record of the S. A. F. O. H. convention, held at Philadelphia this week, shall have formed part of the annals of the national society it will, we think, be readily admitted that the affair has been a great success in every particular. With a large attendance a most magnificent trade exhibit, well handled by an able superintendent; with interesting sessions, full discussions of the subjects dealt with, the report of 1907 will compare favorably with those that have gone before.

The address of President Stewart, a lengthy document, was charged with considerable advice looking to a greater grasping of the opportunities presented to the trade than now obtains, in satisfying what he terms the "garden hunger" of the people, especially in the line of development of home grounds, window gardening and such like. He believes the present day gardener has in too many instances been acquiring a one-sided experience and that some of our most talented indoor growers find themselves badly handicapped in sufficient education in the fundamental operations of general gardening. In this respect, probably, the trend of the times toward specialization is responsible for the condition he mentions. Specialists will, however, still be needed; though the man who aims at conducting a general business, such as that indicated by the president, will no doubt find it to his advantage to be fully equipped in the manner suggested in the address.

The shortcomings of the craft in other respects were also touched upon. The school garden movement was endorsed, and education by example strongly urged. Mr. Stewart believes that some direct system of affiliation with existing local and special organizations is something worth striving for, and thinks the multiplication of such special societies is not a menace, but rather an advantage to the national association—a view we endorse. He correctly points out that there are "movements where a successful combination is only possible under the capacious mantle of a large national organization. He favors one central authority in the matter of plant registration, and is of opinion that the S. A. F. should be that authority. He considers the time is ripe when the society should insist that horticulture be made a regular course in our school system; is in favor of a parcels post; suggests that officers of local clubs, where such exist, should be chosen as S. A. F.

vice-presidents during their term of office, and recommends the continuance of an outdoor exhibition of plant novelties at the annual conventions, wherever practicable. It is to be regretted that owing to unpropitious conditions existing in the convention city this year, this latter phase, so auspiciously inaugurated at Dayton in 1906, could not be carried out in Philadelphia.

With the many ideals submitted by the president for the society to endeavor to reach up to, it is somewhat unfortunate, we think, that he detracted from the force of the generally good advice generously proffered, by the statement in his closing remark, to the effect that "with all their vociferation," the bowlers "are the best promoters in the society's service." This was doubtless intended as a well meant compliment, but to those who look upon this favorite florists' sport as a mere extraneous side issue of the annual meetings, it rather shatters one's conception of the character and objects of a national horticultural organization seeking to be regarded as the leader in its line, to be informed by its president that the indulgence of a harmless hobby of this kind afforded at a convention can in any way "promote" the great interests of the United States which the S. A. F. is supposed to champion. We are inclined to regard the statement as a little bit of taffy, and to let it go at that. Still it was a nullifyingly bad break.

We shall continue our review of the work accomplished in a future issue.

BOOKS RECEIVED

A POLYGLOT DICTIONARY of the principal terms employed in Botany and Horticulture has been issued by A. M. C. Jongkindt Coninck, director of the School of Horticulture at Naarden-Bussum, Holland. The terms are rendered in Latin, Greek, French, English, German and Dutch in parallel columns. There is also appended a list of genera of plants derived from words the explanations of which are found in the dictionary.

This the second edition, is a most serviceable publication, of inestimable value to catalogue makers and others having to do with plant nomenclature. We can supply copies of the work.

Gladiolus America.

Editor Florists' Exchange:

Referring to the recent public discussion as to the source of introduction of this variety, I beg to certify that I first received it among stock supplied by Mr. Groff, before America as such was introduced.

It is also fair to state that I have seen the variety blooming in several collections, in stock of Groff's selections, grown by parties for years before the variety was named.

Having grown the gladiolus for fifteen years extensively for an amateur, and having personally inspected many acres of this flower, I feel that my experience is sufficiently critical to enable me to make intelligent comparison.

St. Louis, Mo.

A. D. HARTWELL.

Editor Florists' Exchange:

My attention has been called to some of the recent discussion on the origin of Gladiolus America, and I write to say that I had the variety from Mr. Groff's selections years before it was introduced under its present name.

In my work of testing new varieties of this and other useful plants, I am able to claim sufficient knowledge and experience on the subject of varietal difference and comparative quality, to qualify me to pass judgment in this instance, which I am happy to do in the interest of truth and justice.

Raynham, Mass.

J. R. LAWRENCE,
Proprietor Eden Trial Grounds.

SPRINGWATER (N. Y.) FLORAL SOCIETY.—The Springwater Floral Society held its first Flower Carnival on Tuesday and Wednesday, in Concert Hall, Springwater. The display of flowers was far beyond the expectations of the committees in charge, and the public was delighted. The hall was transformed into a fairy bower, with flowers everywhere. The displays of gladiolus and sweet peas by E. A. Higgins of Avoca and Chas. Larowe of Cohocton, were very fine, though not entered for competition. There were fine collections of nearly all flowers which bloom at this season, including field flowers and begonias, foliages, ferns, etc. Wednesday evening a very enjoyable concert was given by Prof. De Main Wood of Rochester, Mr. John Rudgus of Perry, Miss Nellie Humphrey and Miss Parmalee of Livonia, Mrs. Jackmare, Miss Peabody and Miss Disbrow, pianists, with select readings by Miss Brettie. The receipts of Tuesday were \$80 and of Wednesday \$55. Mrs. Minnie Amos was awarded the Wadsworth Silver Cup for the best flower garden display. Many other premiums were awarded to the successful competitors.

Thomas J. Johnston.

Thomas J. Johnston, one of the best known florists of Providence, R. I., died at his home, 145 Cypress street, early last week from an attack of acute endocarditis following a siege of rheumatism last Fall and another of appendicitis, with which he was afflicted at the time of death. The demise of Mr. Johnston was totally unexpected, and came as a great shock to his family.

The deceased was the seventh son of Robert Johnston, who conducted a greenhouse on Blackston boulevard near Swan Point Cemetery, was 42 years old, and had conducted a store on Weybosset street for some years. His brothers are all in the same business in different parts of the city, and his grandfather and uncles were all florists. He was a charter member of the Florists' and Gardeners' Club of Providence, and had served as its president. In addition to this he was actively interested in practically every horticultural exhibition which was held anywhere in this part of the United States, and had taken many prizes. He was also a member of the Providence Lodge, No. 14, B. P. O. E.

He married about 20 years ago, and is survived by his widow and two sons.

David F. Ross.

Many Scotch gardeners in the United States will learn with regret of the death of Mr. David F. Ross, which occurred at Brooklyn, Montrose, Scotland, July 28, from cancer. He was 70 years of age. While at St. Martin's Abbey, Perthshire, he was one of the most successful exhibitors at the Perth, Dundee, and Edinburgh flower shows, very often cleaning the show in fruit, flowers and vegetables. He was head gardener at St. Martin's for 30 years. He introduced St. Martin's blue lobelia about 1876, which is still extensively grown in Britain. He served his apprenticeship at Sir Thomas Gladstone's place in Forfarshire and then served in various places as journeyman. He was two years foreman at Floors Castle, the Duke of Roxburghe's place, and from there took charge of St. Martin's. After leaving there in 1890 he was appointed superintendent of Dorward's House of Refuge, Montrose, a position he filled to the entire satisfaction of all concerned for 16 years. He received a handsome testimonial from the town on retiring in March, 1906. He leaves nine of a family, five sons and four daughters. The two eldest sons are highly respected ministers of the Gospel, and the three younger sons are in this country, William F. being traveling representative for F. R. Pierson Company. The daughters occupy high positions as school teachers in England and Scotland. He was of a kindly disposition and highly respected by all with whom he came in contact.

P. P.

Summer Show at Lenox, Mass.

The Summer exhibition of annuals and perennials was held under the auspices of the Lenox Horticultural Society at the Town Hall, Thursday, August 17, and was very successful and interesting. Practically all the cottagers attended the show, the attendance at night being very large. The exhibits of perennials were remarkable for the fine quality when the unfavorable season is taken into consideration. Never before at any of the society's shows were sweet peas staged so abundantly and strong. About two hundred vases were exhibited in the different classes. Conspicuous among the winning collections were King Edward VII, Countess Spencer, Othello, Dorothy Eckford, Helen Pierce, John Ingham, Navy Blue, Mrs. Kenyon, Nora Unwin, Miss Willmott, and Lady Grisel Hamilton.

Annuals were shown well by several exhibitors, particularly interesting being the large vases of salpiglossis, delphiniums, scabiosa, and antirrhinum. Owing to the unfavorable season, dahlias were not quite up to the Lenox standard, but interest centered about a new fancy dahlia shown by Mr. Charles Lanier; it is a large pure yellow, with a tint of salmon, and the flowers grow to be six or seven inches in diameter. It has been under cultivation for three years, and has been registered under the name of Charles Lanier, but will not be disseminated for two years yet.

G. H. I.

SOUTHERN NURSERYMEN'S ASSOCIATION.—The Southern Nurserymen's Association completed the labors of the annual convention at Richmond, Va., on August 15. Charles T. Smith, of Concord, Ga., was unanimously elected president. Mr. Griffin was continued as vice-president. A. I. Smith, of Knoxville, Tenn., was elected secretary-treasurer. Atlanta, Ga., was selected as the best place of meeting.

[Continued from page 287.]

Ebele, Charles, New Orleans, La., for unnamed nephrolepis, very fine fringed drooping fronds.
 Wilson & Hought, Summit, N. J., steel and concrete bench.

Highly Commended.

Long, Daniel B., Buffalo, N. Y., Folders and Novelties.

Dayton Paper Novelty Company, Dayton, O., Embossed cut flower boxes in three different colors.

Rice, M. & Company, Philadelphia, Pa., Ornamental Tree Log.

W. W. Warner & Company, Boston, Mass., sent Gladiolus Harvard and Kathryn, which, unfortunately, arrived in poor condition.

On Changing the Society's Name.

John K. M. L. Farquhar, Boston, Mass., reported for the committee on changing the society's name. He said that the Board of Directors had, by unanimous vote, at the meeting held in Philadelphia last March, recommended the changing of the name of the organization to "The Society of American Horticulture," to be amended by Congress, if possible, by striking out such words in and adding others to the present designation as would bring about the name now proposed. This had been considered by the committee, and they now reported favorably upon the change.

A. Fahrenwald said he saw no necessity for any such change as proposed, considering the present title suitable for all purposes.

F. E. Palmer, in a lengthy speech pointed out the advantages, as he saw them, of the change, stating the objections of the private gardener element to the present name, and pointing out the ridiculousness of the words "ornamental horticulturists." He moved the adoption of the committee's report.

Robert Craig also favored the proposed new title, which would make a short and expressive name, and be just what the society wants. He stated that it had been ascertained that no legal difficulties would be experienced at Washington in effecting the change proposed.

President Stewart pointed out that the society had no power to change the chartered title, which was voted in Congress alone, but the members could recommend to Congress the adoption of whatever designation was finally decided upon.

Professor Corbett told of the large number of horticultural organizations throughout the country, alluding to the comprehensiveness of the name now proposed to be adopted. By such change the old society would lose its identity and individuality. The tendency of the times was for societies to segregate rather than concentrate, and he advised full consideration of the proposition.

H. B. Howard, Chicago, regarded the S. A. F. as a trade organization; it had always been recognized as a florists' body. If the society undertook to be all-embracing, the result would be a spreading out so thin that the association would not be able to gather unto itself any additional strength, and would dissipate that which it now had.

Patrick O'Mara said he believed in things being just as they seem; he did not think it was possible to fool the people. The S. A. F. was the outcome of a necessity; and up till now had carved out its own destiny very successfully. Mr. O'Mara pointed out that although the constitution had been broadened under the charter, opening the doors wide to all interested, the membership since the obtaining of the charter had fallen off instead of increasing. He believed the society should work along its own specific lines; and when the time comes for a combination of delegates from all the horticultural societies in one organization—and he believed this would come sooner or later—the S. A. F. could take its honorable part among them. (Applause.)

J. C. Vaughan endorsed the views of Mr. O'Mara, and favored retaining the old name. There were several organizations already claiming the national premier position horticulturally, and the matter would be a difficult one to decide. He thought the S. A. F. should hold close to certain lines.

F. R. Pierson moved as an amendment to the motion that the word "ornamental" be stricken out and that the amended title be "The Society of American Florists and Horticulturists." Mr. Pierson, it may be stated, was the man who moved the adoption of the original name of the organization "S. A. F."

Further remarks were made by Messrs. Kasting, Manda and Farquhar all in favor of the name proposed by the committee, and the matter was finally held over for settlement at the session on Thursday.

Nomination of Officers.

The following candidates were nominated for the respective offices: President Frank H. Traendly, New York, nominated by W. F. Kasting, seconded by Patrick O'Mara; Joseph R. Freeman, Washington, D. C., nominated by J. C. Vaughan, seconded by W. F. Gude;

H. B. Beatty, nominated by John Westcott and E. A. Seidewitz.

Vice-President: Ex-Mayor W. W. Cutler, Niagara Falls, and George MacLure, Buffalo, N. Y.

Secretary, P. J. Hauswirth, Chicago, nominated by Edwin Lonsdale.

Treasurer, H. B. Beatty, Pittsburg, nominated by Mr. Kasting.

The meeting here adjourned at 12.50 p. m.

Wednesday Evening Session

The Wednesday evening session was devoted to an illustrated lecture by J. Otto Thilow of the Henry A. Dreer, Inc., on the subject of "The Flora of the Yellowstone Park and the Puget Sound Country." The lecture was a most interesting one, delivered in an admirable manner by Mr. Thilow, the views thrown on the screen being exquisitely colored in most instances. At the close of the lecture Mr. Thilow was accorded a rising vote of thanks by the society, and acknowledged the compliment stating that he was glad to have been of service to the members. The remaining business scheduled for this evening was held over until Thursday morning. The meeting adjourned at 10 o'clock.

The Trip to Riverton.**Wednesday, August 21.**

The first break in the fine weather which had so far marked the week came just when the people were preparing to leave Horticultural Hall to take the boat for Riverton. At 12:30 p. m. black clouds made their appearance in the northeast and rain set in, which continued to fall with more or less vigor all afternoon. This state of affairs, however, did not dampen the ardor of the excursionists, and when the good steamer Columbia left the Arch street wharf at 1:45 p. m., she carried some 1,500 people who had taken advantage of the hospitality of the H. A. Dreer, Inc., to visit their vast nursery and greenhouses at Riverton, N. J. Arrived at destination, the rain, unfortunately, was on in earnest and a straight run for the shelter of the greenhouses was made. Here, in one of the packing sheds, a tempting luncheon was awaiting the people, and was much enjoyed. Afterwards, the delegates investigated all the area covered by glass, a few adventurers making short trips out into the open. All were loud in their praise of the neatness which pervaded the entire range, of the health and vigor of the tremendous number of plants there to be seen in all stages, from that of babyhood up to full-grown creations ready for heavy service. Fortunately, under cover, had been arranged a very beautiful flower show which grouped together cut flowers and plants, and this view was both instructive and pleasing.

After luncheon had been served, President W. J. Stewart made a speech of thanks, saying: "We are here as guests of the Dreer Company, and I think it is eminently fitting that we should just express to Mr. Dreer in an informal way the pleasure that we have enjoyed and our gratification to him for this occasion, which, I think, I can safely say has never had an equal in the history of the S. A. F. O. H., not only in the number who are here, but in the quality of the attendance. We have the big men, the best men in the trade, from the Atlantic to the Pacific, and the most beautiful ladies who ever attended a convention. I am not going to try to make a speech, but will ask Mr. Dreer to step up on a chair so we may all see him."

Mr. Dreer, in response, expressed his deep gratification with the attendance of the delegates to Riverton that day. He said that the display which they had seen, and the success of it all, was due in a great measure to his associates, all of whom were devoting their lives and best efforts to the development of the business—namely, Messrs. Eisele, Strohlein, Sims and Clark. For these efforts they feel rewarded and compensated. Mr. Dreer further said: "I am sorry that the weather is so unpropitious that you are not permitted to see the great variety of plants that are in cultivation here, especially in the open air, as they are all in fine condition and are labeled correctly. It would prove to you, as it has to me, a great object lesson, and I know that we have here all the horticultural talent of the whole country, and the appreciative men of the country; to them this cultivation especially appeals. I hope that in an hour or two the grounds may be dry enough for you to see what has been prepared here for the benefit of the eighty-five millions of horticultural lovers of the country. There may not be a full eighty-five million now, but they are gradually growing to that number, if not to one hundred and fifty million. I hope you will have the opportunity of seeing the cultivation on this place; if you do not, you can see the result in the cuttings on the tables. I am glad we have had the opportunity of seeing so many of our friends on this Dreer-y occasion."

Three hearty cheers were then given by the assembled visitors for the H. A. Dreer, Inc.

The palm grower for the H. A. Dreer Company is Max Oeser, who has been with this firm since March, 1900; J. C. Clark is in charge of the ferns and aquatics.

On the return trip Miss Pearl B. Fulmer sang very beautifully and the instrumental music was much enjoyed. Groups of old cronies formed here and there on the decks relating stories of times more or less remote, and without incident to mar the pleasure of the trip, the guests returned in good time for the evening proceedings.

THE EXHIBITION**Displays Other Than Plants and Cut Flowers.**

ADLER, M., New York.—Manufacturer of pearl pins; violet pins a specialty.

BAYERSDORFER, H. & COMPANY, Philadelphia.—With their usual enterprise, this firm took full advantage of the S. A. F. exhibition in their home city to make a display that, in quantity, quality and thoroughness was bewilderingly attractive. Florists' ribbons in countless shades; green tone ware, all sizes and numerous designs; wreaths, doves; small designs in china ware, such as baby shoes and slippers, wells, watering pots; novelties in naturally prepared asparagus and maidenhair fern; wheat sheaves, baskets and countless other attractions. Two coupes were kept in commission between Horticultural Hall and the store at 1129 Arch street, so that parties interested could there see at their leisure the full magnitude of this business.

BOAS & COMPANY, W. J., Philadelphia.—Square lock folding flower boxes.

BOBBINK & ATKINS, Rutherford, N. J.—Round and square plant tubs. See also Plants.

BODDINGTON, A. T., New York.—A large collection of seasonable bulbs.

BOMBAYREED MFG. CO., Columbia, S. C.—Exhibit of Bombayreed jardinières woven from East India reeds.

CASTLE COMPANY, THE, Boston, Mass.—Steel plate boiler and electric circulator; the latter a device for circulating any fluid.

CORT & SON, Wyncote, Pa.—Stake fasteners.

CRAIG, WM. P., Philadelphia.—Art pottery material for window boxes, vases and pedestals.

DREER, H. A., Philadelphia.—A tastefully arranged collection of bulbs in small baskets. Dreer's Peerless Glazed Pots (over 87,500,000 sold in eight years), improved Keystone cedar plant tubs, the Dreer lawn mowers, hose, fertilizer, exhibits, plant food, and a well assorted display of florists' thermometers, tools and implements. For plant exhibit see Plants.

EDWARDS FOLDING BOX COMPANY, Philadelphia.—Staple boxes for florists in all sizes and grades. Originators of the Star Lock Flower Folding Box.

ELLWANGER & BARRY, Rochester, N. Y.—Samples of American grown roses.

FERNERY GREENHOUSES, Govanstown, Md.—A pure white semi-double sport, from Queen Alexandra daisy.

FERTILIZER PRODUCTS COMPANY, Jersey City, N. J.—Plant-Blood, claimed to be an ideal food and tonic for house plants and the garden.

FORD, C. S., Philadelphia.—Florists' Immortelle letters, designs and florists' novelties.

GARA COMPANY, H. L., Philadelphia.—Aleo Naptha Soap for mealy bug, black aphid, scale, insects, etc.

HERENDEEN MANUFACTURING COMPANY, THE, Geneva, N. Y.—Exhibit two of the well-known Furman boilers, viz., Round Sectional, size 18-1, and the New Sectional, size 3008.

KELLER POTTERY COMPANY, THE, Morristown, Pa.—Display of flower pots, bulb pans and florists' specialties.

KING CONSTRUCTION COMPANY, North Tonawanda, N. Y.—Sectional view of the King construction greenhouse.

KESTONE SHEET METAL COMPANY, Ambridge, Pa.—Patent metal hot-bed sash; looks practical and must certainly be durable.

KROESCHELL BROS. COMPANY, Chicago.—Had on exhibition one of their celebrated hot water heaters and boilers (No. 5), heating 12,000 sq. ft. of glass to 60 degrees at 15 degrees below zero. Claim capacity to run the water temperature up to 240 degrees in this boiler without boiling.

LONG, DANIEL B., Buffalo.—Specialties in printed matter for florists.

MICHELL COMPANY, HENRY F., Philadelphia.—Occupied a point of vantage at head of main stairs, affording opportunity for an attractive display. Here was to be seen everything required and desired by the florist and gardener in requisites from tools to fertilizers and manures. Michell's Pure Culture mushroom spawn, the Lehman wagon heater, Campbell's Sulphur Vaporizer, etc. Bulbs in all varieties were also shown.

MONINGER COMPANY, JOHN C., Chicago.—Sectional greenhouse. A new feature in this exhibit is that of their interlocking lap splice for gutters, pur-lins, ridges and all plates; this device absolutely preventing the joints from separating under any weather conditions and making a thoroughly tight joint. A sample of "pecky" cypress was shown in order that the trade might become acquainted with its merits.

MOORE, F. L., Chatham, N. J.—Sections of his new branded Hoses called Sunnywoods Hose.

MOREHEAD MANUFACTURING COMPANY, Detroit, Mich.—Morehead automatic steam, tank, meter and return traps.

Plants and Cut Flowers.

Thursday

Morning Session.

NEIDINGER, JOS. G., Philadelphia.—Wheat sheaves, wax and metal designs, Christmas bells. The exhibits in waxwork of pillows, cushions and wreaths, almost entirely of American manufacture, were in remarkably good taste, and the material composing them most natural in appearance. Some very taking designs shown in small Christmas bells, in clusters, with holly interwoven.

PENNOCK-MEEHAN COMPANY, S. S., Philadelphia.—A charmingly comprehensive and well arranged line of florists' ribbons. In shaded goods, the Killarney ribbon, showing tints of the flower and foliage of that celebrated rose, was quite a leader. Another noted was a Dresden ribbon, with flower warp design. Hexagonal and other designs in florists' pins, cedar bark, crepe papers, and prepared cycas leaves, were all features.

PHILADELPHIA FLAG COMPANY, Philadelphia.—Felt lettering.

PIERSON COMPANY, F. R., Tarrytown, N. Y.—Collection of bulbs. For description of plant exhibits, see Plants.

QUAKER CITY RUBBER COMPANY, Philadelphia.—High-grade rubber goods for mechanical purposes. Garden and steam hose, hose washers and sheet packing.

QUAKER CITY MACHINE COMPANY, Richmond, Ind.—Section of greenhouse showing workings of the Twentieth Century roller-bearing ventilating apparatus.

RAINEAR & COMPANY, Philadelphia, Pa.—An instructive showing of iron pipe, valves and fittings. Agents for the Wm. Powell Company. Composite disk valves for all forms of heating.

RASMUSSEN, ANDERS, New Albany, Ind.—Greenhouse section showing self-balancing galvanized iron ventilator.

REED & KELLER, New York.—In this extensive exhibit was noticed a distinctly new wooden ware, known as Russian ware, for plants and cut flowers, in shades of mottled green, in numerous designs; a new swivel pot hanger, patented, in which plants can be placed and held at any angle in perfect safety; plaited birch vases and tubs, bamboo stands for pots, vases and glass; wire stands; Christmas bells, wax and immortal wreaths; designs in cycas leaves; Empire florists' letters; designs in glass flower holders; wheat sheaves, glass ware, basket ware, birch bark canoes, and many other goods of merit and attractiveness.

ROSEVILLE POTTERY COMPANY, Zanesville, O.—Egyptian Mat green jardinières, vases and pedestals, and fern dishes a specialty, and very attractive. This company specializes in vases, jardinières and pedestals and fern dishes.

SMITH & SONS COMPANY, OSCAR, New York and Philadelphia.—An exhibit of raffia and sphagnum moss.

STERN & COMPANY, Philadelphia.—Novelties in florists' supplies. A center piece of light wood construction, covered with natural asparagus, specially prepared, to be filled in with flowers or orchids, was quite taking. Sprays of Christmas immortelles showing ruscus and spirea, prepared native holly leaves with berries, pendent fruits with natural preserved asparagus entwined, etc.

VAUGHAN'S SEED STORE, Chicago and New York.—Display of all the seasonable bulbs. Noticed, amongst other things, some fine, selected stock of L. Harrisii. A comprehensive display by this well-known house.

WERTHEIMER BROS., New York.—Ribbons and novelties.

WHILLDIN POTTERY COMPANY, Philadelphia, Jersey City and Long Island City.—This well-known firm made a comprehensive showing of flower pots, in sizes from one to eighteen inches; square seed pans, round bulb pans and azalea pots.

ADVANCE COMPANY, THE, Richmond, Ind.—Ventilating apparatus, a very simple and easily worked machine, anything but complicated, being manufactured with but few parts, nothing to get out of order, and giving great satisfaction wherever it has been used. The machine was invented but some three years ago, but is now in use in thirty-five states. This firm is also showing a new bracket for carrying pipes or shelves on the posts of the greenhouse. This is a self-locking bracket, and would seem to be eminently useful for florists.

DAYTON PAPER NOVELTY COMPANY, Dayton, O.—A full line of their many styles of boxes, their leader this year being the embossed lettering. This exhibit was in charge of M. J. Beatus.

LORD & BURNHAM COMPANY, New York.—Exhibits of several lines of their specialties, principally their latest construction of iron greenhouses with ventilating apparatus, in which all the gearing is enclosed so that it is impossible for any water to get next to the machinery or even into the oil cups; also a new bracket that they are using for the carrying of pipe from the posts. In boilers they exhibited their large, sectional steam boiler, provided with grates specially made for the burning of fine coal; also their sectional boiler made particularly for setting up in shallow cellars, requiring low flow pipe connections. The height to center of flow pipe outlet on the No. 13 series is but 48½ inches, and on the series No. 30, which is quite a large boiler, the height is but 61 inches.

HUMMEL & DOWNING COMPANY, Milwaukee, Wis.—An exhibit of boxes suitable for cut flowers in all styles and colors.

HAMMOND, BENJAMIN, Fishkill, N. Y.—A very extensive exhibit of his many products that are used by florists, included among which are his scale destroyers and several other insecticides; also a line of paints, oils and putty material, in which he has worked up quite a large trade throughout the country.

HEWS & COMPANY, A. H., Cambridge, Mass.—An extensive exhibit of their earthenware flower pots and pans of every kind and size, rose pots, orchid pots, thumb pots, ornamented pots with saucers drilled, suitable for hanging baskets; earthenware cut flower vases; in fact, everything in the pottery line was to be seen in this exhibit.

F. R. PIERSON COMPANY of Tarrytown, N. Y., made a splendid exhibit of their new fern *Nephrolepis superbissima*. This fern Mr. Pierson has been growing for several years, and is so sure of its merits being appreciated by the trade at large, when once known, that he will introduce it in 1908. This is, perhaps, the heaviest fronded *nephrolepis* in existence, and the color is a very lively green, a shade not shown in any other *nephrolepis*. As it is a remarkably fast grower, it will, no doubt, prove a valuable addition to the many forms of *nephrolepis* already in commerce. The exhibit was in charge of Mr. Fotheringham and Mr. Trevillian.

THE HENRY A. DREER COMPANY of Philadelphia showed a splendid collection of palms in all commercial varieties and sizes; also a miscellaneous line of commercial plants, among which was the variegated *euonymus*, *araucarias*, hardy ferns in many varieties, *nephrolepis* in variety, *adiantum*, *selaginellas*, *cocos*, and a general line of young stock suitable for growing on.

BOEBINK & ATKINS of Rutherford, N. J., showed a collection of evergreens and samples of their tubs. A. J. COWEE, the gladiolus specialist of Meadowvale Farm, Berlin, N. Y., showed a splendid collection of gladiolus in two groups. This exhibit was the choice of the Groff hybrids, among which are many new and beautiful shades.

JAMES VICK'S SONS, Rochester, N. Y., showed a collection of their asters—perhaps the most notable varieties of these flowers that could be gathered together anywhere, as this firm has made a specialty of the aster for a great many years.

THE JULIUS ROEHRS COMPANY, Rutherford, N. J., were large exhibitors, occupying space in several different portions of the hall, and showing collections of palms in all the commercial varieties; a collection of orchids that, considering the time of the year, was beautifully flowered, among which were such varieties as *Cattleya Trianae*, *C. Bletchlyensis*, *Cynoches chlorochilon*, *oncidiums*, etc.; also collections of decorative plants, including such things as *panax* in variety, *crotons*, *marantas*, *dieffenbachias*, *Adiantum Parleyense*, variegated rubbers, *pendanus* and *dracenas* in variety.

W. K. HARRIS, Philadelphia, Pa., exhibited a collection of commercial plants, among which were *Bougainvillea glabra*, the variegated one; *Saintpaulia* in flower, *dracenas* in variety, *gardenias*, *crotons*, *ficus*, etc.

THE JANESVILLE FLORAL COMPANY, Janesville, Wis., made a showing of their new fern, *Nephrolepis Amerpohlii*, the plants they exhibited being in sizes varying from a thumb-pot up to a ten-inch pan, all of which plants, regardless of their size, showed the true character of the fern.

LAGER & HURRELL of Summit, N. J., exhibited a collection of orchids, established and unestablished. Among their plants in flower were *epidendrons*, *Lælia elegans* and *Oncidium Marshallianum*.

W. A. MANDA, South Orange, N. J., exhibited a collection of decorative and hardy plants.

THE CONARD & JONES COMPANY, West Grove, Pa., showed a beautiful collection of cannas, among which were many of their newer varieties.

JOHN LEWIS CHILDS, Floral Park, N. Y., made a very comprehensive exhibit of gladiolus in named varieties, among which we noticed several, in beautiful shades of color, which should make good commercial varieties.

CHARLES D. BALL, Holmesburg, Pa., showed a collection of *kentias*, *arecas*, *pendanus* and *cibotium* ferns.

LEMUEL BALL of Wissinoming, Pa., showed a nice, well-grown collection of palms, *crotons*, *dracenas* and *ficus*.

CARILLO & BALDWIN of Secaucus, N. J., showed a nice collection of commercial orchids.

GODFREY ASCHMANN of Philadelphia made a nice showing of his specialties in decorative plants, including *nephrolepis* in variety, *araucarias*, *cocos*, etc. Mr. Aschmann also had on view a very rare, old botanical work, in the German language, as a curiosity.

CHARLES EBLE of New Orleans, La., showed a few plants of his fern, a sport of *Nephrolepis Anna Foster*. This is seemingly a very decorative little plant, and would seem to be about to the *Nephrolepis Anna Foster* what *Adiantum gracillimum* is to *Adiantum cucunatum*. It looks very graceful and pleasing.

ROBERT CRAIG of Philadelphia made a splendid exhibit of *Ficus pandurata*, together with a general line of commercial plants, among which were such things as *pteris* ferns, *dracenas* in variety, *Aspidium nidus*, *cyclamen*, *crotons*—in fact, a general line of stock suitable for the commercial florist.

WILLIAM P. CRAIG, Philadelphia, showed a generous exhibit of the fern *Nephrolepis Amerpohlii*. The plants were extremely well-grown, and certainly gave the visitors a clear idea of what can be expected of this fern when grown at its best.

W. C. SMITH of Philadelphia exhibited a collection of *nephrolepis* in variety and *Ficus elastica*.

THOMAS MEEHAN & SONS, Dreshertown, Pa., showed quite a collection of their new varieties of *hibiscus*, which they fittingly call the "Mallow Marvels."

VAUGHAN'S SEED STORE, of New York and Chicago, had a fine display of well-grown spikes of *Princeps gladiolus*. It is a deep scarlet and much sought after both here and in Europe.

THE WM. H. MOON COMPANY of Morrisville, Pa., exhibited a collection of hardy decorative shrubs and trees, which included all the best varieties for landscape work.

THE CROWL FERN COMPANY of Millington, Mass., exhibited samples of their hardy cut ferns in the several varieties; laurel in loose bunches and in the roping.

W. W. RAWSON & CO., Boston, Mass.—An exhibit of some fifty choice dahlias, single blooms; also a collection of gladiolus, including Harvard and other varieties of merit.

H. J. SMITH, Hinsdale, Mass., showed cut hardy ferns, Christmas trees, and miscellaneous green material.

The election of officers took place on Thursday morning. J. G. Esler was appointed judge of elections, while J. D. Carmody, A. Fabrenwold, and — Phillips were chosen as tellers.

The result of the voting for the presidency was as follows: F. H. Traendly, 163; J. R. Freeman, 147. For vice-president: G. McClure, 263; W. W. Cutler, 40. P. J. Hauswirth was re-elected secretary with a vote of 289. Treasurer Beatty was also re-elected.

Mr. O'Mara, on behalf of the Horticultural Society of New York, invited the S. A. F. to take part in the international congress on Plant Hardiness and Hybridization to be held in New York on October 1, 2, 3, 1907.

A prolonged discussion on the change of name resulted in Mr. Pierson's amendment being adopted by a vote of 87 to 10.

If Congress approves, the organization will be known as The Society of American Florists and Horticulturists.

Mr. E. V. Hallock read his paper on Hardy Bulbous and Tuberous Rooted Perennials.

Telegrams of regret were sent to former President William Scott, of Buffalo, who is sick in bed, and M. H. Norton, who is suffering from the result of an accident.

Hardy Bulbous and Tuberous Rooted Perennials.

By E. V. Hallock, Queens, N. Y.

The most interesting, the least known, and the most misunderstood of flowering plants are bulbs. In the form of a bulb the latent flower is cared for more easily and longer than in any other form. Bulbs have been used as sustenance for armies, and the caladiums are now used to some extent by Spanish-speaking people, and through the South, as an article of diet.

This paper will not touch on what are known as Holland bulbs, but will embrace Summer-flowering and Winter-flowering bulbs that are used by the amateur and the professional. The profession of raising bulbs for market and for the amateur is vastly different from the profession of raising flowers for market. The person who raises the bulbs seldom sees the flower in so great perfection as the man who flowers the bulb.

Noted Amateur Bulb Growers.

There are many skillful raisers of bulbs among the amateur cultivators, and, in fact, I think many amateurs have come to a better understanding of the wants of many kinds of bulbs, and raise them in greater perfection, than any professional. These amateurs, however, do not cover a very wide range of bulbs.

Unless a person has seen the late Peter Hanson holding a bulb in his hand, rapt in blissful contemplation, slowly telling the wants of the bulb in cultivation, describing its habit and its flower minutely, he has no idea of what a hold on the affection a bulb could exert. Mr. Hanson's time and devotion were expended on the lily. He over-estimated its necessities. As I have always found, if you can get a bulb growing you can dispense with many of the directions for growing, but Mr. Hanson, no doubt, took as much pleasure in catering to the growth of bulbs as he did in seeing their flowers.

Mr. Huftelen is the most skillful and successful raiser of *Lilium tenuifolium* from the seed I have ever seen. I think his product exceeded for many years over 30,000 bulbs, of which we bought yearly, during that time, at least 20,000 bulbs at \$15 a hundred—rather good pin-money for an amateur on so little known a variety.

I think it is now about time I got down to the subject of bulbs and bulbous plants. I well know that a paper of this kind to a man who does not raise bulbous plants, in a commercial way, or as an amateur, is positively without interest. Of course any one knows that a person could talk all day on one class of bulbs, but I propose to skim the subject very lightly.

Some Useful Bulbs.

The most useful, valuable, and generally raised classes of bulbs, to my mind, are as under; their relative proportion of value is indicated by the order in which they are named:

Gladiolus; lilies; freesias; peonies (at present a highly worked fad); tuberose, for garden and export; iris, the Japanese and German, the forcing irises, and many beautiful species.

Professionally speaking, the introduction of so important a plant as the freesia—useful and beautiful as it is, so easily kept and readily flowered by both the amateur and the professional—was a fiasco, in the sense that no particular person or firm was responsible for its introduction, and no considerable amount was made by any one with this plant that is so generally used.

The amaryllis, to me, has always been an important family. The habits of most varieties can be so changed that they will flower outside in Summer or inside in Winter. I much regret that this plant is not more largely grown in this country.

The tuberous-rooted begonias have taken their place as Summer-flowering, as well as Winter-flowering bulbs.

August 24, 1907

Caladium esculentum is rather largely used as a Summer foliage plant.

Cannas are the most important of the rhizomatous class of plants. Every one knows a good deal about this class of plants. A canna society has even been suggested.

The cinnamon vine (*Dioscorea batatas*) has some value, particularly to the person who sells the bulbs. It is a clean, hardy vine, and one peculiarity of it is, that the root grows deeper and deeper in the ground the older it gets.

Gloxinias are being raised largely and sold very cheap. *Hyacinthus caudatus* first attracted attention in this country at the Philadelphia Centennial.

Incarnvillea is a coming plant, particularly as a garden flower, and undoubtedly can be forced. It has a large, fleshy, good-keeping root; foliage rampant, growth somewhat resembling a fern, with immense spikes of gloxinia-like flowers. If you plant five hundred stroug roots, the flowers will absolutely come in bloom the same day. It is claimed by some that the roots are hardy.

Madeira vine bulbs keep almost indefinitely and are, therefore, good bulbs for store trade.

Montbretias. Why this plant is so neglected, I cannot tell. It has many good qualities, is easier to raise, easier to keep, and will continue in flower much longer than the gladiolus. The sprays are exceedingly graceful and beautiful. The newer varieties are very striking. The bulbs are nearly hardy.

Oxalis. The Summer-flowering varieties of this bulb are largely planted and have some merit, while the Winter-blooming sorts, as *lutea*, *Bowiei* and the so-called Bermuda buttercup, are among the best of the Winter-flowering plants.

Peonies. Can I tell the members of the Peony Society anything about this plant? I think not; but, by the way, it just occurs to me to say that I have bought the past three or four years from the most reliable firms who raise peonies some twelve or fifteen of the best varieties, several plants of each kind, for my private garden. When they bloomed this year, should you take out four of the best colors there would be nothing worth speaking of left. *Marie Lemoine* is what I call a good peony.

Dahlias, as we very well know, are an important class of plants. These alone could be made the subject of a long talk. At one time there was a Dahlia Society; perhaps there is now. I will only touch on a few points. Many seedlings will bloom the first year. Many beautiful varieties of dahlias produce few flowers. With all the many varieties, a sort that will commence to flower early and continue through the season, with a profusion of bloom, and do it every year, will always have some value. It is a well-known fact that the single sorts are the most reliable bloomers and produce the most flowers.

Notwithstanding the fact that bulbs and bulbous and fleshy-rooted plants form the most important division of flowers, they have never had such close attention from our professional class as cut flowers, simply because there is not the money in them. They are slower to produce, and the outlet is through smaller channels, than if they belonged to the more profitable branches of the profession.

Two Important Points.

There are two points I wish to bring to the attention of the profession and the vendors of products.

We all catalogue the different kinds of bulbs as though they were ready for delivery at the same time, and in most cases we try to deliver them. Is it not about time we should state after the description of certain bulbs that they can only be delivered at such and such times? And should not the buyers be taught to wait until the bulbs are in condition to deliver, instead of insisting that they all be delivered at once?

Is it not about time that reliable firms should state that such and such varieties will never bloom, or, if in a very rare case they do flower, that they are not good for anything? Millions of *Anomatheca cruenta* have been sold. Should five out of a hundred of these bloom, as poor as the flower is, it would be a large percentage. Seedling gladiolus has been sent to this country for this plant. How many people here have seen *Lilium Humboldtii* and *Washingtonianum* and *parvum* bloom? I have never seen twelve spikes of these varieties of lilies outside of California, and I have sold tens of thousands of the bulbs, and exported a number each year. This will serve for an evening-up process.

Some Good Lilies.

Lilium pardalinum from California is a good-keeping, free, and sure-flowering lily. Ninety-five per cent. of the bulbs should bloom.

Lilium Parryi is a very handsome yellow variety from California and is not difficult to bloom. The California bulbs, like *calochortus*, *brodiaeas*, *erythronium* and *comassias*, are all beautiful things and really can be flowered if their requirements of cultivation are met.

On the line of *Lilium Humboldtii*, I will ask what is

the use of selling *Lilium candidum* in the Spring? Yet many do it.

I suppose it would be well to mention what I consider the most valuable varieties, or species, of lilies. The auratum and varieties are a magnificent class and very popular with most amateurs. You may as well say that the bulbs of the auratum cannot be grown in this country, but are imported each year. The varieties of *speciosum* I consider one of the most reliable sorts for the amateur to plant.

Double tiger and single tiger and our native lilies, *canadense* and *superbum*, are being used in greater numbers each year, on large estates and in gardens of all kinds. They are low in price, reliable bloomers, and very graceful, particularly *canadense*.

The elegans—or *umbellatum*, or *Thunbergianum*—are very reliable bloomers, easy growers and good keepers, and many varieties are very handsome.

Of course, we could easily talk all day on the lily family, but we shall have to stop somewhere. *Lilium candidum* and what is known as the Bermuda Easter lily are the most important ones for florists' use. *Lilium candidum* should be planted outside the latter part of September. To me it is a more beautiful lily than the Bermuda Easter lily. There are several varieties of *candidum*, but the broad scale, large bulb variety raised in the north of France is the only one worth forcing. There has been more said, and more can be said, on the Bermuda Easter lily than ten such papers

Frank H. Traendly,
President-Elect S. A. F. O. H.

as this would contain. I think the subject has been pretty well thrashed out up to the present time.

Many varieties of lilies have been dropped from the lists of late years, which is probably a good thing. Many sorts could be furnished in good condition if the purchaser were willing to pay for the necessary trouble, and take and plant the bulbs at the proper time.

Lilium philadelphicum has almost disappeared from our lists. It can be grown and flowered, but the bulb is so small and the scales so open, that not one in a thousand will bloom.

Liliums Catesbaei and *Grayii*, also native lilies, are seldom seen except in botanical collections.

Fallacies in Cultivation.

There are some fallacies in cultivation. Many directions for growing different varieties of plants were put in type a number of years ago, when things were thought to require very careful and necessary cultivation. There is a lot of this type that seems to be set-up at the present time.

I will take as an illustration *Iris Kämpferi*. In 1878 we bought Professor Pringle's entire stock of this plant. There were many very fine varieties, and many of the kinds are sold to-day. We noticed that the clumps when being sub-divided for planting had a large center that was entirely dead or dried up; in many you could put your hand right through the center. This came from leaving the clumps too long before sub-dividing. We were told that this plant required damp low ground, and if it could be covered by water occasionally it would

be better. We planted them on common Long Island plains' soil, two feet of soil above clear sand, fifty feet above water. William Falconer, in describing our plantation of iris, said he walked "waist deep" through the plants. When transplanting a field of these, we used a cart and wheelbarrows, and sub-divided the clumps with an axe. One year we left several hundred plants along a driveway on top of the ground, when transplanting in the Spring. In the Fall these plants were alive. Personally, I don't think it is necessary that *Iris Kämpferi* should be flooded with water to produce a good growth.

As this subject seems to be large, and it is necessary and proper that this paper should be short, it is pretty difficult to give anything of real value. But the subject may excite an interest in more people than have ever given it a thought before, and I assure you that it will furnish you a new interest so far as you desire to go.

Bulbs from Arid Districts.

Bulbs represent one of the most wonderful provisions of nature in the vegetable kingdom. Those grown in arid or desert countries conserve their vitality intact longer than bulbs grown anywhere else. The Mexican bulbs, grown mostly in arid wastes, will remain in perfect condition when kept out of the ground a year. I believe that bulbs of *Amaryllis formosissima* will remain two years out of the ground in good condition.

It seems to be a provision of nature to preserve the life of a plant by building around the germ a bulb and this is one of the most convenient and compact of protective forms.

The most striking fact about all bulbs is their endless variety and great beauty, often extending to magnificence. It is this which gives fascination to the subject and makes the raising of bulbs a labor of love.

President-Elect F. H. Traendly.

Frank H. Traendly, the newly elected president of the S. A. F. O. H. was born in Brooklyn about 40 years ago, and is a life-long resident of that city. Mr. Traendly has been a florist all his life, has twice filled the office of president of the New York Florists' Club, and has served on the board of directors of the society which has just elected him to the presidential chair. He is an indefatigable worker, and it is a foregone conclusion that he will spare no efforts in his endeavor to make the year 1908 one of the most prosperous in the society's history.

American Carnation Society.

There was a meeting of the American Carnation Society on Thursday afternoon, August 22, at which the following tentative program for the coming Washington meeting was outlined. The meetings will take place on January 28, 29 and 30, 1908. The first day will be entirely devoted to the exhibition until 7:30 p. m., when a short business session will be held for the reading of the president's address and the reports of the secretary and treasurer. On the following morning there will be a session at about 9:30, when the judges' reports, unfinished business and a paper by S. S. Skidelsky on "What the Grower should Expect from the Introducer of a new Carnation." On the afternoon of the second day there will be a combination meeting of the Carnation Society and the American Breeders' Association, which will be presided over by the Secretary of Agriculture Wilson. President Roosevelt will open the session. On this occasion the Carnation Society will be the guests of the American Plant Breeders. In the evening of the second day there will be another combination meeting, when the Breeders' Association will be the guests of the Carnation Society. Papers will then be presented by both organizations on the subject of "The Breeding of Carnations." On the morning of the third day, a paper will be read by Irving Gingrich on the subject of "Indoor Culture of Carnations and the Best Methods of Getting Paying Results." Dr. Galloway will also read a paper on the soil tests for carnations being conducted at the greenhouses of the Bureau of Plant Industry. On the evening of the last day, a banquet will be tendered to the American Carnation Society by the Washington Florists' Club.

OUR issue for next Saturday, August 31, will contain further reports and illustrations from the Convention City.

Advertisements will be received until Noon on Wednesday. Send your copy earlier if possible.

Bedding Plants, Where and How to Use Them.

By Alois Frey, Chicago.

Riding through parks, along boulevards and country roads, speeding in trains through villages and towns, all over the country, passing the magnificent palaces of the wealthy with their beautiful lawns and the humble cottages of the poor surrounded by modest yards, everywhere the eyes meet the brightness of flowers and richly colored plants, which at once impress upon us the popularity and universal love for bedding plants.

There is such a large variety of these plants from the smallest annual, like portulaca, to the stately subtropical plants, and also the perennials must not be forgotten, for they figure greatly in various effective displays. Then we have tulips, hyacinths, daffodils, etc., for early Spring flowering. No garden need be without flowers from the time the dainty little crocuses peep out of the snow until late in Fall.

No matter how small the purse, enough seed can be purchased to obtain a very harmonious and artistic effect, as well as a continuous season of flowers. It is not the means of being able to procure a large number of choice plants, but it is the good taste and skill of the designer, who understands how to make an arrangement, to harmoniously and discriminately combine the various colors with immediate surroundings, no matter how inexpensive, that appeals to the lover of nature with all its art and beauty, and this is what we are striving for more and more every day.

The average florist who deals in bedding plants should by all means give this particular subject thorough study, in order to be able to assist and educate his customers, who in most cases appreciate such advice and instructions in regard to arranging and planting their gardens so as to present a beautiful picture. It requires just as much artistic judgment and ability to accomplish this, as the painting of a picture on canvas. The designer must show individuality and know exactly what proportions the plants will attain, how soon they will be fully developed, also how the colors will blend together; in fact, he must see the finished picture before him when he designs his plans. The sooner we commence to understand how to arrange these beautiful gifts of nature better, the sooner we make a large majority of the people of our grand nation happier. We have everything to do it with; now let us understand how to do it.

To cover the subject best I have divided it into two chapters, as the title of this article indicates; "Where to use them and how to use them."

Proper Selection of Place First Essential.

The proper selection of the place for the floral display is first to be considered; a place where it will be properly effective is just as important as the execution of the planting, as this takes a definite part in the entire scheme. Locality, building and size of grounds must be taken into consideration. The smaller the place, the simpler should be the display. It is so easy to overcrowd a small front lawn, whereby the proper effect is entirely lost. Large places in proportion will have more elaborate plantings and the artist will have occasion to plan special features such as courtyards, parterres, sunken gardens, Italian gardens, etc.

The front of a building is almost always selected for the display, which is generally formal, and, if the space is limited, a narrow border of plants adjoining the building will be sufficient, with perhaps one or two beds on the lawn, proportional to the latter. There should always be plenty of green grass to offset the beds. The backyard, as a rule, is very much neglected and in many instances unsightly; here I would advocate to have a grass plot with a border plantation. How much more cheerful one would feel looking into a well kept yard than at a lot of rubbish.

Places of larger dimensions with their beautiful landscape effects must be treated more in detail; here we have an opportunity to lay out in connection with residences, conservatories and public buildings, courtyards, parterres, rose gardens, etc., which, as a general rule, are part of the architectural scheme and in harmony with the style of the building. In the last few years Italian gardens have again become quite popular and these especially set apart from the rest of the landscape must be treated by themselves; they are very set and usually contain considerable color well blended together.

Besides the forms of special treatment already mentioned we also have other flower gardens, which give an opportunity for a larger variety of flowering plants, in the line of annuals, roses and perennials, etc., which properly arranged make a brilliant effect without interfering with the more subdued and restful landscape.

Parks and Factory Grounds.

Public parks especially, are a great field for floral displays, and although some authorities on landscape gardening do not favor them, I believe the public fully appreciate flowers; though the utmost care must be taken not to let them run wild all over the park, but keep them in the vicinity of buildings or entirely away and screened off from the quiet landscape. Boulevards also and small squares can be most admirably brightened with the ornamentation of flower beds.

Last year at the convention in Dayton, Ohio, all our members had the rare opportunity of seeing how the surroundings of a factory can be laid out in a most praiseworthy manner; there our bedding plants brighten daily the minds of thousands of people.

Alois Frey, Essayist,
S. A. F. O. H., August, 1907.

Flower Boxes.

How many people are not fortunate enough to possess a home with a lawn and flower beds! There is no necessity to deprive themselves of nature's gifts, but they can enjoy them in a more modest way, by keeping flower boxes, which, no matter how obscure and unassuming the dwelling, give it a home-like air and enliven the aspect of many an otherwise somber home.

On the other hand, many beautiful residences rely solely upon piazza boxes for their floral display and exquisite results can be obtained in this manner.

In Cemeteries.

Finally a few words should be devoted to the homes of our loved dead. There is nothing more soothing to the grief-stricken heart than the sight of well kept cemeteries, bedded with appropriate flowers speaking the language of peace and rest.

Suggestions for Using.

These are the many and varied ways to which the bedding plants lend themselves; there still remains another problem to solve, namely "how to use them." Here skill in artistic arrangement and harmony of colors is put to a severe test.

Starting with the beginning of the season, the various Dutch bulbs are the first ones to attract our attention. They are easily cultivated and therefore most appropriate for the amateur. Exquisite effects and color schemes can be carried out; although their duration of bloom barely reaches more than four weeks, I think they make the most striking display of the season. Only the purest and clearest colors should be selected. Off colors and the peculiar magenta shades are hard to match with pure colors and are best planted by themselves, or far enough distant so as not to detract from them. Mixed beds containing a number of varieties look very well, but beds of all one color show by far better taste. Where a number of beds are planted, greater attention must be given to work out a harmonious color scheme. Pink, white and light blue blend ad-

mirably; next comes yellow, then red and yellow and the various reds. It is a great deal more pleasing to the eye to let the colors run into each other by degrees than to create too big a contrast. Colonies of crocuses, snowdrops and scillas, singly and several together, irregularly scattered on the lawn, look very charming.

Pansies, bellis and myosotis are also extensively used. Although the pansies come in a multitude of colors, they are mostly used mixed and often with *Bellis perennis* as a border. Little advantage has been taken of working out color schemes with pansies and yet if we stop to study their rich tints, tints which I think cannot be found in any other plant, the possibilities are wonderful.

Following these come the Summer plantings with cannas, geraniums, heliotrope, begonias, petunias, coleus, acahyphas, abutilon, salvias, verbenas and a great number of other plants too numerous to be mentioned.

Almost all bedding plants thrive and flourish best in full sunlight except tuberous begonias and fuchsias, which do best in half shade, where there is plenty of indirect light; other plants, like some of our hardy palms—*phoenixes*, *latanias*, *chamærops*—the various fibrous rooted begonias, like *semperflorens*, *Vernon*, *Schmitti*, and fancy leaved *caladiums* do well under both conditions.

The soil for cannas, musas, *ricinus* and *Caladium esculentum* should be very rich, their growth will be so much more luxuriant; while the rest of the plants, like geraniums, begonias, verbenas, salvias, cuphea, ageratum, etc., also need enriched soil. Care must be taken not to use too much fertilizer; this will result rather disastrously and the plants will show an abundance of foliage in place of flowers.

Bedding plants before set out in their Summer quarters should be properly hardened off, they should be exposed freely to the air and sunlight at least two weeks before the planting season commences. Nothing serves this purpose better than the hotbed, not matter how much some of the growers are opposed to this sort of cultivation. It is true, the cost of labor is somewhat higher, but the superior results obtained fully justify the expenditure made, and plants hardened off in this manner suffer but very little in transplanting.

We have plants of every desirable height, from two inches up to eight feet, some with a wealth of flowers, others again with richly colored foliage, some with coarser, others with more graceful features.

Consider the Sky Line.

In the arrangement of planting one great object, which is one of the great principles in landscape gardening, is in many cases lost sight of, namely, the consideration of the sky line. Especially in large border plantations this should be applied; here we have tall plantings broken with lower ones, until they finally run out to very low plants at the edge. In fact, every bed, as well as in larger displays, the relation of one bed to the other should be treated in this way. While the beds are all more or less formal, they should not appear stiff; every plant should have plenty of room for full development and where a number of varieties are used in one bed, the tall ones should be massed, but here and there one should rise above the lower ones, so as to present a loose and pleasing arrangement; in this manner every plant will show its valuable points more advantageously. For example, a bed planted only with *Ficus elastica* would look very stiff; but intermingled with the graceful *Grevillea robusta* and a border of ivy, it would lose this stiffness and present a very pleasing effect. This shows that by careful study we can improve the bad points of one plant with the good ones of another.

Particular stress should be given to the selection of the various tints, blending richly colored foliage tastefully with the more gorgeous tinted flowers, so as not to create too big a contrast. Beds of solid colors, alternating with some of less contrast, will harmoniously tie the entire display together and this will help greatly to achieve the desired plan. It is in the designer's power to present a very brilliant or a very quiet picture according to the scheme that is required.

Quiet and restful effects are worked out by using tints of various blues, white and gray, variegated, glaucous and bronze foliage with a little touch of red; and *Anthericum vittatum* var. *punica*, *Granatum pumila*, *Abelia rupestris*, *heliotrope*, *Plumbago capensis*, *cœrulea* and *alba*, *Phygellus capensis*, *santolina* and *Abutilon Savitzii* lend themselves well for this purpose.

Much more could be said on the subject, but, in my opinion, one runs no risk of failures by adhering to the points laid out in my modest essay.

Hardy Shrubs; How to Plant and Treat Them.

By Samuel C. Moon, Morrisville, Pa.

I acknowledge without much preamble the distinguished compliment of being invited to address this intelligent audience on a subject with which you are already familiar.

I will assume that we all understand by the term "hardy shrubs," the class of perennial, bushy plants, deciduous and evergreen, though largely deciduous, which are used for ornamenting lawns and gardens. Though most are of moderate size when planted, some of them eventually attain the proportions of small trees. The term "hardy" will vary with the location of the planting, but will not materially affect the suggestions here presented. How to plant them will be considered in a twofold light; first, the distribution and arrangement of the plants on the lawn; second, the method of setting the roots in the ground.

Planting in Masses Most Effective.

As a general rule, the most effective way to plant shrubbery is in masses, with not too much variety in one group. Professor Bailey says: "The shrubbery masses should be placed on the boundaries, for it is a fundamental concept of landscape gardening that the center of a place should be open. In most places the mass or border planting should be the rule, and the isolated specimens the exception; but, unfortunately, the rule is usually reversed." It is easy to see conspicuous evidences of the truth of these statements in almost any suburban neighborhood in examples of good and poor arrangements.

Many planters seem to think it desirable to have a well-developed plant of as many varieties as can find accommodation on the lawn in order that they may enjoy each plant individually as it passes through its varying changes of foliage, flowering, fruitage and leaflessness throughout the year. Such an arrangement may be appropriate for an arboretum or trial grounds, and there are special charms in such a collection of shrubs as each successively comes into bloom. But as the blooming period of most shrubs is only from two to four weeks, the beauty of foliage hues, both in the greenness of Summer and in Autumn colorings, is an important consideration in arrangement of shrubbery groups. The introduction of bright colored foliage, such as golden elder and philadelphus, variegated weigelia, purple-leaved plum and hawberry, etc., is occasionally done very effectively, but more frequently the result is a conspicuous blotch amid the verdure. The handling of bright colors always requires a high degree of artistic skill, or the result will be displeasing to the most refined tastes, affording valuable object lessons to the student and gardener, but it is not the way to produce the most effective results in lawn adornment.

To quote again from Professor Bailey's essay on shrubbery: "Plants scattered over a lawn destroy all appearance of unity and purpose in the place. Every part of the place is equally accented. The area has no meaning or individuality. The plants are in the way. They spoil the lawn. The place is random."

In large grounds the shrubbery border should be composed of successive masses of several plants of one species together, followed by another harmonious group of another sort, the border of the two groups interlacing with each other. Let the transition from one variety to another be gradual—not too sudden—and let the groups be not too large or too exclusive. An odd plant, taller or different from the others, may occasionally stand out or above its companions very effectively; of course, tall growers at the back flanked with smaller and low branching species in the foreground.

It is not advisable to mix evergreen and deciduous shrubs in the same group. A few shrubs seem to be admirably adapted for filling in plants. Tamarix is one of these which may often be used to relieve a too monotonous sky line, or to relieve formality or to add variety in foliage effect, it being a tall, neat, inoffensive plant which will harmonize with almost any other one. For low-drooping shrubs to be used for carrying foliage from the grass lawn up to taller plants, few are more effective than *Spiraea Thunbergi*, *Stephanandra*, *Rhodotypus* and *Berberis Thunbergi*.

Knowledge of Plant Habits Essential.

The outlines of shrubberies should not be too straight or formal, but irregular and natural. A skilled florist or gardener should almost conceive these ideas without instructions, but definite knowledge of the habits of the different shrubs to be employed is essential to enable one to make a planting which will develop consistently as they increase in age and size. That such information can only be obtained successfully by observation and experience is evidenced by the very large number of inharmonious combinations that are seen in shrubberies all about the country. Probably *rhododendrons*

are treated injudiciously and are a source of disappointment and waste of money more than any other shrub, largely through misunderstanding. *Rhododendrons* are sociable individuals, liking the companionship and protection of other plants. Their fine, fibrous roots delight in cool, moist soil, but do not want to go very deep in earth to find these conditions, and are particularly sensitive to excessive heat or drought in Midsummer. A situation where the shadows of large trees or buildings will shield midday sun in Summer and Winter, and from severe winds, is an ideal position. A perpetual mulch of leaves renewed each Autumn, and with a light coat of stable manure on top of the leaves to keep them from blowing away, is most congenial to them. Mulching and shelter from wind are the most essential conditions.

One of my most satisfactory plantings of the *rhododendrons* was a small bed at the south corner of a residence. They were wanted in this position, but the owner had been told that they would not succeed in a southern exposure. Recognizing the fact that a large pear tree, southeast of this bed, would afford midday shade, and groups of large forest trees and neighboring buildings not far away would afford shelter from wind, the location was considered eligible. The natural soil was quite sandy, but by generous excavation two feet deep, and filling with muck and vegetable mould taken from open ditches on a nearby farm, and a few barrels of Jersey peat, a soil was prepared which proved suitable. The *rhododendrons* were planted four or five feet apart, and all vacant spaces filled in with *Mahonia aquifolia* and *M. japonica* and the heath *Arbor vitæ* (*Thuja ericoides*), until the bed was a solid mass of foliage, effectually shading the stems of the plants and the ground around them. The ground was then covered with a mulch of leaves a foot deep, with instructions to keep the mulch there all the time, renewing it every Autumn, and that as the *rhododendrons* grew and spread, the nurse plants should be cut back or removed. This planting was made nine years ago, and has been successful.

Treatment of Small Yards.

A most difficult problem in shrub arrangement, more frequently met with in the practical experience of florists and jobbing gardeners than in the laying out of large lawns where general rules of landscape gardening might be applied, is the requirement of owners of small yards, who want one dozen of their old favorites set in a bed or along a garden fence. Perhaps it will be a lilac, *forsythia*, *snowball*, *cydonia*, *weigelia*, *spirea*, *deutzia*, *chionanthus*, *dogwood*, *hydrangea*, *purple filbert*, or other such incongruous neighbors. He who can arrange such a group as this tastily and so it will continue attractive throughout the year, is a master in the art of shrub arrangement. Hopeless as this task may seem, there are plants which we may always look to for help in such emergencies. The slender sprays of feathery foliage of the *tamarix*, the graceful, drooping branches of *Spiraea Thunbergi*, *Stephanandra flexuosa*, the single-flowered *Kerria*s, including the white form known as *Rhodotypus Kerrioides*, with its crinkled foliage, are all gentle, inoffensive subjects willing to help fill up a gap and hide from public gaze the awkwardness of their fellows wherever such service is needed. By adding a few plants of this slender species, the stiffness of a group may be much relieved and some of its awkwardness softened.

A Valuable Lesson.

One of my most valuable lessons about planting was learned in walking through a lawn with an old gardener who remarked: "The man who planted this place understood his business. See, every tree is set on a little hill or mound." The next time you have the opportunity, compare the difference in appearance of a lawn where trees and shrubs stand in mounds slightly above the level of the surrounding lawn and other plantings where the lawn level is carried up to the roots of the plants, or, as is sometimes seen, where plants stand in a depression. See which you like best, and then judge of the wisdom of the above suggestion.

A bed or border for shrubbery should be heavily manured, and dug or powed deeply and prepared as carefully as for corn or potatoes, or any other crop which is wanted to grow well. If I tell you to not ram the roots into a little hole in the ground, but to set them on a little mound, you will think I am joking, but that is pretty nearly what I mean.

Big Holes Necessary.

It would seem as though every gardener should be tired of hearing the trite advice to dig big holes for shrubs and trees, but the innumerable evidences of violations of the rule show that many planters have not yet learned this lesson. Some shrubs, as *forsythias*, *spiraes*, *deutzias*, etc., may flourish if stuck in the ground any way, but many others need the best of care to insure success, and carelessness in setting often discredits good material and a job which in other respects may be all right. Dig holes larger and deeper than the roots require, and larger in diameter at bottom than at top, then fill in some of the best soil obtainable, making

a little cone or mound in the center of the hole. Then spread out the roots of plants around this mound of earth so that all the roots tend downward rather than horizontally or upward. Fill in the richest soil first, tramping firmly as the filling proceeds. Remember Peter Henderson's chapter on the "Use of the Foot in Planting." Also bear in mind that it is results that count, and five minutes spent in care of planting may mean one or two years saved in attaining the desired end.

Manuring, Mulching, Pruning.

Under the heading "How to Treat Shrubs," I will allude to manuring, mulching and pruning. After planting apply a good mulch of manure to conserve moisture, furnish nourishment and to suppress weeds. An annual mulching of leaves, with coarse manure to prevent their blowing away, is beneficial to every class of plants; and mulched or fallow ground is better than grass around the stems.

Most deciduous shrubs should be pruned severely when planted. *Rhododendrons*, *azaleas*, *andromedas*, etc., are usually transplanted with balls of earth and do not need much pruning, but where it is useful it won't hurt them. The annual pruning is a most important part of the care of shrubbery, and the point most difficult to give instruction on by written directions. It is an art which must be learned by practice and observation. The general rule to trim early bloomers as soon as they are through flowering, and Midsummer or late bloomers in Winter, contains a suggestion, but the indiscriminate cutting back of every shrub every year is a great mistake. When a shrub seems weak and needs strengthening, cut out declining shoots and apply manure around it. When one is too vigorous and rampant, remove or shorten superfluous shoots to reduce to symmetry, with as little mutilation as possible. When one has become overgrown and dilapidated in appearance, cut back a part, or perhaps all of its unsightly stems severely—probably at the ground—and allow new shoots to restore the beauty and vigor of youth.

The only way to learn the art of trimming shrubbery is by observation and practice and the exercise of judgment. A safe, general rule is that, whenever you see a twig or branch which needs removing, cut it off on sight, regardless of time of year or other conditions; and when you don't see anything that needs removal, don't prune it, regardless of rule or custom; and for a negative rule, never shear a shrub with a hedge shears. The shearing of lawn shrubs into bald pates, suggestive of convicts or sheared sheep, displays ignorance of plants and depravity of taste. To the last general rule I make exception for topiary gardening, but the creation and care of topiary gardens and of formal specimens is a special art for which all of the above suggestions would have to be modified.

If my feeble sentences may be suggestive of useful afterthoughts in your minds and in mine, they will have accomplished all that I can hope for them.

Ladies' Auxiliary of the S. A. F.

The first regular meeting of the Ladies' Auxiliary of the S. A. F. was held in the Hotel Walton on Wednesday, August 21, at 10 o'clock a. m. The meeting was opened by the president, Mrs. Vesey, who stated in brief that a year ago, as all knew, it was decided to organize the ladies into a club or body in order to get better acquainted, and by having a badge or pin, it was thought they could easily be identified as members of the organization. As they did not wish to be a separate association from the S. A. F., but an addition to it, the pins chosen just had an "L" added.

The secretary then called the role, and reported that up to the present time eighty-eight members had been enlisted, with prospects of many more joining.

The treasurer reported to the effect that there were now \$79.50 in the hands of the club.

The next subject to be discussed was the rules and by-laws. The president stated that they had been advised by the members of the S. A. F. that no special benefit would accrue from taking out a charter, as they would never have any amount of money that would need investing and their object would be fully covered by the organization of a society or club. A committee of five was then appointed to formulate the rules and by-laws of the organization, consisting of Mrs. Poehlmann, Mrs. Herr, Mrs. Swayne, Miss Fulmer and Mrs. Wolff.

Election of officers for the ensuing year followed. A motion was made by

From New York to Philadelphia.

When the train pulled out of Jersey City for Philadelphia on Tuesday morning, a little after 10 o'clock, about 120 delegates were aboard, the New York crowd being joined by 24 or 25 of the Boston florists. The party en route were extremely well entertained, thanks to the house committee of the New York Florists' Club Messrs. J. B. Nugent, R. Schultz and W. Rickards. These three men worked like beavers all the way, and everybody had all the refreshments they required, the ladies in particular being well taken care of.

Among those on board the train were: F. H. Traendly and wife, New York. G. Asmus, Chicago. E. S. Enders, Chicago. J. V. Phillips, wife and daughter, New York.

R. Whitman and wife, Hoboken, N. J.
 E. Baumann and wife, Hoboken, N. J.
 J. H. Fiesser, North Bergen, N. J.
 E. Baumgarten, Hudson Heights, N. J.
 H. P. Wagner, Mt. Vernon, N. Y.
 A. T. Boddington, New York.
 A. F. Wood, Fishkill, N. Y.
 F. R. Pierson, Tarrytown, N. Y.
 B. Hammond, Fishkill, N. Y.
 L. B. Caw, New York.
 J. W. Withers, Jersey City, N. J.
 L. H. Weise, Jersey City, N. J.
 John H. Kemper, Brooklyn, N. Y.
 D. McKenzie, Brooklyn, N. Y.
 H. Weston and wife, Hempstead, N. Y.
 A. H. Langjahr, New York.
 W. C. Krick, New York.
 J. Thielman and wife, Brooklyn, N. Y.
 Peter Wagner and wife, Brooklyn, N. Y.
 P. Kessler, New York.
 M. J. Peake, Buffalo, N. Y.
 L. Powell, wife and son, Millbrook, N. Y.
 F. L. Moore and daughter, Chatham, N. J.
 J. T. Schuneman and wife, Baldwin, N. Y.
 A. M. Henshaw and wife, New York.
 Miss C. Fichtl, New York.
 Miss E. Cooper, New York.
 H. F. Woods, Boston.
 A. Dallas, Waterbury, Conn.
 W. E. Pemberton, New London, Conn.
 J. B. Nugent, New York.

 H. M. Robinson, Boston, Mass.
 W. W. Wheeler, Concord, Mass.
 P. O'Mara, New York.
 W. Duckham, Madison, N. J.
 A. Herrington, Madison, N. J.
 A. Wilson, Summit, N. J.
 Jacob Hauck, Bloomfield, N. J.
 W. Krick, Brooklyn, N. Y.
 J. Massman, Orange, N. J.
 J. Margolis, Boston, Mass.
 W. H. Johnston, New York.
 S. J. Reuter, Westerly, R. I.
 L. J. Reuter, Westerly, R. I.
 E. Leucke, Westerly, R. I.
 Chas. Koch, two daughters and son-in-law, Brooklyn, N. Y.
 H. Turner, Port Washington, N. Y.
 J. McManus, New York.
 Julius Roehrs, Jr., Rutherford, N. J.
 O. V. Zangen, Jersey City, N. J.
 C. H. Totty, Madison, N. J.
 R. Schultz, Madison, N. J.
 W. Rickards, New York.
 J. Shanley, Brooklyn, N. Y.
 C. Webber and wife, Lynbrook.
 C. B. Weathered, New York.
 W. A. Manda, South Orange, N. J.
 S. S. Butterfield, New York.
 J. A. Faulkner, New York.
 J. T. Lovett, Little Silver, N. J.
 Alex. Wallace, New York.
 U. G. Scollay and son, John A., Brooklyn, N. Y.

The S. A. F. Shooting Match. Wednesday, August 21.

This annual event took place at the grounds of the Florists' Gun Club at Wisconsin, with the following results:
 First event, for five prizes, presented by the Philadelphia Florists' Club, high guns to win:

G. O. Bell	24
W. B. Westcott	23
W. K. Harris	23
W. A. Hammond	22
H. Brown	21
G. Anderson	21
E. W. Stevenson	16
T. C. Stevenson	16
W. Wheeler	15
G. Burton	15
A. Rasmussen	12
Edw. Reid	11
J. Adlburger	9
R. McLennan	6

Second event, 25 targets, handicap added; for three cups, donated by the C. J. Rainear Company, manufacturers of pipe fittings, Philadelphia and other prizes donated by the local club:

RAINEAR CUPS.

H. Brown	25
J. Burton	25
E. Stevenson	25
SHOOT-OFF, 25 BIRDS, ADDED HANDICAP:	
H. Brown	25
J. Burton	24
E. Stevenson	20
PHILADELPHIA FLORISTS' CLUB PRIZE:	
E. Latz	24
E. Reid	24
A. Rasmussen	24
C. D. Ball	24
G. Anderson	24
W. B. Westcott	24
G. O. Bell	24
W. A. Hammond	23
W. K. Harris	20
E. W. Stevenson	19
W. Wheeler	19
R. McLennan	13

SHOOT-OFF, 10 BIRDS, ADDED HANDICAP:
 E. Latz..... 10
 E. Reid..... 8
 A. Rasmussen..... 7
 C. D. Ball..... 6
 Messrs. G. Anderson, W. B. Westcott and G. O. Bell withdrew.

Florists' Hail Association of America. Secretary's Report for Year Ending August 1, 1907.

The number of members comprising the Florists' Hail Association on August 1, 1907, is 1,461, insuring glass as follows:

	Single thick glass.	Double thick glass.	Extra one-half single thick glass.	Extra one-half double thick glass.	Extra whole single thick glass.	Extra whole double thick glass.	Amount paid for losses from Aug. 1st, 1906, to Aug. 1st, 1907.
Arkansas	14,970	3,909					\$9.31
Colorado	434,980	332,716	118,206	58,799	220,967	373,239	210.22

South Carolina	2,400	12,400					
South Dakota	32,045	22,407			19,825	1,000	213.57
Texas	80,246	216,694			10,808	33,988	103.05
Tennessee	4,264						
Virginia	44,955	77,859			1,450	28,063	
West Virginia	39,640	4,650			16,360		
Wisconsin	107,352	339,042	6,839	5,475	13,172	16,138	71.89
Wyoming	1,565				1,565		
Washington	12,910						
D. of Columbia	1,317	6,671	400	3,888			
Canada	4,082	42,822			3,082	39,822	
British Columbia		4,162				4,162	
Total	5,692,070	15,540,241	754,993	1,840,066	1,041,228	4,246,271	36.34

The above is equivalent to an insurance upon 27,197,867 square feet of glass.

The total receipts for the year ending August 1, 1907 as per Treasurer's report have been \$20,316.35.

The total expenditures as per Treasurer's report have been \$11,169.90.

The cash balance at the close of the year is \$24,296.94, of which \$348.98 belongs to the Reserve fund, and \$23,947.96 to the Emergency fund.

The Reserve fund now consists of \$17,400.00 securely invested and \$348.98 cash in hand, making a total of \$17,748.98.

Seventy-three losses, representing a breakage of 36,982 square feet of single thick glass and 27,331 square feet of double thick glass have been paid during the year.

1,100 losses have been adjusted since the organization of the Association, in-

volving a total expenditure of a little over \$105,000.

The 10 per cent. assessment on hazardous risks netted the Treasury \$38.52.

The following table shows losses as reported to the Secretary for the past 20 years.

It is with a great deal of satisfaction that your Secretary is able to call attention to the fact that the reserve fund is rapidly approaching that point where it will be amply able to meet the largest possible individual loss. And the growing stability of the Association proves, that the projectors of the scheme, builded perhaps better and stronger than they realized, a decade ago.

The only liabilities of the Association are ten losses which will aggregate about \$600, and of which no proofs have been filed.

The Secretary again wishes to call attention to the fact that a duplicate of any loss will be furnished to any member of the Association upon application.

The false economy of tempting Providence was forcibly illustrated at Newburg, N. Y., about a month ago, where many thousand feet of uninsured glass was reduced to scrap, by a violent hail storm.

The Officers and Directors especially refer the members to the report of the Treasurer, believing that a careful perusal will secure an approval of their stewardship.

JOHN G. ESLER, Secretary.

S. A. F. O. H. CONVENTION

Thursday Afternoon.

H. Bayersdorfer & Co.'s Reception.

On Thursday many hundreds of the trade, ladies and gentlemen, availed themselves of the hospitality of the well-known supply house of H. Bayersdorfer & Co., and after an inspection of the immense stock parlock of the good cheer spread for the comfort of the inner man.

Bowling Tournament.

The team bowling on Thursday resulted as follows:

Philadelphia	2444
Baltimore	2290
Washington	2173
Chicago	2151
Cleveland	2111
New York	2080
Detroit	1753

Owing to going to press at our regular hour full particulars of the bowling are reserved for the next issue.

Ladies' Entertainment at Willow Grove Park.

On Thursday afternoon about 250 ladies were taken to this famous entertainment resort as the guests of the Philadelphia Florists' Club. Music was provided by Sosa's band. A superb luncheon, beautifully decorated tables, a clear sky and an enjoyable temperature all combined to make the outing one never to be forgotten by those whose pleasure it was to be there. Fuller details will appear in our next.

Friday.

The delegates will be the guests of the Florists' Club of Philadelphia, leaving Horticultural Hall at 10 a. m., going by electric carriages to the Dauphin street entrance to Fairmount Park, thence by trolley to the Belmont Mansion, where a light luncheon will be served. The afternoon will be devoted to games, dancing, and races, prizes being offered for the contestants. At 4 p. m. a dinner will be served, to be followed by the awarding of prizes to the various winners by ex-Mayor Wm. B. Smith.

CHANGES IN BUSINESS.

RAYMONDVILLE, TEX.—Mr. Griffling, principal owner and manager of the Griffling nursery has moved here from Sarrita and will occupy the Frost place until he can build.

HANOVER, MASS.—W. E. Packard of Easton has purchased the florist business at the Four Corners which has been conducted for some time past by Stanley Baker. Mr. Baker has taken a position in the business office of the Brockton Daily Enterprise.

DE PERE, WIS.—Carl Meler has purchased from Buth & Shea their greenhouse and floral business in this city, which is located on North Broadway. The firm of Buth & Shea has been in this business but a short time. Mr. Meler will most likely conduct a branch store in the sister city.

MANCHESTER, MASS.—Axel Magnuson, gardener for G. N. Black, Esq., Manchester, and Peter Hylen, of Boston, formerly gardener at "Weld Garden," the estate of Larz Anderson, Brookline, have purchased the greenhouse plant of Wm. F. Stry, located on Bridge street, Manchester, and will carry on the business there as florists and landscape gardeners.

VICTORIA, B. C.—Under the title of the Laosdowne Floral Gardens Company, a joint partnership concern has been organized in the names of James Manton and Andrew Wright. The company owns five acres of land off Laosdowne Road and this property is being cultivated for the purpose of raising hardy annuals and roses.

The company is at present negotiating for the acquisition of some twenty acres of land outside the city limits which will be turned into a nursery. In this, every kind of fruit tree that is worth growing will be planted, and the products will be placed on sale in the city and also shipped to foreign parts.

For the past seven years, Mr. Manton has been engaged in landscape gardening in the city. His partner, Mr. Wright, arrived here about a year ago from Regina.

Treasurer's Report.

Recapitulation.

To Balance on hand August 1, 1906	15,150.49
Total receipts for year ending August 1, 1907	20,316.35

John A. Scollay,
74-6 Myrtle Ave., Brooklyn, N. Y.

REVIEW OF THE MARKET

NEW YORK.—The decrease in the supply of American Beauty roses has made it possible for the wholesalers to clear out a little better in the special grades of this variety at prices somewhat firmer than has been the rule for several weeks. In the case of the short-stemmed flowers, however, it still continues to be a difficult matter to clear them out at satisfactory figures. Practically the same remark applies to Bride and Bridesmaid roses; while a few coming in of the better grades can be sold at a fairly good figure, it seems almost impossible to get away with the quantity of short-stemmed stock arriving, and for this grade there is really no steady price.

Carnations are about out of the running for the time being, but asters are in plentiful supply. They do not seem so far, to be up to the usual quality seen in this market, which is partly accounted for by the long season of dry weather, that has prevailed in this vicinity. Some tuberoses are beginning to appear in the market; and there is a fair sprinkling of dahlias. Gladioli, of course, are extremely plentiful just now, and there is a fair supply of outdoor lilies. Of the longiflorum lilies there has been a slight shortening up in the supply and prices have advanced accordingly. Lily of the valley also is bringing a little better value than has been the rule for several weeks. Sweet peas are over for the time being, though it is not so late in the Summer yet, and there might be a further supply of these seen in the market later.

Business in general is about as good as it usually is at this time of the year. The wholesale district seems to quiet down about 10 o'clock in the morning, and short working hours for the employees are the rule.

ST. LOUIS.—The weather the past week was very favorable to the trade in general. Not very much is looked for at this time of the year; still a very good trade is reported for the past week, especially in funeral work. Outside of that, trade may be called dull. Good stock of all kinds is scarce at the four wholesale houses. Roses are plentiful, but not what one might call first class. A few good Carnots and Kaisers are coming in. Brides and Bridesmaids are soft and with very short stems. Carnations are still scarce; only a few from the field are received, but nothing fancy or even good. Asters are coming in fine, with good calls for the choice in white and purple. Tuberoses of the everblooming variety, are now arriving; these always find ready sale when they first make their appearance; later on they become so abundant that many are left unsold. Gladioli are at their height, and so many are coming in that only about half of them are disposed of. Some very good lay of the valley is still to be had.

A good deal of other outdoor stock is on the market, for which a light demand is reported.

The prices during the past week ran about as follows: Roses, from \$2 to \$5 per 100; American Beauty, long, \$2 to \$3 per dozen; short Beauty, \$3 to \$5 per 100; carnations, \$1 to \$2 per 100; asters, 50c. to \$3 per 100; gladioli, \$2 to \$3 per 100; tuberoses, stalks, \$4 to \$5 per 100. All greens are in plenty, with a fair demand. Smilax sold well the past week at \$12.50 per 100 strings.

ST. PATRICK.

BOSTON.—The past week has seen flowers as plentiful as the preceding one, with very little change. Asters are, of course, the most plentiful but they sell cheap, 20c. per 100 being the prevailing price. Roses are not much improved; the best price yet is 6c. Carnations remain about the same as last reported, prices for the best seldom exceeding \$1.50. Gladioli are plentiful, though not so much used in this city as in some places, they bring from \$3 to \$6. Lilies realize from 10c. to 12c. Asparagus and other greens bring the same prices as formerly.

J. W. D.

Newport, R. I.

Trade and News Notes.

Last week was replete with social events of an enlivening and brilliant character. The usual entertainments given during the week the yachts make Newport their rendezvous were on as liberal a scale as hitherto and their number as large as on previous occasions. The stir caused by the presence of the yachts hardly subsided when a still more animated state of affairs came into existence with the coming of Prince William of Sweden, in whose honor a number of very elaborate functions will be held, beginning on the 24th with a dinner at "Crossways" by Mrs. Stuyvesant Fish. The decorations for this af-

fair are, so far as the material and arrangement are concerned, secretly guarded by Mrs. Fish and Messrs. Wadley & Smythe, who are entrusted with the work. From "Crossways" the Prince will on the same evening attend a ball to be given in his honor by Mr. and Mrs. E. J. Berwind at the "Elms." Here the floral decorations are predicted to be on a scale of unusual grandeur and magnificence. There are numerous greenhouses at the "Elms," the residence of the Berwinds, but on this occasion their capacity will not be depended upon to supply the necessary material. Outside sources are secured to be drawn upon as the needs of the occasion will demand.

Last Saturday evening a notable affair came off at "Rough Point," the newly acquired residence of Mr. and Mrs. William B. Leeds. This function was styled a house warming. Wadley & Smythe had the work of decorating for the occasion. Orchids and lily of the valley were used principally, of the latter many thousand were used with telling effect in the drawing room and on the dining tables.

Strange though it may seem, the Park Commission of the city of Newport was heretofore chiefly notable because of the absence of anyone having the least practical knowledge of horticulture on the board. The appointments were from time to time as vacancies occurred, made from the ranks of the same political party as the mayor in office, who had and still has the power of appointment, or sometimes a member was taken from among the Summer residents. This state of affairs could not fail to prove unsatisfactory, as it did. Now, however, Mayor Clarke has departed from the custom of his predecessors, and appointed on the Park Commission a practical horticulturist in the person of Mr. Richard Gardner, whose appointment has afforded widespread satisfaction and given rise to the hope that in future the Commission will be forced to adopt a progressive course in keeping with the needs of a city like Newport.

Hothouse fruit is at present in fairly good demand here. Nectarines and hothouse peaches are especially strong in demand with the supply just at present unequal to meet it. James McLeish who is now the principal commercial grower of all of these in the city, has for the past week been unable to fill his orders for either peaches or nectarines; his grapes are also moving quite satisfactorily. For a number of years consumers of grapes have expressed a decided preference for white over black. Realizing this Mr. McLeish and one or two others a year or two ago planted largely of Muscat of Alexandria, the best all-round white grape grown. This move answered a two-fold purpose—that of supplying local demands, and meeting the call for white grapes coming from the commission men in New York, it being found out that home-grown white grapes are far ahead of those imported from Belgium from whence come large quantities of black grapes.

D. M.

Chicago.

The Week's News.

E. F. Winterson left here a few days in advance of the convention party, accompanied by Mrs. Winterson, intending to visit Boston and other New England points before going to Philadelphia.

A little romance is connected with a honeymoon trip to Philadelphia this week, when Peter Olsem, the well-known foreman of the Chicago Carnation Company, appears as a benedict. Mr. Olsem and Miss Emily Lepper were married on Saturday and immediately started East. In their early acquaintance Mr. Olsem became a hero by saving his present wife, who is now only seventeen years of age, in a runaway accident, and the reward has been persistently pursued ever since.

A special meeting of the Chicago Florists' Club was held in the J. A. Rudlong store at 37 East Randolph street on Friday evening of last week when convention matters and the invitation to be extended to the several horticultural organizations that are expected to meet in Chicago next year were discussed. The matter was thoroughly considered and the president au-

thorized to appoint a committee to sound the feeling of the members of the S. A. F. and extend an invitation to the association to meet here next year, if the consensus of opinion so dictated.

Fred. E. Kuhn, of St. Joseph, Mo., was in the city last week taking a few days' recreation, calling on old friends and at the same time attending to business matters.

At the picnic of "The Old Settlers," held last week at Riverview Park, Abram V. Jackson received the medal for being the oldest settler present. Though little is seen of Mr. Jackson now, unless one goes out to his mushroom farm on North Western avenue, he is one of the oldest greenhouse men in Chicago, having been for many years a grower of both vegetables and flowers under glass. As the head of the A. V. Jackson Mushroom Company, of which his son is taking the business charge, the old gentleman spends most of his time with his family and his chickens.

Capt. A. I. Simmons returned last week from the encampment.

It was supposed to be a secret, but as long as it has been made public in a quiet way, the florists generally will extend their congratulations to Miss Davidson, bookkeeper at Winterson's, who on Thursday of last week was married to Mr. C. V. Nelson.

W. Y. Hendron, who represented the Chicago Telephone Company at the club meeting last Friday evening, argued his point well and it is safe to say that he carried the majority of the attendance on his side.

Harry Vent was up from De Kalb the first of the week, accompanied by his wife.

W. K. W.

St. Louis, Mo.

News Notes.

George B. Windler, whose plant is on Delore street, is building five new houses and rebuilding his old one. George had great success with chrysanthemum plants last year, also fine bulbous stock.

Fred Alves, of Augermuller, has returned from his ten days' vacation in the best of health.

The St. Louis Seed Company has moved its store to the corner of Fourth street and Lucas, much larger quarters, and which Mr. Nichols says are much needed.

Frank Fillmore has given up growing roses and has planted his big rose house with carnations, from which he expects a great crop this fall.

Werner Bros., who are new beginners out in the country, are building one large house, 32x165, for carnations to be consigned to this market.

George Schrieffer, of Kuehn's, is back to work after a two weeks' vacation. Ed. Gerlach, the head of this place, will not take his vacation until the boss returns from the convention.

St. Louis to Philadelphia.

The St. Louis delegation to the S. A. F. convention left over the Pennsylvania R. R. Sunday at 1 p. m. in a special sleeper. The following florists were on the train: Mr. and Mrs. J. J. Beneke, Mr. and Mrs. John Stridle, Mr. and Mrs. F. H. Meinhardt, Mr. and Mrs. H. Berning, Mrs. Klockenkemper and daughter, Fred Ammann, C. A. Kuehn, Adolph Fehr, Emil Schray, W. H. Kruse, H. Kahrs, Mr. and Mrs. F. H. Weber, John Koenig, W. C. Young, and Fred C. Weber.

The Annual Shaw Banquet.

The florists, gardeners and nurserymen of St. Louis on Wednesday enjoyed the eighteenth annual banquet given under the will of the late Henry Shaw at the Southern Hotel. Covers was laid for 150. The tables were beautifully decorated with asters in wreath shape.

The delegates of the Apple Growers' Congress were in attendance. Director William Trelease, of the Missouri Botanical Gardens, was toastmaster and called on the following speakers: H. M. Dunlap, Park Commissioner Philip C. Scanlan, Walter Retzer, President-elect W. C. Young, M. B. Waite, Norman J. Colman, L. A. Goodman and J. C. Vaughan, chairman of the National Council of Horticulture. The St. Louis florists who were in attendance were: J. F. Ammann, J. J. Beneke, Carl Beyer, C. A. Kuehn, E. Schray, W. C. Smith, John Connon, A. J. Brutzen, C. C. Sanders, F. J. Fillmore, W. C. Young, A. Jablonsky, J. W. Dunford, H. S. Halstead, G. H. Augermuller,

H. C. Irish, C. Fulgrof, W. Retzer. The affair was enjoyed by all present.

Apple Growers' Congress.

The American Apple Growers' Congress held its annual meeting in this city on Tuesday and Wednesday of the past week at the Southern Hotel. The meeting opened Tuesday morning with President Dunlap in the chair, and Secretary Wilson at his desk. There were delegates from all over the country, numbering close on 200. The meeting on the first day was addressed by Professors M. B. White and W. W. Scott, W. A. Taylor, pomologist of the Department of Agriculture; James N. West, assistant State entomologist of Illinois; S. W. Smith, of Albion, N. Y., L. A. Goodman, Kansas City, president of the American Pomological Society; F. W. Fausot, Mountain Grove, Mo.; Judge W. J. Patton, Springdale, Ark.; M. L. Dean, Pontiac, Mich.; Wesley Green, Des Moines, Iowa, and M. Burton, Indiana. On Wednesday the officers were re-elected. St. Louis was again chosen as the next place of meeting by a full vote. Those who addressed the second session were: Senator J. P. Logan, Arkansas; C. A. Zavitz, Guelph, Ont.; J. M. Bechtie, Hamburg, Iowa; G. T. Tippen, president of the Missouri Horticultural Society; Professor Hicks, St. Louis; A. Miller, Hydenville, Mass., and H. A. Aldrich, Neoga, Ill. In the evening the delegates enjoyed a banquet given by the Missouri Botanical Garden, after which most of the guests departed for home much pleased with their trip.

ST. PATRICK.

European Notes.

There is absolutely nothing new to record this week; but the writer may be permitted to point to the important fact that the unfavorable conditions which have already been reported on are bound to have a prejudicial effect upon the quality of the seeds harvested this year.

It is well that there will not be any surplus, and that the shortages are in articles that are in great demand.

In commenting upon the prices of rape and kindred seeds in last week's notes, no mention was made of that very important article, mustard—an article which at this time of the year is in great demand by the sheep farmers who derive great benefit from feeding the ewes on a mixture of mustard and rape in equal proportions. It is seldom that one has seen such poor samples as are now offered on our markets and selling readily at almost any price the holders choose to ask. As rape has advanced another fifteen cents per 100 pounds, the farmers are not getting all the benefit of the increased values of mutton and wool.

Black blight is reported on some of the cabbage seed crops, but the seed is too fully developed for any serious injury to result.

Sweet peas growing in the open fields are doing very badly; many blooms are falling without developing a pod, and in other cases the dead flower clings round the young pod and rots it. The crop will be fifty per cent. less than anticipated at the beginning of June. Fancy varieties grown on sticks will give better results.

Albert McCullough and daughters left per steamer Celtic on the 8th inst. W. Atlee Burpee, wife and two sons sailed per steamer Minnetonka. It is stated that Mr. Burpee's baggage mainly consists of orders for his new Spencer sweet peas.

EUROPEAN SEEDS.

Plant Notes.

HYBRID TEA ROSES.—Florists who grow at least some portion of the cut flowers they have need of, know the value of roses. They nevertheless, as a rule do but little with hybrid perpetual roses and that for good reason, which is, that they hardly pay for the space they occupy and the time and labor expended on them, considering the short time they are the source of any income when grown outdoors; but with the class of roses known as hybrid Teas that is not the case because they bloom right along through the late Summer and continue until frost stops them. This class of roses is not a great deal harder to manage than the hybrid perpetual. Of course, most of them need protection in Winter, but they do not require to be lifted and stored indoors as is commonly supposed. In most sections of the country in ordinary Winters all the protection they need is a good covering of coarse manure or salt hay.

Horticultural Education S. A. F. O. H.

Report of Committee on School Gardens.

By referring to last year's report of this committee, it may be seen that the school gardens movement is already an active factor. Most wonderful results have been accomplished by individual effort. Whole communities have been benefited under the direction of individuals and also of associations. Good examples of these two methods are what John H. Patterson has done in Dayton, Ohio, and the Home Gardening Association in Cleveland.

The school garden has passed its experimental stage. Its success and good results are assured. But, as stated in the committee's report of last year, there is "lack of concerted action" in the present methods of work, "no two schools or organizations conducting their garden work on the same lines."

It is proved beyond doubt, by the success of these different movements, that the teaching of horticulture in the schools is of more importance than anyone realized; and the successful outcome that has been attained, all by different methods, shows that elementary teaching of horticulture according to one method could be spread indefinitely throughout the country. Variations and broadening could be indulged in, but all should follow the lines laid down. It seems as though there had been enough proof offered and its vital importance acknowledged by every one.

Teaching in Rural Schools.

There is a tendency, we find, to confine the school gardens to our cities and large towns, where they have been established by civic associations and philanthropic workers, or to make them a part of some normal school system. The desire of this committee is to reach the rural common schools, and to give the children of every rural district in the land some simple lessons in practical gardening adapted to their surroundings and their needs.

The time has now arrived for doing, and many plans have suggested themselves to your committee. To get a hearing before educational societies, or the local and State boards of education, is a difficult matter. A committee going before a State organization would be picked to pieces, criticisms made, difficulties piled up, a plea that the course is full, and a hundred other objections. We therefore believe and recommend that this subject of teaching horticulture in all the rural schools (and other schools wherever possible) be made an act of legislation, mandatory in the State Board of Education to embody it in the public school course; and that the Society of American Florists formulate a working plan to this effect, and prepare the matter for the first, second and third years, due consideration and consultation to be had with the State Board of Education, and a limitation of time to be devoted to this subject fixed on—of not less than one hour per week in school, and not less than two hours out of school, except during the three winter months.

The committee presents a tentative plan, and it is the sense of this committee that the only practical way is to start with one State at a time, and we propose to have this bill passed by the legislature of the State of New York. If there is any other State that the society thinks would be preferable, the committee has no objection.

As the Massachusetts Horticultural Society makes the broad statement (quoted in our report of last year) that its aim is to give every school in Massachusetts a garden and every child a home garden, it might be more feasible to have this bill adopted by the legislature of that State.

Proposed Bill.

(Introduction.)

The movement of establish school gardens has already been put in force successfully and according to original ideas. In every case the school garden has proved more beneficial even than we expected, opening a new and attractive and useful field of study to the pupils, giving them healthful exercise, and providing them with manual training in connection with mental work, which is said to increase the efficiency of mental effort as much as thirty per cent.

Its advantages are almost too apparent to repeat—uplifting in morals, and changing as if by magic the exuberance of youth from mischievousness into interesting and useful channels. It has proved to have almost eradicated the spirit of lawlessness and destructiveness, or changed it into a sense of possession and a desire to respect the rights of others as the possessor would have his own rights respected.

The material benefit derived from gardening can be made to change the entire mode of living of a family, making possible the saving of large sums of money otherwise expended for fresh meat and canned goods, and being at once a stop-gap of outgo, and providing a healthful diet, which is little appreciated when never tried. Millions of dollars in each State could be saved to the laboring man—and the man of means, also—by a surprisingly small effort, if properly directed.

In this era of trusts and the raising of prices, the garden is the poor man's answer. Thousands of acres of land that lie fallow in every State of the Union, producing nothing, worth nothing, could be changed in one short year to produce millions of dollars, all

going toward the betterment of the poor, or comparatively poor man. We have the land, and the sunshine too, and the intelligence of man—all these are free and can be turned into incalculable value with slight direction of the controlling power of the State.

If the youth of the country can be made to see the broad benefits derived from horticulture, and the interest, desire and love for this work be implanted in their hearts, usefulness will take the place of vandalism, and interesting exercise the place of pernicious activity.

As every native born child and all foreign born children up to a certain age pass through the portals of our schoolhouses, it stands to reason that here is the place to teach them what will be of so much use and importance in their life-long welfare.

We believe that the teaching of horticulture, and the rousing of interest in the pupils' minds as to its possibilities, have a strong bearing upon the welfare and contentment of the people, and will tend to allay the present spirit of unrest which seems to pervade all ranks.

Therefore we submit the following as a bill to be introduced into the Legislature of the State of—:

Resolved. That the teaching of horticulture by simple, practical methods in the public schools of the State of— become a law of the State; and that the Society of American Florists be empowered to put this law into operation, with as little disturbance as possible of the present course of study, and with the aid of the most experienced people in this line who will be in close connection with the heads of agricultural schools and colleges and experiment stations throughout the country.

Resolved, also: That this law be put in force the second year after the passing of this bill.

(As the Society of American Florists covers every State in the Union, it is evident that the members are capable of coping with the conditions in the several States.)

Essayist, S. A. F. O. H., 1907.

Horticultural Education in Agricultural Schools.

By Theodore Wirth, Minneapolis, Minn.

I have been asked to prepare a paper on "Horticultural Education in Agricultural Colleges," and I hardly know how to approach the subject, for, personally, I have no experience whatsoever as a student or graduate of such an institution of learning.

Early Training.

I attended school until I was sixteen years old, and when I arrived at that, what I considered very ripe age, and barely graduated with figures which I don't care to remember, I was of the opinion that additional wisdom, to be gained from professors and books, was superfluous technical theory, which would be of little help in practical work. I thought it was a kind of polish that would soon wear off and most likely spoil the leather, and that it would be better to grease the boots to begin with and go to work, and so I did.

I served one of those good old country apprenticeships where I had to work three years, not only for nothing, but my "governor" had to pay by board besides. I don't know now whether at that time I earned my board, but I had a feeling that I did that and more, too. However, I graduated with honors as a full fledged gardener, and I distinctly remember the great celebration that took place at that memorable time, which clearly shows that my memory was good under the most trying circumstances.

Since then I have followed the noble profession of gardening in many of its branches and in different

lands and climates, and have found pleasure, contentment and happiness in all I have approached and worked at, and if I could return to boyhood and had a chance to make my selection of a trade again, I would most certainly select the gardener's profession.

But, who has not passed through life, successful or otherwise as it may be, who would not omit some things he has done and do some things he left undone, if he was to live the same period of life over again? No one; and it is through this, our experience, that we must attempt and endeavor to teach those that follow us, to become wise where we were unwise.

I therefore appear before you, not as a student or graduate from any horticultural college, but as one who wishes he had made use of the opportunity to be such, at the time he had the chance.

Theory and Practice Combined Essential.

I have, in my professional life, come in contact with young men of practical schooling only, men of theoretical schooling only, and men of both, and I have often had occasion to envy the latter. I have observed, however, that among the former two, the first has by far the advantage, but I am convinced that a happy combination in which the practical schooling is predominating, is the ideal course for horticultural education.

The Aim of Agricultural Colleges.

From prospectuses of different agricultural colleges that I have read, and through conversations which I have had with some of the leading teachers at such institutions of learning, I feel convinced that a sincere interest and support given those institutions by the individual and combined efforts of our craft, would result in a much more progressive and beneficial treatment of horticultural subjects in general, and floricultural interests especially, than is at present the case, and possible.

I feel assured those institutions are sincere and anxious to help us with all their available means and opportunities, and if we give them the glad hand of support, interest and appreciation, the combined efforts of both will be crowned with unbounded success to the benefit of all the far-reaching interests concerned. And who is better adapted and able to give that support, and who is closer to that calling than our S. A. F.?

S. A. F. Should Help and How?

I believe that our association should take into earnest consideration what could and should be done to further our interests in the horticultural education of the younger members of our craft.

Let us exchange ideas how it might be done. I, for one, wonder whether it might not be possible to select one of the many excellent State agricultural colleges, one as centrally located as possible, to make the study of horticulture, and especially floriculture, a special attraction along the lines which would meet with our ideas of practical, commercial usefulness. For instance, would it not be practical to have such a college equipped with an up-to-date commercial plant, for the culture of plants both under glass and out of doors? Would it not be possible to market the products of this college plant at fair open prices without creating an unfair competition to local trade in the vicinity of the institution? If so, would not this branch of such a college become more or less self-sustaining, and would not the very desire of making it so, and the need of successfully meeting such commercial competition, spur both teachers and pupils to achieve results far beyond the aim and the possibility of the ordinary college plant and experiment station?

If all this is possible I think it is well worth our efforts to secure it, and I think it should be our aim. A forceful, earnest combination of our interests and practical experiences with those of the scientific and theoretically advanced researches of the teachers of our colleges, I believe would result in horticultural education along most remunerative lines.

Practical Men as Teachers and Advisers.

I should like to see some of our leading professional men connected with the governing board of such an institution, and I should want some of our successful practical gardeners on the staff of teachers. I should like to see the theoretical and scientific teachings of our professors of botany, entomology, chemistry, etc. brought into uninterrupted and closest contact with the practical experiments and demonstrations of our experienced leading practical gardeners, so that the teachings of both, supplementing each other, may inform the student why and how and when and where.

The merits of such an institution, I think, would speak for themselves, and it seems to me would be universally recognized at an early date of its exist-

ence. Its beneficial and educational influence would not be limited to the building up of a young generation of well educated, practical craftsmen, but it would also become the central station of horticultural and floricultural interests in general, a place we all would want to visit, a trial and experimental station open to all introductions and products of our ever advancing skill and progress. Its seal of merit and excellence should be the coveted prize of professional advancement, achievement and ambition.

Learning from Similar Institutions Abroad.

Every year a number of our successful and leading fellow craftsmen go to Europe on a combined pleasure and business trip, and we all know that traveling with open eyes means to learn and profit. If a few such travelers would act as a committee and together visit some of the horticultural schools of Germany, France and Switzerland, I believe some of the things they would see there would be helpful toward the realization of my dream herein outlined. True, conditions and requirements here and there differ greatly, but in a general way our aims are the same. There and here we must have and do have at heart the advancement of our noble calling, the profession of gardener, of which I pride myself to be a member, and anything that can be done to further such advancement, through combined and individual effort, should receive our hearty and active support.

Horticultural Education by Horticultural Societies and Clubs.

By John K. M. L. Farquhar.

It is undoubtedly true that all American horticultural societies and clubs have endeavored to promote interest in, and knowledge of horticulture. It is also true that the efforts of these organizations have resulted in great advancement along the lines they have worked. If, for the sake of illustration, we regard the field of horticulture as a complete circle, we find well defined lines running from its center to the circumference in many directions, but, unfortunately, we also find too many of the 360 degrees of its circumference to which as yet there appear no lines, vast fields of horticultural science which have hardly been trodden upon in this country. Considering the phenomenal successes we have developed along the lines which we have explored, it seems all the more regrettable that our efforts have not been more distributed.

The keen watchfulness, zealous application and enterprise of the American florist have given him, in a single generation, first rank in the world in the production of roses, carnations, chrysanthemums, violets, sweet peas, asparagus and other plants in which he has specialized, and his intimate knowledge of the requirements of his subjects, gained by close personal observation to which his accomplishments are chiefly due, has rarely been equaled by his fellow-craftsmen abroad. This aptitude and past success make it quite obvious that he can achieve similar progress in new lines.

The florists have not hesitated to impart freely through talks and essays at horticultural meetings, the knowledge they have gained of their specialties. The nurserymen, too, have occasionally given valuable information on trees and shrubs and how to use them. Likewise the fruit and vegetable growers have most freely imparted the knowledge they have acquired. Again, the members of every horticultural society in the land have listened to predictions of despoliation by blight and insect until in dread of calamity their faces have become white and their lips blue like the trees and crops whitened with arsenate of lead or blued with copper sulphate.

Untrodden Fields.

But you will ask me,—"What about the untrodden fields?"

In the flower line there are many things yet untried which may and will be used both in commercial and private establishments. We have seen larkspurs, lupins, scabious, cornflowers, schizanthus, leptosyne, etc. grown for winter cutting as successfully as roses and carnations.

We force a few perennial plants like deliytra and spiraea, but how seldom do we hear of the campanulas, foxgloves, sweet williams, troilus, Daphne cneorum, the Christmas rose and many other suitable biennials and perennials being forced, notwithstanding an existing and growing demand for greater variety and novelty in winter flowers.

I have alluded to talks on fruits and vegetables and their culture. Who has ever suggested the prolific and delicious lichee of Southern China or the delicate naseberry of the West Indies as subjects for culture under glass like the peach and nectarine; or, which of our vegetable experts has taken pains to advance our knowledge of salad plants or of herbs

for seasoning, in both of which subjects we know much less than did the Romans when they occupied the northern shores of the Mediterranean two thousand years ago.

This is the day of progress, and horticulture must and will advance in many heretofore neglected lines.

Practice vs. Theory.

Generally speaking, it can best be advanced through the instrumentality of the all-round trained gardener. How many of our foremost florists have risen from the ranks of the private gardener? Peter Fisher of carnation fame, M. H. Walsh and Alexander Montgomery, whose names are garlanded with roses, are notable examples and there are others too numerous to be referred to individually now. I am satisfied that this is the day to stir the gardener to new activities; his opportunities for advancing both himself and his profession were never so good; besides, too, he must look to his position—a certain kind of landscape architect seeks to outstrip him and wrest from him the laurels and emoluments of his art. That which the gardener, from his long practice and intimate acquaintance of his material, knows almost intuitively, this kind of landscape architect gathers a superficial, talking knowledge of from his books, and immediately begins to practice theoretically. His clients and the gardeners are usually the sufferers. Never has there been such an effort on the part of these impractical, book-made, self-styled experts to

J. K. M. L. Farquhar, Essayist S. A. F. O. H.

subordinate the practical gardener as at the present time.

We have many progressive trained gardeners, who are much more competent to lay out and plant a place than the mere graduate of a college landscape school. The gardener may not be able to make as attractive a plan, nor to talk so fluently of harmony of color, contrast of form, of light and shadow as the college man, but he knows how the grade should be, how to prepare the soil, how to plant the trees and shrubs, and he has genius to plant a picture of such beauty, of such harmony, of such strength so exactly the complement of its setting, that beside it the labored composition of the college striping is a helpless misfit. Do not imagine, however, that I underestimate the value and advantage of the horticultural school course provided it is a practical one and supplemented by actual garden work; but I would rather trust with the arranging of a garden a man who has been taught to use the spade properly and who has a natural love of nature, than the horticultural school graduate who has learned to pot plants with gloves on.

The Boston Landscape Class.

It was with the view of bringing the best young gardeners to the front, to encourage them to take their places as leaders in horticulture and to show them and qualify them for the opportunities open to them, that, about a year ago, the Boston Landscape Class was organized. The class numbered about sixty members, mostly working gardeners—

Many of them head men filling positions of responsibility, others assistants. It met twice a week, with an average attendance of about forty.

The subjects taken up the first year included geometry, topographical drawing, projection, perspective, grades harmony of color, landscape composition and the use of the level. The instruction was supplemented by field days for outdoor demonstration and practice.

It is intended to extend the course over three years in which time the members should become thoroughly acquainted with the practice and theory of general landscape gardening.

The better class of landscape gardeners or architects will find the members of the Boston Landscape Class in no way opposed to them, but by their study better able to understand each other and cooperate to the mutual advantage of both when their work brings them together. At the same time, the gardener who has thus become familiar with both the practice and theory of landscape work will never give place to the book-made adventurer of the average superficial and impractical, two or sometimes three year landscape college course of the present time.

Legal.

ALEXANDER DICKSON & SONS, LIMITED, v. ALEXANDER DICKSON & SONS.

This is an action brought by the well known company of nurserymen, seedsmen and rose growers, carrying on business in Newtownards, Belfast, Dublin, Blackrock, and also in Hertfordshire, against the defendants, nurserymen and seedsmen, at Woodlawn Nurseries, Dundrum, County Dublin, for an injunction restraining the defendant firm from selling roses or seeds not grown or propagated by the plaintiff company as Dickson's roses or Dickson's seeds, or as Dickson's Irish roses or seeds, and from carrying on the business of nurserymen and seedsmen under the style of Alexander Dickson & Sons, or any style in which the name of Dickson appears without taking reasonable precautions to clearly distinguish the business carried on by the defendant from that carried on by the plaintiff company; and also claiming an account and an inquiry as to damages. The plaintiff company allege that roses and seeds grown and cultivated by them have been largely advertised as Dickson's roses and Dickson's seeds, and thereby acquired a reputation for excellence in the home, colonial, and foreign markets, and that roses and seeds stated to be Dickson's would be understood in the trade and by purchasers as the plaintiff company's roses and seeds; and they charge that the defendant Alexander Dickson, who until February last carried on business as the Ashbourne Agricultural Company, had, for the purpose of taking advantage of the reputation of the plaintiff company's roses and seeds and appropriating their trade connection, commenced to trade under the name and style of Alexander Dickson & Sons. But the defendant firm repudiated the foregoing allegations, and deny that there is any foundation for them.

Mr. J. C. Davison (instructed by Messrs. Sainsbury & Redington) for the defendant, Alexander Dickson, sought an order for discovery of documents and leave to administer interrogatories.

Mr. Andrews (instructed by Messrs. Shean & Dickson), for the plaintiffs opposed the application for interrogatories and applied for a cross-order for discovery.

The Master of the Rolls made no rule on the application for interrogatories, and ordered discovery to be made by both sides.—Horticultural Advertiser, Eng.

American Rose Society.

Wednesday, August 21.

The session of this society was held on the boat on the way to Riverton, there being some seventeen members present. Detailed arrangements were completed as to the part the Chicago club would take in the forthcoming show, and the people of the East have pledged themselves to make a fine exhibition. M. H. Walsh of Woods Hole, Mass., was represented by proxy and promised a carload of Rambler roses, equal to that which he had at Washington this year. The schedule will be the same as that of last year so far as the Rose Society part is concerned, and the Chicago florists will make their own additions. The Rose Society has now about \$400 donated in cash prizes. The meeting confirmed the work of the executive committee at their recent meeting in New York.

The Flora of Yellowstone Park and the Puget Sound Country.

By J. Otto Thilow, of Henry A. Dreer, Inc.

It is hardly possible in the space of the allotted one or even two hours to give a fair description of the flora of this vast park—or better styled, "The World's Wonderland," and when coupled with the natural and curious phenomena which exist throughout, it is the more wonderful, and in greater contrast than can be found anywhere in the world. Upon entering at the gateway at Gardiner, the flowers of the park greet you before even entering the Gardiner Cañon—and are prominent throughout on mountain side and in the valleys—with species suited to the location; and in their season covering their native habitat with a conquest of color. They grow almost everywhere, and one rarely finds a spot so sterile that nature has failed to beautify it with some simple blossom.

A Coaching Tour of the Yellowstone.

We will take a tour of the park throughout, following the coach road, and note from place to place the various flowers to be found during the Summer season, and while en route get a glimpse of the wonderful and mysterious formations produced by the geysers and hot springs in their constant action, whose beginning has no record, nor its ending a prophecy. Alighting from the Northern Pacific train at Gardiner station, the gateway to the park, one is seized with an unrestrained anxiety to mount to the top of one of the six horse coaches in waiting, and get the first ride of five miles up, and up to the altitude of 6,000 feet above sea level—when reaching Mammoth Hot Springs. A full afternoon is offered here for sightseeing and reconnoitering. The hillsides near the Springs are covered with bitter-root or wild portulaca (*Lewisia rediviva*). Its stem, calyx and flower are of delicate pink, having no green; it is of low growth. The root of this plant was used by the Indians for food.

The bitter root has been chosen as the State flower of Montana. The lungwort (*mertensia*) is a harbinger of Spring, appearing very early with its blue bells.

The night blooming *mentzelia* is considered one of the most beautiful flowers; found on desolate and arid spots; it somewhat resembles a thistle; it is found abundantly below the Mammoth Hot Springs.

The anemone, or Pasque flower, is found in May and June, about the foothills of Mammoth Hot Springs.

A trip over the formation presents a vivid brilliancy in coloring of which the flowers cannot boast—among them Pulpit, Jupiter, Cleopatra, Minerva, Hymen and Angel Terrace, Cupid's Cave, Orange Geyser formation, and every conceivable color in the hot springs themselves. The afternoon spent with this constant alpine exertion fits one for early retiring and sound sleep.

The trip is resumed the next morning in coaches of twelve, including the driver, drawn by four horses well matched. The start is made at 8 a. m. on toward Norris, twenty miles distant. A few miles from Mammoth Hot Springs we pass through Silver Gate—a mass of travertine rocks—of limestone formation. They are called the "Hoodooos." Further on, and when 12 miles from the Springs, Bunson Peak comes into view. This peak, 9,700 feet high, is covered with growth of pine contrasting beautifully with Terrace Mountain opposite, which is of beautiful yellow and gold. Between these two the road winds, hugging Terrace Mountain, and elevated by a concrete viaduct, below which the Glen Creek finds its way into Gardiner Canon.

The evening primrose (*onothera*), also called rock rose, is found here. It is a night bloomer, and very fragrant. It is found where there is apparently no soil. The flowers are white at first, and gradually turn to a deep rose pink. The period of flowering is long. There are four species.

The beard tongue (*pentstemon*), in thirteen species, is found here, and almost throughout the park, and most noticeable on the roadway where it catches much of the dust of the coaches, yet it seems to defy the dust and drouth, and exists in spite of adverse conditions.

Halfway to Norris (10 miles) is located the wonderful Apollinaris Spring. None of this valuable water is wasted; that which is not relished by the tourist runs into a tank, and is taken up by the sprinkling carts and sprinkled on the roads to settle the dust, as well as it often unsettles the stomach of the tourist, who unwisely takes too much.

Obsidian Cliff comes next into view. This mountain of glass, as black as coal, is a world's wonder, and no doubt the remains of volcanic action. It is a half mile long and 250 feet high. On its top is a forest of pine—thinly scattered but growing. When building the roadway it was necessary to cut through one end; this could be done only by heating it with blast fires, and pouring cold water upon it, so by crumbling it its removal was possible, as it resists the chisel and blasting.

Beaver Lake, nearby, is now overgrown with vegetation. The blue gentian is prominent here, and also the lupin, which comes in colors from very pale lavender to deep blue and purple. It is found throughout the

park, and is in bloom the greater part of the season. Continuing on and looking over the valley to the right the Twin Lakes can be seen; but before reaching them Roaring Mountain is heard to the left—a powerful steam vent near its summit, which has been quite active since 1902, makes a very loud noise which can be heard a mile away.

Arriving at Twin Lakes (16 miles) one is struck with its beautiful blue—not due to the hot water as in the other basins and lakes, as the Twin Lakes freeze over in Winter, and for that reason aquatic growth is abundant, even to some native small-flowering nymphæas. The undergrowth in the pine forest is very thick, resembling the prostrate juniper, but upon examination it was found to be low growing hemlock, singularly encircling each tree. A little further on, and on a slight rise, a large area through the wood is covered with the native fern, *Cystopteris fragilis*, growing very thick, even to the edge of the road. The Devil's Frying Pan is the next interesting object. It is a small basin, or geyserite, vigorously stewing or frying, resembling a kitchen spider in operation.

Norris Geyser Basin is next in evidence; not in view but in odor. The sulphur fumes are clearly impressive; perhaps nowhere in the park is this as prominent as at Norris Geyser Basin. The trees have suffered severely from the many new spouting and sizzling springs, which have sprung up in recent years; and have added to the pot-pourri already in innumerable variety. Black Growler, Hurricane, Congress, Monarch, Locomotive and New Crater are among the noisy veterans, while the Devil's Bath Tub performs its regular function of giving his Satanic Majesty a hot wash off whether he ob-

J. Otto Thilow,
Essayist S. A. F. O. H., August, 1907.

jects or not. One and a half hours are spent here for lunch and sightseeing. A very few flowers can be found here, except a few *pentstemons* among the scrub pines north of the formations.

The road follows the Gibbon River to within a few miles of its mouth. The ride through Gibbon Canon of about six miles is one of the most interesting through the park; the road lies close to the river's edge; the mountains rise on the opposite side presenting beautiful views. Large clumps of *phlox* of the subulata type are on and about the rocks on the opposite side of the river, in bloom only in the early season directly after the snow disappears.

Beryl Spring, five miles from Norris, is close to the road, discharging a great volume of water, and sometimes vapor enough to obscure the roadway. The next interesting object is Soda and Iron Spring; everybody takes a drink. Gibbon Falls, a half mile further on, is one of the park features; rushing through the cañon and over the black rock it presents a beautiful veil effect.

The Colorado blue spruce growing up out of the cañon alongside the Falls, even towering to the top of the cliff, gives additional color to this beautiful scene. From this point a splendid view over the forest valley can be had. In the next four miles there is no scenery of special interest until the coaches reach Fire-hole River again, and come in full view of the pretty cascade; then the road ascends the right, or east bank of the river for the next three miles. Before reaching Nez

Perce Creek a quantity of larkspur (*delphinium*) were noticeable, ranging in color from very pale light blue to a strong sky blue, and a few clusters of immortelles (*anaphalis*) in pale pink and white, its foliage a silvery white.

Covering the twenty miles from Norris brings the tourist to Fountain or Lower Geyser Basin. This is a very interesting place, and the first where the black and brown bears can be seen, and the first place visited is their feeding grounds. They are interesting and quite docile, perhaps because they are well provided with substantial food; they are not anxious to dull their teeth on lean Yankees. In the woods near the bears' feeding grounds a profusion of harebell (*Campanula rotundifolia*) can be found with an occasional blue beard tongue (*pentstemon*).

Enough time is allowed in the evening and early morning to visit the many interesting features. The Fountain and Great Fountain Geysers, Mammoth Paint Pots, Surprise Pool, and many other pools and spouting springs, whose weird performances would suggest a name from each visiting tourist.

Very little flora can be found on the plateau, as a great area is covered with the geyser product, which finds its way even into the valley, where hundreds of acres are covered, and the trees have yielded to its effects. The lower Geyser Basin covers an area of 30 square miles. The Twin Buttes are prominent features; these two peaks, which are west of the river, dominate the entire basin. The well-known Excelsior Geyser is the greatest in the park, and perhaps in the known world. This water volcano, which is near the Firehole River, pours out 4,000 gallons of water per minute, even when not in eruption; its dimensions are about 330 by 200 feet, and 20 feet deep, and when in eruption it throws a body of water 50 feet in diameter 250 feet high, and at such times ejects very large rocks. Prismatic Lake is a wonderful body of water, in which can be seen a perfect reflection of the rainbow colors. This pool is 250 feet by 300.

The tour from Lower to Upper Geyser Basin, known as Old Faithful, covers a distance of nine miles. Along the roadway, and looking over into the valley, the low growth of spruce presents a modern park appearance. In some of the shaded spots the wolf's bane (*aconite*) shows in clusters of violet purple. This plant seems to flourish best in high altitudes.

Just before reaching Upper Geyser Basin the first interesting feature is Biscuit Basin, which is off from the road westward. It contains a geyser and several beautiful springs. Sapphire Pool is especially beautiful, of a rich blue.

On the main road, and just at the edge, is the wonderful Morning Glory Spring. It represents perfectly a large azure blue flower of that name. A little above is the Fan Geyser; it spouts obliquely and not vertically.

After crossing the river toward the west is Grotto Geyser, and the Giant. The interesting Punch Bowl is a round basin rising only about 18 inches above level ground, with every conceivable color on its sides, showing the effect of mineral in its water. It is in a constant boil. Rounding the road a little to the left the wonderful Old Faithful Inn comes into full view; its approach is beautiful, as it is a winding road through a pine forest.

When the tourists arrive and enter this magnificent structure, they at once express the desire to remain longer than the allotted time. Time would not permit a full description of this wonderful conception of architectural genius which planned this model hotel. It is constructed with material from the surrounding forests so artfully joined together that it does not deviate from the idea of a mammoth bungalow or log cabin style. A view from the roof towards the east over the tops of the forests into the mountains is enchanting and refreshing.

Directly in front of the inn is the home of geysers, springs and pools, and to the southeast is Old Faithful, which is also a veteran timepiece as well as a monster geyser. Its hourly action is with the same force as it has been for thousands of years perhaps. A stroll back of the hotel through the pine forests and among the bears reveals very little interesting flora except an occasional glimpse of the mountain primrose. It is more plentiful after leaving Upper Geyser Basin and going toward Yellowstone Lake. At least three varieties of hardy asters partly cover the wooded hills back of Old Faithful Geyser. They are in bloom the whole season. A trip with the guide over among the geysers and pools is highly interesting; Emerald Pool is a chief feature among these. Following the guide and walking in the course as he directs, reminds one of going through an extensive perennial garden, constantly looking for new features.

After returning to the hotel a pleasant evening is spent before a large open log fire; corn popping and other entertaining features are the evening's program, not forgetting a night view of Old Faithful in eruption with searchlight and color effect. The old-fashioned beds induce an old-fashioned sleep; the exhilarating atmosphere in early morning induces a sharp appetite for

old-fashioned corn cakes and an old-style breakfast with modern trimmings and service. An early start is made for the lake (19 miles), and one of the most pleasant rides in the park. Keppler's Cascades, a short distance out, are generally viewed by everybody. Along this route the beard tongue (pentstemon) is plentiful. Madison Lake, ten miles up the valley, is said to be further by water route from the sea than any other lake on the globe. Before reaching the lake the Continental Divide is crossed—altitude 8,425 feet. On this height is the lily covered pond filled with the yellow water lily (*Nymphaea polysepala*).

Descending the Divide the coaches pass down Corkscrew Hill, and when arriving at Shoshone Point an enchanting view of Shoshone Lake, miles away, presents a most restful scene over the towering pines in the foreground. Lake View, one mile from the lake, is said to be one of the most striking water landscapes in the world.

After passing through a dark pine forest the coaches suddenly arrive at Thumb station at the edge of Yellowstone Lake, a body of clear cold sparkling water 7,741 feet altitude, or nearly one and a half miles above the sea. After lunch at Thumb it is optional to continue with the coaches over the mountain road (16 miles), and cross Natural Bridge, or cross the lake by boat; either ride is extremely delightful, the coaches being constantly in full view of the lake. About 5 p. m. brings the tourist to Lake Hotel. This place with its surroundings, overlooking the tranquil lake, bespeaks rest from the roaring and hissing geysers and hot springs; the only roar would be from bruin and his associates in the woods back of Lake Hotel. A glimpse from the roof of the hotel off to the left of the lake reveals a scene without compare and no encomium that it would be possible to pronounce would overrate its merits. The towering peaks gilded by the setting sun clothes them with a halo of the softest tint which leaves an impression never to be forgotten.

A ramble through the woods and along the river and edge of the lake reveals a garden of natural flora. The seed fluff of the *Clematis ligusticifolia*, is abundant, also forget-me-not (*Myosotis sylvatica*), found here and also along the river through Hayden Valley, and the everlasting flower (*Antennaria dioica rosea*). Aside from becoming well acquainted with the bears, a delightful pastime is fishing for trout in the lake and river; it is always a sure catch, one can without fear of contradiction describe their size to those who have been through the park. The night is spent at Lake Hotel; a peaceful and restful one it is, away from the roar of the geyser which knows no cessation. An early start is made in morning for the crowning feature of the park's wonders, viz., The Grand Cañon. After covering seven miles and before entering Hayden Valley, the wonderful Mud Volcano is visited; it lies west of the road a short distance. Its action is uncanny but interesting; it is a huge cavern filled with mud which is thrown from one side to the other by steam force which issues from many openings in the sides of the crater. This action is constant, weird and noisy, and emits an odor far different from that of heliotrope or lemon verbena.

While passing along the river bank many clusters of the buttercup (*Ranunculus montanensis*), were noticeable, but not in bloom, their time of flowering being June and July.

Trout Creek (9 miles), presents an interesting feature, having cut its way through and around the plateau, and forming the Northern Pacific Railroad trade-mark. Two miles further on and a half mile from the main road is Sulphur Mountain, which is especially interesting in the morning when the numberless little steam jets issue from its top and sides. A notable feature is that the trees do not object to this sulphur bed; they grow freely amid this sulphur deposit.

Hayden Valley is one of the most picturesque scenes; the river winds beautifully on, narrowing as it reaches the cascades. This valley is an important winter range for the park buffalo and elk, and covers an area of fifty square miles. A dense fern growth follows along until the cascades are reached.

Upper Falls, 112 feet high, is beautiful and turbulent; the scenery here is very rugged.

In a moment the coaches arrive at a bend in the road which reveals the whole vista of the Grand Cañon of the Yellowstone. A sharp rise in the road, with a heavy tug, brings the tourist to the Grand Cañon Hotel, which is 1,000 feet above the Upper Falls. The only time spent at the hotel is the lunch hour; the balance of the day is given entirely to the cañon which can be viewed from either side of the river. The Grand Cañon of the Yellowstone is acknowledged by all beholders to stand without parallel among the natural wonders of the globe; other cañons have greater depths and more imposing walls, but there is none which, in the words of Captain Ludlow, "unite more potently the two requisites of majesty and beauty." It is 2,000 feet wide, 1,200 feet deep and twenty miles long. It is pre-eminently a cañon of color. Its principal feature and a most inspiring one is the lower or Great Falls, 310 feet high, pouring over its brink the waters of the Yellowstone River with a thundering force; the west side

is a panorama of the brightest colors that pigments could suggest, while the east side is heavily set with pine and spruce, contrasting beautifully through its entire length. Forget-me-not (*Myosotis sylvatica*), is found on the very crest of the east side and half way down its bank.

Along the road and leading up to the side of Mount Washburn the buttercup grows in profusion, also many clusters of the blue gentian. The columbine (*aquilegia*) is here in its favorite habitat. Quite a chapter could be written about Mount Washburn, and its commanding prominence; it is the most celebrated peak in the park from which a panorama which defies description lies before you. As the tour was over the old route leading from the cañon back to Norris, thence to Mammoth Hot Springs and Gardiner, the pleasure and many new features are in store for those who will from now on tour the park, as the new route will be via Yancey and Mammoth Hot Springs. This will afford a trip along nearly the entire length of the cañon, and over parts with new and distinct features different from those described above. We will, therefore, follow the old route from Cañon to Norris, passing the Solfatara Plateau and the Virginia Cascade.

The mountains and valleys along this stretch are very interesting, both in scenery and heavy growth. After covering about 12 miles, Norris is reached; lunch is taken and another visit made to springs and geysers, and then toward Mammoth Hot Springs and Gardiner.

In concluding with the park flora a few species which have not been mentioned should have a place. The fire weed or willow herb (*epilobium*), the globe flower (*Trollius albidiflorus*), shooting star or American cowslip (*dodecatheon*) in four varieties, bladder pod (*physaria*), Jacob's ladder (*polymonium*) in four varieties, golden rod (*solidago*), in five varieties.

It is interesting to know that the cultivated varieties such as sweet peas, which bloom through the whole season, pansies in large flowers, marigold, asters, and many of the leading annuals find congenial conditions for thorough development.

Attractions of The Puget Sound Country.

Fifteen hours by the Northern Pacific brings the tourist into the State of Washington among the stately firs and heavy undergrowth of beautiful wild flora. The vast difference in climatic conditions between the east and west of the States of Washington and Oregon are such as to give each State a northern and southern flower blooming period. The flowers of the Puget Sound region grow in great profusion and beauty.

We shall not take up the wild flora, but touch only in part on the results achieved with cultivated varieties which are generally known. Roses bloom out of doors from early in April to late in November, and nowhere else, not even in California, are they excelled in size, beauty and fragrance. The mild Winters and moist climate of the coast region make ideal conditions for propagation of shrubs and bulbs. Narcissus, tulips, hyacinths, lilies, dahlias and others multiply rapidly during the Summer, so that full-sized young bulbs are harvested by Fall. Lilies in particular seem to enjoy the soil and weather conditions, and once planted, they become established and continue year after year bearing and multiplying. Sweet peas are used as veranda vines; they bloom through the Summer until frost in November, and cover trellises twelve feet high. In Seattle, in the residential sections, every home, with rare exceptions, had an abundance of sweet peas. Noisette roses are trained over large screens and on walls; the hybrid teas seem especially adapted to the soil and weather of Seattle, Tacoma and Portland.

Hybrid clematis grow as freely as the honeysuckle, and bloom through the Summer and Fall. The mountain ash is a prominent specimen in all parks and along the avenues, covered with its red clusters.

Referring to roses again, it is interesting to note that many varieties, in standards flourish as well as in England and France. The free flowering hybrid teas are planted in rows between trees and between the sidewalk and curbstone, producing large bushy specimens 4 to 5 feet high, of same diameter, and were in full bloom the middle of September. *Retinisporas* grow in perfect symmetrical specimens twenty feet high; the box elder, thirty feet high, and in perfect foliage.

The Puget Sound country has every advantage for the development of plants, flowers, and seeds. While its location would lead one to think it was of an Alaskan climate, lying north of Quebec and Dnluh, yet it is four degrees south of London, and as the British Isles are tempered by the Gulf Stream, this Northwest country is influenced by the Japan current which is 400 miles wide. There is neither extreme heat nor cold, nor disastrous lightning and storms. The wild flora of this belt of country is very extensive; it is interesting to botanists because of the thorough development of all plants and flowers.

The value of the nursery stock exported from the United States during the fiscal year ending June 30, 1907, was \$225,339, as against \$242,056 in the same period of 1906.

National Sweet Pea Society.

Editor Florists' Exchange:

In my brief notes on the exhibition of this successful society I hinted at important work done by the Floral Committee at Reading and as their report has been adopted by the General Committee and ordered to be published forthwith, there is no breach of confidence in my sending you the following items for publication.

The awards made at Westminster were confirmed, but the committee recorded the fact that the varieties *Elsie Herbert* and *Silas Cole* do not appear to be thoroughly fixed at present.

The society's F. C. C. and silver medal for the best novelty of the year was awarded to *St. George*. If it maintains its present character it is a decided acquisition, but after the falling off in *Helen Lewis* some of the committee would have preferred to wait another year before making the award.

A first-class certificate was awarded to *Helen Pierce* (*Morse*), one of the very best introductions from your side. An award of merit was given to the following varieties:

Princess Victoria (*Dobbie*).—A light colored *Spencer*, said to be identical with *Pink Gem* (N. B.—This name was adopted by Messrs. *Dobbie* by royal request).

Norah Unwin.—A white form of *Glady's Unwin*, quite distinct from the *Spencer* type.

Lord Nelson, which Mr. Burpee informs me is synonymous with *Brilliant Blue*, as both appeared in *Eckford's David R. Williamson*.

Prince Olaf (*Dobbie*).—Upright standard; ground color of standard and wings white, marbled with clear blue, nearly always four flowers on a stem.

As more than 150 varieties were submitted to the Floral Committee they can hardly be charged with prodigality in their awards.

Another very important part of the Floral Committee's work was the preparation of a list of the best variety in each of the society's twenty color classes. The result is appended herewith. It will be observed that the list deals only with varieties already in commerce.

Another equally important work, and one that may cause some heartburnings, was the bracketing of "too-much-alike varieties." The object of this work was to try and bring the list of sweet peas within reasonable dimensions.

I fear, Mr. Editor, that your space is too valuable to publish this list in extense, but a copy of the same shall be placed at your disposal by next mail. A further step in the same direction consisted in the preparation of an Index Expurgatorious for varieties which are no longer worthy of cultivation. A copy of this list will reach you in due course. From the foregoing it will be seen that some very useful work of a permanent character has been accomplished which fully justifies the existence of the society and also accounts for its great success. In this connection it is a pleasure to record that 215 new members have already joined the society, and that, thanks to the generosity of Mr. Burpee and other hearty supporters of the cause, the prize list for 1908 has already assumed such liberal proportions that our worthy secretary is casting about for a larger hall to accommodate what will be, if the fates are kind, the record show of the society.

It is reported that *Sutton & Sons*, who last year bought the entire stock of a novelty named *Mrs. Rothera* (to which an award of merit was granted), and exhibited it this year under the name of *The Queen*, (the name of a variety already in commerce, have decided to send it out under the name of *Our Queen*, a step in the right direction. It is a pity that *Dobbie & Company* are not disposed to alter the name *Princess Victoria* so as to prevent clashing with an old variety of the same name.

N. Sherwood, Esq., V. M. H., has been named as president for next year. Everyone hopes he will see his way to accept the office.

The greater disappointment of the year has been a much misnamed variety hailing from California and known as *Coral Gem*. It may be a *Coral*, but it certainly is not a *Gem*, and may best be described as a loose and ugly sport from *Countess of Lathom*.

S. B. DICKS, F. R. H. S.

London.

The best variety in each of the National Sweet Pea Society's 20 color classes, compiled by the Floral Committee, July 18, 1907: White, *Dorothy Eckford*; crimson and scarlet, *King Edward VII.*; Queen Alexandra; rose and carmine, *John Ingman*; yellow and buff shades, *Mrs. Collier*; blue, *Lord Nelson* (dark); *Romolo Piazani* (light); bluish, *Mrs. Harcastle Sykes*; cerise, *Cocinea*; pink, *Countess Spencer* (true); orange shades, *Henry Eckford*; *Helen Lewis*; lavender, *Frank Dolby* and *Lady Grisell Hamilton*; violet and purple, *Duke of Westminster*; magenta, *Captivation*; striped and flaked (red and rose), *Jessie Cuthbertson*; striped and flaked (purple and blue), *Marbled Blue* (*Sutton's*); picotee edged, *Dainty*; fancies (more than two distinct shades), *Sybil Eckford*; mauve, *Mrs. Walter Wright*; maroon and bronze, *Black Knight*; bicolor, *Jeannie Gordon*; marbled, *Helen Pierce*.

Altoona, Pa.
Meyers Brothers have two distinct establishments which are conducted on independent lines. The Fairview Greenhouses opposite Fairview Cemetery, are right in the city. The largest growing plant is situated at Eldorado, a short way out. Each plant is self-sustaining in its own way and while a splendid fraternal feeling exists Myers the retailer, and Meyers the wholesaler, do business together on a strictly cash basis. The Eldorado plant is extensive and conveniently situated.

A. A. Whitred has an extensive range of glass within the city limits. He has just made arrangements to open up a fine city store for early Fall trade, the present location occupied by him being entirely inadequate.

Karl Kuny has a comparatively new place on First avenue. This establishment is also close to one of the city cemeteries.

The Penna. R. R. Co's greenhouses are situated at this point and are in charge of Emil Engleman. The various stations from Altoona to Harrisburg are supplied with bedding plants from these greenhouses. A nursery is also operated in connection with these greenhouses where a general line of nursery stock and perennials are grown for the embellishment of the grounds on the middle division of the company's road.

quired on Tenth and Walnut streets. The greenhouses in the city will be overhauled and consolidated into a couple of smaller houses for decorative plants. All the growing will, however, be done at the new stand. Two of his newest houses are on somewhat lower ground than the rest in which carnations are grown in solid beds. Last Spring during high water the Shamokin creek rose in his greenhouses two-thirds the way up the sides of his benches. In this way the under soil got a thorough soaking as the water remained in the passage ways between his benches for several days. During this time and immediately afterward Mr. Rossiter remarks that he cut the finest carnations he ever saw. The quality was all that could be desired, the daily cut being also very much increased. They continued for some weeks after to show the benefit of the Shamokin water. What was first feared as a calamity turned out to good advantage and Mr. Rossiter is now a thorough believer in sub-irrigation.

One of the features of this establishment is a handsome smokestack of concrete. While concrete is now used extensively in all available greenhouse construction, this is the first smoke stack your correspondent has seen made of this material. Many of Mr. Rossiter's friends told him it would not stand, as the sulphur would eventually eat it away. The stack is of his own construction and is about 75 feet high. It has been in use two years, and Mr. Rossiter is satisfied that it will endure as long as any other. This Summer

58-60 WABASH AVE., CHICAGO.

July and August supply the seed should be sown thinly, and when the plants are large enough, thin out to 6 inches apart. I find this a better method than attempting to transplant during extreme hot dry weather.

The main secret in producing good lettuce is constant cultivation, especially after every rain; and should the soil get extra dry watering must be attended to. Nitrate of soda is a capital fertilizer, especially helpful in making a quick growth. There is no better plan than to use this fertilizer in water, say an ounce or a little more to a three-gallon can of water, affording enough water to give the plants a fair supply. This soda watering is especially recommended for the hot Summer months.

There is quite a variety of lettuce to select from. The head lettuce is the most largely grown; the loose, or Cos lettuce, is admirably adapted for Spring and early Summer, but practically useless during the hottest weather. Trianon Cos is one of the best of that type. Some of the best standard sorts in head lettuce are Boston Market, Big Boston, New York, Deacon, and others.

In Frames.

Frames play an important part in keeping up a long season of lettuce. Growers should be careful to select a good location. The frames should be set in a position where they get the sun all day, if possible, in a sheltered, warm spot facing south, having them sufficiently elevated so that there will be no danger of water getting in. Many a frame of seeds has been destroyed through damage by water getting into it. A frame with a brick foundation is the best and most lasting, although the first outlay is somewhat expensive; but it makes a substantial job, and there is not much chance of having the frame flooded with water at any time.

Frames may be used for two purposes; that is, as cold frames, and what is usually termed hotbed sash. Take, for instance, the vicinity of New York; hotbeds may be made the first week in March. Collect fresh manure from the horse stable, add about one-third leaves, mix well, and thoroughly firm the manure when making the hotbed. The manure should be at least 2 feet deep. Also bank up around the frame with manure. Six or eight inches of soil should be placed on the manure. Sometimes the temperature of the manure, after made up, will go close to 100 degrees, but when it drops to 90 degrees, or just below that, it is then in good condition to sow seed on or to transplant lettuce into, that has been wintered in a cold frame. The aim should be to keep plantings in frames for a succession till the supply is ready in the open. Big Boston, and Boston Market are both good for frame work either in Spring or Fall. Big Boston should be allowed a space of eight or nine inches apart, while Boston Market will stand an inch or two closer. Seed may be sown, for the cold frames for Fall succession, somewhere around the 15th to the 20th of August. Lettuce from this planting should be ready for cutting by the first week in November. Another planting should be made two weeks later, and, with proper protection, there should be no trouble in keeping the plants in perfect condition till Christmas. One thing should not be overlooked, namely, give air every available chance. It would be impossible to keep lettuce in a cool frame during the short days, but by watching closely all details it is surprising the quantity of lettuce that can be produced in this manner.

CLEVELAND, O.

FIRMS WHO ARE BUILDING.

PLATEBUSH, N. Y.—Gustav Fischer has secured a permit to erect two greenhouses, one 16x100 feet, the other, 20x100 feet.

WALLINGFORD, CONN.—Rowden & Mitchell are erecting two new greenhouses—one 60x18 feet, the other, 20x75 feet, to grow carnations and chrysanthemums.

WILLIMANTIC, CONN.—Dawson, the florist is building an addition to his greenhouses on Pleasant street, the addition being a new house 55 by 24 feet for carnations.

EVERETT, WASH.—Trubshaw & Ferguson are building an immense greenhouse near the Wye, where they expect to raise lettuce for the Everett market and points north. Heretofore the lettuce supply for these places during the winter months has come from Vashon island.

KROESCHELL BOILERS CAN'T BE BEAT. ORDER NOW.

Kroeschell Brothers Company, Chicago, Ill.
Dear Sirs:—Please book my order for one No. 14 Kroeschell boiler. This boiler will take the place of the two No. 8 boilers you sold me in 1889-1891. I shall put the entire range on to the new No. 14. The No. 8 boiler bought in 1889 is about used up, but the one bought in 1891 is still serviceable. Should you have an inquiry for a second-hand boiler, please send the party to me. If the new boiler lasts 17 years and does the work as well as the old ones, I shall be satisfied. The old ones surely were dandies.
JOHN FELKE, SR.
Wilmette, Ill.

Kroeschell Brothers Company, Chicago, Ill.

Dear Sirs: Had different kinds of cast-iron boilers. I am assured that I can save about one-third fuel with your boiler. I started firing October 10 and the fire never went out up to this time, May 12, 1907. This boiler heats both my dwelling and greenhouses and gives the best of satisfaction. My dwelling is about 40 feet from the boiler. Can recommend your boiler to anybody. It is the only greenhouse boiler.
G. BASLER,
Buffalo, N. Y.

Kroeschell Brothers Company, Chicago, Ill.
Gentlemen:—I do not have the least trouble to maintain my temperature in the coldest weather with your boiler, which

has given entire satisfaction. Your boiler will run seven to ten hours with hard coal as fuel.

ALBERT KNOWLTON, North Grafton, Mass.

Kroeschell Brothers Company, Chicago, Ill.

Gentlemen:—Your No. 3 boiler, which we purchased from you last year, is heating at present 9,000 feet of glass. We fire at 10 p. m. and again at 6 a. m. and are able to maintain a temperature from 40 to 50 at 18 degrees below zero. Your boiler has given us the best of satisfaction. We formerly had two cast-iron boilers which could not carry us through the winter, but your No. 3 boiler does.
GEORGE HAIGHT & SON,
Ridgfield, Conn.

Kroeschell Brothers Company, Chicago, Ill.

Gentlemen:—Had three cast-iron sectional boilers and find I can heat twice as much glass with yours and save about one-third fuel. We are using the Kroeschell Honeywell Generator with the boiler, and believe it helps. The boiler distributes the water with a more rapid flow, also saving fuel.
N. BOMMERSBACK,
Decatur, Ill.

150 New Establishments, with 2,158,000 square feet of glass, installed the Kroeschell Boiler in 1906.

Made in 15 sizes. Heats from smallest houses up to 50,000 feet of glass. Will maintain 60 degrees at 15 below zero outside.

New catalogue, just off the press, and prices, mailed on request.

SAVE GREENHOUSE FUEL

WITH the Ideal Concrete Block Machine, any florist can build his own greenhouses at little cost. Saves in fuel, because the hollow block is practically frost-proof. Lowers insurance rates and ends the cost of maintenance, because Ideal Blocks are fire-proof and everlasting.

IDEAL Concrete Machine

The original and only perfected Concrete Block Machine working on the face-down principle.

ENABLES the manufacture of Ideal Concrete Blocks from sand, gravel and a little cement at a cost far lower than that of other building materials. May be operated by any man without previous experience. Low in cost, rapid in operation, and can never wear out or break in use.

WRITE for catalogue and illustrations of Ideal Concrete Block construction, of practical value to every florist. Sent Free.

IDEAL CONCRETE MACHINERY CO.**Dept. Z,****South Bend, Indiana.**

NOT FATAL, BUT COSTLY

A grower in this advanced age who builds a house with wooden plate and nailed-on bars, when our steel eave and roof bar bracket would increase the life of his house twice over, while adding to the first cost but a small per cent., is certainly not what would be called a careful buyer.

This point in our construction is not alone a protection against decay, but a powerful brace and stiffening member to the entire house. Will sell materials for the entire house, or the steel eave and brackets alone. Write us.

NOT MERELY THE MAKING OF MONEY

enters into our business nor is that the sole reason why we manufacture greenhouse material—there is another question that is just as important as the making of a profit; the moral side of any business is the most important side from the customers standpoint and every business man who recognizes this responsibility to the purchaser of his goods will ultimately outrun his competitors who are merely thinking of the dollars.

In these days of keen competition it is not possible for anyone to keep his customers in ignorance of the prices which should be paid for merchandise but unscrupulous dealers are always ready to discriminate when it comes to the quality. The price is made to suit the buyer's pocketbook but the goods sent him are not the kind represented and the small saving in the first cost is lost, probably several times over, before he has received value for his money. Such methods should be discouraged and the best way to "frown down" this way of dealing is to purchase your goods somewhere else.

For forty years we have been making greenhouse roof material, long before some of our competitors were in business, and we are to-day at the top in our line—the reason for this is plain as we have at all times given each and every buyer of our product an honest dollars worth for every dollar he spent with us.

We solicit your inquiries if you are a greenhouse owner or thinking of becoming one.

Our new 96 page catalogue will be mailed for the asking and we hope to send you one of them, also an estimate on your needs.

My Dear Sir:—

I take great pleasure in writing you that your No. 5 Boiler, which has only now given out, has been in use in my greenhouses thirty-two years. This I consider a long time for a boiler to last. The original grates were the only ones used during the thirty-two years. I have also at present twelve boilers of your make, which are giving perfect satisfaction.

Yours very truly,

Abraham Van Sicklan.

(From Wm. H. Maher, Florist, Newport, R. I.)

"The Scollay Boiler put in on March 19th was to replace one put in by you in 1876. The old boiler was used each year, for about eight months, and has proved to be a very good one." The above boiler was in use nearly 30 years. This speaks for itself.

BODDINGTON'S CHRISTMAS SWEET PEAS

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOWBIRD.

An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white upon long stems; habit fairly dwarf, and of exceptionally free flowering qualities. Trade pkt. 50c., 30c. per oz., 1/4 lb. \$1, 1/2 lb. \$1.50, 1 lb. \$2.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Trade pkt. 50 cts., 30c. per oz., 1/4 lb. \$1, 1/2 lb. \$1.50, 1 lb. \$2.50.

FLAMINGO. Color scarlet; free-flowering and early. As the crop of this variety was small, we can only send out packets this season for trial. Pkt. 25 cts., 5 packets for \$1.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the winter months. 1/4 lb. 30 cts., 10c. per oz., 1/2 lb. 50 cts., 1 lb. 75 cts.

BODDINGTON'S CHRISTMAS WHITE. A grand companion to Christmas Pink. 10c. per oz., 1/4 lb. 30 cts., 1/2 lb. 50 cts., 1 lb. 75 cts.

Our Fall Bulb Catalogue now ready. It is free. Send a postcard today. It contains a list of all Seasonable seeds for sowing now, besides a collection of over

TWO HUNDRED VARIETIES OF PERENNIAL SEEDS

**Boddington's
Bulbs Bloom!**

We offer the following for immediate delivery, all stocks scarce this season.

**Don't Delay
LILIES**

LILIUM HARRISII (True Bermuda Easter Lily) Boddington's Quality Brand Pure Harrisii.

5 to 7-inch, 400 bulbs in a case, doz. 80c., 100 \$5.50, 1000 \$50.00.
5 to 7-inch, 835 bulbs in a case, doz. \$1.00, 100 \$7.00, 1000 \$65.00.
7 to 9-inch, 200 bulbs in a case, doz. \$1.50, 100 \$10.50, 1000 \$95.00.
We can supply cheaper grades of regular Harrisii at "meet competition" prices.

LILIUM CANDIDUM. The thick-petaled kind. We offer only the largest size, Northern-grown, 22 centimeters and up in circumference. You should plant some of these. They are excellent for cutting in May and June. \$1.50 per 100, \$40.00 per 1000. About 250 in a case.

LILIUM JAMESII. The new Bermuda Lily. A hybrid between L. longiflorum and L. Harrisii.
5 to 7-inch, 400 bulbs in a case, doz. 80c., 100 \$5.50, 1000 \$50.00.
7 to 9-inch, 200 bulbs in a case, doz. \$1.50, 100 \$10.50, 1000 \$95.00.

**Paper White Narcissus
Grandiflora**

Bulbs running 12 centimeters and up only, about 1550 to a case, 100 \$1.00, 1000 \$9.00, case \$11.75.

Calla Lilies

These bulbs have been selected with great care and are sound and free from rot and all with eyes.
1 1/2 to 1 3/4 inches in diameter, 100 \$4.75, 1000 \$45.00.
1 3/4 to 2 inches in diameter, 100 \$6.75, 1000 \$65.00.
2 to 2 1/2 inches in diameter, 100 \$10.00, 1000 \$95.00.
Monster bulbs, 100 \$12.00.

**Freesias
French Crown**

Bulbs, 3-8 to 1-2 in. in diameter, 100 75c., 1000 \$6.00.
Mammoth bulbs, 1-2 to 3-4 inch in diameter, 100 85c., 1000 \$7.50.
Monster bulbs, 3-4 inch and up in diameter, 100 \$1.50, 1000 \$12.00.

**The Grand
New Freesia, Purity
(True)**

A grand acquisition to the Freesia, and for the florist as a cut-flower or pot-plant, and no one should be without a few bulbs of this delightful novelty. Flowers which are snowy white, of large size, are borne in great profusion on long stems which grow upright and stiff; are excellent for cut-flower purposes. Good stock, 100 \$2.00, 1000 \$18.00.

Dutch Bulbs to arrive soon, send for Catalogue to-day, it's free.

Seed Trade Report.**AMERICAN SEED TRADE ASSOCIATION**

George S. Green, Chicago, Ill., president;
M. H. Duryea, New York, first
vice-president; F. W. Bolgiano, Wash-
ington, D. C., second vice-president; C.
E. Kendel, Cleveland, O., secretary and
treasurer; Leonard H. Vaughan, Chi-
cago, assistant secretary.

NEW YORK.—M. B. Faxon, who for
the past two years has been with The
Livingston Seed Company of Columbus,
O., is now with J. M. Thorburn & Com-
pany of this city.

CHICAGO.—Interest is beginning to
be manifested in the coming National
Corn Exposition to take place at the
Coliseum in this city, October 5 to 19,
under the general management of G. A.
Shamel. Though the seed exhibits will
be a leading feature, many interesting
departments pertaining to the corn in-
dustry and its final uses will assist to
attract, entertain and instruct visitors.
Upward of \$30,000 has been appropriated
for the decoration of the building; and
\$50,000 are to be awarded in special and
\$16,000 in cash prizes.

MITCHELL, S. D..—The Board of Di-
rectors of the Dakota Improved Seed
Company have decided to postpone the
erection of their proposed seed house
until next Spring. The business for the
coming season will be conducted in
rented quarters. The outlook at the
present time is very favorable. The
company will do a mail order retail
business. The first annual catalogue
will be issued about January 1, 1908,
and from that time on the concern will
be in shape to conduct a general mail
order business in farm and garden
seeds.

CARTHAGE, MO..—Earl Tucker and
J. W. Tucker, the proprietors of the
Tucker seed house, have purchased the
fixtures of the Parsons Seed Company,
and are making some extensive improve-
ments for their next year's trade. Be-
sides the fixtures they get the Parsons
poultry supplies, but not the seeds. This
is the first year for the new firm and
they say that their success has been so
marked that these improvements were
made necessary. The enlargements will
also permit of doing greater wholesale
business.

Earl Tucker, who is an experienced
seed salesman, will go on the road for
his house in about a month, and will
cover a territory radiating from Car-
thage about 100 miles.

IMPORTS OF SEEDS, ETC..—Aug-
ust 19.—W. C. Becker, three boxes

THE Cultural Leaflets treating on BULBS are especially seasonable at this time.

Seedsmen and Florists who sell BULBS at retail should procure a supply of these LEAFLETS, and present one to each customer. Do this, and each purchaser will be enabled to grow the BULBS intelligently; in this way you make a satisfied customer, a result always to be desired.

CULTURAL DIRECTIONS

Specially written for the use of your amateur customers. Send Twenty-five cents for complete sample set, which amount will be deducted from order for first thousand.

The universal favor in which these Directions are held, as shown by the many orders received therefor, encourages us in the belief that these Leaflets are just the neat little factor to help promote business and establish better relations between the dealer and his customer.

TRY SOME!

BIG BUSINESS ASSISTANT

TO SAVE TIME, QUICKEN SALES, AND AID YOU
PLEASE YOUR CUSTOMER, WE HAVE PREPARED

Cultural Directions

COVERING A NUMBER OF THOSE PLANTS
AND BULBS MOST LARGELY IN DEMAND

THE "CULTURALS" have been written by experts; they are fuller, and contain more detailed directions than it is possible to embrace in a catalogue.

Equipped with these, just hand one out with each sale, and save yourself considerable present and future trouble, as the customer will then be able to consult the directions, grow his plants, seeds or bulbs intelligently, and so receive satisfactory results, without having to continually resort to you for advice.

The following "Culturals" are now ready:

AMARYLLIS (Hippeastrum)	CROCUS, Snowdrop and Scilla Sibirica	MUSHROOM CULTURE

European Notes.

The harvest has tumbled in upon us all at once, in spite of the fact that we get a good shower every day and the amount of bright sunshine does not average more than six hours out of the twenty-four.

The greatest improvement noticeable in our growing crops is manifested in our pole beans which, in spite of the attack of black fly previously referred to (or as a result of it), are podding freely right from the ground. At present it looks as if the crop would, in a great measure, compensate for the destruction occasioned by the late Spring frosts.

Dwarf beans are also very healthy, but so late that the sale of the green pods is seriously diminished by the fact that the pole beans are ready at the same time. It will induce many growers to let the plants stand for seed and thus another shortage will be lessened.

Despite the statement in your Chicago contemporary that "Flower seed crops (in Europe) are reported a general failure," it is a pleasure to record that our crops of many of the leading annuals, such as clarkias, godetias, nasturtiums and other articles of a similar description, have seldom looked better than they look to-day. Sweet peas and pausies show very little improvement at present. As regards the latter the shortage, particularly in Germany, is due to the great destruction of Autumn sown plants by the severe frosts of the past Winter. This led the growers to make Spring sowings and these, owing to the very unfavorable season, have not been a success as regards quantity, while they have been many weeks late in ripening their seed. Our friends must prepare themselves to pay 50 per cent. higher prices for seed of the prize strains.

The crop of florists' flower seeds, particularly primula and cyclamen, has been seriously affected by the absence of sun. Usually we are able to ship new crop seed of both at this date, but at present the cyclamen seed is still on the plants. One of the most successful growers of this article states that his crop will be 50 per cent. smaller than last year. Half a loaf is better than no bread, Mr. Editor, and at any rate it is not right to say that our flower seed crops are a failure. Our friends can send their orders along as usual, and we will do our utmost to fill them with the very best of

EUROPEAN SEEDS.

THE WEEK'S WORK.

Bouvardias.

It requires extremely careful handling to successfully transfer bouvardias from the open ground outdoors, but if the work is carefully done and the plants given due attention immediately after they are housed few will succumb as a result of the operation. Bouvardias succeed well when potted in good fibrous loam with a sprinkling of leaf mold and sand to make the compost somewhat porous, good drainage in the pots is an absolute necessity for their well-being, as it is in fact with all plants of like nature, especially when they are subjected to the process of forcing. After the plants are potted they should be placed in a house where shade can be readily given and this protection they will need for two weeks more or less until it is seen that they are in an established condition, then the shade may be removed and air freely admitted when the weather is favorable. The continuous flowering properties of bouvardias, together with the freedom in which their delightfully fragrant flowers are usually produced, render them almost indispensable at certain seasons of the year when flowers are in brisk demand.

Stevias.

Although stevias like a cool temperature it is a well known fact that the least touch of frost raises the dew with them; therefore to be on the safe side it will be well to make preparations for the removal of these plants to a location where they can easily be protected in the event of a sudden drop in the temperature. It may be considered early for such precautions yet, but it is much better to have things in readiness in case of an emergency than to have all the work to do when it may be there will be but little time in which to do it. If stevias are potted or placed in boxes as advised in order to safeguard against frost they need not be put into a greenhouse by any means; they will be much better outdoors somewhere convenient for quick work when covering becomes a necessity for a brief period.

Mignonette.

There are some flowers that are at all times favorites, if not to a great many flower-loving people indispensable, yet it is only during a very brief period in Winter that they are in any way profitable to grow and perhaps one of these is mignonette. If the seed of mignonette is not already sown the work

should be no longer delayed. Circumstances may require that the seed be sown in pots even when the ultimate destination of the plants is a bench or a solid bed, but if the necessity of starting the seeds in pots can by any means be avoided so much the better will the results be. In case, however, that pot sowing must be resorted to the seed may be sown sparingly in a three or four-inch pot, thinning out to one plant and that the strongest one eventually. Keep the seedlings as near the glass as possible in order to prevent the plants becoming drawn and weakly. For good long spikes for Winter cutting a solid bed or a deep bench is the place to grow mignonette in. The soil should be rich and consist mainly of fibrous loam together with about one-sixth part of well rotted cow manure, both thoroughly mixed together and well firmed in the bench or bed before the seed is sown. The soil should also be well raked in order to obtain a loose surface before sowing the seed. Sow the seed in rows about a foot apart and the distance between the plants in the rows. Although several seeds may be sown where only one plant will be allowed to remain when the seedlings are well up thin out to one plant. After the seed is sown a gentle watering will be necessary but a drenching of the whole bed or bench is not only unnecessary but injurious.

Decorative Foliage Plants.

Choice decorative foliage plants such as dracaenas, crotons, marantas, diffenbachias and many others are no harder to grow than many other things of much less value from a strictly decorative point of view, but it seems to me that many give in to the idea that these things are hard to manage just as in days gone by it was supposed that some supernatural gift was necessary in order to grow orchids. Having as I intimated given in to that idea these plants are either not grown at all or they are simply kept alive and then when at Christmas material having color such as they possess is needed the mess is raked over for a lot of stuff that requires to be packed closely together in order to make any kind of a presentable arrangement. On the other hand, how much more satisfactory it would have been if all these plants had been so grown that each one could stand and do service on its merits and how much more profitable it would be to the grower when every plant could be sold and each plant be worth two or three of the apologies he had in stock when selling time arrived. In greenhouses now will be seen dracaenas two or three feet high with but half a dozen leaves on the pinnacle resembling

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSEYRYMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

NATIONAL NUT GROWERS' ASSOCIATION.—The Nut Growers' convention at the Jamestown Exposition, September 26-28, promises to be an important meeting. Requests for information regarding the National Nut Growers' Association and applications for membership should be sent to Dr. J. F. Wilson, secretary, Poulan, Ga.

Dr. Robert T. Morris, of New York city, finds recreation and pleasure in studying the shagbark hickory. He will tell about his researches in this line at the National Nut Growers' convention at Norfolk in September. E. W. Kirkpatrick, of Texas, and W. A. Taylor, of the Department of Agriculture, will represent the National Nut Growers' Association on the program of the approaching horticultural congress, to be held at the Jamestown Exposition.

PURDUE (IND.) UNIVERSITY AGRICULTURAL EXPERIMENT STATION, ETC.—The Purdue building recently remodeled by the Indiana State Board of Agriculture is now completed. In this building the Experiment Station will make exhibits from the soil, crop and horticultural departments. To supplement this work and exhibit, lectures will be given in the auditorium adjoining the exhibit rooms, on all popular phases of agriculture and domestic science. The lectures which will occupy about twenty minutes each, will be illustrated with stereopticon views. These will be given every day of the State Fair according to the following schedule:

9:30 a. m. Treatment of soils for wheat and corn.
10:30 a. m. Methods of eradicating the San José scale.
12:30 p. m. Harvesting and storing seed corn.

Habits of Trees Fixed.

United States Foresters Discover that it is Impossible to Acclimatize Them.

Under the above heading the Brooklyn (N. Y.) Eagle has an article of which the following are the opening lines:

"The United States foresters have discovered that trees in their habits are fixed and almost inflexible, and that it is impossible to acclimatize them. For centuries—indeed, as long as we have record—each species has kept in its beaten ways, insisting on the same average of temperature and refusing to grow where this could not be found; seeking and occupying certain kinds of soil and demanding certain amounts of moisture and avoiding situations where these were wanting.

The latest authorities go so far as to declare that trees cannot be acclimatized; that is that even the ingenuity and perseverance of man are unable to induce trees to change their habits far enough to adopt a country not closely like their native habitat. For a time the forester may use various devices to surround a tree with artificial conditions, by which, so to speak, the tree is deluded into feeling at home. But as soon as the forester's care is withdrawn, in such cases the tree is seized with homesickness and dies."

The portion quoted, as well as the rest of the lengthy article, is exceedingly interesting, and while, practically agreement on the position taken by the foresters will be unanimous, there is much that can be said on the other side of the case. That there is but little change in the hardness of a species in a century is true, yet changes do take place, as many nurserymen know. Seeds of forest trees obtained from the South and sown North are usually partly killed the first Winter or two; not that they are unable to withstand the cold, but because of their Southern habit of growing late in the season, failing to ripen their growth before freezing weather comes. After a few years these seedlings, if not killed, take on the character of their Northern brothers, ripen their growth earlier, and become hardy.

Another instance of change of character is met with in the case of forest trees indigenous to both the Northern and Southern States. It seems accepted as a fact that these trees have sprung from a common center though their progress apart may have taken ages. Take, for illustration, the white hickory, *Carya tomentosa*, and the sweet gum, *Liquidambar styraciflua*, as examples. The hickory grows from the extreme South to the extreme North; the sweet gum from the extreme South to Connecticut. Now neither the hickory nor the sweet gum taken from the far South will live at the Northern end of their line of growth. Allowing that at some remote time they sprang from a common center, have not their characters changed to conform to their surroundings?

Looking at it as applying but to the lifetime of a man, the foresters referred to are doubtless right; but considering it in the light of centuries all evidence points toward assuming that many trees in the midst of us

show that acclimatization has been going on in their case, making portions of certain species much harder than the rest.

White Oak for Forestry Planting.

The United States Department of Agriculture has issued a leaflet dealing with the white oak, its propagation and usefulness for forestry purposes. It contains excellent directions concerning the collecting and sowing of the acorns, but its recommendations regarding the preservation of the acorns of this oak over Winter for Spring sowing, have been found hardly practicable. The white oak acorns are of a nature to sprout at once as soon as they fall from the tree and meet damp soil, hence are best sown at once. The leaflet of the Department, after directing how to practice Fall planting, says: "The acorns should be stored for the Winter by stratifying in a box of moist sand, using three bushels of sand to one bushel of seed." Where this needs modifying is in having moist sand called for. This would not do at all. As aforesaid, these acorns sprout as soon as they come in contact with moist soil, and to mix them with moist sand would cause them to send out roots, which would be two to three inches long by Spring, so that to get the acorns free from the sand and planted without injuring them would be impossible, even with great care. If instead of damp sand dust dry sand were used, and then the box, or barrel, set away in a dry building, being first headed up, the acorns would

New White Baby Rambler Rose Madame Zeimet.

Introducers, John Charlton & Sons, Rochester, N. Y.

be plump in Spring without having sprouted. This is not theory, but has been proved by practice.

The white oak is such a valuable tree for so many purposes that it is no wonder there is such a call for it as there is to-day, both from our own foresters and those of Europe. The white oak with the chestnut oak are the first to ripen their acorns, and have to be collected in October.

Pinus Flexilis of the Rocky Mountains.

It is a pleasure to see that more recognition of the merits of our Rocky Mountain evergreens is displayed by our nurserymen than was the case but a few years ago. The general well-doing of the Scotch and the Austrian pines is reason for their extensive planting, and while the excellence of some of our Colorado sorts was in a measure unknown, it was excusable that nurserymen did not keep them. Now that these Western kinds have been tried in the Eastern States years enough to be safe in deciding on their merits, why is it that it is almost impossible to buy these pines from any of our nurserymen? There is the beautiful *Pinus flexilis* for one, a native of the Rocky Mountains, a lovely pine, seeds of which are easily obtained, and the seedlings of which thrive well here, yet a stock of this pine is practically unobtainable. *P. flexilis* is a particularly pleasing pine to look on. The foliage is light green, the habit of the tree good, and though the needles are not soft they

give way when touched because of the flexible nature of the branches.

It is the custom of our nurserymen to buy the greater part of their supplies of evergreen from Europe, notwithstanding the tariff charges, so that it would seem the best way to get our pines into general planting here will be to urge on the foreign nurseryman the importance of raising a large lot of the seedlings, foremost among the pines to be *Pinus flexilis*.

Varieties of Privet.

With the close of August the planting of many trees and shrubs can be accomplished with entire safety, among which are the several kinds of privet. For many years the Californian, *Ligustrum ovalifolium*, was the only one thought of when the object was the forming of a hedge, and in the Middle States it is still and is likely to be the favorite for this purpose. In the colder States the Californian privet is not always hardy, especially when in rich ground where the plants grow late and do not ripen up well. As a substitute the *ibota* has been found to be a good subject, being much hardier. Now it is in the way of holding its foliage late remains for further testing. In the vicinity of Philadelphia the Californian is a much better evergreen than the *ibota*.

Another privet, *L. Regelianum*, is growing greatly in favor. It is quite as hardy as the Californian if not more so. Instead of the upright character of growth of the other two it makes a horizontal, drooping growth, and it has leaves of good size. As a single specimen or as a hedge it is greatly admired. Owing to its close growing character it makes a charming hedge with little or no clipping, and on many a place it will be preferred to any other sort, both for its beauty and for its being different from the Californian, which almost every place contains.

Planters of privet find September a good month in which to set the plants. Given a good pruning, which they should have always when planted, and the usual care in such cases, the plants thrive, and are then ready to respond to the first warm days of Spring.

JOSEPH MEEHAN.

Ivy Growing on Hickory Tree—Failure with the Holly.

Referring to the inquiries, with answers, one concerning English ivy growing on trees, the other to failure in transplanting hollies, I would say that while true that ivy will kill a tree in some cases it is only when it is permitted to overlap the foliage of the tree to which it is attached. It will injure no tree by climbing its trunk or bare limbs.

The trouble the correspondent has with hollies is the same experienced by every one who does not severely prune them and cut off all their leaves. They require the hardest kind of pruning, and in addition the cutting away of every leaf. More die from inattention to these two things than from any other cause.

Most nurserymen understand this, and always advise their customers to treat their hollies in this way; in fact, they often ask permission of their patrons to prune the stock before they deliver it, knowing how important it is that this be done.

JOSEPH MEEHAN.

Hollies.

Editor Florists' Exchange:

Replying to the inquiry of E. W., New Jersey, on page 197 of The Florists' Exchange of August 17, about hollies, the holly grows in various places near the seashore and some of the best fruiting trees I have ever seen were at Wildwood and Atlantic City.

When I sell hollies, I always cut off all the leaves with a pair of scissors, and if for my own planting I also cut back the larger sizes pretty freely. I had collected for me, last Winter, 2,000 small ones, they arrived in very cold weather in Winter and were placed in the cellar in the package, until thawed out. Then the leaves were all clipped off and the plants were repacked till the ground opened and gave a chance to heel them in outside. In Spring they were planted out and nearly every one is growing.

I have sometimes, when collecting plants two to three feet on an order, cut back some that had too little root, to sell, nearly to the ground, and planted them and they grew and made good plants.

WM. F. BASSETT.

Hammonton, N. J.

New White Baby Rambler Rose.

Editor Florists' Exchange:

We send you a photograph (reproduced herewith), of the new white Baby Rambler rose, Madame Zeimet. It is an interesting variety and we think it will become a general favorite. It is a good grower, with clean fresh foliage, growing freely. Its flowers are pure white, with the fragrance of the hyacinth, and are perfectly double. It will be welcomed for its color and its floriferousness. It was exhibited in pots at the convention of the American Association of Nurserymen, held in Detroit last June, where it attracted great attention.

5,000 Specimen Evergreens

Grown on new soil, well adapted to develop, good fibrous roots and a sturdy, unforced growth. That is what all growers say who have seen them.

They comprise all the common and fancy varieties in SPRUCE, PINE, HEMLOCK, ARBOR VITÆ and RETINISPORA, from one to seven feet high and perfectly shaped. We want you to see them or write for descriptions and prices.

We can show you thousands of deciduous trees and shrubs also.

HARDY PERENNIAL PHLOX

We are the largest growers of Perennial Phlox in the world. Our collection is unequalled, and we are prepared to furnish the new and rare kinds as well as all the popular standard varieties in large quantities.
Over quarter of a million one-year-old field-grown plants in stock.

Delivery at any time after September 25th

New and Rare Hardy Phlox

	Per 100	Per 1000
Albion. A variety which originated with us several years since. It is a remarkably strong, vigorous grower, producing very large panicles of pure white flowers with a faint aniline red eye. An excellent sort for massing	\$10 00	\$90 00
Aglae Adamson (Tall). Immense flower and truss; snow white, with violet-rose eye	8 00	75 00
B. Compté (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties	6 00	50 00
Chateaubriand (Medium). Pure white with crimson-carmine eye, shading to bright violet purple	6 00	50 00
Consul H. Trust (Tall). Pure red with bright French purple eye	6 00	60 00
Coquelicot (Dwarf). A fine pure scarlet with crimson-red eye	6 00	60 00
Etna (Medium). Crimson-red, suffused with fiery red; cherry red eye	6 00	50 00
Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre of petals, with an exceptionally large, white, star-shaped centre	10 00	90 00
F. G. von Lassburg (Tall). The finest white in cultivation, the individual flowers being fully double the size of any other variety, pure in color; a strong, clean, vigorous grower	50 00	125 00
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal; a pure red eye, very effective	6 00	50 00
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height, pure white flowers of good size, early; unequalled for bordering; a perfect little gem	10 00	90 00
Independence (Tall). An excellent large-flowering early white	6 00	50 00
Inspector Elpel (Tall). Tender rose, with bright crimson-carmine eye	6 00	50 00
Lamartine (Tall). Very bright magenta, with a large white centre; very effective	6 00	60 00
Lord Raleigh (Dwarf). Deep reddish violet, distinct	6 00	50 00
Le Mahdi (Tall). Deep reddish violet, with darker eye	6 00	60 00
Mrs. Jenkins (Tall). An early-flowering pure white, forming an immense panicle; one of the best	10 00	90 00
Michael Cervantea (Tall). Pure white, with pure red eye; larger flower	5 00	50 00
Stella's Choice (Tall). A much-branching late white variety	6 00	60 00
Selma (Tall). Large flower, pale rose mauve, with distinct claret-red eye	10 00	90 00

Collection of Choice Standard Phloxes

Aquillon (Tall). Bright Tyrian rose with crimson-red eye.
Andreas Hoffer (Medium). An early and continuous flowering pure white.
Bouquet Fleuri (Dwarf). Pure white with crimson-carmine eye; free-flowering; each branch a perfect bouquet.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Berninger (Dwarf). Ground color white, delicately suffused with rosy pink and distinct amaranth-red eye.
Bacchante (Tall). Tyrian rose with crimson-carmine eye.
Blanc Nain (Dwarf). Very dwarf pure white.
Colibri (Tall). White, with crimson-carmine centre; very late.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Caran d'Ache (Dwarf). Geranium-red with old rose shadings and white eye; very effective.
Cyclon (Very Dwarf). White, suffused with lilac; aniline-red eye in the form of a star.
Clairneur (Tall). Brilliant rosy magenta with large lighter halo; an excellent variety.
Eugene Dunzevillier (Tall). Lilac, shading white towards the edges; large white centre.
Esclarmonde (Tall). Lilac marked with white; aniline-red eye.

Frau Dora Ungeller (Tall). Very rich, deep rose; a strong tree-flowering late variety.
Gustav Nadaud (Tall). Ground color white, delicately suffused with reddish violet; Tyrian rose eye.
Graff von Ungerer (Tall). Large flower; white suffused throughout with rosy lilac and dark crimson centre.
H. O. Wigers (Tall). Pure white, with crimson-carmine eye.
Henry Manger (Tall). White, with crimson-carmine centre.
Inspector Felker (Tall). Purplish mauve, washed with white.
Jeanne d'Arc (Tall). A late-flowering pure white.
La Vague (Medium). Pure mauve with aniline-red eye; one of the best Phlox in our collection.
Mozart (Tall). Ground color white, suffused with salmon; aniline-red eye.
Mme. Marie Kuppenheim (Dwarf). A fine, late, pure white.
Martinique (Tall). Tender rose with brighter eye.
Mme. Pape Carpentier (Dwarf). Very early pure white; tube of corolla tinted with pink.
Otto Thacker (Dwarf). Tyrian rose with deep red eye and light halo.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; the best of its type.
Pantheon (Tall). Bright carmine rose.
Pecheur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Pacha (Dwarf). Deep rose pink suffused with solferino-red and carmine-purple eye.
Professor Schlieman (Tall). Pure mauve with crimson-carmine eye; an effective late flowering variety.
Papillon (Medium). Bright violet purple, peculiarly marked with white.
Philibert Andebrand (Tall). Pure white with carmine centre; large flower.
R. P. Struthers (Tall). Rosy carmine with claret-red eye; one of the best Phlox in cultivation.
Sunshine (Dwarf). Large flower, aniline-red with crimson-red eye and light halo.
Thebaide (Dwarf). Carmine lake with brighter shadings and aniline-red eye.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Zouave (Medium). Bright rosy magenta with red entre.

Price Choice Standard Varieties: Strong, one-year-old field-grown plants, 75 cts. doz.; \$5.00 per 100; \$40.00 per 1000.

Early Flowering Phlox (P. Suffruticosa)

Miss Lingard. A grand free-flowering white. \$1.00 per doz.; \$7.00 per 100; \$60.00 per 1000.

For a full and complete list of Hardy Perennial Plants as well as all other seasonal Plants, Bulbs and Seeds see our new Wholesale List, issued September 1st.

REVIEW OF THE MARKET

NEW YORK.—Business does not differ materially from that of other years during the month of August. Outdoor stock is coming in freely, and a certain position of it can be moved fairly well at prices about as good as are usually obtained at this time. Asters so far have not shown their usual quality, though H. E. Froment had a few in one day this week that were exception- ally good on very long stems; some of them fetched as high as \$6 per 100 which is about three times more than is being obtained for the general run of asters at the present time.

Lilies have become more plentiful than they were, and prices have dropped accordingly. American Beauty roses are not fetching quite so much as they did a week ago because they are a little more plentiful. Other roses have experienced no change in values. Carnations are about out of the running altogether, very few of them being seen. Lilies from outdoors are to be had in quantity; and tritomas have begun to arrive in limited numbers, as also have Hydrangea paniculata and hardy phlox. The orchid supply is not heavy, still there is sufficient to meet what demand there is. Lily of the valley is not selling quite so well as it was last week.

Green material of all kinds is not much in demand, though the supply is such that prices are not affected.

The best and fanciest varieties of asters are now being marketed at 75c. to \$1.50 per 100. 35c. to 60c. a dozen is the retail price for them. Several kinds of yellow flowers, particularly Rudbeckia Golden Glow, are conspicu- ous in the shop windows; hardy hy- drangeas in combination with them form a popular decoration. Harrisii and auratum lilies, also L. japonicum, rubrum and album, pass from grower to customer with surprising rapidity. Excellent lily of the valley is forced in this section, selling at \$3.50 to \$4 per 100.

New crop roses are much better than the old and bring somewhat better prices; fine Kaiserin Augusta Victoria and Liberty sell at \$6 to \$7 per 100. The best Bride and Bridesmaid roses wholesale at \$4 to \$5 per 100. Medium- stemmed American Beauty are always a welcome commodity, at \$15 to \$20 per 100.

The growers at Tomlinson Hall report a most satisfactory business, most of which is transacted early in the day.

CHICAGO.—The market has as usual during convention week been practically dormant. The rose stock is a little better, also carnations. Asters and gladioli are more plentiful, less in demand and of no better quality.

BOSTON.—The past week business has seen very little change. Flowers are just as plentiful as ever; asters are the most abundant and they go slowly. Carnations are slackening up somewhat and soon new crop flowers will be looked for. Roses remain about the same; there are not many first class flowers, but then there is not much of a demand for them. Lilies are good; quite a number of L. speciosum are now in but they do not have much of a call. Gladioli are plentiful but aside from those used for hotel pur- poses there is little demand.

J. W. D.

INDIANAPOLIS, IND.—Satisfactory comments are brought forth upon in- quiry as to the past two weeks' busi- ness. A steady counter trade, inter- rupted by occasional spurts of funeral work, has been maintained. Sales gen- erally are small ones but numerous.

CARNATIONS

Enchantress, Queen Louise, Lord, Mrs. Bradt, Harlowarden, Peary, Harry Fenn, Mrs. Lawson, Fiancee and 200 White Lawson.

First size, \$6 00 per 100, \$50.00 per 1,000.

Second size, \$40.00 per 1,000.

The Queen and Mrs. Patten only second size. Cash with order.

Plant Culture

By GEORGE W. OLIVER

OF THE BUREAU OF PLANT INDUSTRY, UNITED STATES DEPARTMENT OF AGRICULTURE. LATE PROPAGATOR TO THE UNITED STATES BOTANIC GARDEN, WASHINGTON, D. C., AND THE ROYAL BOTANIC GARDEN, EDINBURGH

A Standard Work Written by Request of the Publishers of the Florists' Exchange

A WORKING hand book of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines, and a chapter on miscellaneous subjects in connection with the above.

This reliable cultural book has been gotten up for use not ornament, there- fore the price has been fixed at a figure within the reach of all, while it contains more real practical information for those for whom it is intended than is found in much more pretentious works costing five, ten and twenty times as much money. Cloth; strongly bound to stand rough handling and plenty of it. Price, \$1.00, by mail, postpaid. Send for sample pages, free.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BEERTELMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

Our London Letter.

By A. Hemsley.

ROYAL HORTICULTURAL SOCIETY.—At the meeting held on August 6 water lilies were a great feature. *Nymphaea atropurpurea*, a rich deep crimson, flowers of large size, which came from A. Allen, gardener to Lord Hillingdon, gained a first-class certificate. Another pretty plant shown was *Acalypha msaica* var. Mrs. Marc, the foliage being beautifully marbled and of a clear yellow and small green markings—a very distinct sport from the species. Cut blooms of *Eucalyptus ficifolia* were shown; these were of a beautiful shade of orange scarlet. If this would only flower freely it

Messrs. Kelway & Son. There is a remarkable improvement in these early sorts, but the varieties are too numerous and of varied hues that to enumerate them would take up too much space. One was selected for an award of merit; this was Duke of Richmond, a pretty shade of pink with creamy markings, and a deep shade on margin of petals.

FLOWERS IN THE MARKET.—We now get large supplies of hardy flowers from the open ground and these materially depreciate the value of choice indoor stock. Among the prettiest things we have are the improved sweet sultans. I have before me the pure white and the soft mauve. The large starry flowers are of beautiful form, and I have seen them used in choice floral arrangements with great effect. Many other hardy flowers are now used where formerly none but choice hot-house productions would be appreciated. As an instance I may mention the depreciation in the value of gardenias; they did once go up to about eight shillings per dozen last Winter, but the average price for good blooms has been from a shilling to one shilling and sixpence per dozen. *Eucharis* have also depreciated in price, but this is owing chiefly to the large and regular supplies of *Lilium longiflorum* which we now get. During the last few weeks these latter have been over abundant and prices down to the lowest ebb, both for good pot plants and for cut blooms. I have recently been able to buy them at lower prices than I could get *L. lancifolium* for.

Fashions change; recently small flowers such as gypsophilas, statice, etc., have been much in demand in place of foliage for standing up among more showy flowers. The double variety of gypsophila is a great acquisition. In going through a nursery on August 12 I noted some large clumps. It is most effective as a border plant, and more useful for cutting from, as it lasts so well. I have previously written in its favor, but too much cannot be said regarding its value. *Statice Suworowii* is another plant which either for the garden or for cut bloom is most valuable; but many who see it do not understand that it will dry and keep the beautiful pink tint. I have kept it in good condition for months. The best yellow variety is *Bonduella*.

We are already getting some fairly good chrysanthemums, but while we have a surplus of many other more seasonable flowers they are not much appreciated. Yet, last year, some good specimen blooms made top prices in July.

THE ANNUAL AUCTION TRADE SALES OF POT PLANTS.—These are fixed to commence on Monday, September 9, and it seems likely that it will be a busy week. I have not yet inspected the stock at the various nurseries, but I hear that it is fully up to the usual standard of good quality. In some instances auctions are arranged to clear off waste or useless stock, but for these annual sales most of the stock is grown specially for the purpose and is of the highest quality. I have met the same buyers for at least 20 years; we get them from all parts including Scotland and Ireland.

The sales of Dutch bulbs are commencing earlier than over this year, the first being announced for August 19; upward of 4,000 lots will be offered on that date.

New *Nephrolepis*, Sport of N. Anna Foster.

Originated with C. Eble, New Orleans, La.

(See Page 202, issue of August 17.)

would be a grand commercial plant, but I find specimens nearly twenty feet high have not yet flowered. A first-class certificate was awarded for it. Other novelties included *Mitricaria inodora*, "bridal robe," a fine double variety; this gained an award of merit. From the same exhibitor came a very fine white variety of *scabiosus*; these were from Messrs. Titt & Son, Windsor, and should prove useful plants for cut bloom. *Campanula longistyla* was another novelty worthy of note, the tall spikes of purple blue being of large size. This came from the gardens of Sir Trevor Lawrence, and was given an award of merit.

Early flowering hybrid gladioli were well shown by

Nephrolepis Amerpohlil.

Introducer, Wm. P. Craig, Philadelphia, Pa.

THE STANDARD TREATISE ON GARDENING.

THE GARDENER'S ASSISTANT

New Edition.

UNDER THE DIRECTION AND GENERAL EDITORSHIP OF

WILLIAM WATSON

Curator, Royal Gardens, Kew.

Thoroughly Up-to-Date; The Recognized Authority on Gardening; Most Distinguished Contributors; Lavish in Illustration; Indispensable to Practical Florists and Gardeners, to Country Gentlemen and the Amateur. A Complete Encyclopedia of Gardening. The Leader Among Gardening Books.

For the past half-century THE GARDENER'S ASSISTANT has maintained its unique position as the standard treatise on practical and scientific horticulture.

The publishers in this new edition have given this monumental work such a complete remodeling, revision and extension as will enable it to hold in the twentieth century the place which it worthily filled throughout the latter half of the nineteenth. It is so thoroughly up-to-date, and is so comprehensive in scope, as to constitute a complete encyclopedia of all that is known about the science and art of gardening. No one who wishes to excel in gardening, either as a business, or a hobby, can afford to be without it.

THE GARDENER'S ASSISTANT is a compendium of all operations of the garden and arboretum; from the formation of the garden and plant-houses to the cultivation of all kinds of plants, whether for use or ornament: trees, shrubs, herbaceous and alpine plants, stove and greenhouse plants, orchids, ferns, succulents; fruit, both under glass and in the orchard or kitchen-garden, and vegetables of all kinds.

Everything has been done that could be done to elucidate the text by the free use of illustrations. These represent recent gardening appliances, houses, heating apparatus, flowers, trees, diagrams, schemes for laying out the garden, methods of pruning, etc. In fact, wherever a picture would be useful a picture is given. Moreover, in addition to the black-and-white text illustrations, there are twenty-five full-page black-and-white plates, and eighteen colored plates of flowers and fruits, specially prepared for the work by eminent artists.

THE FIRST PORTION of the work deals with GENERAL PRINCIPLES; THE SECOND PORTION is devoted to directions for the CULTIVATION OF DECORATIVE PLANTS OF ALL KINDS—stove, greenhouse and hardy trees, shrubs and herbaceous plants; THE THIRD PORTION treats upon FRUIT CULTIVATION in all its branches, both under glass and outside; and THE FOURTH PORTION upon the GROWTH AND MANAGEMENT OF VEGETABLES AND HERBS.

THE GARDENER'S ASSISTANT has been made the SOUNDTEST and MOST PRACTICAL, as it is unquestionably the NEWEST and MOST UP-TO-DATE, Book on Horticulture.

SEND FOR PROSPECTUS.

We have obtained the exclusive right to the sale of this invaluable work in the United States. It is elegantly printed, on thick, durable paper, in two handsome imperial 8vo. volumes, substantially bound in Roxburgh, half leather, cloth sides, marbled edges, about 1300 pages.

PRICE, delivered free, by express, to any part of the country, cash with order, \$15.00. Money refunded if not satisfactory. Or, we will send purchaser the two volumes on receipt of a first payment of \$4.00 and six monthly payments thereafter of \$2.00 each.

ARAUCARIAS OUR SPECIALTY

WATCH US GROW

1907 is our 12th anniversary in a successful career in the importation, growing and shipping of this well-known and so much admired evergreen, decorative plant, *Araucaria Excelsa*, *Robusta*, *Compacta* and the *Laevis Glauca*.

Our importation this Spring, 1907, has swollen up to the enormous number of 6,000; more are coming with the azaleas in September and October. The florists of every city from the Atlantic to the Pacific Ocean can talk of Aschmann's *Araucarias*.

Now is the time to buy. They will gain in their growth 100 per cent. in two or three months.

The next in rank is our *Nephrolepis Ferns*, of which we only grow the best selling and well-known varieties, and of which we have a big lot: *Boston*, *Elegantissima*, *Whitmani* and *Scottii*, three large houses full, in best selling sizes, all pot grown (not bench grown).

Our ferns are not forced or grown in shady houses, but grown exposed to the sun, ventilators are open day and night. Such treatment stiffens the fronds, and makes strong, stout plants, that can be shipped 5,000 miles safely without injury to the plants in transportation.

If you so much money would make, That to pile it you'll need a big rake; Then to Ashmann you'll scurry, And buy in a hurry.

All the plants your benches will take.

ARAUCARIA EXCELSA, 5 to 5½ in. pots, 10-12 to 14 in. high, 3 to 4 tiers, 2 years old, 50c. each. Larger sizes, 5½ to 6 in. pots, 2-3-4 years old, 3-4-5 tiers, 60c.-75c.-\$1.00 to \$1.25. each.

ARAUCARIA Compacta Robusta, 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each.

ARAUCARIA Glauca, 3-4-5 tiers, 2-3-4 years old, 10-12-15-18 to 20 in. high, 6 in. pots, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each. Specimen plants, *Compacta Robusta*, of last year, Spring, 1906 importation, 5 years old, 30 in. high, 7 in. pots,

(something fine), 5 tiers (perfect), \$2.50 to \$3.00 each. Specimen Plants, 5 perfect tiers, 36 to 40 in. high, 7-8 in. pots as broad as long, \$4.00 each (worth \$10.00).

LATANIA Borbonica, 4 in. 20c. to 25c. each. *KENTIA Forsteriana* and *Belmoreana*, European stock, 6 in. pots, 25 to 30 in. high, five leaves, \$1.00 to \$1.25 each; 4 in. pots, 18 to 20 in. high, 35c. each.

COCOS Weddelliana, 3 in. pots, 10-12-15 in. high, 15c.-18c. to 20c. each.

ARECA Lutescens, 4 in. pots made up, three plants in a pot, 20c. per pot.

FICUS ELASTICA or *RUBBER PLANTS*, home grown and Belgium stock, 5-5½ to 6 in. pots, 35c.-40c.-50c. and 60c. each.

FERNS, *Boston*, 4 in. 20c., 5 in. 35c., 6 in. 50c. each.

Elegantissima, 4 in. 25c., 6 in. 50c. each.

Whitmani, 6 in. single plants, 50c. each;

6 in., made up, three plants in a pot, having from 20 to 25 fronds, very fine, 75c. each; 4 in. 25c. each.

Pieroni, 4 in. 20c. to 25c. each.

Barrowsi, 5½ in. 40c. each.

Scottii, 4 in. 20c. to 25c., 6 in. 50c., 5 and 5½ in. 35c. and 40c.

Ferns for Dishes. A large assortment in 2½ in. pots, \$4.00 per 100.

ADIANTUM Hybridum, the best adiantum for cut purposes, large plants in 6 in. pots, 50c. each.

ASPARAGUS plumosus naus, 3 in. pots, \$5.00 per 100.

CYCAS REVOLUTA (Sago Palm). Plants from 5 to 10 leaves 10c. per leaf, above 10 up to 35 leaves 80c. per leaf.

PRIMULA OBCONICA, in bud and bloom, best strain, 3 in. \$7.00 per 100.

CHINESE PRIMROSES, 4 in. best Jno. F. Rupp strain, \$8.00 per 100.

CHIRYANTHEMUMS, last call, about 15 best varieties named, 2½ in. pots, about 10 to 12 inches high, \$2.00 per 100; to close them out; have about 600 plants.

All goods must travel at purchaser's risk.

Please state if plants are to be shipped with or without the pots.

Cash with order please.

Philadelphia Convention S. A. F. O. H.

Despite a few drawbacks arising mainly from misunderstandings, the straightening out of which at times resulted in somewhat heated discussion, last week's convention of the S. A. F. O. H. at Philadelphia may be regarded as having been a most successful one from every point of view. And, surely, in the matter of entertainment, never before were greater or more varied hospitalities extended delegates to an S. A. F. O. H. convention than those so liberally dispensed by the Philadelphia brethren.

In our last week's issue we gave a resumé of the main points brought out in the president's address, the tenor of which was in accord with the spirit of the program following. The president's remarks in some cases, were supplemented by reports of committees appointed for the purpose, the whole forming an interesting compendium on the matters dealt with.

What may be termed the practical essays were devoted to outdoor gardening subjects, the greenhouse branch of the business, as we before pointed out, having been ignored on the present occasion. The topics treated upon were somewhat threadbare themes to be presented in these times before a convention of the S. A. F. O. H., and the essayists seemed to so regard them. However, they were in harmony with the endeavor to satisfy the "garden-hunger" of the public, referred to by the president in his address, and, as such, they should prove generally instructive and helpful.

The subject of horticultural education in schools received its fair share of consideration. That it was a matter of absorbing interest to the delegates was demonstrated by the discussion following the reading of the various papers thereon presented.

Evidently the theoretical gardener is not in much favor with the practical man; still it cannot be gainsaid that, from several of the agricultural schools, where the teaching of horticultural subjects forms part of the curriculum, have graduated some of the men taking a foremost part in the operations of the trade to-day. These schools but lay the foundation; the rest remains with the graduates, who, like other men, differ in their caliber and capabilities. It is well, however, that the drawbacks, if any, in the prevalent systems of teaching

horticulture at these seats of learning should be pointed out, and remedies applied, so that men fully equipped for their life work, who will honor rather than bring discredit on their chosen calling, be turned out from these necessary and useful institutions.

So far as the S. A. F. O. H. is concerned, the matter of horticultural education in the common and rural schools would now seem to have been placed in a position where good results may be expected to be forthcoming through the society's efforts; for if as desired, horticultural education in all the schools of the United States be made compulsory by State legislation, the benefit to the public must be far-reaching, to say nothing of its value to the horticultural interests of the country. And greater assistance in this connection will be rendered the movement, when the S. A. F. O. H., issues the text book in horticulture as originally intended. A book of this nature, coming from such a source, could not fail to be valued, seeing that it would be the work of men fully competent to instruct in such matters.

The proposition to change the title of the organization to "The Society of American Horticulture," so suddenly sprung upon the members, went down to defeat. Those standing sponsor for this proposed change were, no doubt, sincere in their belief concerning the benefits to accrue from the adoption of the new name. Our own opinion is, that the whole thing was largely visionary and idealistic; certainly it was impolitic and impracticable. However, "all's well that ends well," and the convention voted to recommend to Congress, the adoption of the title "The Society of American Florists and Horticulturists," a designation broad enough, surely, to cover all the departments of horticultural work, which the members are banded together to promote and advance.

There was some talk heard of the method of procedure pursued on this occasion, in arriving at a change of name, having been irregular, and threats of seeking an injunction to prevent its adoption were rife; still it can hardly be conceived that the men responsible for initiating the attempt to secure a change of title would have taken this step before carrying out the legal requirements necessary in such cases.

The elimination of the word "ornamental" from the name will remove a ridiculous and unnecessary appendage, which, it is said, had become the laughing stock of nations and the amended designation should find favor with those whose sensitive feelings were jarred by the adjectival augmentation now removed. The doors of the society are, as they always were, open to all interested in its work and in what it stands for, and all those having the furtherance of its aims and objects at heart should rally to its support, and by their advice and counsel help to improve that in which the society is deficient—something that can be better done within rather than without the ranks.

We are in favor of the adoption of the recommendations of the committee on nomenclature and registration; as set forth in its report; and, doubtless, the executive board, in its wisdom, will put the committee's suggestions into operation. To do so would place the registration of new plants on a solid basis, and prevent burdening the records of the organization with a useless list of names, buried there and representing nothing tangible in the plant world.

The national flower show matter received considerable attention. The date most suitable for the holding of this exhibition appeared to be a debatable one, although the committee entrusted with the preparatory work had made their plans for a Fall show in 1908, as decided upon at Dayton last year. The matter was finally left in the hands of the committee, with power; and as the official preliminary schedule, which we publish in this week's issue, applies to a Fall exhibition, it is assumed that the show will now be held in Chicago in November 1908, as was the original intention. The committee desires criticism of this schedule, and all having any views to express on the subject, should send same to the chairman, Wm. F. Kasting of Buffalo, N. Y.; or, we shall be pleased to publish your opinions in our columns.

We have referred to the elaborate and varied entertainment so generally dispensed by the Philadelphia brethren. They have set a high standard in this connection, difficult of attainment by other meeting places less fortunately situated. No such forms of enjoyment as those given last week should be expected or looked for, at Niagara Falls next year; but this should in no way militate against the attendance at the 1908 convention. What may be lacking in the way of entertainment then, will, we feel sure, be more than compensated by the

many famous and unique attractions which next year's convention city presents. So let all bend their energies toward a large and successful gathering in 1908.

International Conference on Plant Hardiness and Acclimatization.

The Horticultural Society of New York announces an international congress on "Plant Hardiness and Acclimatization" to be held October 1, 2 and 3, 1907, in the rooms of the American Institute and in the Museum Building of the New York Botanical Garden. Following is the program as arranged to date:

PROGRAM.

TUESDAY, OCTOBER 1—10 o'clock a. m.

(Rooms of the American Institute, 19-21 West 44th Street.)

Organization of the Conference. Address by the President of the Horticultural Society of New York. Reading of papers: 10:30 a. m.—12 m. and 2—5 p. m.

WEDNESDAY, OCTOBER 2.

(Excursion. Details will be announced at the meeting of October 1.)

THURSDAY, OCTOBER 3—10 o'clock a. m.

(New York Botanical Garden, Bronx Park.) Meetings for the reading of papers in Museum Building: 10 a. m.—12 m. and 2—5 p. m.

List of Papers.

The following partial list of titles which have been promised will serve to indicate the general scope of the subjects that the conference will cover, and the committee of arrangements will be glad to receive promises of other titles or suggestions from people who are interested. Communications should be addressed to the secretary.

It is planned to publish in one volume a complete report of the proceedings, which should be an important contribution to the literature of horticultural research.

The Determining Factors in the Seasonable Activity of Plants. D. T. MacDougal, Tucson, Ariz.

Factors that Control Acclimatization. Henry C. Cowles, University of Chicago, Ill.

Evaporation as a Climatic Factor Influencing Vegetation. B. L. Livingston, Tucson, Ariz.

Air Drainage as Affecting Hardiness of Plants. Ernst A. Bessey, Subtropical Laboratory, Miami, Fla.

The Real Factors in Acclimatization. Frederic E. Clements, University of Nebraska.

Plant Improvements Needed in Specific Cases. W. M. Hays, Assistant Secretary of Agriculture.

Comparative Hardiness of Plants of the Same Variety from Northern and Southern Points. J. C. Whitten, Missouri.

Observations on Eucalyptus Hybrids; The Japanese Loquat in Algeria; Truth to Seed of Eastern and African Varieties of Vitis vinifera. M. Robert, Algeria.

Temperate Zone Plants in the Tropics. D. W. May, Porto Rico.

Acclimatization of Economic and Other Plants in the West Indies. D. Morris, Imperial Dept. of Agriculture for the West Indies.

Co-operative Testing to Ascertain Hardiness in Fruits. H. L. Hutt, Guelph, Canada.

Resistance to Cold, Heat, Wet, Drought, Soil, etc., in Grapes. T. V. Munson, Texas.

Developing Hardy Fruits for the North Mississippi Valley. Samuel B. Green, Ohio.

Hardiness of the Peach. U. P. Hedrick, Geneva, N. Y.

Hardiness of Apples. O. M. Morris, Oklahoma.

Fruits and Trees in the Northwest. W. S. Thornber, Washington.

Hardiness and Acclimatization of Alfalfa. B. C. Buffum, Wyoming.

Some Work with Timothy and Awnless Bromegrasses. S. Fraser, Genesee, N. Y.

Hardiness of Ornamental Plants in the Middle Northwest. Anthony U. Morrell, Minnesota.

Studies on the Acclimatization of Plants in the Prairie Regions. L. H. Pammel, Iowa.

Observations in the Region at the Head of Lake Michigan. Jens Jensen, Chicago, Ill.

Experiments in Plant Acclimatization in Alaska. Walker H. Evans, U. S. Dept. of Agriculture.

Fifteen Years Experience in Southern California. D. F. Franceschi, Santa Barbara, Cal.

Some Experiences with Field Crops in Virginia. Andrew J. Soule, Blacksburg, Va.

Observations on Hardiness of Plants Cultivated at the New York Botanical Garden. Geo. V. Nash, New York Botanical Garden.

Some Anomalous Observations in St. Louis. W. Trelease, Missouri Botanical Garden, St. Louis, Mo.

Problems of Hawaii. J. E. Higgins, Hawaii.

Promises of co-operation have also been received from W. Robinson, J. Backhouse, and the Royal Agricultural Society of England; Ph. de Villemorin of France; W. Saunders, Canada; and many experiment station workers.

LEONARD BARRON,

Secretary.

OUR READERS' VIEWS

Express Rates Reduced.

Editor Florists' Exchange:

You will be pleased to know that the United States Express Company has this day (August 27, 1907), reduced the rate on flowers from \$1 to 60 cts. per hundredweight at Madison, N. J., and I believe, a like reduction has been made at all their other offices.

This is a handsome illustration of what the S. A. F. is doing for the florist trade, for, if the society's plea had not been made to the Inter-State Commerce Commission, we may rest assured that the express companies would have indulged indefinitely in their discriminations.

FRANK L. MOORE.

Chatham, N. J.

Convention Snap Shots.

John Westcott still retains rank as the Prince of Good Fellows.

The bowling and other prizes were beauties.

"The best things in life never happen"—Carmody.

The Florists' Hall Association turned up with full coffers.

J. Otto Thilow gave one of the best stereopticon lectures ever heard at an S. A. F. convention.

Kasting makes as efficient a campaign manager as he did a president.

Harry Bayersdorfer's open house was largely visited and greatly appreciated.

Mrs. Vesey as president of the Ladies' Auxiliary, is the right person to make the organization a success.

Among the absent ones who were missed were, Temple, Gillett, John N. May, Valentine and Wilcox.

O'Mara wants a "Senate of Horticulture." Let us have it, and make Pat president.

The Ananias Society failed to convene. Nearly all the members apparently have reformed.

The exhibitors' displays eclipsed all former efforts, and the show was a fine one.

Carmody's stock job is making the S. A. F. presentation speeches; and he does it well.

The Ladies' Auxiliary decided to have a Board of Directors so as to better distribute the honors.

With the dirty linen washed clean, and all the wrinkles ironed out the S. A. F. should feel more comfortable.

Bobby Schultz's night outfit consisted of a corkerew and a blue ribboned pajama with shadow embroidery.

With all the big guns firing at him President Stewart's lot was like that of the policeman, "not a happy one."

The Philadelphia boys are topnotch bowlers, but Graham and Scott made them look like 30 cents at baseball.

Atlantic City, Gettysburg, Luray and the Jamestown Exposition were points of interest visited by returning florists.

J. C. Vaughan remarked that Robert George was "the greatest all round horticulturist in America." Robert blushed.

President Sam Pennock of the Philadelphia Florists' Club and his lieutenants have just and sufficient reason to feel proud.

Campaign cards were numerous. The New York man's bore this strange device; "Popular, Progressive and Prince of Good Fellows."

"When the hour of meeting is set for 9 o'clock, that means sixty minutes past eight," says Gude. Pity the sergeant-at-arms didn't know this.

The graduate of the agricultural school came in for his share of criticism; he seems to be in the same class as the "ornamental horticulturist."

One of the delightful incidents was Miss Fulmer's rendition of "Annie Laurie," on the Columbia with Rogers as tenor and Rickards as bass.

The newly elected president is a worker, not a talker; next year's presidential address may therefore be briefer—a consummation devoutly to be wished.

Speeches "long drawn out" containing little of value or information, wasted a lot of good time that was needed for more important business.

Fulmer of Des Moines, Ia., dreamed that the florists had raised the price of their products to meet the increase in the price of glass. It was only a dream.

The S. A. F. O. H. ought to greet any branch of horticulture when it desires to join, with a polite bow; but to salaam and kow-tow; Oh no!

Leuly left his bike at home this year and came by train. Stephen D. Horan of Bridgeport, Conn., with his family, came by auto.

Even a had shower couldn't dim the luster of the Dreer entertainment. To say that everybody spent a grand afternoon was putting it mildly.

The throes of the convention in getting rid of its "vermiform appendix" will probably be buried in a Congressional pigeon hole.

Several of the convention orators developed the fact, that they possess the requisite four inches of extra jaw, to have their skulls assorted with the ladies'.

When Rickards was discovered in a bootblack's chair on a street corner before breakfast he promptly explained that "He hadn't roosted there all night."

Points of order and personal privilege are parliamentary weapons seldom used at S. A. F. conventions, but the closing session this year seemed to require them.

The florist at the Walton who landed at the wrong room at 2.30 a. m. was greeted with a feminine "go to your own room, you naughty thing." And he went forthwith.

The same energy that kept the New York Florists' Club hustling, will now be at the service of the S. A. F. O. H. (beg pardon, A. H.), in the person of President-elect Frank Traendly.

The old-time gardener needed no other inducement to make displays at our exhibitions than the chance of showing the results of his skill and of taking a prize. How the times have changed.

The "Ornamental" Horticulturist
(The Late C. W. Turnley's Conception)

Reproduced From The Florists' Exchange,
August 28, 1897.
A necessity a decade ago; skidoo in 1907.

At the little entertainment given the Ex-Presidents, on Thursday night those gentlemen were in a reminiscent mood, and the affair was as solemn as a Methodist experience meeting.

The trip from Manhattan to Philadelphia was a pleasant one for which the famous entertainment committee, of the New York florists' clubs should receive due thanks.

The transition from "Florists' business methods," to twentieth century business methods, evaporated much hot air, accompanied with lurid flashes of oratory, entirely uncalled for. Moral: If you want interesting conventions get up a fight.

The Philadelphia boys outdid themselves and eclipsed all previous records. A few visitors deprecated the elaborate entertainment, but the writer noticed that they occupied prominent positions at the feast.

Pat O'Mara made a good substitute for Ex-Mayor Smith as a distributor of the bowling prizes. The presence of so many ladies failed to fluster him, or impair his native wit and humor. He regretted he had to burn the cigar, so gracefully handed to him by Mrs. McKellar.

Patrick O'Mara says the difference between the "ornamental" horticulturist and the other fellow is that the former never has any dirt below his finger nails, while the latter generally has a plentiful supply—the trade mark of his profession.

The Boston seedman said the articles distributed by the National Council of Horticulture were "amateurish," yet one of our Chicago contemporaries considered the same articles good enough for its readers. Are they mostly "amateurs?"

It is said that it was almost impossible to report the meeting of the Ladies' Auxiliary, as they all wanted to speak at one time. Which caused one of the auxiliary to remark that that was one occasion at least when all were unanimous.

Here's to the ladies first. The Ladies Auxiliary S. A. F. O. H. is a lively and hustling organization, which promoted a closer acquaintanceship among its members. They can now assist the florists to promote horticulture, by advocating the use of natural flowers on Spring bonnets.

One auto going to Fairmount Park, contained most of the ex-presidents, three editors of horticultural papers, and George Watson. Suppose anything had happened the car and all had been blown up. Watson and the editors are used to explosions, but the other fellows, what of them?

For many years we have been praying for interesting conventions. We had one this time; and now that several animosities have percolated to the surface let us hope that they will be hereafter buried deep, and that we shall in the future dwell together in peace and unity.—Amen!

The private gardeners present at the convention accused the society of being insincere because "O. H." was not added to the badge; and kicked because the appendage, for which these letters stand, made them ridiculous in the eyes of the world. Why don't they tell what would really suit them best?

The convention unfortunates were F. E. Kanst of Chicago, who went to the Municipal Hospital with diphtheria; Superintendent of Parks Rogers of Cincinnati who got to the same kind of an institution with acute indigestion, and Miss Pearl Fulmer who was robbed of \$40, her pocketbook having been taken from her room at the Hotel Walton.

The far reaching character of the decision of the Inter-State Commerce Commission regarding express rates on flowers was well exemplified by the statement of Secretary Herr of the American Carnation Society, who said that every agent of the Express Company received a copy of the decision in favor of the S. A. F., thus giving the members of the society a distinct advantage in contesting claims.

Couldn't the S. A. F. O. H. secure closer relations, by having a carnation section with a carnation meeting and exhibition in February; a rose section with a meeting and exhibition in June; a chrysanthemum section with a meeting and exhibition in November, and an annual meeting with a trade exhibit and a rousing good time in August? Then the S. A. F. O. H. wouldn't hibernate eleven months in the year.

The Sports at Belmont.

A new departure in connection with the S. A. F. annual convention was inaugurated this year by the Philadelphia Florists' Club in the form of outdoor sports which took place at Belmont, Fairmount Park, on Friday, August 23, 1907. The various contests were witnessed by a large concourse of people, who thoroughly enjoyed the fun.

The baseball game was an exciting one, the home team being matched against one drawn from delegates from different cities. The pitching of Graham of Cleveland, and the fielding of Winterson of Chicago, formed two of the most interesting features of the game. The teams were made up as follows, and the scores were as under:

PHILADELPHIA.

	R.	H.	E.
Eisele, 3b.....	3	3	0
Palmer, 2b.....	1	0	1
Davis, bf.....	0	0	1
Dunning, ss.....	0	0	0

Winterson, rf.....	0	0	0
Beneke, cf.....	0	0	0
Kesler, lf.....	2	1	1
Total	22	13	3

The other contests consisted of the following:

50 Yard Race for Women.—First, Miss May Dodds; second, Miss Jennie Burton; third, Miss Carrie Burton, all of Philadelphia.

100 Yard Race for Men.—First, K. Christie, Baltimore, Md.; second, H. D. Graham, Philadelphia; third, P. Klingspoon, Philadelphia.

Potato Race.—First, Miss Jennie Burton, Philadelphia; second, Miss May Dodds, Philadelphia; third, Mrs. Olsen, Chicago, Ill.

Wheelbarrow Race.—First, M. Campbell, Philadelphia; second, E. Dornheim; third, W. E. McKissick, Philadelphia.

Quoits.—First, G. C. Shaffer, Washington, D. C.; second, Samuel Batchelor, Philadelphia.

FIRMS WHO ARE BUILDING

SHILLINGTON, PA.—Luke M. Deeds is building three new greenhouses, each 100 feet in length.

MANKATO, MINN.—The Windmiller Company have now 6,500 square feet of glass in use, and will add 2,500 feet this Fall.

KEWANEE, ILL.—Albert G. Larson is making an addition to his greenhouse, which will be 58x25½ feet. A new boiler room, 16x20 feet, will be constructed, and a modern boiler installed. Hot water will be the heating system.

CHANGES IN BUSINESS.

CLINTON, MO.—J. H. Temple and family have gone to Olathe, Kan., where they will engage in the nursery business.

AKRON, O.—The Akron Floral Company has been incorporated by E. M. Smith, Horace Neff, W. G. Weinhold, Theodore O. Damschroeder; capital, \$10,000.

ELWOOD, IND.—The Bradley firm have completed a deal for the purchase of the greenhouses at Tipton, formerly conducted by Thomas Weakly. C. Bradley will remove to Tipton and assume charge of the establishment.

BOSTON, MASS.—The Florists' Album Company has been incorporated for the purpose of publishing floral designs; capital, \$40,000. Incorporators: President, S. E. Blanchard, Hyde Park; treasurer, G. N. Murch, Newton.

BLOOMINGTON, ILL.—The Corn Belt Nursery and Forestry Association has been incorporated; capital, \$10,000; to deal in nursery and greenhouse stock; incorporators: Burton J. Vandervoort, Louis Dunning and Ulysses G. Owens.

BUSINESS DIFFICULTIES.

YOUNGSTOWN, O.—At a meeting of the creditors of the Templin Company, held on August 8, 1907, attended by principal creditors representing \$75,000 of indebtedness, it was stated that the company has ample stock in trade and effects to pay, and a request was made that the business be continued till June 1, 1908, by W. H. Schmick, D. W. McCloskey and John Walker, a committee chosen by the creditors present at the meeting. The remaining creditors are being asked to agree to this proposition.

BALTIMORE, MD.—C. Bosley Little, a well-known grain merchant, who conducts a farm at Van Bibber, Harford county, and takes an active interest in all means for improving the output of Maryland farms, is advocating a pure-seed law to be enforced by the United States Government, just as the Pure-Food law is being enforced.

Society of American Florists and Ornamental Horticulturists

Incorporated by Act of Congress March 4, 1901.

Continuation of Report of the Twenty-
Third Annual Meeting and and Exhibition
held at Philadelphia, Pa. : : :

August 20, 21, 22, 23 and 24, 1907

Last week we gave a summary of the proceedings of the Philadelphia convention up to and including the adjournment of the morning session of Thursday, August 22. The following is the conclusion of our report:

In the discussion of Mr. Hallock's paper on "Hardy Bulbous and Tuberous Rooted Perennials," Mr. Bisset asked if in the essayist's plantings of *Iris Kämpferi* on dry ground he had not been troubled with the field mouse. Mr. Bisset's experience having been that, when this iris was planted in dry ground he had suffered loss from these pests, whereas on wet ground no such trouble resulted. Mr. Hallock responded that both the field mouse and the mole had proven destructive; he had tried traps, and even then these animals would get the best of him.

Being asked by Mr. Wintzer as to the difference between *Lilium philadelphicum* and *L. superbum*, Mr. Hallock stated that there was quite a difference. *L. philadelphicum* is a delicate plant, the bulb rarely exceeding the size of the point of one's finger, the scales being very open. It is not a tall grower, whereas *Lilium superbum* grows to the height of from four to five feet, and the flower is reflexed. Mr. Wintzer stated that he had found *Lilium superbum* growing in the swamps of New Jersey from four to six feet high, the stems bearing from fifteen to twenty-five flowers. The bulbs of those were larger than are secured at the present time. Mr. Hallock added that the bulbs of this particular lily were getting scarce, and that growers preferred to purchase rather than to raise their own stock.

Mr. Boddington, referring to the statement of the essayist that bulbs of *Lilium candidum* held over until Spring would be worthless, stated that he had had a few cases of these in cold storage to fill Spring orders. The bulbs had not made any Fall growth and were perfectly dormant when taken out of the storage house. Mr. Hallock replied that his statement referred more particularly to bulbs treated in the ordinary way and not to those placed in storage.

The superintendent of the trade exhibit, David Rust, then read his report, and stated that he looked for the gross receipts from the exhibit this year to be somewhere about \$1,500.

The subject of horticultural education in schools was then taken up, a lengthy paper thereon being presented by W. B. DuRie of Rahway, N. J. The paper was freely discussed by Messrs. O'Mara, Hallock, Pierson and Hammond, who spoke of the work along this line in the State of New York; also by Professor L. C. Corbett of the Department of Agriculture, who stated that the school garden movement was in operation in nearly every State in the Union and also in Porto Rico and Cuba, Nevada and Kansas being the only two States from which the Department had not received a communication regarding the matter. There were, he said, about 3,000 school gardens in actual operation in the United States, and in this movement Mississippi was taking a foremost part in making the study compulsory in its rural schools. The movement would have a tendency to relieve the congested condition existing in cities, taking a certain class of people out of the cities into the country. The greatest demand upon the Department of Agriculture for assistance along this line had come from the State of New York, while Massachusetts and Maryland were also leaders in this particular work. The speaker favored the establishment of agricultural high schools, and also told of the effort to divert some of the congressional seeds into cities for the furtherance of school garden work.

James Dean stated that an appropriation of \$50,000 had been made to the Brooklyn (N. Y.) Institute of Arts and Sciences for the erection of greenhouses to be used for the education of teachers in public schools in horticultural matters there. They were also endeavoring to establish in Brooklyn a botanical garden of considerable size.

On motion of Mr. O'Mara the report of the committee on school gardens was received, and the committee instructed, working with the Board of Directors of the S. A. F., to secure legislation for compulsory education in horticulture in all schools throughout the United States.

A committee on final resolutions, consisting of James Dean, H. B. Howard and J. K. M. L. Farquhar, was appointed by the chair.

After the announcement of the result of the election, President-elect Traendly made a few remarks, stating that he thanked the society for the honor it had bestowed upon him, and that, with the assistance of the members, he would do his utmost to make the convention at Niagara Falls in 1908 the banner one of the society. Mr. McClure, vice-president-elect, also responded in similar terms.

During this session retiring President Stewart was presented with a solid silver service of knives, forks and spoons, also a check for a sum of money, Mr. Carmody, on behalf of the society, making the presentation speech. The recipient feelingly replied.

Thursday Evening Session.

The evening session on Thursday opened at a little after 8 o'clock. R. Vincent, Jr., for the committee on vice-presidents' reports, made the following report:

Report of Committee on Vice-President's Reports.

We, the undersigned committee, appointed by this body to examine the vice-president's reports, beg to offer the following suggestions:

That they be requested to do more missionary work to build up the national association, and that the ones so doing should receive the thanks of the national body when in annual session.

We find from their reports, that the cold late Spring was much against their business in many lines, but

George W. McClure,
Vice-President-Elect S. A. F. O. H.

that later returns, with prosperity, well repaid their labors, and much building and other improvements are as a result being done to the benefit of the florists' trade generally.

Classes in landscape gardening, as recommended by E. L. Peirce, State vice-president for Massachusetts, ought to be encouraged.

We believe the efforts of the Illinois State Society in getting a state appropriation, and so forth, for the study of the best and cheapest methods of growing cut flowers and plants, and looking into their diseases, remedies, etc., and methods of ridding them of insects and pests is a move in the right direction, and one for other States to follow.

We are satisfied the Washington Florists' Club is doing a great work in the education of the future generation in offering medals or premiums to the successful child or children that produce the best plants or flowers from their plots.

We find also from many reports that the increased cost of labor and material necessary to successfully conduct our business is cutting large holes in our profits, as the prices of our products have not advanced in proportion.

RICHARD VINCENT, JR., }
GEORGE A. KUHLE, } Committee.
JOHN G. ESLE, }

Horticultural Education.

Theodore Wirth then read his paper on "Horticultural Education in Agricultural Schools." This was characterized by Mr. Hallock as a very able paper, and a vote of thanks was tendered to Mr. Wirth.

In the discussion of this paper, H. C. Moon, of Morrisville, Pa., stated that his experience with the graduates from these agricultural schools had been that they did not get down to real work. Almost all of them failed to take any particular interest in the work on hand.

W. N. Rudd, of Chicago, said that the florists had not yet waked up to the possibilities before them in horticultural education. While there was a very large number of experiment stations in the country, only a few of them had been doing anything for floriculture that was worth consideration, yet they had been devoting considerable time and money for work on apples, currants and such like things. He told of the successful endeavor of the Illinois State Florists' Association in securing from the state legislature, at its last session, an appropriation of \$15,000 to be used exclusively for experimenting with the growing of plants under glass. They in Illinois would never have gotten that appropriation had they not gone in for it. He believed that the florists of every state should satisfy the authorities of these state experiment stations that the promotion of horticulture meant something more in these times than the cultivation of apples. Before they in Illinois were through with this matter they hoped the State University would become a practical school where florists could send their boys to learn the things they ought to know. He did not think there was a state in the Union where, if the florists got together and said: "We will have this," and keep on saying it, in season and out of season, but what they would get something and keep on getting something.

R. Vincent, Jr., told of the efforts of the Florists and Gardeners' Club of Baltimore in securing attention to floriculture from the Maryland Agricultural College. The authorities there had obtained about one hundred boxes of glass which would be used for greenhouses for the purpose of testing florists' products.

Colonel Castle considered that better results would be obtained by encouraging the school children to grow plants, flowers and vegetables which they could exhibit at the various state fairs for prizes. This method, he thought, would be more beneficial than spending money for horticultural education in these state agricultural schools, where about \$3,000 a year would go to professors and other officers, and \$1,000 for education.

Alex. Wallace spoke of the good work doing by the Cornell University College of Agriculture on behalf of the peony. The recent exhibition held there, as well as the field tests of peonies had proven most instructive. He believed that every experiment station was willing to undertake work on behalf of floriculture, so far as its facilities and funds would allow, and that it rested with the florists themselves to see to it that their interests received greater attention from these institutions than at present is the case. These stations were, he considered, doing some valuable work; they were distributing literature on various horticultural and floricultural subjects that was of a very helpful nature, and it seemed to him, that they were not receiving due credit for the good they really were accomplishing. It was unfair to them to underestimate their endeavors.

Mr. Farquhar of Boston, then read his paper on "Horticultural Education by Horticultural Societies and Clubs." This matter was discussed by Messrs. Hammond and O'Mara, the latter pointing out the mistaken idea of some proprietors in considering that their gardeners were not properly equipped to undertake the work of landscape development. He cited one case where the employer had been out of pocket considerably on account of this prevalent conception of the gardener's limitations. If the S. A. F. could bring the fact home to the men who employ gardeners, that they have at their doors the talent and the men who could do that work efficiently, the organization would be accomplishing something.

Resolutions of sympathy were passed to Joseph Heacock, of Wyncote, Pa., for the great loss he had sustained in the death of his son by drowning.

The National Flower Show.

Mr. Kastig, chairman of the committee of fifty, appointed at the meeting of the Executive Committee held in Chicago, stated that the guarantee fund for that affair now amounted to \$10,490. He also said that a premium list had been gotten up which would be printed in the trade papers.

This subject was productive of a great deal of discussion, some favoring the holding of the proposed show in Chicago in November, 1908, as decided upon by the Executive Committee; others being of the opinion that March was the more appropriate season in which the exhibition should be held. The matter was finally left in the hands of the Executive Committee, with power.

Friday Morning Session.

An extra session opened this morning at 9 o'clock in the meeting room of the Philadelphia Florists' Club, with a fairly large attendance. The report of the School Gardens Committee was again brought up, and the names of Mr. O'Mara and F. R. Pierson were added to the committee.

In the absence of the author, S. S. Skidelsky, Mr. O'Mara read the report of the Committee on Publicity. This report urged that greater individual effort should be made by the florists of the country to bring to the attention of the people, through the daily press, what they were doing, also that greater attention be paid by the trade to the development of the plantings of backyards, and endorsed the work of the National Council of Horticulture, which should be supplemented by individual endeavor as far as possible.

The report was ordered to be made part of the proceedings, and a vote of thanks was tendered to Mr. Skidelsky.

tory of its parentage and origin, such report to be made on suitable blanks to be prepared by the committee so appointed, said blanks to be furnished breeders or introducers on application by the secretary of the society.

Your committee would recommend that a certificate of registration be granted to all plants possessing superior merit in the class to which they belong. To carry out the provisions of this feature, it is recommended that the Society of American Florists maintain a permanent committee consisting of experts in the several lines competent to pass upon the merits of the several subjects offered annually for registration.

Further, that in the event the merits of the plant in question cannot be determined from specimens and the data given by the originator or introducer, that said plant be placed in suitable trial grounds, either under the direct control of the S. A. F., or such institution as it may designate, for a full test of the points claimed for it by its originator.

It is believed that by pursuing such a policy the S. A. F. will be doing for the workers in horticulture what the Patent office is now doing for the American inventor. In addition to the valuable work of preserving a history of the introduction, the society will give its official sanction and approval to all worthy intro-

Reporting for the Committee on Tariff and other cognate matters, Mr. Pierson stated, that as it had been advanced that no revision of the tariff would ensue until after the next Presidential election, action by the society on this matter be deferred. Agreed to.

For Better Society Business Methods.

Wm. H. Elliott, Brighton, Mass., presented, for the committee, a report suggesting ways and means for the better conduct of the society's business affairs. This report was provocative of a heated discussion, resulting in the whole being expunged from the record.

To Aid National Council of Horticulture.

Robert Craig moved that the society appropriate \$200 to the National Council of Horticulture to assist in the propaganda, through the daily press, of reading matter on horticultural topics, pointing out the great benefit resulting from the distribution of such articles in this manner.

Mr. Farquhar opposed the motion on the ground that the articles distributed were amateurish, some of them unpractical in their advice and instruction. He believed the S. A. F. could itself accomplish this kind of work in a more satisfactory and practical way and did

Members of the S. A. F. O. H., their Ladies, Families and Friends, at Fairmount Park, Philadelphia, Pa., on Friday, August 23, 1907.

The report on suggestions in regard to plant registration and nomenclature was read by Mr. Bisset, and was as follows:

Nomenclature and Plant Registration.

Your committee on Nomenclature and Plant Registration beg leave to report that in their opinion a committee should be appointed with power to pass upon all questions of nomenclature and plant registration.

The committee further recommends that the body constituted to do the work on nomenclature and plant registration consist of three members from each of the important horticultural centers of the country. This committee should be appointed by the executive board of the S. A. F., and to be extended as the demands of the work require.

That it is the judgment of the committee that the work of plant registration which has been inaugurated by this society be continued, its scope broadened, and its value to horticulture increased.

That the list of plants so registered each year be made, as at present, a part of the annual report of the society, a special section if necessary being devoted to this work.

That in order that a plant may be eligible to registration, the request for registration must be accompanied with a carefully prepared and accurate description of the plant and its characters, together with the full his-

duction; such sanction, if secured as the result of merit, will give the introducer the advantage which is bound to come as a result through increased demand.

If this work be carefully and conscientiously done, every plant registered will bear the impress of royalty, and receive the impetus of the unbiased judgment of an impartial tribunal—a reward worth striving for by every man working to improve horticultural products.

L. C. CORBETT,	} Committee.
PETER BISSET,	
J. A. MANDA,	
EDWIN LONSDALE,	
W. N. RUDD.	

Mr. O'Mara moved that the report be received and that the Executive Committee be instructed to carry out the recommendations contained in it. This motion was carried.

Affiliation with Other Organizations.

Mr. Farquhar explained that it had been considered advisable by this committee to postpone its report, as there were several issues which had not been settled on which the report depended, among them the fixing of the name of the society. This was agreed to, and the committee granted further time in which to make its final report.

not think the funds of the society should be used for the purposes of another and separate organization. The motion, however, prevailed.

The meeting then adjourned.

Friday Evening Session.

The evening session on Friday opened in the meeting room of the Philadelphia Florists' Club at 8:30, with an enthusiastic, if not a large attendance.

Several communications were read by the secretary, among them one from Mr. Brinckle, giving a very interesting account of the career of the late Professor Thomas Meehan. On motion of Mr. Wallace the letter was ordered to be incorporated in the proceedings.

The secretary also read a letter from the Jamestown Exposition authorities stating that it was intended to hold a chrysanthemum show there during the month of November, on the closing days of the exposition, and asking the support of the Society of American Florists. Mr. O'Mara stated that in view of the fact that the society was to hold a national flower show, and that its energies and resources would on that account be taxed to the fullest extent, he did not think it would be wisdom to take any action toward making an extra exhibition there at the date mentioned. The secretary was therefore instructed to advise the Jamestown people to that effect.

Standard Flower Pots.

A letter was read from W. N. Rudd of Chicago calling attention to the fact that the manufacturers of flower pots had so changed their models, until there is hardly such a thing as a standard pot in the market. The pots of hardly any two makers would nest, and the breakage on that account was something frightful. Mr. Rudd suggested that all pots exhibited at the convention should be measured, and no award made by the society to any not according to standard.

The president suggested that a committee might be appointed to take up the examination of samples of flower pots in some systematic way and that action thereon might be taken next year. Subsequently, the president appointed on that committee Robert Craig, John Birnie and F. E. Palmer.

Closing the Exhibition Hall.

Colonel Castle then brought up the present method of closing the exhibition during certain hours, pointing out the disadvantage of that action to those who have gone to the trouble and expense of making a display at the convention. He moved that in future the second day of the meeting should be known as exhibitors' day, and that the program be so arranged that nothing shall take place on that day which will tend to divert the attention of the delegates from the exhibits made. The president pointed out that this resolution would conflict with the by-laws to some extent, and the matter was finally placed in the hands of the executive committee for adjustment.

Money Appropriations.

Quite a discussion ensued on the proposition that the

society appropriate money for the purpose of the secretary's office and other matters, and on motion of Mr. Esler it was finally resolved that the executive committee be instructed to present classified appropriations to the members of the S. A. F. O. H. at the annual meeting for their approval. This motion was carried.

Prize Essays.

Secretary Hauswirth stated that the time for submitting essays in competition for the prizes offered by Samuel Murray of Kansas City, Mo., the nature of which was recently set forth in the trade papers, had been extended until September 13, and that all papers must be in the hands of the secretary by October 1. The decisions would be rendered somewhere about October 15.

Mr. Farquhar again brought up the matter of the appropriation by the society to the National Council of Horticulture, and a motion to the effect that all articles of a cultural nature distributed by the Council should be submitted to a committee on publication of the Society of American Florists, consisting of two members, for approval or revisal by that committee. On this committee Robert Craig and Mr. Farquhar will serve.

The convention then proceeded to discuss the amount appropriated by the executive committee for the purpose of fighting the United States Express Company before the Inter-State Commerce Commission at Washington, and after considerable debate the action of the executive committee was ratified.

The convention here adjourned at 10:50 p. m. to meet in

Niagara Falls in 1908.

An Enjoyable Occasion.

On Thursday evening, in Horticultural Hall, after the close of the business session of the S. A. F., there took place one of the most enjoyable features of the many occurring in connection with the convention, in the form of a reception tendered to the ex-presidents of the society, and invited guests. The genial John Westcott had made a special effort to secure the attendance at the Philadelphia meeting of as many of the former presidents of the organization as possible, resulting in the large number of these gentlemen seen at the gathering.

Ex-President Adam Graham acted as toastmaster, and acquitted himself in his usual able manner when serving in that capacity. All of the speakers were in a reminiscent mood, and their hopes and ambitions, when officiating as the presiding officer of the organization were all very interesting. Mr. Vaughan had attended every meeting of the society since its inception. Mr. Stewart had only missed one convention, and there were several others who had a record of regular attendance for many years. Mr. O'Mara spoke optimistically of the future of the society. He said also that probably the day was not far distant when there would be "A Senate of Horticulture" in America, composed of delegates drawn from the many organizations now devoted to the promotion of the art, and when such a Senate materialized, the S. A. F. delegates would be found taking a foremost place in its deliberations.

The proposed change of name also formed the theme of some of the speakers, Mr. Rudd remarking that the society had wrestled along fairly well without the charter, probably as well as it had done with it.

Those who spoke were Messrs. Stewart, Traendly, Hill, Vaughan, Dean, Beatty, Lonsdale, O'Mara, Gude, Kasting, Rudd, McClure, Burton, Hallock, Hauswirth, Cutler, Castle, and Westcott.

The happy affair terminated at an early hour on Friday with the singing of Auld Lang Syne.

David Rust Making Notes

Ex-President Dean and Others Watching the Ball Game

The S. A. F. Outing at Fairmount Park, Philadelphia, Friday, August 23, 1907

Ladies' Auxiliary.**Thursday Morning Session.**

The meeting held on Thursday, 9 a. m., opened with the calling of the roll. The following new members were reported to have joined: Mrs. Alex. Guttman, New York, N. Y.; Mrs. W. H. Elliott, Brighton, Mass.; Miss P. A. Baker, Media, Pa.; Mrs. E. Amerpohl, Janesville, Wis.; Mrs. H. J. Berning, St. Louis, Mo.; Mrs. John Rogers, Cincinnati, O.; Miss Bather, Clinton, Ia., and Mrs. Evans of Pennsylvania.

The by-laws were read and adopted, and a motion made and carried that they be printed, and a list of members added, a copy to be sent to each member.

The society is to be entertained at Niagara Falls next year, and as there are only two florists in that city,

The Outing at Fairmount Park.

The climax of the round of entertainment given by the Philadelphia Florists' Club to the S. A. F. delegates took place at Fairmount Park on Friday, August 23. The visitors were taken to the park in buses and automobiles, some going by way of Girard College, where the bedding on the grounds of that institution, in charge of Edwin Lonsdale, was very highly commended.

Arrived at the park, the delegates had luncheon served, after which the various games arranged for their enjoyment were indulged in. The baseball game between the Philadelphia team and one composed of visitors from other cities seemed to be the greatest attraction, but the various races in which the ladies took part were also greatly enjoyed by the onlookers. At the termination of the games, dinner was served in a large tent, between six and seven hundred people participating. A fine orchestra discoursed music while the diners were busy, the popular airs and old-time favorite tunes of the different nationalities being thoroughly appreciated.

President Stewart of the S. A. F. being called upon, mounted a chair and made a few remarks, in the course of which he stated that the society had been attempting to change its name, but the handwriting on the wall was seen. There were three hundred ladies for every one hundred gentlemen, and they had got to give the ladies what they asked for. Continuing, Mr. Stewart said: "When we were invited last year by the Philadelphia brethren to come here and hold this convention, they stated that they would make it the banner convention in the history of the society. Have they done so? (Cries of yes.) It has been a glorious convention, and we should not forget to voice in the strongest manner our gratitude for it all. The convention with our exhibition and our meetings, and this beautiful ride we have had to-day; the hospitalities they have extended to us, and this crowning part of it here in this delightful, cool spot, with this beautiful sky line of trees, with grove and lawn, will last in our memory, and surely we are grateful for everything that has been provided and will tell our folks at home how much we have enjoyed it. It has been a great convention. We shall go away satisfied that we have done some good work. We have had some little differences, but they were finally overcome, and we are going away with everything clear, with malice for none and charity for all? That is the spirit we carry away from Philadelphia, and that is something which we can go back to our homes and be happy for during the years to come.

"I thank you on behalf of the society; I thank you personally for all you have done for us, and assure you that our hearts are full of gratitude." (Applause).

J. K. M. L. Farquhar then read the report of the committee on final resolutions, thanking the Philadelphia Florists' Club, its officers and committees, the Pennsylvania Horticultural Society and the ladies of Philadelphia for the many courtesies extended to the convention delegates. Thanks were also tendered to W. F. Dreer for the elaborate arrangements made for the pleasure of the visitors at Riverton, N. J., and to his manager, J. D. Eisele. The committee also thanked J. O. Thilow for his interesting lecture; the committee of sports for their carrying out of the arrangements connected with these and the daily press of Philadelphia.

On motion of J. C. Vaughan, seconded by E. V. Hallock, the report was received as the expression of all those present.

P. O'Mara then distributed the various prizes won

C. J. Graham, Pitcher for Visiting Team.
The Potato Race for Ladies.
What are They Laughing At?

in the different contests. Mr. O'Mara was in his best form, and kept his hearers in good humor by his witty sallies, as he handed over the trophies to each of the recipients.

This closed what has been surely the most enjoyable convention experienced by the Society of American Florists, and as the visitors took their varied ways in the rain which began to fall at the termination of the proceedings, it was with the feeling that their trip to Philadelphia had been a profitable as well as a pleasurable one.

Expedition and Satisfactory.

We wish to congratulate you on your success in reporting the transactions of the S. A. F. convention like a newspaper. We had a report of Thursday's meeting on Friday morning.

RICHARD VINCENT, JR. & SONS Co.

Secretary Ladies' Auxiliary S. A. F.**

both of whom have not a very large business, the president suggested that the members might possibly at that time give a reception or some form of entertainment. The matter was left in the hands of the officers who will act as a committee for that purpose.

A rising vote of thanks was extended to Mrs. Maynard, the secretary, for her services during the year.

A motion was made and carried that the legal advisory board be abolished, and an amendment added to the by-laws providing for a board of five directors. Those appointed were Mrs. J. C. Vaughan, Mrs. Elliott, Mrs. Herr, Miss Fulmer and Mrs. Freeman.

The meeting then adjourned.

Convention Notes.

On Thursday, August 22, the exhibitors presented to David Rust, superintendent of the Trade Exhibit, a purse containing \$60 in gold, as a mark of their appreciation of his able services. The presentation speech was made by Colonel Castle.

In our report of the Trade Exhibit in last week's issue, the display of adjustable flower holders, made by Robert Kift, Philadelphia, was inadvertently omitted. This was an attractive exhibit, well demonstrating the adaptability of this device for the purpose for which it is intended.

The Ladies' Auxiliary, on Friday at Fairmount Park, presented the secretary, Mrs. Maynard, with a set of silver teaspoons, in recognition of her untiring efforts on behalf of the organization. Up to Saturday forenoon, August 24, 1907, 100 members had been enrolled.

purpose of the duty is to enable the domestic glass makers to get higher prices for their product.

The price of glass has advanced recently 26 per cent. The florists appealed to the chairman of the Ways and Means Committee and of course got no comfort from him. He pointed out that the imports of glass were less in 1905 than in 1896 and offered this as a complete answer to them. The American manufacturers have been driving imported goods out of the market pretty generally and would have done more of it if the tariff had not enabled them to maintain high prices.

Our present purpose, however, is not to discuss the merits of the case presented by the florists or the sufficiency of the reply of Congressman Payne. We direct attention at present to the evidence that the American pays the tax, that whatever benefit the tariff affords to one American interest it affords at the expense of, and through burdens imposed upon, other interests and the

once a year. The chrysanthemums could not be shown in the Spring, nor the bulbous plants in the Autumn; while roses from the open air would have to have an intermediate season.

Would it be too great a strain on the fraternity to hold two or even more exhibitions each year? The growing popular demand for flowers would probably justify them, and they might be held at different places if that seemed desirable. The floral wealth of this country would easily fill a new show every month the whole year round.—Philadelphia Evening Bulletin.

NEW ENGLAND DAHLIA SOCIETY.—The first annual meeting of the New England Dahlia Society will take place Wednesday, September 4, at 2 p. m., at Horticultural Hall, Massachusetts and Huntington avenues, Boston, Mass. Every member, who possibly can, should attend as the officers for the next year will be elected and every member will be given an opportunity to vote

Greenhouses and the Tariff.

Nothing illustrates better the ramifications of the tariff than the issue raised by the florists, regarding the duty on glass. This is imposed for the stimulation of the American glass industry, but the stimulation consists of a heavy tax upon other American industries, one of which is floriculture. The greater part of the glass is not used in making greenhouses; it is used in dwelling houses, and every man who builds a house is just as really interested in the glass duty as the florists are, though he may not be so conscious of it because he buys a smaller amount.

Evidently the nonsense that the foreigner pays the tax makes no impression on the florists; they know they pay the tax, and they know, also, that they pay the tax whether they use imported glass or not. The

general consuming public. The tariff creates no values at all; it simply takes a lot of small sums from a great many people and combines them into a few large sums for a few beneficiaries of the system.—Philadelphia Record.

A National Flower Show.

The florists, in their convention, have had much to say about a plan for a national flower show. They favored the idea, but there was much difference of opinion as to the proper time of year to hold it, and the subject was finally referred to a committee.

That enterprise seems too large to be concentrated at a single time or place. Even the local shows to which Philadelphia has been accustomed for years, would lose some of their chief attractions if held only

on questions pertaining to the welfare of our society. The dahlia exhibit of the Massachusetts Horticultural Society is on the above date and should be a special drawing card for our members.

In connection with the exhibit of the Massachusetts Horticultural Society on September 4 and 5 our society has been allowed the use of a table that our members may exhibit upon it freaks and otherwise unrecognized dahlias, also such varieties as require naming. A committee from our own ranks will pass judgment upon this exhibit, also supply the correct names.

Upon the same table may be exhibited new and original introductions or seedlings not shown previously. The committee in charge will carefully go into the merits of each new variety and their report should be of greatest value to the introducers and dahlia lovers in general.

M. FULD, Secretary.

S. A. F. NATIONAL FLOWER SHOW

List of Guarantors.

Treasurer A. B. Beatty subscribed \$200; the Dayton Florists' Club, \$150.

to and from the grove was enjoyed by all who participated in it. The park is delightfully situated and covers an area of about one hundred and thirty acres.

Upon arrival at the park the guests repaired to the music pavilion; here Sousa was the attraction, and the music was thoroughly enjoyed. Adjournment was then had to the Lakeside café, where luncheon was served. The tables were beautifully decorated with ferns, palms, gladiolus and other flowers. About three hundred guests participated in the repast so kindly prepared for them.

After luncheon, the visitors were at liberty to roam about the park. Sousa again rendered selections from the various operas, and most of the ladies decided to listen to the music. At the termination of the musical program for the afternoon the guests scattered, some to enjoy the various attractions about the park, among which were the carousels, the scenic railway, the mirror-maze, the Ferris wheel, and so forth. One of the attractions was the Administration Building, fashioned after the colonial style of architecture. Here one may see the portraits of the various conductors of orchestras that have played at Willow Grove Park.

The Ladies at Willow Grove Park.

The entertainment tendered the ladies of the convention by the Philadelphia Florists' Club was a decided success. Willow Grove Park was their destination, and, owing to the cool and beautiful weather, the trip

THE BOWLING TOURNAMENTS.

As was to be expected considerable interest centered in the various bowling tournaments held in the convention city this year, where, among the craft, this pastime is more highly developed than anywhere else in the country. The rooters were out in force, and, as usual, "vociferation" was at its highest pitch. Refreshments were liberally served by the home club during the contest.

The following are the official scores:

The Mendelian Theory of Reproduction.

A paper on reproduction from seed as explained by the Mendelian theory was contributed recently by P. Murray Thomson, S.S.C., secretary of the Royal Caledonian Horticultural Society, to the Scottish Horticultural Association, and as it presents the subject in a very clear style, we reproduce from it the following interesting extract:

The speaker pointed out that although Mendel's paper was published in 1865, it was lost to the world of science till 1900, but that since its discovery numerous experiments had been carried out on such plants as orchids, peas, cereals, antirrhinums, stocks, primulas, and among animals, sheep, poultry, pigeons, rabbits, rats, and mice; also observations regarding the heredity of coat color in horses had been carried out to test what is now generally known as the Mendelian Law.

Stating that Mendel worked with forms of garden peas possessing characters remaining constant from generation to generation crossed with other varieties having differentiating constant characters, he showed, largely by means of diagrams, the results which Mendel observed when experimenting with each of seven pairs of differentiating characters, and the interesting deductions which he drew from them. Crossing tall with dwarf peas or round smooth peas with wrinkled he got in the first generation all tall or all round smooth, according to the pair experimented with, but that on this progeny being self-fertilized and the resulting seeds grown the character which had been recessive or suppressed in the first generation reappeared, the plants of the second generation producing tall and dwarf or round, smooth and wrinkled in the proportion of three "dominants" to one "recessive." He further observed that while the recessives and one-third of the dominants thereafter continued to breed true, two-thirds of the dominants continued to act as the hybrids of the first generation had done—breaking up into two classes, three-fourths showing the dominant character and one-fourth the recessive.

The essential point of Mendel's discovery was not the question of dominance, but the evidence that the germ cells produced by cross-breds may, in respect of given characters, be of the pure parental types, and consequently incapable of transmitting the opposite character; that in the hybrid there is not a complete fusion of the parental characters, and that in course of breeding the dominant and recessive characters segregate in the progeny. This part of the paper was variously illustrated.

Speaking of the great progress which has been made since 1900 in investigations of heredity, the lecturer mentioned that a white sweet pea (Emily Henderson) had been found to produce long different plants, distinct kinds of pollen—long and round pollen—that while plants producing long or round pollen when self-fertilized produced only white flowers, if long pollen were applied to a flower bearing round pollen or vice versa, not white but purple flowers were produced. He stated that with a knowledge of Mendel's law the work of the hybridizer and plant breeder had been much simplified, and that in place of the methods of "fixing" a type hitherto adopted the Mendelian would analyze the characters into dominant and recessive, and also analyze his results, working with individual plants instead of masses, knowing that if he obtained a pure dominant or a recessive these would breed true at sight, while if he had an impure dominant this would continue from generation to generation to give pure dominants, impure dominants, and recessives in the ratio of 1, 2, 1. The speaker urged all horticulturists, particularly the younger generation, to engage in a little experimental work, believing that thereby their labors will be made more interesting and their outlook broadened.

JOLIET, ILL.—Mr. Peter Olsem, superintendent of the growing at the Chicago Carnation Company, was united in marriage to Miss Emilie Lepper, of Joliet, on Saturday, August 17. They immediately started on their wedding tour, stopping in Chicago until Sunday, when they accompanied the Chicago delegation to the S. A. F. at Philadelphia. They will also visit New York, Washington and the Jamestown Exhibition, returning about September 10, when they will be at home to their many friends. Mr. Olsem has been with the Chicago Carnation Company for the past five years and has been serving in the above mentioned capacity for the past year and so far has met with excellent success. Mrs. Olsem comes from an old and respected family of Joliet. Their many friends join in wishing them success.

American Carnation Society.

In addition to the papers to be read before this society at its Washington meeting next year, as given in our issue of last week, there will be one from the standpoint of a buyer of new carnations and another from the standpoint of the seller.

It is expected that Luther Burbank will be present at the meeting of the American Breeders' Association, which is to be held conjointly with that of the Carnation Society. Other men prominent in horticultural science will also be present, and it is expected that a most instructive gathering will be the result.

Another and important change of consequence will be in the system of return postage coupons which will go into effect on October 1. Persons desiring to inclose return postage to their correspondents abroad will be able to purchase at the post offices in this country a coupon for six cents which will be redeemed in certain foreign countries and converted into five cents worth of foreign stamps. This is, in a way, an international money system. The turning of five cents American postage into five cents foreign on the other side costs only one cent, about enough to cover the expense of exchange and printing.

In the order of the Postmaster General the other

the Netherlands and the Netherlands Indies; Roumania, Siam, Sweden, Switzerland and Tunis.

All of these coupons will finally land in the International Bureau at Berne, Switzerland, where they will be redeemed by the various nations providing them to their subjects or citizens.

MASSACHUSETTS HORTICULTURAL SOCIETY.—Two exhibitions are scheduled by the Massachusetts Horticultural Society for the first week in September. The first is the dahlia show which will be held at Horticultural Hall, Wednesday and Thursday, September 4 and 5.

Collection of Newer Varieties of Nephrolepis.

Display of Cocos and Other Palms in Packing Shed.

Display of Ferns and Palms in Packing Shed.

House of Fancy-Leaved Caladiums.

Some of the Plants Seen at Dreer's Riverton (N. J.) Establishment, Wednesday, August 21, 1907.

Reduction in Foreign Postage Rates.

The Postmaster General has issued an order arranging for the new foreign postal rates which are to go into effect the 1st of October, and which were agreed upon in the Universal Postal Union in Rome in May of last year.

Foreign postage, which has heretofore been five cents for a letter weighing a half ounce, will now be five cents for an ounce weight and three cents for each additional ounce. The rate as it now stands is five cents for the first half ounce, and five cents for each additional half ounce.

Letters sent abroad which weighed two ounces cost 20 cents under the old rate, and the same weight will now go for eight cents, a saving of 60 per cent.

countries which have agreed to accept this coupon system of exchange of postage are given as follows:

Germany, the German Protectorate and German post offices in Asia, Africa and Australasia; Austria and the Austrian post offices in the Levant; Belgium, Bosnia-Herzegovina, Brazil, Bulgaria, Chile, Korea, Costa Rica, Crete, Denmark and the Danish Antilles; Egypt, Spain, France, the French post offices in Morocco, and the French colonies except Madagascar, Magotte, Mohele and establishments in India; Great Britain and the British colonies except Orange River, Antigua, Barbados, Bermuda, Cyprus, Falkland Islands, British Guiana, Jamaica, Southern Nigeria, Sarawak, Trinidad and Zanzibar; Greece, Guatemala, Haiti, Republic of Honduras, Hungary, Japan and Japanese post offices in China and Manchuria; Luxemburg, Mexico, New Zealand, Norway,

From the widespread interest in this popular flower it is safe to say that this exhibition will surpass anything ever seen before in this country, as entries have been made by the principal commercial and amateur dahlia growers of New England. In addition to dahlias there will be also fine displays of seasonable flowers, fruits, and vegetables. This exhibition is free to all and will be open Wednesday from 12 m. to 6 p. m. and Thursday from 10 a. m. to 6 p. m.

The second exhibition of the week is the annual exhibition of the products of children's gardens. This will be held Saturday, September 7, from 12 to 4 o'clock. Numerous prizes are offered for collections of flowers and vegetables from school gardens. It will be an unique and interesting display.

WM. P. RICH, Secretary.

PRELIMINARY PREMIUM LIST FOR PROPOSED NATIONAL FLOWER SHOW

One of the chief objects of this exhibition is to bring to notice deserving novelties and rare plants, which will be awarded medals or certificates of the Society. Exhibitors may rely upon careful consideration by the judges of all exhibits in this class, also all deserving exhibits, new or otherwise, whether specified in this schedule or not.

Open to Commercial and Private Gardeners.

Best Flowering Plant, var. not before exhibited.—Medal or Certificate of S. A. F.
Best Foliage Plant, var. not before exhibited.—Medal or Certificate of S. A. F.
Best Pelargonium (zonal), not before exhibited in America.—Medal or Certificate. Certificates of merit, gold, silver or bronze medals may be awarded to other deserving novelties.
Best Fern, other than *Nephrolepis*, introduced within three years or to be introduced within one year from date of exhibition, not over 8 in. pot or pan.—Medal or Certificate.

Plants.

Best finished group containing foliage plants of any var., arranged for effect, covering not over 200 square ft. 1 2 3
 \$75 \$50 \$25
Twelve foliage plants, grown in not over 8 in. pots, two *Crotons* admissible. 50 30 20

CUT FLOWERS, Violets.

Best display, 800 blooms. 15 10 5

Lily of the Valley.

Best display, 500 blooms. 25 15 10

CUT FLOWER WORK.

It is the purpose of the management to have a large and fine display of cut flower work, believing that such a display would prove attractive to the public. Under the competitive plan this has always been difficult, or impossible, to accomplish, because no competitor in the retail business wants to get "second" or "third" premiums. It is proposed to have several examples of each item, as shown in the list below. Any florist desiring to exhibit will please notify the superintendent of the exhibition. If there are too many applicants, the exhibitors will be chosen by lottery.

The management reserves the right to reject any exhibit deemed unworthy.

Mantel, 15 in. x 6 ft. } Two examples—\$35 ea.
Mirror
Grate
Panel, 3 ft. x 5 ft., six examples—\$25 each.
Doorway Decoration, 5 ft. x 8 ft., four examples—\$40 each.
Dinner Table, round or oval, for 12 covers, four examples—\$50 or \$75 each.
Roses in tall vases, 4 ft. to 6 ft. high—50 American Beauty, arranged for effect, four examples—\$50 each.
50 Any other rose, arranged for effect, four examples—\$25 each.
100 Carnations, vases 2 ft. to 4 ft. high, arranged for effect, six examples—\$25 each.
Mirror Decoration, size of Mirror 4 ft. x 6 ft.—\$25.
Chandelier Decoration, two examples—\$15 each.
Steamer Basket or Hamper, four examples—\$25 each.
Bride's Bouquet, six examples—\$25 each.
Bridesmaid's Bouquet, pair; three pairs—\$20 each.
Floral Valentine, six examples—\$10 each.
Chancel Decoration for Church Wedding, four examples—\$50 each.
Decoration of Reception Room, four examples—\$50 each.
Decoration of Room for Home Wedding, four examples—\$75 each.

"Art Gallery."

Deep frames, about 3 ft. x 5 ft., 50 examples to cost \$15 each. Frames to be furnished by the management, should be arranged and lighted similar to picture gallery.

Recapitulation.

Special Premiums.

Vaughan's Seed Store, Chicago and New York. Special premium on exhibit to be selected. Silver cup, value \$50.
 C. H. Totty, Madison, N. J. Special premium, silver cup, value \$50. Exhibit to be selected.

WE HAVE A NICE, CLEAN LOT OF STRONG PLANTS OVER AFTER PLANTING, WHICH WE OFFER AS LONG AS THEY LAST, AS FOLLOWS:

Mrs. M. A. Patten, Victory, Crimson Glow, Enchantress
at \$8.00 per 100.
We have also some extra strong plants of Welcome at \$12.00 per 100. This variety is decidedly the best sport of Mrs. Lawson; it is rose pink in color and far superior to the parent. The New York Florists' Club award committee who saw it growing, scored Welcome over 90 points.
DAILLEDOUZE BROS., Flatbush, BROOKLYN, N. Y.

250 of any one variety at 1000 rate.
NOVELTIES FOR 1908
HARVARD: Glowing crimson (the real Harvard color). This variety will take the place of all other crimsons as it is very free and the blooms are of the finest as to size and quality. It is a very rapid grower and the habit is ideal. Rooted Cuttings, \$12.00 per 100, \$100.00 per 1000.
FAUST: A brilliant scarlet. This variety will replace all of the commercial varieties of this color owing to its extreme productiveness, many plants last December having 20 buds and blooms to the plant. A fine one for the Xmas trade. Rooted Cuttings, \$6.00 per 100, \$50.00 per 1000.
REMEMBER WE GUARANTEE SATISFACTION.

Washington, D. C.

News Items.

The recent Philadelphia convention has been the all absorbing theme this week among the growers and retailers; each individual to a man came back rejoicing over the good time he had had in the City of Brotherly Love, nor did he forget that trip to Riverton, and the cordial hospitality of Mr. Dreer.

Washington is enjoying some magnificent weather with comfortable temperatures, and some of the weather-wise are predicting a very early Fall. The bountiful supply of golden rod and wild asters would seem to indicate the correctness of this statement.

There was a slight recuperation from the extreme sluggishness of a week ago along all branches of the trade, and if the cool weather continues business will no doubt soon begin to take on a new phase. Some very good asters are coming in now from various local points.

JAS. L. CARBERRY.

BIRMINGHAM, ALA. The Birmingham Florist and Horticultural Club, composed of landscape gardeners, seedsmen and florists of the city, was organized Monday night, August 19, 1907, with a membership of twenty-five. The object of the club is to promote the cultivation of flowers and plants.

The book of WATER GARDENING
By Peter Bleasat. Price, postpaid, \$2.50
A. T. DE LA MARE PTG. & PUB. CO., LTD.
2 to 8 Duane Street, New York.

The Gardeners and Florists' Club will commence its Fall and Winter meetings on September 17; R. G. Leavitt will be the speaker of the evening and his subject "Hybridization." The club will hold a field day to-day (August 31) at the Bay State Nurseries, North Abington. Take 12:43 train at South Station. Mr. Wyman has special attractions and you should avail yourself of the opportunity of this outing.

W. W. Rawson & Company have sent out special invitations to those interested to visit their dahlia trial grounds at Marblehead, where they have a collection of 900 distinct varieties.

The parks and cemeteries of this city were visited this past week by many of the members of the American Association of Cemetery Superintendents who had been attending their annual convention in Providence, R. I.

Many of the scientists who attended the Zoological Congress in this city the past week spent considerable time in the Arnold Arboretum and Botanic Gardens of Harvard University; they were highly pleased with Boston's park and boulevard system and visited several private estates, spending one afternoon in the beautiful Italian gardens of Larz Anderson at Brookline.

The Herald of Sunday contained an interesting article on the Children's Gardens of North Easton. W. N. Craig takes quite an interest in this movement and his work is very creditable.

Dahlias, in spite of the dry season, look well in this locality and this city expects one of the finest exhibitions on record at Horticultural Hall on September 4 and 5.

Thos. H. Westwood and family are spending a few weeks at Hyannis.

H. H. Rogers of South Sudbury is sending in some extra fine asters for which he realizes top notch prices.

Both flower markets have received their annual house cleaning and painting and are now ready for their sales of stalls which take place next week, as announced in last issue.

J. W. DUNCAN.

MANCHESTER, MASS.—W. F. Spry who has gone on a trip to Europe, sold his florist business here recently. Mr. Spry is a native of England and will visit among his relatives there whom he has not seen since leaving there twenty-two years ago. He will remain abroad until October and on his return will engage in the florist business in Magnolia where he has purchased an acre of land. He will build a greenhouse later.

BRAINTREE, MASS.—Herman Waldecker, florist, is confined to his house by sickness.

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers. If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases. (The leaflets embrace over forty subjects.) We can supply them at \$2.50 per 1000, or 500 for \$1.50, and can make a reduction of those prices on large quantities. At a small extra cost we can put your imprint on each leaflet. Try a thousand and see what a help they are in selling goods. The following "Culturals" are particularly seasonable for your customers at the present time: Chrysanthemums, Dahlias, Hyacinths, Lavens, Lily Culture, Tulips, Freesia, Vegetables.

THE FLORISTS' EXCHANGE

P. O. Box, 1697 NEW YORK

New York.

The Week's News.

We rather expected that Twenty-eighth street would be decorated with flags, bunting, etc., and that a brass band would have been in attendance ready to send forth that soul-stirring refrain: "See, the Conquering Hero Comes," when the newly elected president of the S. A. F., F. H. Traendly, went to his place of business on Monday morning. Not that his friends in the wholesale district lacked any in their enthusiasm over the great honor that had been done to Mr. Traendly; the decorations, music, etc., were wanting only because they were forgotten in the excitement that prevailed. Since his arrival home, Mr. Traendly has been extremely busy accepting the congratulations of his friends. He had no idea of running for any office when he started for Philadelphia. This is an instance in which the office has sought the man, and, if we may be permitted to use a rather slangy expression, "He will make good"; and the affairs of the S. A. F. will make progress under his guidance and leadership.

Secretary John Young was one of the New York delegates who took in all of the convention festivities, and next to the sessions of the society, his most enjoyable time was out in Fairmount Park on Friday, witnessing the baseball game between the smartly uniformed and bespiked club of Philadelphia and the scratch team composed of men gathered from different parts of the country.

J. B. Nugent, Jr., had too much to attend to in New York to spend any time at the convention. He came back home on Tuesday night.

A. M. Henshaw and wife went to Atlantic City at the close of the convention and spent a few days there before coming home. Mr. Henshaw has spent many years on the ocean, and does not believe that it is worth paying Waldorf Astoria prices in order to spend a night or two by the sad sea waves.

J. K. Allen, who had been spending several weeks at Atlantic City, finished up his vacation at the convention, and has returned looking quite ruddy, having added several pounds to his avoirdupois. Both he and Mrs. Allen have had a most enjoyable time during their vacation.

L. W. Wheeler, who for the past seven and a half years has been the manager of the New York branch of Vaughan's Seed Store, has resigned and will start shortly for Southern California, where he expects to make his home. During his management of the Vaughan store the business has been eminently successful, and the house has become a very popular one among the private gardeners of New York and vicinity. Mr. Wheeler has been identified with the New York Florists' Club while here, and has always been a hard worker on any committee on which he may have been appointed, and he has served on many important ones. He was elected to the office of treasurer at the last election, and the members of the club as a body will regret that, owing to his removal to California, he will have to sever his connection with the organization. The best wishes of the craft will go with Mr. Wheeler in whatever he may undertake to do in his new home in the Golden West.

A. T. Hartnupp has been appointed superintendent on the estate of Mr. Murray Guggenheim, West End, N. J. Mr. Hartnupp was formerly foreman at Blenheim Palace Gardens, England, and until recently had charge of the landscape construction department of Messrs. Wadley & Smythe, New York.

Adolph Jaenicke, who for many years has had charge of the indoor propagating and greenhouses at the John Lewis Childs establishment, Floral Park, N. Y., will, on October 1, go into business for himself as landscape gardener, with offices at Floral Park.

John Scott, the fern and gardenia specialist of Flatbush, N. Y., returned from his European trip just in time to attend the meetings of the S. A. F. convention at Philadelphia. He reports having had a most pleasurable time abroad and thoroughly enjoyed the Philadelphia trip.

Among the convention delegates who stopped off at New York before going home were J. J. Beneke of St. Louis, Mo.; Charles Eble of New Orleans, La.; E. S. Enders, who is with Charles A. Samuelson, retail florist, Chicago; and J. Trinz of the firm of Lubliner & Trinz, also of Chicago.

A. M. Rennie, Providence, R. I., was a visitor on Wednesday.

A. M. Rennie, Providence, R. I., was a visitor on Wednesday.

Baltimore.

Convention Echoes.

The Baltimore florists are exuberant in their praise of Philadelphia, and how they did things there so thoroughly and expeditiously. It was a revelation to everyone to see the manner in which everybody and everything was taken care of during convention week. Those who had the good fortune to be present have learned much, and too much praise cannot be given to the very able committees that handled the convention work. The affair was a record breaker in every way, and will not soon be forgotten by the Baltimore delegation. How could we forget it, with such splendid reminders as the great Philadelphia cup and the Michell trophy which were won by Baltimore and will hereafter be on exhibition in the handsome Florists' Exchange hall, the meeting place of our club?

News Notes.

Elaborate preparations are making by the Maryland Horticultural Society for an even greater and more general exhibition than last year at the annual meeting the first week in December. The armory of the Fifth Regiment, one of the largest in this country, has again been secured from the State, ensuring an abundance of room for any and all kinds of exhibits. About \$500 have been allotted for premiums for cut flowers, ornamental and decorative plants. The Baltimore Gardeners' Club offers a premium of \$20 to the florist making the best general display.

The Summer meeting of the Horticultural Society will be held in Jamestown, Va., September 24.

The orchard and nursery inspectors have commenced their work of thoroughly inspecting every nook and corner of this State. All of these inspectors have received a course of instruction at the Maryland Agricultural College, and are fully equipped for their work of identifying injurious insects and diseases, especially San José scale and peach yellows, and are also up-to-date on methods of orchard culture. A given territory is allotted to each inspector and reports are to be made of the number of trees inspected, with the percentage infested with insect pests. Trees infested with peach yellows must be destroyed at once; and an effective remedy is to be applied to trees infested with San José scale. Both the State Entomologist and Pathologist will see to it that all negligent growers comply with the law, which will result in better orchard conditions in this State.

G. P. and W. H. Miller are about to plant 20,000 peach trees in Alleghany County, Maryland. C. L. SEYBOLD.

RACINE, WIS.—R. J. Mohr, florist, and Miss Kathryn Park were married on August 17, at the home of the bride, 1219 Wisconsin street, Rev. Mr. McKillop, of the First Baptist church, performing the ceremony.

MAINESTEE, MICH.—E. G. Gillett, of Cincinnati, with his family, are enjoying a vacation in this locality. They will return to their home about September 5 or 6.

Newport, R. I.

News and Trade Notes.

Last week things took on a decidedly better complexion. There were dinners and entertainments in great numbers given, and on each occasion the decorations were on a fairly large scale, being composed in the main of choice material, much of which had to be purchased out of town.

Prince Wilhelm of Sweden made things hum in great style when the guns on his cruiser boomed defiantly on her entrance into the harbor. It seemed that society had been waiting for his arrival for weeks; clouds of anxiety disappeared instantly the guns were heard and then all hands were out for the Prince. Mrs. Fish had the honor or distinction, or both, of piloting him to her residence on the evening of his arrival, when a grand dinner was given in his honor.

Messrs. Wadley & Smythe had charge of the floral decorations which were elaborate and costly, as well as tasteful and appropriate. They were of blue hydrangeas, but the more important parts were decorated with choicer flowers, many scores of *Cattleya gigas* being utilized.

From this dinner the Prince was piloted by his hostess to the "Elms" the residence of Mr. and Mrs. G. J. Rewind, where a ball was given in his honor. Here the decorations were on a magnificent scale and consisted principally of Killarney roses and *Oncidium varicosum*. The centerpiece on the table at which sat the Prince and his hostess was made up of that orchid and *Adiantum Farleyense* with charming effect. The other tables, of which there were seventy, had each a centerpiece of Killarney roses. Large vases of American Beauty roses constituted the sole decoration of the ball room. The supper room was very effectively festooned and interwoven with various kinds of yellow, red, and blue flowers, relieved with strings of *Asparagus plumosus* and *Sprengerii*.

Visit of Cemetery Superintendents.

On Thursday, August 22, the members of the American Association of Cemetery Superintendents, with their lady friends and guests numbering in all about 300, came by boat to Newport. On landing at Commercial Wharf they were met by Superintendent McMahon and the trustees of the Island Cemetery and conducted by them to that cemetery, where after an inspection of the office, chapel and grounds an address of welcome was made by Hon. R. S. Franklin, president of the association. This concluded, the visitors were conducted to Masonic Hall where a collation was served. At 3 o'clock in the afternoon carriages were provided for the conveyance of the visitors along the Ocean Drive and to various other points of interest in the city and its vicinity. The return trip was made in time for the delegates to hold a final business meeting on board the boat before starting back to Providence, the convention city. Among the resolutions passed at this meeting was an expression of thanks to the Newport Horticultural Society for the many courtesies, official and otherwise, extended while in Newport.

Among the visiting superintendents was William Falconer of Allegheny Cemetery, Pittsburg. Mr. Falconer, who is one of the best known as well as one of the best equipped horticulturists on this continent, was well known to the gardeners of Newport two or more decades ago. He stopped over night in order to see more of the horticulture of Newport than could be seen during the first afternoon, and left well pleased with what he observed. Mr. Falconer was accompanied on the trip by his daughter, Miss Jeannie Falconer, who is apparently little less of an horticultural enthusiast than her father. D. M.

BIRMINGHAM, ALA.—Wm. M. Lindsay, florist, has gone on an extended tour through the middle Western States, and the East, combining pleasure with business. Mr. Lindsay is one of the pioneer florists of Alabama, but last year he sold his greenhouses. While away he will visit some of the largest and most up-to-date greenhouses in the United States, and if he can secure the services of the right man to take charge of the plant, will construct a range of glass for the growing of everything in cut flowers and plants.

Trade and News Items.

Business during the last few weeks has been marked by the usual Summer dullness. Asters, gladioli and hardy annuals and perennials have been fairly good and very plentiful; the demand for early fine stock is very limited, but is likely to pick up again soon.

Stock for the coming season is looking very well and unless business is extra good there will be enough to supply the demand. There has been considerable building this Summer and roses and carnations generally are in splendid shape; some of the stock in the fields is rather small, but very healthy.

The meeting of the American Parks Association held here last week was a successful one but there were not so many delegates present as was expected. The meeting lasted three days. The delegates were driven round several of the city parks on Thursday afternoon and tendered a luncheon at High Park. On Thursday morning the delegates were taken to the parks in the eastern and northern parts of the city. It was decided to hold the next meeting in the twin cities of St. Paul and Minneapolis. T. M.

LITTLE ROCK, ARK.—The Arkansas Floral Association has been organized, with the following permanent officers: President, J. J. Mandlebaum; vice-presidents, J. F. Letton and Guy B. Tucker; secretary, George Russ Brown, and treasurer, W. P. Pollock. The association will hold a flower show on November 14, 15 and 16, at the assembly hall of the Hotel Marion. Handsome prizes will be offered and everything done to make the exhibition strictly up to the standard set by the largest cities in the country. The assembly hall is one of the most attractive spots that could have been selected for the occasion, and will furnish space and setting for an elaborate show.

Floral Scandal.

"You can't paint the lily," declared the rose.
"Maybe not," responded the aster.
"But have you noticed?"
"Noticed what?"
"The lily pads."
—Pittsburg Post.

Plant Notes.

DAHLIAS.—Now is the time to get busy and do some thinking over the dahlia question. This is not an exceptionally favorable year for dahlias and that may act as an incentive in the thinking business. There is no doubt but dahlias are of considerable value as cut flowers commercially, but whoever intends making anything out of them as such cannot afford to be what is known as a dahlia fiend, or in other words, crave after varieties without number. On the other hand, he must study the merits not only of the different types, but also of the varieties, and then grow such types and varieties in quantity to suit the demands of his business. In this regard I may suggest that the single dahlias are of more practical utility for decorative purposes, when cut, than any other type.

PRIMULAS.—There are some plants considered of little value commercially, not from any want of merit in the plants themselves, but because they are usually so poorly grown that they are practically insignificant and worthless and this can be said with more truth perhaps of primulas than any other plants. There are but few things more unsightly in a store window than poor starved primulas with foliage and flowers but half developed, on the other hand, if primulas and cinerarias as well are grown in such a manner that all they are capable of is brought out there is no question but that their cultivation is as profitable as that of many other things that takes more time and labor to bring to perfection. Attend, then, well to them now, and not only now but right straight along until they come into flower; don't starve them for want of pot room; don't let them get dry; keep them as cool as possible.

GERANIUMS.—We have in years past deferred starting to put in cuttings of geraniums from outdoor stock because of the soft condition of growth, but growers in most sections of the country have not that excuse this season for delaying the work. A beginning should be made in this important work early in September at least, in order to allow of plenty time to get all the cuttings that will be required in and rooted in good season. There are several methods of propagating geraniums, but perhaps the all-around best method is that of putting

USE THE BEST.
Economy Greenhouse Brackets
are used by leading growers everywhere. Send for price list and descriptive circular.
BUXTON & ALLARD, Dept. O, Nashua, N. H.

one good stocky short jointed cutting into a small pot previously filled with a compost of loam, leaf mold and sand in equal proportions covering the surface with about a quarter of an inch of sand, this to act as a preventive of damping. Rooting the cuttings in sand in the bench may be the more expeditious way of doing the work, but I doubt if as many good thrifty plants will result from it as will from the small pot method.

RAMBLER ROSES.—For several years there has been an increasing demand for Rambler roses in pots at a time when very few flowering plants can be had in bloom. While Crimson Rambler sell quite as well as when they were more in the nature of novelties than they are now, the many excellent varieties of pink Ramblers available for forcing are much more in favor than the former, and rightly so, because there is no gain-saying the fact that they are not only more pleasing but are also, as a rule, more satisfactory to purchasers than the other.

The distinct color of the Crimson Rambler will nevertheless make it an indispensable plant for florists to have, and for that reason at least it should not be at all neglected.

GARDENIA FORTUNEI.—Customers have had their attention drawn to Gardenia Fortunei this Summer, because of the immense size of the blooms, which are much larger than those of G. florida. Intending growers of G. Fortunei should not make the mistake of preparing to grow this variety with the idea that it will yield as many flowers as G. florida, because it will not under any conditions. Gardenia plants are much sought for in 4-inch pots, the most suitable size for planting in benches. Where bottom heat will soon be available, cuttings may be put in at any time. It takes quite a little time for gardenias to develop into plants that fill 4-inch pots comfortably.

CROTONS intended for sale at Christmas should now be well established in the pots in which they will be sold. An occasional watering with liquid cow manure will not only help to sustain them in a thriving condition when they get potbound, but it will also facilitate the changing of color, which is a necessity usually in quickly grown plants from small tops or cuttings. M.

MASON CITY, IA.—The plant of the Perth Floral Company was destroyed by fire on Saturday, August 24, 1907. Loss, \$2,000.

Take a wooden eave plate house that has stood a few years, and you will find

here and there a roof bar with end rot—the first symptom of the violent disease of repairs that soon must follow. Success with House Plants

BY LIZZIE PAGE HILLHOUSE.

A complete text-book and guide to the care, cultivation and propagation of all plants in the garden and the home.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

12mo., 232 pp.; profusely illustrated, with complete and ready reference index to all plants enumerated. Price, Cloth, \$1.00; Paper, 50 cents.

To Retail Florists. The old thought, that it was dangerous for a customer to know much about the care of plants, has passed away, being superseded by the newer and more intelligent one, viz.: that the more successful a customer is with plants, the greater quantity will he or she buy.

We offer Special Inducements to all who wish to handle this book. It is a good seller.

Your Money is well spent when you advertise in
THE FLORISTS' EXCHANGE

HEATING THE GREENHOUSE

thoroughly and economically during the coming Winter is the problem now engrossing the mind of the Florist who takes time by the forelock.

I am in a position to help you to the best solution of this problem. I have done it for others, I can do it for you.

It will be to your advantage to consult me and get quotations on your heating plant either erected complete or for material ready for erection.

I have the largest line of greenhouse boilers on the market and can give prompt shipments.

WRITE ME TO-DAY.

John A. Payne

Horticultural Architect and Builder

260-274 Culver Ave.,
 JERSEY CITY, N. J.

Sash opening apparatus and all kinds of greenhouse structural material

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

FOR WATER SUPPLY GET A STANDARD PUMPING ENGINE which is A GOOD GAS OR GASOLINE ENGINE AND A GOOD HIGH PRESSURE PUMP. BOTH IN ONE MACHINE Catalogue will tell you more. The Standard Pump & Engine Co. CLEVELAND, O.

Price, - - - \$1.00.

A. T. De La Mare Ptg. & Pub. Co.

No Long Tie Bolts

Each section of a "Burnham" has a tie up of its own. This means easy set up—no blocking or bracing of sections—you tighten the identical section you want tight—no

danger of cracking the other sections by uneven draw up strain—no new long tie bolts to buy when new sections are added. It's a greenhouse boiler made for greenhouse work. Send for catalog.

We make every part of a greenhouse but the glass. We sell any part.

Seed Trade Report.
AMERICAN SEED TRADE ASSOCIATION
George S. Green, Chicago, Ill., presi-
dent; M. H. Duryea, New York, first
vice-president; F. W. Bolgiano, Wash-
ington, D. C., second vice-president; C.
E. Kendel, Cleveland, O., secretary and
treasurer; Leonard H. Vaughan, Chi-
cago, assistant secretary.

**W. ATLEE BURPEE AS A TOAST-
MASTER.**—Writing on the subject of
the recent dinner of the National Sweet
Pea Society of England at which Mr.
Burpee was chairman, a correspondent
of the Horticultural Trade Journal re-
marks as follows: "The dinner. Ah! it
was great, although there might have
been more present. The absentees knew
not what they missed for we were a
merry party with W. Atlee Burpee in
the chair. He made quite a delightful
chairman, and his remarks were most
quaint, being as they were punctuated
with Americanisms. We are not used
to a chairman who in calling upon some-
one to propose a toast goes on to propose
the toast himself and replies to it. It
was just too whimsical for words, and
had not W. A. B. gone in for seed farm-
ing he might have been a second Mark
Twain."

JACKSON, MICH.—F. G. Johnson,
formerly of Columbus, O., is now with
S. M. Isbell & Company, seedsmen at
Jackson, Mich., and is associated with
E. J. Sheap in the management of the
garden seed department of that company.
Mr. Johnson was with the Livingston
Seed Company for over twenty years, but
about a year ago was compelled to give
up business on account of ill health.
He has now fully recovered.

NEW YORK.—D. M. Ferry & Com-
pany, of Detroit, Mich., were repre-
sented here last week by their Mr.
Coe, who reports present trade good
and future prospects very bright. F.

IMPORTS OF SEEDS, ETC.—Aug-
ust 27.—A. L. Young & Company,
seven cases onion seed. August 28.—
J. Hopkins & Company, 20 bags seed.
August 29.—J. M. Thorburn & Com-
pany, two bags seed, one barrel seeds,
five cases mushroom spawn; P. Hender-
son & Company, five bags seed, 11 cases
bulbs; American Express Company, 320
bags clover seed; Andreas Olson, 250
bags clover seed.

Large Privet, Shrubs and Vines for
fall planting. Write us for prices.
The Elizabeth Nursery Co.
ELIZABETH, N. J.

Seed Crop Notes.
It is no easy matter to predict so
far ahead what the supplies of seeds
will be for the coming season, or with
much accuracy to say what prices will
be, but one thing is sure: there is, and
has been for some time, a feeling in
the trade, that seed stocks on the
whole will be shorter and prices, both
wholesale and retail, higher consider-
ably than has been the case for some
years. Usually at this time of the
year sellers are much more eager than
buyers, but the reverse would seem to
be the fact now, and is becoming more
pronounced every day; those dealers
especially who need large quantities of
seeds for market, garden and counter
trade are not at all adverse to pick
up good seed stocks whenever oppor-
tunity offers at seemingly reasonable
prices.

Perhaps the greatest factor of all in
determining the prices of seeds for the
Spring of 1908, is "What is the size
of the carried-over seed stocks in the
hands of our large seedsmen?" Few
dealers, who annually purchase seeds
say from \$100 to \$500 worth or even
more for their trade, realize that the
amount of seed stocks carried over
from one year to another is as much
or more of a factor in its effect on
making prices, than is the new seed
crop about to be harvested. Now, no
reader must misunderstand me here,
as regards what I mean by carried-
over seed stocks; I refer to the seed
business as a whole—an average, so
to speak, as to how seeds are handled.
No reliable seedsmen carries over
from one season to another seeds that
are not as good or improved by keep-
ing; to illustrate clearly my meaning
and not encroach on my allotted space
let me briefly say, that at the end of
a seed season such stocks as cucum-
ber, melon, squash, cabbage, turnip,
etc., are most valuable assets; while
seeds like onion, parsnip, etc., must
be thrown away. It is for these rea-
sons, which I will some time explain
at length to you, that the outcome of
the onion seed crop is always awaited
with so much anxiety by the whole
trade. Speaking of the onion seed
crop, there has not been for some
years anything like the pessimistic re-
ports that were so freely circulated
early in the season regarding the
growing crop. Onion seed is going to
be short enough to advance prices
considerably, but not a crop failure,
as so many advices from California,
especially, at one time stated. The
last reports that I have seen estimate
the crop at from 40 per cent. to 60 per
cent. of an average one; should this
prove to be so the consumer will cer-
tainly grumble considerably at the
prices he must pay. Not that \$3 to
\$5 per pound, according to the vari-
ety, is any more, in any year, than
the planter should be willing to give
his seedsmen for first-class seed; but
unreasonable competition amongst
onion seed growers and seedsmen has
yearly brought the prices lower and
lower, until a point below the cost of
production has been reached—then
comes along a few seasons of con-
tinued short crops—hence this violent
reaction.

As regards the bean and pea crops
it is still too early to tell you very
much, except in the case of early
peas; these, from all reports, will cer-
tainly be a short crop. I do not think
that such varieties as First and Best,
Alaska, Early Daniel O'Rourke, etc.,
will turn out to be much over half a
crop; later sorts like McLean's Ad-
vancers, etc., should do better.

Much depends on the weather dur-
ing the next few weeks with all seed
crops; the season started at least a
month late; can we regain any of this
time remains to be seen. V.

European Notes.

Dwarf Essex rape is keeping us busy in more senses than one just now. Owing to the catchy weather none of the samples yet sent to market are in a fit condition to stand a voyage in the hold of a ship. As our warehouses are nearly empty we are able to utilize the floors for drying, but this means shrinkage and additional expense.

Even at the present high prices the demand is exceptionally brisk; this as a rule brings out abundant supplies, but up to the present they are not forthcoming. It is therefore fair to assume that they are non-existent, and as we have now to reckon on a largely increased demand from the Southern hemisphere there is practically no possibility of any reduction in price. Buyers will therefore do well to cover their requirements as quickly as possible, and to be very wary in accepting any very cheap offers without a satisfactory guarantee.

The weather conditions remain as last reported, and all hope of a genial finish to a sunless Summer has vanished from our minds. At the same time we are bound to admit that there are some compensations.

We have an abundance of good, strong, well developed and healthy plants of all our round seeds for next year's crops, the only difficulty being that owing to the late ripening of crops already occupying the land they are intended to occupy the work of transplanting is seriously hindered. As, however, we have not had a recurrence of the July frost all may yet be well.

C. C. Massie and wife left for New York by S.S. Baltic on August 22; Robt. Buist, daughter and grandchild left by S.S. New York on August 24, and J. Chas. McCullough, with his wife and daughter, are upholding the honor and interests of the U. S. A. in London.

EUROPEAN SEEDS.

Continental Notes.

NEW VARIETIES IN CANNA.—Herrn. Pfitzer has two new canna varieties which by reason of their dark colors are very attractive, and should be brought to the notice of our readers. W. Pfitzer describes them as follows: "Mephisto, leaves deep dark green, flowers blackish purple blood red with amaranth, velvety, one of the darkest colored varieties of the day; Schwabenland, leaves brownish-red marbled dark green, flowers grand, four petaled, velvety dark red flower spikes, loose, and graceful, well elevated above the striking foliage."—Mollers' Deutsche Gärtner Zeitung.

A NEW RACE OF PELARGONIUM.—The German hybridists have in recent years succeeded in calling into existence a race of pelargoniums of a self-supporting bushy habit, wonderful coloring, and a freedom in flowering that is quite remarkable. These have found great favor as market plants. The most successful hybridists so far are Herrn. Max Bürger, of Halberstadt, and Herrn. Faiss, of Fewibach, near Stuttgart, and both of them showed plants at Mannheim. One of the finest of Faiss' varieties is Deutscher Rhum (1906); the flowers have the coloring of the petals of Cattleya labiata, with two large purplish magenta-red blotches. Equally good, and belonging to the P. Odier section are the three following varieties, viz.: Andenken an Friedrich Schiller (1905); the flowers of a bright flame color with

five sharply marked black patches, a striking very free flowering variety, and first-class market plant; Wolfgang Goethe, having flowers of dark purplish carmine with five clearly defined, deep violet spots, large and slightly waved; Ludwig Uhland (1906), large circular blooms, of an aniline red color, also decorated with five dark violet patches, very peculiar in regard to the color; the growth of this plant is moderate as regards the height, and robust. A conspicuous representative of the P. diadematum class is Wilhelm Hauff (1906), the flowers light purplish rose-pink with white stripes and chestnut-brown spots in the two upper petals, extremely abundant bloomer, strongly waved blooms, and large truss. Another of the Odier pelargoniums is Ostergruss, a novelty of 1905, one of the earliest and latest to bloom. The colors are bright amaranth, spotted black on the five petals.—Horticultural Trade Journal, Eng.

Peter Barr, V. M. H.

Our good friend, Peter Barr, V. M. H., the English daffodil specialist, who, it may be remembered, made a visit to the United States some years ago, continues to take a lively interest in the doings of the craft here. In a recent private letter he wished to be remembered to all his old acquaintances, and adds the following remarks on how he is spending his time these days:

"I have taken up polyanthus and primrose to see if I can make any advance upon them. Rather a big job, but were I not doing this I might get into mischief, as I hear Satan still finds mischief for idle hands to do. Last Autumn I had some 10,000 to 12,000 plants to Winter. The northwest winds killed about half of them and crippled half of those which survived, so I had not much in flower; consequently made no progress. I will this Winter give some protection, and if this is sufficient, I will make progress, I hope, by discarding all that do not come up to standard. The garden I have bought is about one-third of an acre. I have with seedlings and plants bought, or gifted, nearly replaced my loss. It commenced raining July, 1906, and with the exception of a week or two, we may say it has continued to rain until now, August 9."

American "Everblooming" Hydrangea.

Hydrangea arborescens sterilis.

Description which follows is by the introducers, the E. Y. Teas Co., Centerville, Ind.

This new American Hydrangea is believed to be the most beautiful hardy flowering shrub introduced during the last twenty years. It was found growing wild in the rocky hills of Western Pennsylvania several years ago, and finally was introduced into Central Ohio by Mrs. Mary Kelley when she removed from Pittsburg many years ago. From this introduction numerous plants have been grown and planted in that locality, so that many plants are now growing three to eight years old, and blooming profusely from early June till toward Autumn frosts. At this writing, the old and popular *Hydrangea paniculata grandiflora*, which up to now has been one of the most popular flowering shrubs, has not opened a single panicle of bloom, while the new form has been in magnificent bloom for more than two months.

The plant, which attains a height of five or six feet, with near the same breadth, is of far more graceful habit than the old form; with large trusses of beautifully formed flowers of dazzling whiteness, rendering this a plant of peerless beauty. It seems to thrive in various soils, and when fully exposed to the sun as well as in partial shade.

The introducer has been studying this Hydrangea carefully for three seasons and is convinced that it is an ornamental plant of the greatest value. It is unquestionably a sport from our native *Hydrangea arborescens*, found in rocky cliffs from New York to Iowa.

The original plant is growing most thriftily, and the stock on the market has been grown from that plant, or its direct descendants. It has often withstood 30 degrees below zero or lower without injury to bud or shoot. Those who have had it longest in cultivation call it "Everblooming," to distinguish it from *Hydrangea paniculata grandiflora*, which is grown in the same locality; and "American Everblooming" would be exceedingly appropriate, as well as eminently descriptive.

The profusion of bloom of this new Hydrangea is very unusual. There have been counted 100 good trusses on one plant—trusses 7 1-2 inches in diameter and under. The flowers, when cut, keep in good condition a long time. This feature will make the plants especially useful to florists.

Shrubs and Fruit Notes.

Chimonanthus fragrans is famed for the delightful odor of its small yellow flowers. It is so eager to flower that when outdoors the late frosts often catch the flowers. It is better to grow it in a pot, then introduce it to a dwelling room in the Winter. Its blossoms are so odoriferous that one is sufficient to perfume delightfully a room or a greenhouse.

Cornus paniculata is one of the prettiest of the shrub dogwood. Its heads of white flowers are fairly attractive, but are outshone by the white berries, which are ripe in September or earlier. These berries are carried on pink colored stems, the whole in little clusters, ornamenting a bush of a pretty habit of growth besides.

In the latter part of August, continuing through September and October, the berries of *Viburnum Lantana* make a fine display. Many berried shrubs are of value only when their berries are displayed, but of this viburnum it can be said its flat heads of white flowers are handsome in the earliest days of Spring.

Acier Ginnala is ornamental as a bushy shrub of large size all Summer, and when Fall comes its leaves take on an Autumn color of a yellowish scarlet hue, which enhances its value. Landscape gardeners find great use for it in their plantings.

Cherry stocks of the Mahaleb species are grown, and in a satisfactory way, by many of our nurserymen, but the growing of Mazzards is not so successful, owing to their liability to leaf blight. Spraying with Bordeaux mixture controls the blight. But with high priced labor and the fighting of the blight to contend with, it is no wonder importations of stock still go on largely.

California fruit growers are suffering from pear blight in their orchards. It has been extremely bad of late years and has become so serious that the officials of the Bureau of Plant Industry from Washington have

date for budding can be named. In the same nursery a block of stocks may be in a low situation, another in a higher one. In this case the stock on higher ground would be in condition for budding sometime before the other.

As these notes will show, budding depending on the growth, the months for the work are likely to be August and September.

Budding of roses is not followed here to the extent it is in England, but where it is the same rules apply as for fruits. But it should be said that English periodicals advise the budding of roses early rather than late. Further, they insist on the extraction of the little piece of wood from the buds, something never practiced here.

Practically all fruits are increased mainly by budding, if we except apples. Apples graft so easily on roots that budding them is rarely thought of.

Sumachs for Planting Effects.

There are two sumachs, *Rhus glabra* and *Rhus typhina*, the Stag's-Horn sumach, which are greatly prized and much planted by many landscape gardeners who know of their great value. For beautiful effects the whole year through there is no other tree or shrub of equal value in the way these are. Take them in their appearance in leaf in Spring, and there is their beautiful display of large compound leaves, followed a little later by their prominent heads of greenish yellow flowers. Very soon the berries form, and by August what were heads of flowers become heads of scarlet seeds. The heads, setting among the bright green leaves, are highly ornamental. The chief glory of these sumachs, however, lies in their Autumn foliage. By the close of September the leaves commence to change color and by October a bush of either one is a mass of orange scarlet color, in which shape it is the crowning glory of many landscapes. With the approach of Winter the leaves fall, but even then there is interest in the bushes. The heads of scarlet seeds do not fall with the leaves but are in position on the ends of the branches long after Christmas, until at last they fall apart one by one from the storms of Winter.

In many parts of Fairmount Park both sumachs are natives, the *R. typhina* in most abundance. As this one, *typhina*, spreads from its roots to some extent it has in the course of time formed very large thickets, which, when in their glory of Autumn color, attract lovers of the beautiful from long distances to admire them. So much have they done to cause the parts of the park they inhabit to be favorably known that plantings of them have been made to line other parts of the park, notably the comparatively new Lincoln Drive.

Rhus typhina, as will be seen in the illustration, is one of a few that bear their seeds in a cone-like head, while many others bear the seeds in loose bunches, witness the poison vine, and the poison ash, so called, *Rhus venenata*.

It was near New Year's when this photograph was taken; a little snow was on the ground, but only a few of the flower heads had commenced to fall apart.

Planting Deciduous Stock.

Landscape gardeners are often called on by patrons to plant trees and shrubs in September, a month in which no one thinks of planting, as a rule. Yet all with experience know that that month is a splendid one for moving evergreens; and as for deciduous trees they are much better moved then than toward the approach of Winter. An experienced man in the transplanting line would advise the planting of all sorts of trees in September. The growth of deciduous trees is practically over in September, hence the stripping of the foliage on transplanting is no great loss to them, not enough to counter balance the gain of the early planting. Trees have been set out in early September having their leaves stripped off, and later on have made a few fresh leaves, showing they had taken root hold. It is this taking hold that constitutes the gain, as it shows the tree is secure, having a fresh supply of roots to carry it through the Winter. The writer has time and again set trees in September, and has never failed on deciduous ones. Planted in the way so often explained, with a copious supply of water to the root, and all foliage stripped off, it is rarely indeed a deciduous tree will die. There is really more risk with evergreens, as they have to carry their foliage, but even with these, if well supplied with water at the root, success can be almost assured. Water is more essential than anything else. Combined with the warm soil it causes rootlets to form in a few days. A tree may be over watered when it has become well established, but when freshly transplanted, pour the water in freely for several days, so that there is abundance of it in the ground for a full week or more, by which time it should be secure.

JOSEPH MEEHAN.

Rhus typhina, the Stag's-Horn Sumach in Winter. (See text.)

been co-operating with officials of the State Department of Agriculture of California in an effort to stamp out the disease.

A symposium on grafting the cherry appeared recently in *The National Nurseryman*. The contributors to it mostly all agreed that the better way to propagate the fruit was by budding, grafting rarely proving satisfactory. Further than this the writers said that from causes unexplained, propagating the cherry is less successful now than it was years ago, referring both to budding and to the growth of the trees.

Some contend that the foliage of Schwedler's maple loses the purple tint as the season advances. So it does to a degree, but not greatly. The leaves are crimson when young, becoming purple with age, distinguishable from an ordinary Norway maple at any time.

Budding Fruit Trees.

At what time should trees be budded, is a common question a nurseryman is asked. There can only be answers given in a general way, because the date depends on the growth of stocks, and growth depends on climate. In a general way it may be said budding may be done whenever the bark can be opened to receive the bud. This must be at some time while the shoot is still growing, for when growth of the stock ceases the bark tightens and cannot be lifted to receive the bud. But besides that it must be at some stage of the stock's growth; it has been found that, as a rule, buds take better in the later stages of the growth than they do in the earlier ones. Hence nurserymen prefer to bud when they see the stocks are nearing the end of their growth, a surer "taking" of the buds resulting from work done then. It will be seen from this that no set

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

Plant Notes.

There are not many kinds of plants in the American trade that are dwarf enough to be used in conjunction with alternanthera, and of a white color in foliage, but there is one and a very good and satisfactory one at that, although it has not been generally used along with the other plants referred to. The plant I mean as being very suitable, and that has this season especially, proved very satisfactory, is *Abutilon Savitzii*. This variety is very dwarf and almost white in foliage, the flowers are insignificant. When something is desired in white to be planted in any kind of arrangement where alternanthera and lobelia are used, nothing better than *Abutilon Savitzii* can be obtained. A few stock plants should be got immediately, if a large number is required to be produced, and propagation commenced and continued until the required number is rooted; they root readily when placed over a gentle bottom heat.

Acalypha Macfeeana makes a splendid show outdoors in Summer, outclassing coleus and several other things commonly used in places where the former would be much more effective if better known. For stock for propagating from, a few plants should be lifted before frosts nip them. When potting the plants they should be cut well back and care should be taken that the soil be made firm in the pots. There will be no use attempting to root the rank pithy top shoots of the plants when they are lifted out of the open ground, but when they are cut back and kept in a moderately warm temperature they will soon make numerous short jointed growths which will root readily when placed in sand in the propagating bench during the Winter or early Spring.

Over quarter of a million one-year-old field-grown plants in stock.

Delivery at any time after September 25th

New and Rare Hardy Phlox

	Per 100	Per 1000
Albion. A variety which originated with us several years since. It is a remarkably strong, vigorous grower, producing very large panicles of pure white flowers with a faint aniline red eye. An excellent sort for massing.	\$10 00	\$90 00
Aglae Adamson (Tall). Immense flower and truss; snow white, with violet-rose eye.	8 00	75 00
B. Compie (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.	6 00	50 00
Chateaubriand (Medium). Pure white with crimson-carmine eye, shading to bright violet purple.	6 00	50 00
Consul H. Trice (Tall). Pure red with bright French purple eye.	6 00	50 00
Coquelicot (Dwarf). A fine pure scarlet with crimson-red eye.	6 00	50 00
Etoa (Medium). Crimson-red, suffused with fiery red; cherry red eye.	6 00	50 00
Edmond Kostand (Medium). Reddish violet, shading brighter towards the centre of petals, with an exceptionally large, white, star-shaped centre.	10 00	90 00
F. G. von Lassburg (Tall). The finest white in cultivation, the individual flowers being fully double the size of any other variety, pure in color; a strong, clean, vigorous grower.	50 00	125 00
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal; a pure red eye, very effective.	6 00	50 00
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height, pure white flowers of good size, early; unequalled for bordering; a perfect little gem.	10 00	90 00
Independence (Tall). An excellent large-flowering early white.	6 00	50 00
Inspector Elpel (Tall). Tender rose, with bright crimson-carmine eye.	6 00	50 00
Lamartine (Tall). Very bright magenta, with a large white centre, very effective.	6 00	50 00
Lord Raleigh (Dwarf). Deep reddish violet, distinct.	6 00	50 00
Le Mahdi (Tall). Deep reddish violet, with darker eye.	6 00	50 00
Mrs. Jenkins (Tall). An early-flowering pure white, forming an immense panicle; one of the best.	10 00	90 00
Michael Cervantea (Tall). Pure white, with pure red eye; larger flower.	5 00	60 00
Stella's Choice (Tall). A much-branching late white variety.	6 00	50 00
Selma (Tall). Large flower, pale rose mauve, with distinct claret-red eye.	10 00	90 00

Collection of Choice Standard Phloxes

Aquillon (Tall). Bright Tyrian rose with crimson-red eye.
Andreas Hoffer (Medium). An early and continuous flowering pure white.
Bouquet Fleuri (Dwarf). Pure white with crimson-carmine eye; free-flowering; each branch a perfect bouquet.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Beranger (Dwarf). Ground color white, delicately suffused with rosy pink and distinct amaranth-red eye.
Bacchante (Tall). Tyrian rose with crimson-carmine eye.
Blanc Nain (Dwarf). Very dwarf pure white.
Colibri (Tall). White, with crimson-carmine centre; very late.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Coran d'Ache (Dwarf). Geranium-red with old rose shadings and white eye; very effective.
Cyclon (Very Dwarf). White, suffused with lilac; aniline-red eye in the form of a star.
Eclairneur (Tall). Brilliant rosy magenta with large lighter halo; an excellent variety.
Engene Duozenviller (Tall). Lilac, shading white towards the edges; large white centre.
Esclarmonde (Tall). Lilac marked with white; aniline-red eye.

Frau Dora Umgeller (Tall). Very rich, deep rose; a strong tree-flowering late variety.
Gustav Naddud (Tall). Ground color white, delicately suffused with reddish violet; Tyrian rose eye.
Graff von Ungerer (Tall). Large flower; white suffused throughout with rosy lilac and dark crimson centre.
H. O. Wigers (Tall). Pure white, with crimson-carmine eye.
Henry Murger (Tall). White, with crimson-carmine centre.
Inspector Peiker (Tall). Purplish mauve, washed with white.
Jeanne d'Arc (Tall). A late-flowering pure white.
La Vierge (Medium). Pure mauve with aniline-red eye; one of the best Phlox in our collection.
Mozart (Tall). Ground color white, suffused with salmon; aniline-red eye.
Mme. Marie Knappenheim (Dwarf). A fine, late, pure white.
Martinique (Tall). Tender rose with brighter eye.
Mme. Pape Carpentier (Dwarf). Very early pure white; tube of corolla tinted with pink.
Otto Thunacker (Dwarf). Tyrian rose with deep red eye and light halo.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; the best of its type.
Pantheon (Tall). Bright carmine rose.
Pecheur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Pacha (Dwarf). Deep rose pink suffused with solferino-red and carmine-purple eye.
Professor Schilleman (Tall). Pure mauve with crimson-carmine eye; an effective late flowering variety.
Papillon (Medium). Bright violet purple, peculiarly marked with white.
Philibert Andenbrand (Tall). Pure white with carmine centre; large flower.
R. P. Strubers (Tall). Rosy carmine with claret-red eye; one of the best Phlox in cultivation.
Sunshine (Dwarf). Large flower, aniline-red with crimson-red eye and light halo.
Thebaide (Dwarf). Carmine lake with brighter shadings and aniline-red eye.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Zouave (Medium). Bright rosy magenta with red entre.

NOW, OF COURSE!

Waiting Means Suicide

I always act as quick as I think, and have been successful; learn and do likewise.

ARAUCARIAS OUR SPECIALTY
WATCH US GROW

1907 is our 12th anniversary in a successful career in the importation, growing and shipping of this well-known and so much admired evergreen, decorative plant, Araucaria Excelsa, Robusta, Compacta and the Excelsa Glauca.

Our importation this Spring, 1907, has swollen up to the enormous number of 6,000; more are coming with the azaleas in September and October. The florists of every city from the Atlantic to the Pacific Ocean can talk of Aschmann's Araucarias.

Now is the time to buy. They will gain in their growth 100 per cent. in two or three months.

The next in rank is our Nephrolepis Ferns, of which we only grow the best selling and well-known varieties, and of which we have a big lot: Boston, Elegantisima, Whitmani and Scottii, three large houses full, in best selling sizes, all pot grown (not bench grown).

Our ferns are not forced or grown in shady houses, but grown exposed to the sun, ventilators are open day and night. Such treatment stiffens the fronds, and makes strong, stout plants, that can be shipped 5,000 miles safely without injury to the plants in transportation.

If you so much money would make, That to pile it you'll need a big rick; Then to Aschmann you'll hurry, And buy in a hurry All the plants your benches will take.

ARAUCARIA EXCELSA, 5 to 6 1/2 in. pots, 10-12 to 14 in. high, 3 to 4 tiers, 2 years old, 50c. each. Larger sizes, 5 1/2 to 6 in. pots, 2-3-4 years old, 3-4-5 tiers, 60c.-75c.-\$1.00 to \$1.25, each.

ARAUCARIA Compacta Robusta, 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00, each.

ARAUCARIA Glauca, 2-4-5 tiers, 2-3-4 years old, 10-12-15-18 to 20 in. high, 6 in. pots, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each. Specimen plants, Compacta Ro-

busta, of last year, Spring, 1906 importation, 5 years old, 30 in. high, 7 in. pots, (something fine), 5 tiers (perfect), \$2.50 to \$3.00 each. Specimen Plants, 5 perfect tiers, 36 to 40 in. high, 7-8 in. pots as broad as long, \$4.00 each (worth \$10.00).

LATANIA Borbonica, 4 in. 20c. to 25c. each. KENTIA Forsteriana and Belmoreana, European stock, 6 in. pots, 25 to 30 in. high, five leaves, \$1.00 to \$1.25 each; 4 in. pots, 18 to 20 in. high, 35c. each.

COCOS Weddeliana, 3 in. pots, 10-12-15 in. high, 15c.-18c. to 20c. each.

ARECA Lutescens, 4 in. pots made up, three plants in a pot, 20c. per pot.

FICUS ELASTICA or RUBBER PLANTS, home grown and Belgium stock, 5-5 1/2 to 6 in. pots, 35c.-40c.-50c. and 60c. each.

FERNS, Boston, 4 in. 20c., 5 in. 35c., 6 in. 50c. each.

Elegantisima, 4 in. 25c., 6 in. 50c., each. Whitmani, 6 in. single plants, 60c. each; 6 in., made up, three plants in a pot, having from 20 to 25 fronds, very bushy, 75c. each; 4 in. 25c. each.

Pierstoni, 4 in. 20c. to 25c., each. Barrowsi, 5 1/2 in. 40c., each.

Scottii, 4 in. 20c. to 25c., 6 in. 50c., 5 and 5 1/2 in. 35c. and 40c.

Ferns for Dishes. A large assortment in 3 1/2 in. pots, \$4.00 per 100.

ADIANTUM Hybridum, the best adiantum for cut purposes, large plants in 6 in. pots, 50c. each.

ASPARAGUS plumosus nanus, 3 in. pots, \$5.00 per 100.

CYCAS REVOLUTA (Sago Palm). Plants from 5 to 10 leaves 10c. per leaf, above 10 up to 35 leaves 80c. per leaf.

PRIMULA OBCONICA, in bud and bloom, best strain, 3 in. \$7.00 per 100.

CHINESE PRIMROSES, 4 in. best Jno. F. Rupp strain, \$3.00 per 100.

All goods must travel at purchaser's risk. Please state if plants are to be shipped with or without the pots.

Cash with order please.

GODFREY ASCHMANN

Importer, Wholesale Grower and Shipper of Pot Plants

1012 West Ontario St.,

Philadelphia, Pa.

ASPARAGUS

PLUMOSUS, strong 3 in., \$5.00 per 100. DEFLEXUS, strong 3 in., \$5.00 per 100. SPRENGERI, strong 2 in., \$2.00 per 100.

SPRENGERI, strong 4 in., \$10.00 per 100.

THE FLORISTS' EXCHANGE, Franklin & St. Paul Sts., Baltimore, Md.

CARNATIONS

Mrs. Joost, Queen Louise, \$4.00 per 100. Lords, Boston Market, Lady Bountiful, Norway, Crane, \$4.50 per 100. Enehan-tress, Estelle, The Queen, Lawson, Harlow-warden, Cardinal, Vesper, Prosperity, Wal-cett, Flora Hill, \$5.00 per 100.

ASPARAGUS AND GERANIUMS

Asparagus Robustus, 4 inch at \$5.00 per 100; Sprengeri from rose pots at \$1.50 per 100; Plumosus from rose pots at \$3.00 per 100; Deflexus a very desirable pot novelty at \$6.00 per 100; or 12 plants free by mail for \$1.00.

Send for list of GERANIUM CUTTINGS and fall prices.

ALBERT M. HERR,

Lancaster, Pa.

VIOLETS

Strong, field-grown plants of Lady Campbell and California, \$2.50 per 100; \$20.00 per 1000; 500 at 1000 rates. Fairly well rooted plants now, will be strong by August 1. Packed to carry safely by express.

CHAS. BLACK, HIGHTSTOWN, N. J.

Obconica Grandiflora

Rose, lilac, white, FOXGLOVE, yellow, rose white, spotted CAMPANULA PYRAMIDALIS CALYCANTHEM, rose, white, true ORIENTAL POPPIES, pink, scarlet, salmon, 21 in., \$2.50 per 101. Cash.

REVIEW OF THE MARKET

NEW YORK.—The cut flower business continues to be quite quiet, most of the work just now being of a funeral nature. A few more orchids possibly could have been sold this week, though of lily of the valley and gardenias, always considered to be choice material for funeral purposes, there has been plenty on hand at all times. American Beauty roses will not average perhaps quite so well as they did last week; the supply, if anything, is increasing. The short grades of Bride and Bridesmaid roses are very plentiful at times and have to be cleared out at extremely low figures.

There are a few carnations coming in, but mostly of the short-stemmed grades. Lilies are more plentiful than they were and prices tend downwards. There is a noted improvement seen in the quality of asters coming in, and a very good grade of blooms can be had at \$2 per 100. Dahlias and Hydrangea p. g. are coming in plentifully, and there is quite a supply of Lillium speciosum, which is evidently field-grown stock, and very beautiful for decorative work. There is not much call for green material and prices remain unchanged.

ST. LOUIS.—Labor Day and the opening of the public schools should help the retail trade somewhat this week. The past week and, in fact, the whole month of August was reported a dull business season among the retailers and wholesalers, with funeral work the only thing that kept them a little busy some days. All the bosses and their help have returned from their vacations and all are in town for a big hard season's work, which is about to open at the wholesale houses.

This morning we find a pretty good demand for stock, but good first-class stock is out of the question. Roses are plentiful but very short in stems. The best American Beauty do not bring over \$2 per dozen with medium stem, shorts from \$4 to \$10 per 100; other varieties in roses sell from \$2 to \$4 per 100. In these the quality is very poor. Very little can be said of carnations as so very few are coming in; the best bring \$1 per 100. There are plenty of asters in all colors at 50c. to \$2 per 100. Gladioli and tuberose stalks were in plenty, the price being from \$2 to \$3 per 100.

The green market has everything the trade needs and plenty of it.

ST. PATRICK.

BOSTON.—Flowers have become scarce during the past week, that is, good flowers, and prices have advanced

considerably. Roses are very small so far, though there are some good American Beauty. Carnations are practically all from new crop now and although the stems are rather short the flowers are good for so early in the season. Asters are still in good shape and, in fact, one or two growers are sending in some flowers which are extremely fine, the flowers are large and perfect with long stems. Lilies are not plentiful. Gladioli still continue in abundance. Sweet peas have shortened up somewhat and lily of the valley seems to be less plentiful at present.

J. W. D.

INDIANAPOLIS.—August business terminated well. Several unseasonable wedding decorations and a quantity of funeral work served to advance the month beyond last year. The earlier part of each day was enlivened by numerous counter orders. Choice garden flowers have sold well as the price is most reasonable and the quality exceptional.

Asters are again becoming a serious question, the finer grades often attract purchasers at \$1 to \$2 per 100, but the inferior grades go to waste. Hardy hydrangeas, Golden Glow and gladioli take a prominent part in flower transactions. Prices vary but little from former quotations. American Beauty seemingly have a good start this season. Excellent medium stemmed ones are shipped from Illinois at \$15 to \$20 per 100. Carnations are always marketable, though the stems are but six to eight inches in length, at 75c. per 100. Dahlias have suffered from the severe weather, but a satisfactory crop is looked for this week. Harehish and auratum lilies are shipped in at \$15 per 100.

I. B.

CHICAGO.—The past week has shown a marked increase in shipping business, with a strong call for American Beauty, which, by the way, are not as yet showing very good quality. Some very fair Richmond are to be had, and these are taken in place of American Beauty in a great many instances. Asters are coming in quantities but the supply of really good flowers is not large. The usual glut of gladioli is to be seen, and only the light shades of this flower can be moved at any price worth speaking of. Liatis, Golden Glow and many other perennials are coming in in large supply, but this stock finds little demand.

Wholesalers are now settling down for the coming season which, if present indications point aright, should be a banner one.

W. K. W.

Success with House Plants

BY LIZZIE PAGE HILLHOUSE.

A complete text-book and guide to the care, cultivation and propagation of all plants in the garden and the home.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

12mo., 232 pp.; profusely illustrated, with complete and ready reference index to all plants enumerated. Price, Cloth, \$1.00; Paper, 50 cents.

To Retail Florists. The old thought, that it was dangerous for a customer to be superseded by the newer and more intelligent one, viz.: that the more successful a customer is with plants, the greater quantity will he or she buy.

We offer Special Inducements to all who wish to handle this book. It is a good seller.

News Notes.

At this writing most of those who attended the convention at Philadelphia have returned. Among the first to return were J. F. Ammann, Emil Schray and W. H. Kruse, followed by Mr. and Mrs. J. J. Boneke and C. A. Kuehn, who visited his old home in Detroit. Mr. and Mrs. F. C. Weber and Mr. and Mrs. F. H. Meinhardt stopped off at French Lick Springs, where they were joined by Mr. and Mrs. Theo. Miller. W. C. Young is still at Atlantic City, N. J., and Mrs. Klockenkemper and her daughter visited the Jamestown Exposition. Mr. and Mrs. Henry Berning visited New York before returning home. All the delegates expressed great satisfaction from their trip, and say they never attended a more interesting convention and were never better entertained.

Miss Newman and Miss Armstrong are spending their vacations at Killbuck, Wis. They are expected home by the end of the week.

Fred H. Weber, with his wife and sister-in-law, is at Niagara Falls, having gone there from the Philadelphia convention. They will return home this week.

The agreement of the wholesale houses to close at 5 p. m. during the week and half day on Saturday, ended last week. After this they will keep open as usual.

W. C. Smith, George Augermuller and John Burke found much enjoyment in their ten days' fishing trip. They have returned ready for a hard season's work.

C. Young & Sons have contracted for the decorations for the big Veiled Prophets' Ball, to be held the first Tuesday in October. This is one of the largest decorations of the year and uses up a large amount of plants and cut flowers.

Shaw's Garden, better known as the Missouri Botanical Garden, opened for the second time this year on Sunday to admit visitors. The attendance numbered over 10,000. Superintendent Irish and a large force of guides were on hand to show the visitors through the grounds and answer all questions. The afternoon was very hot, and this, no doubt, kept the attendance down. The garden never looked better.

Ostertag Brothers furnished the decorations for the opening of the new Marquette Hotel at Eighteenth and Washington avenue. Every room and table had vases of flowers. Henry Ostertag superintended the big job himself.

The members of the St. Louis Florists' Club should not forget that the club meets on next Thursday afternoon in the Burlington Building at 2 o'clock. The interesting features of this meeting will be the installation of officers and talks from the convention delegates. President Irish and Secretary Boneke are making great efforts to have a large attendance. President-elect Young and the rest of the new officers will return in time to be installed into office when the new year of the club begins.

Ornamental Poppies.

Bright and brilliant in color, but of a fleeting glory: this is the general characterization of practically all the papavers. I recently read a glowing description of a field of historic ancient Roman ruins, literally overflooded by the fiery red color waves of wild poppies. The writer of that narrative, a fine, subtle observer of nature, drew a most vivid pen picture of the transient beauty of this glaring sea of color. It reminded me in some way of the distant days of my boyhood, when now and then, I beheld similar displays of color in the waving rye fields of Germany, where the same wild poppies were the chagrin of progressive farmers and the delight of the country visiting city folks.

As a matter of fact, it was first and last by merit of their glorious hues that poppies became permanent inhabitants of our gardens, the oldest and up to the present day most conspicuous representative being the perennial variety, *Papaver orientale*. Oriental poppies are therefore so generally known in American gardens, that it would be a waste of time and space to again point out their high ornamental value. Equally treasured to-day are the Shirley poppies, to whose marvelous, glistening tints, in countless variations, are solely attributable their general popularity—a popularity which not in the least wavers on account of fleeting glory.

Principally for climatic reasons the biennial *Papaver nudicaule* is restricted more to the mountainous North. Iceland poppies are the prettiest of the harbingers of Spring in Maine gardens. The clear solid colors of this class—white, cream, yellow and deep bright orange—

are eagerly admired by the early arrivals of the large contingents of Summer inhabitants from our hot Eastern business centers. As for the profusion of flowering of this papaver genus, I call attention to the accompanying illustrations.

Iceland poppies along the Maine coast remain in bloom practically all season, although the principal flowering period is in May and the beginning of June. Cut, they are a magnificent material for table decorations and the filling of vases.

Of the great number of attractive, double, annual, midseason, papavers the carnation poppies are still unsurpassed. Their ornamental value is to some extent shown by our illustrations.

As for singles, the large, pure white variety—The Bride—stands highest in the favor of northern Summer resort society. The snowy white flowers, borne on long, erect stems, are indispensable for effective indoor decoration.

RICHARD ROTHE.

Bar Harbor Nurseries, Me.

An Impostor.

A party as yet unknown has been calling upon florists in different sections of the country representing himself as J. H. Myers, florist, of Altoona and Eldorado, Pa., soliciting loans in cash, also quantities of cut flowers, etc., directing the bills sent to me. A notice similar to this was published some months ago in two of the florists' journals. His latest attempts were made in Philadelphia with some success, the latter part of August. Should any florist have an opportunity to have this party arrested, I will do the rest. They would confer a favor to me, as well as other fellow florists.

The Plea and Plight of the Private Gardener.

To any disinterested party, viewing the matter dispassionately, the position assumed by the spokesmen representing the private gardener element at the recent S. A. F. O. H. convention at Philadelphia, where the national society was accused of insincerity toward those engaged in the branch of the craft referred to, appears to be a most untenable one.

The S. A. F. has since its inception welcomed to its ranks the private gardener; in fact, some of the brightest and most able men in that profession have been and are its members; among them, William Falconer, the late Fred. L. Harris and others. These men considered the original title of the organization broad enough to admit them to membership; they became affiliated without coaxing or any inducement other than the benefits generally dispensed by the society, in which they shared, and considered themselves in their particular capacity well rewarded thereby. And what is of greater importance, it is doubtful if better or more lasting service was ever rendered the national organization than the work done by Mr. Falconer when he was chairman of the nomenclature committee of the S. A. F. The compilation of the list of new plants, the result of Mr. Falconer's painstaking and practical labors, has never been equalled, far less excelled, at any time before or since, in the society's history. Other private gardeners as members of the S. A. F. have done good service for the craft when called upon.

The hullabaloo at the present time concerning the necessity of a change of name so as to make provision by the title for men engaged in other branches of horticultural work, the private gardener in particular, is, in our opinion, uncalled for, and the agitation resulting seems nothing more nor less than a desire on the part of a few to pander to a class of men, the majority of whom, left to themselves, see as much for them, in a

society way, in the S. A. F. as at present constituted, as could possibly proceed from the organization under a different designation. Much, if not all, depends on the willingness to affiliate themselves with the S. A. F. as it stands. There is no question at all regarding the benefits to the private gardener resulting from such affiliation.

It has been stated by one of the disaffected ones that the society's meetings in former times were largely devoted to "buffoonery," although in its latter days, the members appear to him to have mended their ways in this respect. Such a statement betrays a complete ignorance of what appears in the records of the S. A. F. Never at any time has the society deviated from its beneficent course of providing literature of the best and most practical kind to its members; and a careful study of its annual reports would form the best kind of an education even for those who so unjustifiably sneer at and undervalue the efforts of the organization. It may be true that there are some side issues of each convention the indulgence in which to the ultra-practical mind seems incongruous to be associated with an organization of such high standing in its line as the S. A. F.; but these are extraneous features, and in no way detract from the good work accomplished at each annual meeting. And it is worthy of note that the private gardener seems but little differently constituted from the florist so far as these side issues go, for we find the former in the thick of the fun, taking all the enjoyment out of these features he possibly can.

The preliminary premium list for the proposed national flower show to be held next year, published in our columns last week, demonstrates the desire of the S. A. F. to be sincere and friendly with the private gardener. Its open and special classes can all be entered by him; and he has even had exclusive classes provided for his benefit. It is puerile to assert that "when the S. A. F. wants to give an exhibition it has to call in the private gardener to assist it." No man having pride in his profession needs any supplication to display the results of his skill at a flower show; he does so by instinct, as it were; is anxious to do so in fact; for he realizes that it is to his own advantage to send there the products representative of his ability.

As we have previously stated, we can see no good ground for the accusation of insincerity toward the private gardener by the S. A. F. The history of the organization reveals the very opposite spirit—one of extreme friendship and fraternal good will; and he is an enemy both to his own profession and the one whom he accuses who makes any such deliberate and unjustifiable assertion to the contrary. In fact, the position assumed by some members of the ancient and honorable calling would lead one to believe that they have not yet passed the childish stage of their existence. There is an American Gardeners' Society from which many of the private gardeners hold aloof for reasons best known to themselves. They refrain from joining the S. A. F. because, they say, the title of the society does not suit them; and they predict all sorts of disaster to and competition against the national body, if certain things, as they see them, are not put in operation. And, strangest of all, there are evidently among the members of the S. A. F. a few men who would humor this petty spirit.

What the complainant private gardener apparently needs is more manliness, greater tolerance of and respect for the rights of others and a fuller knowledge of the fact that progress never yet resulted from pursuing a dog in the manger policy.

Canadian Horticultural Association.

The tenth annual convention of the Canadian Horticultural Society, held at London, Ont., on August 28 and 29, was a grand success, and one of the best in the history of the society. The first day's proceedings opened at 2 p. m., with an address of welcome by the mayor of London, with response by H. Simmers, Toronto, and an address of welcome on behalf of the Board of Trade of London by Mr. McMahon, London. A paper which caused a great deal of discussion was "Experience with Easter Lilies for Easter Trade," by A. Gilchrist, Toronto. Reports of the secretary, treasurer, standing committees, etc., were read. At the end of the session the delegates were taken in a special car to the greenhouse establishment of Gammage & Sons, where refreshments were served.

The evening session opened at 7.30 p. m. with a paper on "Up-to-date Methods of Conducting a Commercial Florists' Establishment," by J. W. Duggan, Brampton. "Plants versus Cut Flowers for Holiday Trade," by Thos. Manton, Toronto, was a good paper which brought out discussion.

Other excellent papers read were "How to Grow Exhibition Flowers of Chrysanthemums," by Thos. McHugh, Dorval, Que., and "What Are the Advantages of Connected Houses Over Single Houses?" by F. R. Pierson, Tarrytown, N. Y.

On Thursday morning Mr. Wm. Gammage's paper on "What is the Best Way to Get at the Cost of Pro-

duction of Greenhouse Stock?" was read. This was one of the best papers presented.

D. J. Sinclair's paper on "What is the Best Way to Appease the Voracity of the Storeman for Cut Greens?" caused a very lively discussion.

A paper which caused some very pointed remarks was "Wholesalers Retailing, from a Retail Standpoint," by M. E. Moore, Toronto.

The voting for the next place of meeting caused a great deal of discussion, but Niagara Falls was decided on so as to hold the C. H. A. convention the same week as that of the S. A. F.

In the afternoon of Thursday the delegates were the guests of the local committee. A special car was provided and they were taken for a trip around the city and then to Springbank Park, some five miles out, where refreshments were served and the election of officers for the next year took place. The following were elected: J. Walsh, Montreal, president; Ed. Dale, first vice-president; M. Allendale, Toronto, second vice-president.

The evening session opened at 7.30 p. m. A splendid paper, "How to Make a Flower Show Most Attractive to the General Public and of Most Benefit to the Trade," was read by Chas. Chambers, Toronto.

Mr. Brown delivered a fine paper on "Up-to-date Retail Management." Unfinished business and final reports concluded the meeting.

The trade exhibits were very fine and numerous. The following were among the exhibitors:

Manda & Co., South Orange, N. J.—A fine collection of stove and greenhouse plants. F. R. Pierson, Tarrytown, N. Y.—New Nephrolepis superbissima, a very fine and beautiful fern. Robt. Craig & Co., Philadelphia, Pa.—A fine new fern, Nephrolepis Amerpohli. King Construction Co., Toronto and North Tonawanda, N. Y.—Ventilating apparatus. J. Gammage & Sons, London.—A very large and fine display of commercial greenhouse stock. The London Horticultural Society exhibited some five or six long tables of all varieties of garden cut flowers. F. C.

Society of American Florists and Ornamental Horticulturists and Express Rates.

The following letter from the counsel of the United States Express Company to the Secretary of the Interstate Commerce Commission, a copy of which has been received by the President of the Society, is self-explanatory:

New York, August 23, 1907.

Mr. Edward A. Moseley, Secretary, Interstate Commerce Commission, Washington, D. C.

Dear Sir:—We received your letter of August 21, 1907, enclosing letter from Wm. J. Stewart, President of the Society of American Florists and Ornamental Horticulturists. Mr. Stewart complains that the United States Express Company has restricted the effect of the Commission to the points named in the complaint.

We regret to say that although the question was taken up some time ago, and although the officers of the Company decided, in order to be perfectly fair, that the new rates should not be confined to the points in question, but should be extended throughout the territory involved, at points similarly situated, through a misunderstanding and oversight the new rates were not put into effect.

As soon as we received your letter we took the matter up with the Traffic Manager, and found that through a misunderstanding he was awaiting some word from us before changing the rates. We regret very much that this has happened, for we can assure you that the Express Company did not intend to interpret the meaning of the Commission's order in a narrow manner.

We think that Mr. Stewart's suggestions are being entirely covered; if, however, his attention is called to any specific instance where the rate is not, in his opinion, according to the spirit of the Commission's order, we will have the matter adjusted if he will call our attention to it.

We return the enclosure herewith, and wish to thank you for thus calling the matter to our attention.

Yours truly,

O'BRIEN, BOARDMAN & PLATT.

This disposes finally of the controversy which has been extended over the past fifteen months and should place the United States Express Company in a most favorable light in the estimation of the flower-shipping trade. The position taken by the Company is at once eminently fair and cordial.

WM. J. STEWART, President.
P. J. HAUSWIRTH, Secretary.

Our Special Convention Editions.

A Philadelphia business man writes us as follows: "I much appreciate the last edition of The Florists' Exchange and, in fact, all the editions during and after the Convention. In their write-ups they have certainly been on the ground early and late, and in my humble opinion, the most wide-awake in reference to the Convention matters. No doubt you were glad at the close of the Convention that your arduous efforts had ceased, as you certainly were very diligent, and stuck close to your task."

Many papers of great interest are unavoidably crowded out of this issue, and will be inserted as space permits.

Violeta at Rhinebeck, N. Y.—One Day's Cut

Rhinebeck, N. Y.

The violet growing industry in this village is yearly on the increase. There is not a season that passes that the business has not added a few recruits, and the glass area thereby increased from season to season. About five years ago it was said there were about forty growers altogether in the vicinity of Rhinebeck engaged in violet culture. A few years ago the number had increased to about 85. In a recent write-up of the industry by the Rhinebeck Gazette it was computed that there are at the present time 150 different establishments where violets are grown for the wholesale trade.

The extent of glass operated by each grower varies considerably. Some have just one house, and the others range upward in number to three, five, eight and ten. The largest establishments have twelve 20x200 ft. houses. The number of plants grown by each grower varies from 7,000 up to 22,000 plants each. While many people in various parts of the country have given up violet growing as an unprofitable undertaking for one cause or another there are no failures on record with any of the Rhinebeck growers. All that enter into the business remain in it and find the industry pays. It is not through any studied art in the growing of these plants acquired by former experience that this is so, for the baker, shoemaker, butcher, groceryman, mechanics, doctors and farmers are numbered among the ranks of the Rhinebeck violet growers.

To visit one or two of these establishments would be equivalent to seeing them all. The houses are of the same construction and the plants are grown in solid beds about two feet high or more. The large as well as the smaller grower follows the same routine of culture. No one claims to have any superior skill in the matter and the same general success is met with all engaged in the business.

The mode of culture is the simplest. The runners are rooted in February and March and when rooted are transplanted closely together into beds prepared for this purpose where they remain until June. They are then placed on the beds where they are to bloom. June is a busy month with the growers so far as preparation goes. The old plants are thrown out and new soil put in. Then the planting comes. This is the most laborious part of the work and is usually completed by July 1. From July on to flowering time the work consists of watering, weeding and the general cultivation in the way of removing runners, etc. This work is done by the boys and girls of the vicinity, the men turning this lighter work over to them as soon as planting is finished.

The shipping season usually begins in October and continues well into the Spring. During this time the Express Company of Rhinebeck is kept busy hauling the different shipments daily from the various growers. These shipments go as far west as Chicago, St. Louis, and Kansas City, Mo., and to every town where flowers are used from Boston to New Orleans.

The people of Rhinebeck are very proud of the distinction they have achieved in this industry and take pleasure in giving all the details of the business to any one that may seek it.

J. M.

Wisconsin State Horticultural Society.

The Summer meeting of this society was held at Shiocton, near Green Bay, on August 28, and was devoted, almost entirely, to a consideration of methods for propagation and culture of flowers, of which there was a fine display.

Mr. E. G. Arzberger, of Madison, read a paper on

"Bulbs, Corms and Tubers," illustrating by means of drawings the development of each.

Mr. A. P. Loewe, of Milwaukee, read a paper on the dahlia, speaking particularly of the cactus dahlia, introduced from Mexico, from which many new varieties have recently been developed. The easiest and most satisfactory method of propagation is a simple division of the roots, care being taken to secure at least one eye in each tuber. As the eyes or buds are not on the tubers, but on the stem above them, they should always be divided in the Spring, and very often not until the tubers have been put in a warm place for a brief time, so as to start the buds and leave no doubt as to where they are located. A sunny, airy location, with sandy loam containing a large amount of plant food, will give best results.

Mr. Matthew Crawford, of Ohio, who at the present time is superintending the work of the Shiocton Garden and Land Company, read a paper on the gladiolus.

Mr. A. Henderson, of Chicago, representing the firm

Nephrolepis Superbiasima—Single Frond

See Report of S. A. F. O. H. Trade Exhibit at Philadelphia, page 270

of J. C. Vaughan & Co., read a paper on "Dutch Bulbs," giving a description of the manner of raising, and a list of varieties recommended for culture.

Prof. J. C. Elsom, of Madison, spoke of the economic value of the common birds of our country in destroying an enormous number of injurious insects and also checking the growth of noxious weeds by consuming their seeds.

Utica Florists' Club Annual Field-Day and Clambake at Illon, N. Y.
(See page 277 issue of August 24, 1907.)

M. H. Walsh.

M. H. Walsh.

We have been enabled to reproduce in The Florists' Exchange, at various times, illustrations of new roses, the result of the successful labors of that skilled rosarian, Mr. M. H. Walsh, of Woods Hole, Mass. In this issue we are enabled to show some of Mr. Walsh's older as well as newer productions, and, in addition, a photographic reproduction of the gentleman himself, whose fame and whose roses are now as well known on the other side of the Atlantic as on this.

Mr. Walsh was born of Irish parents in the town of Wrexham, County of Denbighshire, North Wales, England; twelve miles from Chester. When a boy of eleven years he began work in the gardens of Simon York, Esq., Erddig Park, Wrexham. At the age of twelve he began an apprenticeship for three years, under the charge of James Phillips, gardener.

On this estate were extensive pleasure grounds and the choicest varieties of trees, shrubs, etc. A large

number of roses were grown, including all the varieties in cultivation at that time; there were, also, extensive vegetable and fruit gardens, orchards, etc.

The term of three years having expired he remained two years longer under the same gardener. Then he went to Sir Watkins William Wynn's of Wynnstay, Ruabon, which was in charge of Mr. Peter Middleton, a thorough, practical gardener in all the branches. Mr. Middleton was a frequent prize winner at the Chester and Liverpool Horticultural exhibitions; as well as at Oswestry. His writings in the Gardeners' Chronicle were read with much interest in those days, he being a frequent contributor. It was here in the botany, in the long Winter evenings, Mr. Walsh spent his time in reading the "Gardeners' Assistant" by Robt. Thompson, "The Floral World" by Shirley Hibbard, and The Gardeners' Chronicle.

This estate of Sir Watkins William Wynn was one of the finest and most extensive in that section of the country. Here he remained three years, having charge of the graperies, peach house, mushroom house, forcing house and stoves. He was always interested in roses. At that time the cultivation of roses was much discussed in Shirley Hibbard's "Floral World," and the varieties of roses in cultivation then were practically few, and nearly all were introduced from France. Questions of soil and the merits of these varieties was much discussed among professional gardeners. Mr. Walsh says he has most pleasant remembrances of these discussions, for what was practical at that time is practical in this country to-day, with some modifications.

Mr. Walsh came to the United States in 1868, arriving in Boston. He was first employed as foreman on the Samuel R. Payson estate, formerly the old Cushing place, in Belmont, Mass., where he remained five years, from there going as foreman to the Strong greenhouses in Brighton, Mass., where he remained for four years, having leased the greenhouses in the meantime.

From Brighton Mr. Walsh moved to Woods Hole, and on the estate of the late Joseph S. Fay. His first undertaking was the planting of large areas of forest land in addition to the care of garden, trees, etc. There he began the growing of roses on a small scale, gradually increasing the number of varieties and the quantity. Mr. Walsh has exhibited at the Massachusetts Horticultural Rose Society's Shows for the past eighteen years, and has been awarded the first prize in the leading classes of the American Rose Society's shows, as well as numerous first prizes for vegetables and fruits.

For the past fifteen years Mr. Walsh has been experimenting in rose hybridizing, and has produced many charming new varieties of the rambler class, and which have become standard sorts in Europe as well as in this country. Mr. Walsh is now turning his attention and skill toward the hybrid tea roses and expects to be successful in producing new and improved sorts.

Rambler Roses at Woods Hole, Mass.

The name Woods Hole, Mass., has become famous all over the country as the place where has originated an entirely new class of roses, which are yet only in their infancy as it were, and which to the rosarian will prove a delight. The man who has placed these wonderful Rambler roses before the public is M. H. Walsh, a modest, unassuming gentleman, and yet in his field without a peer. He will not tell you that he has created these fine varieties of roses, and yet he is doing a work which is unsurpassed by anyone in this particular line; and although he has placed on the market within the last five or six years some of the finest trailing roses that can be secured, yet were one to visit Mr. Walsh's rose garden during the following season in July he would at once see that better things are to come and that the public will get them after they have been duly tested.

The principal thing that will impress the visitor is the length of the flowering season of these different roses. While some varieties will bloom early, there are others that will come in succession so that the season of Ramblers in flower will not be two weeks but two months; and that this time will be extended in the near future there is no doubt.

Perhaps the most popular of the Rambler roses sent out by Mr. Walsh has been Lady Gay, now too well known to need description. This may be closely followed by Hiawatha, that charming single variety, with spikes of ruby-crimson blossoms.

There is another variety, though, of this type which, in my estimation, is the best of them all. This is Delight. It has a beautiful, glossy foliage, large clusters of flowers of a beautiful shade of bright carmine. I had the good fortune to see a field of several thousand young plants of this rose, and although they had only been set out late last Summer, they were this season a glorious mass of flowers. Every plant had from six to twelve spikes of bloom, which would show that it was one of the most floriferous of roses.

Wedding Bells is one of the earliest blooming varieties, and although this is a good forcing rose it is in the open that its beauties need to be seen.

A very pretty variety is Paradise, a single-flowered sort of a beautiful shaded pink and white color. This is a variety that has a gracefulness and charm about it that will commend it to anyone.

Debutante is one of the finest of Rambler roses. The color is a beautiful soft pink, and growing on a trellis, as seen by the writer, it is a sight that any rose lover will not soon forget.

Evangeline is a beautiful variety, a deliciously fragrant flower of a pleasing pink color and growing in large clusters; for planting in sprawling masses this rose is unsurpassed.

Rambler Rose "Debutante," growing on trellis.

Copyright, 1907, by M. H. Walsh.

Roses at the Establishment of M. H. Walsh, Woods Hole, Mass.

La Fiamma is a fine flame-colored single variety, a strong grower and good.

Sweetheart is a beautiful rose, the flower buds being pink, but when fully expanded shaded to a soft white.

Coquina is a new variety of a salmon shade of pink. It is good on account of its peculiar color.

Galaxy is another new variety, a very late bloomer and one of the finest of the lot. The color is pink, but it is quite distinct; a good grower and valuable on account of its lateness.

Bonnie Belle is another of the new seedlings. What a glorious rose it is! The flowers are single, of a beautiful cerise pink shading to light in the center and remaining of a good color.

These are only a few of the many varieties that are seen under test, and although it may be several years before some of them make their appearance in the market, rose growers may rest assured that any variety sent out by Mr. Walsh will stand on its merits and be a fitting monument to the man who has done so much not only for rose lovers in America but also in Europe, where every year these Woods Hole Rambler roses are becoming more and more popular.

JOHN W. DUNCAN.

Society of American Florists and Ornamental Horticulturists.

Mr. Murray's Prize Offer.

Secretary P. J. Hauswirth of the Society of American Florists advises us as follows:

On account of the short time intervening between the publication of Mr. Murray's offer and the meeting of the Society, the Executive Committee extended the time to September 30.

Prize Essays.

Samuel Murray, of Kansas City, offers two prizes of \$30 and \$20 for the following essays to be presented by Sept. 30. "Comparative Worth in the Community and to Horticulture and Floriculture."

First: The man who is a gardener and florist, having a store and conservatory in the city, conducts a high-class business; has greenhouses in the suburbs; grows plants and cut flowers for his store; has a good business in Spring bedding plants and does all in his power to increase the sale of hardy perennials, setting forth to his patrons on every occasion possible the beauty and charm of the hardy flower garden plants, shrubs and trees and bulbs in the Fall.

Second: The man who conducts a store, and conservatory in the city, has a high-class business, but does not have any greenhouses, buying all his plants and cut flowers at wholesale.

S. A. F. O. H. Registration.

M. H. Walsh of Woods Hole, Mass., submits for registration the following Rambler Roses:

Walsh's "Poesy"—Color clear dark pink; base of the petals fading to pure white; distinct; free flower-

ing, strong grower; flowers borne in large clusters and hanging gracefully on the plant. This variety raised in Woods Hole in 1901.

Walsh's "COQUINA"—Beautiful shell pink; lower half of petals creamy yellow; foliage glossy ivy green; profuse bloomer; single flowers.

Walsh's "CINDERELLA"—Beautiful dark rose; flowers double, borne in immense clusters; shoots bearing from sixty to one hundred blooms; when fully developed, flowers assume imbricated form and change to a lovely shade of light pink; one of the latest of the Rambler class to flower.

Walsh's "DELIGHT"—Single flowers; intense carmine tipped with scarlet; lower half of the petals white; most profuse bloomer; flowering from every bud on each shoot; foliage dark glossy green and a grand forcing rose.

Walsh's "EVANGELINE"—Single flower, two inches in diameter; large bronzy glossy green foliage; most vigorous grower; deliciously fragrant; color soft pink and white; suitable either for climbing or creeping in parks or shrubberies.

Walsh's "PARADISE"—Single flowers; borne in large clusters hardy; profuse bloomer; fragrant; petals, lower half white; upper half, pink; when fully developed the petals recurve to a sharp point forming a perfect star; center filled with yellow stamens.

P. J. HAUSWIRTH, Secretary.

Congress of Horticulture Opening September 23, 1907.

Jamestown Exposition, Norfolk, Va. Headquarters at Inside Inn.

The week of September 23-27, 1907, is to be as important one, horticulturally, at the Jamestown Exposition. In addition to the regular meetings of the American Pomological Society, American Nut Growers' Association, The Society for Horticultural Science, and the Federation of Horticultural Societies, arrangements have been made for a Congress of Horticulture to consider topics of a general character covering the various branches of horticulture. This Congress was arranged for by the National Council of Horticulture upon invitation of the authorities of the Exposition Company and of the Norfolk Horticultural and Pomological Society.

In view of the fact that the regular biennial session of the Pomological Society occurs the same week all strictly pomological subjects are omitted from the program of the Congress.

The topics are to be treated in a general way and the aim will be to show the present status of our actual knowledge of these subjects and to point out just where we stand in the various branches in a manner that will be of interest to horticulturists generally. It is hoped that these meetings will be the means of bringing the more or less scattered branches into closer union, add inspiration and profit to all participants and others who may be present and to dignify and advance horticulture in all of its branches.

It is earnestly hoped that the attendance will be commensurate with the interests involved.

Greenhouse Construction.

Paper prepared by F. R. Pierson, Tarrytown, N. Y.,
and read before the Canadian Horticultural
Association at London, Ont.

The question as to the best style of greenhouse construction is a most important one. As our business has widened and developed the necessity for the increased facilities has taken place, as in other mercantile lines. The ocean steamer of twenty years ago bears about the same relation to the leviathans that are now being built, as the small greenhouses of twenty years ago bear to the large structures that are now being erected, any one of which is as large and covers as much ground as was covered formerly by an entire establishment composed of eight, ten or more houses. In the earlier days of our business a number of houses was not only desirable but necessary; but in our business as in other branches of trade, we are fast becoming specialists, growing one kind of flowers or plants, and these in immense quantities.

As conditions have changed, the size of the buildings has naturally increased. Twenty years ago, eleven foot houses were in the majority; then came the $\frac{3}{4}$ -span, 18 to 20 feet in width; in fact, fifteen years ago, when we built a new range of four iron houses, 20 feet in width and 300 feet in length, it was considered a model range and was much in advance of anything that had been built up to that time. Visitors came from everywhere to inspect it. But times have changed and changed rapidly, and it has been duplicated to such an extent in the meantime that it has long ago become commonplace. At that time, however, these light houses were much in advance of the houses in general use, but with the increase and growth of the business the necessity for larger houses became apparent, and then came what are known as the ridge and furrow open construction.

The Ridge and Furrow Plan.

For the economy in construction and the returns on the investment these houses are undoubtedly more economical and profitable than the 20 foot separate houses of east and west construction. This style has recently been greatly improved in details by the use of light iron gutters, increased height of the gutter line, the use of larger glass requiring fewer sash bars, the use of light trusses or posts increasing the width of the houses, making an admirable structure and capable of indefinite extension only limited by the quantity of one thing to be grown.

This style has many champions, and fine examples of it can be seen in the immense establishments at Brampton and in other Canadian cities—Toronto, Ottawa, etc. It has been adopted very largely in the vicinity of Chicago, where immense ranges have been and are being built. But I believe that the old idea of single separate houses running east and west and greatly enlarged in

width, is preferable to this type of house. Of course, I am speaking from the standpoint of the cut flower grower to whom sunlight in the short Midwinter months of December, January and February is at a premium. For plant growing, especially palms and foliage plants, the ridge and furrow open construction is ideal; but for cut flower growing, I consider the wide separate east and west house immensely superior, as these houses certainly get much more sunlight, especially in the short Midwinter days. In fact, this is wherein their superiority exists, and as this is the season of the year when flowers command the highest prices, it is of the utmost importance to the grower that he get every bit of sunlight that can possibly be secured. Such a season as we have just experienced makes this doubly apparent.

Female Flower.

Male Flower.

Cycas Revoluta in Bloom.

About Cost.

The argument in favor of the construction of the ridge and furrow open construction has been that it costs less to build and for the money expended the results obtained were in its favor, but by increasing the width of the east and west single house, this advantage disappears. In contemplating a large addition to our establishment last year, I went into the comparative cost of the two styles, and obtained estimates for exactly the same area; and while the single east and west house was the very best style of flat rafter steel construction and the ridge and furrow was of the semi-iron construction only, I found there was but six per cent. difference on the total investment in favor of the ridge and furrow construction—a difference so small that the difference in one week's crop at the holidays might offset the entire extra cost.

With the question of cost settled, I think the advantages in favor of the single wide east and west house are unquestionable. Not only is much more sunlight obtained in the short dark Midwinter days when the sun is at its lowest meridian, but much more ventilation can be given, in fact, I have been surprised to

see how much is necessary in the coldest Midwinter weather when other houses could be given little if any—of course, this adds to the general health of the plants, giving stronger stems and increasing the numbers of flowers. Take a dull, dark Winter, such as we have just passed through, and the importance of this is better appreciated, for it is a well settled fact that the more air that can be given the better for the plants. It is then that the advantage of this type of house is seen at its best. We get better ventilation in these houses in the Summer also, as the side ventilation is a great advantage, making the house airy and cool.

Cost of Heating.

Some have thought that these houses would be difficult to heat. On the contrary, they are much easier heated than the smaller and lower houses. It is not to heat the volume of air that costs; it is rather the amount of glass exposed to the outside air, and there is little if any more exposure in these houses than in the connected ridge and furrow ones. In fact, the larger volume of air in these large houses cools slower and is subject to much less fluctuation. This large volume of air is also a reason why more air can be given in these houses in zero weather than can be given in the smaller and lower ones.

Cost of Operating.

So far as the cost of operation is concerned, I see no advantage in either. The single large house can be built as large as one needs, as large as there is any advantage in. We are now building houses 56 feet in width, but there is no reason why that cannot be greatly increased if one wishes to—say to 75 or even 100 feet in width; but of course, the greater the width the higher the ridge would necessarily have to be. In commencing a new range several years ago, we started at 56 feet in width and will continue that for the present, at least for the sake of uniformity; but there is no other reason for not increasing it. Yet little would be gained, for we now get about all the economy in operation possible, the only advantage being a possible very slight decrease in the cost of construction.

Criticism of a Very Wide House.

We have all been interested in the monster house erected this year at North Wales, Pa.—154 feet in width, I believe—and admire the faith and enterprise of its projectors; but I fail to see any special advantage in such extreme size. In this case, in order to avoid an excessively high ridge a very flat roof has resulted, which I consider very objectionable, both on account of the liability of drip in rainy weather and also from the lodgement of snow in Winter. The roof being so flat, I doubt if the snow would slide off of it readily. So while I am an advocate of the single wide house, there are limitations to be reckoned with, and reasons for not building to such an extreme width. In advocating the single wide house, I speak from experience, as we have several ranges of the most modern and perfected type of the ridge and furrow connected houses, as well as of the large wide separate houses. We are now building the latter type of house and believe fully and unqualifiedly that it is the best type, all things considered, for the cut flower grower. These light steel airy structures, with reinforced concrete sides, such as we are now building, eliminating all woodwork, except the sash-bars and ventilating sash, offer little or no obstruction to the light. It is really getting back to first principles, and following out the same principle that the market gardener, who is dependent on sunlight only, is compelled to observe in placing his cold frames; so that I think all will agree with me that an east and west house facing south gets more sunlight than the connected ridge and furrow house.

There is an all too prevalent idea even among florists that the temperature or warmth is the necessary factor, but that this is not so is shown most conclusively in the dull Winter days when the growth becomes weak and the plants stop blooming. It is the province of the florists to aid nature, and the house that will admit the most sunlight, other things being equal, is the better style of structure.

Cycas Revoluta in Bloom.

Editor Florists' Exchange:

I send you pictures of the Cycas revoluta, or sago palm, in bloom. One plant flowered in 1904 and produced male flowers; the other plant bloomed this Summer and produced female ones. I do not know whether it is rare for this plant to flower or not, and would like to have you advise me.

Conn.

T. S. AUSTIN & SONS.

[As it is grown commercially, the Cycas revoluta does not often get a chance to flower, but in the greenhouses connected with public parks, where the plants are grown permanently year after year, it is not at all infrequent that they come into flower.

The picture taken July, 1907, shows the pistillate form, and the one taken in 1904 shows the staminate form of the flower.—Ed. F. E.]

Philadelphia.

We are again down to our usual Summer quiet, although we cannot quite yet forget the convention, as nearly every day some one from a distant point bobs up on his way home from some seashore resort. The convention week seems like a dream; most of us fellows were kept so busy that we had not the opportunity to enter into conversation with those we know well, and think of many things now that we would liked to have talked about. We are very thankful to our friends for the many kind things they have said about our Club, and we feel glad we were able to make a few brothers in the business happy while here.

Ed. Kanst of Chicago, who is in the hospital here with diphtheria, is doing nicely; we are able now to talk to him over the phone; he will be detained yet another three weeks to perfect quarantine regulations.

F. L. Polites had a thrilling experience at his store, 1418 Chestnut st., on Monday. A man entered the store who proved to be a money maniac, demanding an enormous sum of money, and when it was not forthcoming, struck Polites with a heavy cane which he had with him. Polites, fresh from bowling triumphs, landed right and left on his man, put him out of business, and got him into a policeman's custody; he is now in safekeeping awaiting trial.

The Florists' Club meeting on Tuesday was taken up mostly with convention matters, reports of committees, etc. Nominations of officers for the next club year were as follows:

President, Samuel S. Pennock and Fred. Hahman; vice-president, Wm. Graham and Wm. P. Craig; treasurer, J. Wm. Colflesh; secretary, Edwin Lonsdale and David Knst. The election takes place in October.

We have forwarded or returned all letters left over from the convention, and if any members have trouble about souvenirs, photos, etc., the writer will be glad to attend to their inquiries.

DAVID KNST.

Washington, D. C.

Club Meeting.

Notwithstanding the prevailing high temperature of the night of September 3, there was a good attendance at the regular monthly meeting of the Washington Florists' Club, and a most interesting program ensued.

George H. Cooke, chairman of the chrysanthemum exhibit to be held in National Rifles' Armory, November 12, 13 and 14, reported excellent progress thus far and printed schedules are still being sent out to various members of the trade by Secretary McAuley.

N. L. Hammer moved that the awards committee, in future, submit its decisions upon the merits of all exhibits directly to the club, to be passed upon at the next meeting by all members present. J. R. Freeman made a strong appeal in favor of this motion and it was unanimously carried.

An exhibition of the beautiful cup won in Philadelphia by the Washington florists' bowling team, brought J. R. Freeman to the floor, where, holding the cup, he paid the highest tributes to "the plant of human gratitude," expressing to an impromptu, but none the less eloquent manner, his appreciation of the work his many friends had done toward securing his election to the presidency of the S. A. F., and alluding modestly to himself as a defeated candidate. "Not defeated, but deferred," said President Bisset. (Applause.) Mr. Freeman, continuing, again thanked his many friends for their interest displayed, and explained that it was only through the earnest entreaties of his family that he permitted his name used as a candidate. Holding the cup aloft he concluded by saying, "This isn't deferred, this is here, all honor to the boys who won it; I'm only sorry its empty or I'd pass it around."

Later, Mr. Freeman moved that due recognition be taken of the magnificent manner in which the Washington florists were received in Philadelphia. W. F. Gude rose to bear testimony to this fact and to inspire all with enthusiasm by a resume of the trip; he spoke of how all worked together, and of how "Every stranger came at home in a city of 'Brotherly Love'."

Messrs. R. Vincent & Sons Co., of White Marsh, Md., have extended an invitation to the club to visit their dahlia farm on September 17. The train will

leave Washington at 11:50 a. m., arriving about 12:15 p. m. Wagons will be waiting to convey the florists to the plantation.

Owing to the exhibition being given under the auspices of the church which is attended by the Vincent family there will be a nominal charge for meals; this in no way deterred many present from openly declaring their intention to repeat the pleasure enjoyed a year ago.

It was reported to the club that one of the police precincts had ordered the removal of bay trees from the sidewalk in certain sections of the city, which was a hardship, and unfair, so Secretary McAuley was instructed to take the matter up with the proper officials and report at the next meeting.

The first Tuesday in October will be the time of the next meeting and, in connection therewith, there will be a dahlia exhibition of the newer and finest varieties, also other plants and flowers.

JAS. L. CARBERY.

Boston Dahlia Show.

The annual dahlia show of the Massachusetts Horticultural Society, which was held on Wednesday and Thursday, was the best in years, notwithstanding the unsatisfactory season. There were many fine flowers in the Hall, in fact, both the upper and main halls were filled and almost entirely with dahlias.

Perhaps the most striking dahlia was the vase of the new variety Chas. Lanier, an excellent yellow show variety, from A. H. Wingett. Lenox. B. Hammond Tracy of Wenham had an excellent display of gladiolus, among which were noticeable as superb varieties, Harvard, Kathryn, Augusta, Jean Dieulafoy, Baron Halot, Princess Sandersoni, May and Shakespeare. R. & J. Farquhar & Co. had a fine display of lilies, including auratum in variety, speciosum, tigrinum and Philippinense.

In the schedule of classes for dahlias the following prizes were awarded:

24 blooms Show: 1. Mrs. H. A. Jahn; 2. Johnson & Hall; 3. Edgar W. Ela. 12 blooms Show: 1. W. H. Symonds; 2. J. H. Flynt; 3. J. H. Flynt. 24 blooms Cactus: 1. W. W. Rawson & Co.; 2. Edgar W. Ela; 3. N. A. Lindsay.

12 blooms Cactus: 1. Johnson & Hall; 2. Mrs. T. O. Richardson; 3. Wm. H. Symonds.

12 blooms Fancy: 1. Edgar W. Ela; 2. J. H. Flynt; 3. W. D. Hathaway. 24 blooms Decorative: 1. Mrs. H. A. Jahn; 2. W. W. Rawson & Co.; 3. W. D. Hathaway.

12 blooms Decorative: 1. Edgar W. Ela; 2. W. H. Symonds; 3. Mrs. L. M. Towle.

24 vases Pompon: 1. W. W. Rawson & Co.; 2. J. K. Alexander; 3. W. D. Hathaway.

24 vases Pompon: 1. W. W. Rawson & Co.; 2. Edgar W. Ela; 3. Mrs. H. A. Jahn.

12 vases Single: 3. E. W. Ela.

Largest and best collection of dahlias: 1. W. D. Moon; 2. Mrs. L. M. Towle.

For the collection of herbaceous plants the Blue Hills Nurseries were awarded first prize.

Certificates were awarded: To J. L. Smith, a first class certificate for the superior cultivation of Nephrolepis Barrowsii; to Mrs. J. L. Gardner for display of potted plants; to Geo. E. Daveport for general display; to Wm. Whitman for display of asters and dahlias; to Forbes & Gillette for display of dahlias; to Harvard Botanic Gardens for display of tuberous begonias; to Mrs. E. M. Gill for general display.

First class certificates were awarded to B. Howard Tracy for each of the following: Gladiolus Kathryn, Princess Sandersoni, Jean Dieulafoy; and honorable mention for gladiolus Harvard.

Honorable mention was awarded to H. A. Dreer for Nephrolepis Todeoides and N. Amerpohli; to R. & J. Farquhar & Co. for display of lilies; to Laban Poatt for display of single dahlias.

First class certificate was awarded to A. H. Wingett for seedling dahlia Charles Lanier. A like award was made to Hoffman, the florist, for artistic arrangement of dahlias. Honorable mention was awarded W. W. Rawson & Co. for general display of dahlias.

The Philosophy of Wholesaling.

Read before the Florists' Club of Philadelphia by Chas. E. Mehan, September 3, 1907.

It has been suggested by a friend that I call this short paper by the above title. I am rather in doubt as to the amount of philosophy contained herein, but, nevertheless, we will let the title stand.

The wholesale florist has, I believe, done more for the advancement of the flower business in general than any other branch of the florist business. He has been the outlet for the enormous quantities of cut flowers which have been coming to our large cities and which could not be disposed of, in many instances, if it were not for him. It is his business to hunt for business wherever he can find it, whether it be in his home town or whether it is one thousand or more miles away. He has created markets for cut flowers and plants that would have been impossible but for his push and energy. His relations to both growers and retailers are of a peculiar character. I have often heard it said that he is between the Devil and the Deep Sea, and I think this is, in a measure, true, as he has a hard time to please both parties. If flowers do not bring as much as the growers think they should he hears about it, and if they bring good prices the retailer calls him a robber and other names of like nature, or worse.

Now, let us take up this matter from the standpoint of what the grower has gained. In the first place, I think it must be generally admitted that under present conditions there is only one right way to sell flowers and that is through the wholesaler. Years ago all the flowers that came to this city were sold direct by the grower to the store men. This was a satisfactory way at that time but would never do under present conditions. Other and more satisfactory methods have gradually been adopted and, at this time, I cannot recall in our city a single instance of a grower who, having once tried the wholesaler, has gone back to his former ways. This, it would seem to me, is fairly good evidence that it must be satisfactory to those who try it. The reasons for this are many. In the first place, where a man may be the finest kind of a grower he may be the poorest kind of a salesman. Also, as before stated, there are so many flowers grown around the larger centers they could not possibly be consumed but have to go to other points.

The wholesaler has created markets and business by his up-to-date methods; he has careful men to handle and pack the stock, storage boxes in which to keep the stock in good condition, proper boxes to pack in, telephones, a place of business close to railroads and express companies, and, in fact, has worked and developed his business until today he is indispensable. He, however, cannot do business unless he has the stock to do it with, which means he must give his growers satisfaction. I believe if the growers would see their wholesaler more often, see how their stock arrives from the express company, how it is handled, etc., and keep in closer touch with the wholesaler, it would be to their advantage, as many times, flowers which are in seemingly good condition when shipped, arrive in bad condition, due to improper packing and other causes which could be remedied, and it does seem too bad that in a few short hours all the work and trouble which has been taken to produce good stock should go for naught simply for the want of proper packing, cutting or keeping. Therefore, I say again, Mr. Grower, keep in close touch with your wholesaler.

I also believe in these times of specialization that it will pay the good grower to grow what he can grow best in quantity rather than to grow a number of things indifferently. Get the opinion of your wholesaler on this. He can do better for you if you have a large quantity of first class stock rather than a number of small lots of poorer stock. I think this is generally recognized by growers, although some of them still send all kinds to the wholesalers and expect the same results as the man who sends good stock.

It is often said by retailers that the price of flowers is so much higher than it used to be, but do they take into consideration that the quality is just as much better? A wholesaler cannot sell

the fine long stemmed stock of to-day at the price of ten years ago for short stemmed stock, and please his growers. In this connection I want to say that the wholesaler is accused unjustly, many times, of raising prices unnecessarily, but do his accusers ever stop to think that the law of supply and demand does more to control prices than any wholesaler or combination of wholesalers? One trouble with a great many of the wholesale man's customers is that they want to be both buyer and seller. I might also say a word in this connection about the retailer who takes advantage of a falling market by not dropping his prices, but that would not be pertinent to the subject, perhaps.

I said, in speaking of the growers, that a wholesaler could not do business unless he has the stock to do it with, nor could he do business if he had no customers to whom to sell. I do not believe the retailers are using the wholesaler to the same advantage in our city as is done in some other big cities. What I mean is this: The wholesaler has a large stock of flowers on hand, usually early in the morning. Now, it seems to me, if the retailers were to come or send their buyer to market, they would do much better for themselves than by ordering some of this or some of that, several times during the day. Think of the variety he would have to select from. And then, too, he would often times be able to pick up lots of certain stock at better figures than if he bought only a small quantity. The wholesaler in selling a big quantity at once would also be able to make better returns to his growers than if the stock were sold in small quantities and picked over, thereby losing value. It seems to me that the retailers generally expect a great deal more from the wholesaler than they ought to do. I am not speaking altogether of service, but I do think that after the wholesaler has used his best efforts to serve this customer for a month, oftentimes procuring and delivering stock at a loss, it is up to the retailer to meet his bills promptly. I know this to be a sore subject generally among wholesalers, but I think our business has grown to such proportions that the same or better business methods should be as effective in the florist business as they are in others. The wholesaler pays his growers once a month, some twice a month, and some weekly, and in order to do this he has to collect his accounts on time.

I think it pays the wholesaler to cultivate as close business relations with his customers as possible; try to give the best stock and service procurable, and in return the retailer should do his part and show his appreciation of what has been done for him by the wholesaler.

In conclusion, I want to say that my experience in the wholesale business has been recently acquired, and perhaps I will know more and talk less ten years hence. I can speak with some authority from the grower's standpoint as I have had considerable experience in this line, and also a little in the retail line, so that I have had some opportunity to gather ideas from all sides.

New England Dahlia Society.

This society held its annual meeting at Horticultural Hall, Boston, on Wednesday, September 4, when the following officers were elected for the ensuing year: President, H. F. Burt, Taunton; vice-president, Wm. F. Turner, New Bedford; secretary, M. Fuld, Boston; treasurer, N. Allen Lindsay, Marblehead; executive committee: A. E. Johnson, Brockton; Geo. H. Walker, North Dighton; Henry W. Kendall, Newton; H. M. Bates, Brockton; Wilbur D. Moon, Lynn.

The society now has 181 members and after clearing all expenses shows some \$75 in its treasury. J. W. DUNCAN.

LITTLE ROCK, ARK.—A flower show, under the auspices of the florists of the state of Arkansas, will be held here on November 15, 16 and 17.

BOWLING GREEN, OHIO.—Suit has been filed by Norman L. Hanson against the Michigan Seedless Apple Company. The petitioner sets forth in his claim that the property has been grossly neglected and mismanaged by the directors and managers, and asks for the appointment of a receiver.

THE WEEK'S WORK.

Boston Fern and Its Varieties.

At the time of the introduction of *Nephrolepis Piersoni* by F. R. Pierson of Tarrytown it was thought by some persons that the usefulness of the old variety from which it had sprung was past, but as time went on we find that such is not the case, although, perhaps, there are not quite as many old Bostons grown now as there were some years ago; still there are quite a large number grown for purposes for which the newer varieties, no matter how meritorious they are, are totally unsuitable.

There is always a good demand for large well-developed specimens of *Nephrolepis Bostoniensis* in Winter. One point greatly in favor of this fern is its adaptability to the limited confines of a shallow pan, a kind of receptacle much in favor with florists, because of the effect capable of being produced with one or more plants when in such shallow effects, almost impossible under certain conditions and in some locations with plants in large pots.

Now is the time to give all possible attention to such ferns in pots and pans as are intended to be made into large specimens in time for profitable sales during the Winter. Plants growing vigorously and placed close to one another on benches will suffer, more or less, deformity if they are not moved round frequently and given room as their growth demands it. Choice and large specimens will have their appearance made still better if they are raised up by placing them on inverted pots or on pedestals, and a limited number may, to advantage, be strung up or suspended from the rafters. In one respect, at least, ferns are like palms, worth a great deal more money, relatively, as they get into specimen stage, and when once the hang of growing them is got into an almost incredible number can be grown in a limited space in the course of a year.

The newer forms of varieties of *nephrolepis* are in great demand and will continue to be so because of the merits they possess and the various uses to which they can be put. A well-grown plant of the extremely decorative form of *nephrolepis* is almost without limit in usefulness, although, as before stated, it can never take the place of the sweepingly graceful old Boston when a plant is wanted for the production of an effect of which it alone, in ferns, is capable of producing. On the other hand when a choice decorative plant is desired and one that will give assurance of keeping in good shape for an indefinite period, there are few things better than any of the new *nephrolepis*.

All of these newer varieties of *nephrolepis* are, in a certain sense, just as easily grown as the old one, providing their wants are scrupulously attended to, from start to finish, but if they are subjected to prolonged neglect, especially at this time of the year, they will show signs in plenty of reversion, and although the objectionable fronds can be cut out of the plants, it would have been much more satisfactory if the plants had been given the required nourishment when such nourishment would have acted as a sure preventive against reversion, as well as a sure promoter of health and vigor in the plants. There is a great demand for nice thrifty plants of these ferns in six, eight and ten inch pans; larger specimens are, of course, worth much more money, but unless a very good start is already made, these will not be marketable until well on in the Winter. Small plants of any kind are at a decided disadvantage when they are in pots one or more sizes too large. This is especially true of ferns and, for that reason, every effort should be made to get the plants well established in the pans or pots holding them at the time they will be offered for sale.

When to Feed.

In over eagerness for the development of plants we sometimes see men apply liquid manure, when such application works incalculable injury to the plants, intended, in good faith, to be, on the contrary, benefited thereby. Plants newly potted or recently potted, and in such condition that their roots have not yet fully penetrated the soil in the pots, should not be watered with liquid manure of any kind, under the impression that such liquid stimulates the plants or from a like mistaken impression that the liquid thus applied enriches the soil to the extent of ultimately benefiting the

plants. Neither should liquid manure be applied to the general run of plants when they are not in active state of growth; on the other hand, when the general run of plants are in the pots in which they are to remain until disposed of, and when they have completely filled these pots with roots, they will, as a rule, be benefited by judicious applications of liquid manure, but safety almost always demands that clear water be given almost immediately afterwards, to many kinds of plants so treated.

Crotons and dracenas now in the pots in which they are to remain permanently will, as soon as they have become pot-bound, need frequent applications of liquid manure in order to keep in perfect condition, both as regards color and the retaining of every leaf, down to the edge of the pot. There are many kinds of preparations and formulae used in the making up of liquid manure, but I am thoroughly convinced, after a fair trial in the course of years of experience of the most of them, that nothing is safer and few things as effective as cow manure; there may be some things more stimulating and capable of producing more rapid growth, but for lasting benefit, there is nothing that beats the easily obtainable cow manure for the feeding of plants.

Geraniums.

From now on there can be no excuse or necessity for deferring the rapid pushing of the work of propagating geraniums. There are many varieties of geraniums grown and we sometimes notice that small growers have in stock a great number of varieties, a number greater, in fact, than good business methods would seem to warrant them in growing. This is said because it has been also noticed that the growers of numerous varieties have often, at the end of the season, a great number left on their hands. It is not hard to ascertain the kinds that will, in all probability, sell the best next year. If it has been closely observed, one way or the other, which varieties sold best this year, then it goes without saying, that it will be better to grow in large quantities the kinds that will, in all probability, find a ready market when the time comes for turning the product of many weeks of hard labor into hard cash. To some growers the method of putting the cuttings into flats may appeal, for various reasons. When the cuttings are put in flats they may be allowed to remain without being shifted into pots for an indefinite period, if there is no available space for their reception when potted.

A good compost for geranium cuttings when placed in flats to root is made of equal parts of loam, leaf mold and sand. If the leaf mold and loam are very coarse and lumpy, they may be put through a coarse screen and the screenings used for the bottom or drainage material for the boxes. These should then be filled firmly to within about two inches of the top with the compost, surfacing this with an inch of sand. From 50 to 100 cuttings may be put into a flat, depending upon the size of the flat and the length of time during which the cuttings are likely to remain in them after rooting.

For a little while yet it will be just as well if the geranium cuttings, if in flats, are allowed to remain outdoors, and after a few days in as bright and sunny a situation as is possible to afford them; then by and by if it becomes apparent that they are likely to suffer through cold or damp, they may be placed in cold frames, there to remain until danger of frost demands their immediate removal to safe quarters. In case it may not be thought of at the time when most needed I will state my experience with several thousand geranium cuttings with which I had the mishap early last Winter of getting slightly frozen in a cool house. Having noticed what happened early in the morning after the night in which Jack got his work in, I immediately watered the cuttings thoroughly with very cold water and as soon as this was accomplished I had them covered and kept them covered until next day with the result that I only lost about one per cent. of the plants by the mishap.

Alternantheras.

There are as many methods in vogue for the propagation of alternantheras

as geraniums. Cuttings of alternanthera may be put in now and then put into the flats when rooted, and thus kept until the time arrives for multiplying in early or late Spring. The most satisfactory all-round method, however, especially when large quantities are needed, is to take up as many of the old plants as seem reasonable and place these as close together in flats as they can be put, at the same time packing the soil firmly around the plants; then when the flats are filled with the plants take a pair of hedge shears and shear them down to within half an inch of the surface of the soil in the flats. Give a good watering, put them on a shelf or bench in a sunny part of the greenhouse and let them remain there until they are wanted for propagating. Some growers take in far too many stock plants of alternanthera and of many other things, all of which are only an incumbrance for a part of the Winter. A year ago I fixed up just 600 alternantheras in two varieties and kept that number all Winter. I began propagating from these on the 25th of January. On May 15 I had thirty-eight thousand in flats from the six hundred wintered over and had the demand been greater I could easily have still further increased the production.

Heliotropes.

In case the precaution was not taken of keeping a number of heliotrope plants in pots for stock, no time should be lost in bringing the needed number indoors and potting them. Heliotrope does not lift well out of the open ground, and for that reason it may be well to cut the plants back when potting, and also shade them for a day or two.

Begonias.

If begonias intended for stock by the seed produced by them have been grown close to other and undesirable kinds it will be well to take in a number of plants and propagate from cuttings. Seeds of desirable begonias should be saved from plants grown by themselves. In any case it is very important that great care be exercised so that true stock will result from whatever method is employed in the raising of begonias. There are some dealers reasonably reliable to furnish seed that will give plants of the expected color and type, and there are again instances when growers, depending on seed purchased, had the disappointing experience, when it was too late to remedy it, of having a lot of mixed rubbish instead of a few thousand stocky plants of Begonia Vernon.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

THE PREPARATION OF ASPARAGUS GROWTHS AND FERN FRONDS.—When these are matured they should be removed from the plants, and immersed in a vessel containing glycerine to which two parts water are added, and allowed to remain for a time. They are then taken out and the fluid allowed to drop from them and dried in the air. The process preserves the natural color and allows the fronds and shoots to be kept in a useful state for months, even for a year. It is, however, essential that they be laid between tissue paper and kept in a close box or drawer in order to preserve them from insects and dust.—Horticultural Trade Journal, Eng.

A DECORATED MOTOR CAR COMPETITION.—At a recent "Battle of Flowers," held in Guernsey, Channel Islands, prizes were offered for the best decorated motor cars. The following description of the first prize winner will, we think, prove of interest to our retail readers:

"Capt. Campbell, who is the son of the Governor, as well as his aide-de-camp, secured first prize and the Prix d'Honneur. He showed a scheme of decoration in red and white, which certainly ranks among the best

Fred. C. Bauer and His Seedling Lily.

(*L. giganteum* × *L. multiflorum*.)

Forty-two Blooms on Two Stems.

ever seen either in Guernsey or Jersey. The body of the car and the wide mud guards presented a smooth surface of Achillea grandiflora, delicately panelled with light lines of red carnations. The decoration of the front mud guards was set off with Asparagus Sprengeri, gypsophila being used in the case of the rear mud guards. The wheels were filled with masses of marguerites, and in the front of the car was a crown design, surmounted by a mass of beautiful carnations, and Lilium candidum. Over the car was a light canopy of A. Sprengeri and smilax, with a strongly marked border design in red carnations. At each corner was a spherical mass of white blooms, and in the front was a heart design in carnations, surmounted by a white crown and a small gilt eagle. On the top of the canopy was an immense eagle with outspread wings, apparently taking flight from a pedestal of red carnations. The eagle was beautifully constructed with white flowers, and a red carnation was held in the beak. The car was decorated by the house party at Saumarez Park. The carnations used were supplied by Messrs. Bell and Sheldon and Messrs. Morris and Co., and the cluster of flowers on the bonnet of the car was supplied by Mrs. Allen, French Hall.

An August Wedding.

While August is a month that is usually quite prolific in decorations at the Summer resorts, weddings of the kind that call for elaborate decoration are particularly scarce during this month. But a large "out of town wedding," that took place this week, will give an idea of what can be accomplished with the present supply of cut flowers and foliage. The principal feature of the decoration was the large reception hall. This was temporarily converted into a chapel. At one end of the hall, under a balcony that was reached by a flight of stairs an altar was erected. This consisted of a wire frame made in sections, so that it could be packed flat. These sections were wired together, the top section locking the lower portions securely, making the whole arrangement perfectly firm. A flight of steps, two in number, surrounded this frame on three sides, each step being six inches high and eighteen inches wide. This was painted white and covered with fine silver sand giving the effect of stone. The wire frame was completely covered by hanging strings of smilax closely together, the smilax being tied into place, so as to obtain sharp outlines. The frontal cloth was a work of art, being a relief from an old French monastery. A brass cross stood in the usual place. Candelabra, and brass vases filled with lilies completed this part of the arrangement. A Gothic arch of lilies was placed at the back of the altar, which reached to the top of the rail around the balcony. The stairway to the right was covered with branches of pin oak and filled in with more Easter lilies. The four fluted wooden columns, which were most happily placed, added greatly to the chancel-like effect. There were two on either side of the altar. They were wound with wire and the spaces left by the grooves of the fluting made most convenient places for filling in with small branches of oak with which the pillars were completely covered. Metal cornucopias were inserted at short intervals, these being filled with a splendid variety of pink phlox, making a beautiful foreground for the altar which was all done in white. The remaining portion of the ceiling was completely covered with branches of pin oak with numbers of miniature lights showing through here and there. The large open fireplace was banked with Nephrolepis Bostoniensis with large clusters of Hydrangea paniculata. Adiantum Farleyense was used on the mantle above. This was banked high at either end and allowed to slope gradually toward the center, which was occupied by a large silver vase filled with Lilium speciosum album. Palms were banked in the corners, the groups being relieved with Gladiolus America and white phlox. Palms were also placed in convenient places in the reception rooms.

American Beauty roses were used in the library, the mantels and fireplace being banked with them. The piazza, which extended around three sides of the house, was partly enclosed with oak boughs. The large stone columns were completely covered with Hydrangea paniculata. Japanese lanterns in all sizes and patterns were festooned around the piazza and over the lawns.

The floral arrangements for the bridal table were done with lily of the valley and Adiantum Farleyense. A large centerpiece of lily of the valley occupied the center of the table, while smaller pieces composed of A. Farleyense were placed at either end with a large bow knot of lily of the valley filling in the intervening space. The chandelier, which hung immediately above the center of the table, was partially hidden with light garlands made of lily of the valley and Adiantum cuneatum. The guests' tables, for ten people, were done with Killarney roses. These were arranged in vases in bouquet form with flowers of Lilium speciosum roseum laid on the cloth.

The bride carried an Empire bouquet of white orchids, consisting of Dendrobium formosum, Phalaenopsis amabilis and A. Farleyense; a shower effect was obtained with long sprays of P. amabilis. The six bridesmaids carried sheaves of Oncidium varicosum Rogersii tied with pale yellow ribbon.

D. RAYBUN.

Fred C. Bauer and His Seedling Lily.

The accompanying illustration shows the president of the Baltimore (Md.) Gardeners' Club, Fred. C. Bauer, and flowers of his seedling lily (*L. giganteum* × *L. multiflorum*.) The bulb producing the blooms pictured measured 18 inches in circumference and the plant bore 42 flowers on two stalks. Last year the same plant produced 14 flowers.

GEO. J. HUGHES, Berlin, N. J.

Indianapolis.

News Notes.

The Indiana State Fair beginning September 9 holds forth liberal inducements for florists, but up to date there have been few entries.

The Labor Day demonstration enabled the retailers to display some of their abilities in decorating the several floats.

Mr. and Mrs. A. Pahnd state that their convention trip surpassed the one enjoyed by them in France, also that there is no bathing resort to be found in Europe that approaches Atlantic City.

Bertermann Bros. Company are improving their store front.

Tomlinson Hall Market does not present its usual animated scene.

Words inadequately expressed to the "home folks" the hospitality and pleasures received at the hands of the Quaker City Florists' Club.

Walter Bertermann and Geo. Wiegand are spending their vacations in the East. I. B.

New Bedford, Mass.

State of Trade.

Trade is about as usual, with a good demand for funeral work; stock is quite plentiful; good asters are now coming in and sell at from 35 cts. to 50 cts. per dozen retail; sweet peas are still in bloom, though this has been a very hard season on them on account of the dry weather prevailing all through the Summer months. Roses are very poor yet; some of the growers have strated up the old plants again for their Winter's work. Young stock outdoors, violets and carnations, are looking fairly well considering the dry weather all season.

George N. Borden has returned from his vacation at Lake Winnipiskankee, N. H.

One grower is already starting the season by advertising carnations at 20c. per dozen retail, a good start off, surely.

The carnival or Old Home Week Flower Show, was a grand success in every way; admission was free all three days, Aug. 27 to 29. There were cups and prizes offered for both professional and amateur growers of dahlias, etc.

It is estimated that fully 5,000 people visited the show each day. The judges were James Farquhar and William C. Winter.

Nearly all the florists have housed their carnation plants, and while the stock is rather small it looks good and healthy. Winsor carnation is a picked winner for the coming Winter, its color easily sells it at sight; Peter Murray, the originator, will have a large stock to propagate from; his new houses are all ready for this grand prize winner. E. Y. Pierce, on Cottage street, reports trade as excellent; in fact this has been a good Summer with him; he has just finished his new boiler pit of concrete, all of best Portland cement. HORTICO.

VIOLETS

Strong, healthy, field-grown plants of Farquhar and Lady Campbell.

\$5.00 per 100; \$45.00 per 1000.

JACOB KOL, East Nutley, N. J.

The Gladiolus for the People.

Extracts from a paper read before the Wisconsin State Horticultural Society, August 28, by Matthew Crawford.

The gladiolus is a native of South Africa, western Asia and southern Europe. It is at home in all parts of the United States and is here to stay. It is indispensable wherever known. It is easily grown, succeeds on any soil and is not liable to the attacks of insect pests or fungous diseases. It may be planted from early Spring until July, and may be had in bloom in this climate from the middle of July until freezing weather. As far south as the Ohio River it may be planted ten inches deep and left in the bed for years, until it gets too close to the surface. Every year the new bulb forms on top of the old one, so it rises about an inch annually. If a late frost cuts the young sprout to the ground it continues to grow just the same, and is not discouraged by being cut back repeatedly. If the bulb is planted wrong side up it grows about as well; and if it has to stand in water for days, or endure drouth for months, it will make the best of its opportunities, giving an abundance of bloom. When the first few flowers open, the spike may be cut and kept in the house as well as on the plant, giving constant bloom for one or two weeks, according as the weather is warm or cool. As a flower to ship, it is unequalled as far as I know. We have sent it from Ohio to Montana in good condition. Many tons are shipped to the cities in the Summer and Fall where they are purchased by rich and poor and used for all purposes.

A word in regard to their culture. The bulbs must not freeze at any time. They may be planted early in the Spring and covered six inches. This will prevent their blowing over when in bloom. While growing the gladiolus needs the same care that other crops do. It is not well to plow under rank manure, but it may be put on the surface after planting. Other things being equal, a bulb is valuable in proportion to its vertical diameter. A bulb which has not bloomed is roundish or conical, but a thin, watch-shaped bulb has bloomed and possibly ripened seed. A conical bulb three-fourths of an inch in diameter will produce as fine a spike as a larger one and will cost much less.

Cutting off the spike when the first flower opens, without cutting the foliage, relieves the drain on the bulb and allows it to grow larger and thicker. Take up the bulb in the Fall, cut or break off the tops and spread where they will dry without freezing. Then they may be put in the cellar, not over four inches deep, in boxes, crates or baskets. After two or three weeks they may be cleaned, the roots and the old bulbs removed. It is not best to keep them too near the furnace. The bulbs may be saved and sown in the Spring, like peas, if one wishes to increase his stock rapidly.

We cannot determine the value of a gladiolus by weight, measure or chemical analysis. When it appeals to our taste we call it beautiful and admire it, although sometimes we can hardly tell why. However, there are certain characteristics that are generally conceded to be desirable, among which the following: Healthy, vigorous growth, with tough foliage not easily broken by the wind. The leaves should be ample so as to build up a large bulb, and if they grow upright, without drooping, so much the better. The spike should be tall and straight, with ample capacity to take up water to sustain a good number of open flowers. The flowers should face one way, and be so arranged on the spike as to make a broad and compact appearance without crowding. The size is not so important, but most people prefer good sized flowers. It is very desirable that the petals be thick so as not to wilt easily.

Color is of great importance. If that be unsatisfactory, all other good points that it may possess go for nothing. Whether light or dark, let it be clear and pure, not muddy nor faded looking.

FIRMS WHO ARE BUILDING.

NORRIS, PA.—Foulds & Brother have just completed a new greenhouse.

HOLLAND, MICH.—Wm. Harkema will build a new greenhouse 50x100 feet, of modern construction.

NOVELTIES FOR 1908

HARVARD: Glowing crimson (the real Harvard color). This variety will take the place of all other crimsons as it is very free and the blooms are of the finest as to size and quality. It is a very rapid grower and the habit is ideal.

FAUST: A brilliant scarlet. This variety will replace all of the commercial varieties of this color owing to its extreme productiveness, many plants last December having 20 buds and blooms to the plant. A fine one for the Xmas trade.

REMEMBER WE GUARANTEE SATISFACTION.

Bulbs, Corms and Tubers.

Paper read before the Wisconsin State Horticultural Society, August 28, 1907, by E. G. Arzberger.

It has been the poet's privilege to give expression to his fancies in regard to the beautiful and charming structure which issues forth from bulb, corm and even from such an odd-looking form as the tuber. He has painted for us the inflorescences in beautiful smiles and metaphors; he has crowned them with the best of praises to express his deep-felt sentiments. Yet little do those parts which possess the vital elements, the wonderful life processes, which produce all the harmony and beauty which he sees and feels, seem to attract his attention. He probably considers this too crude and inartistic, and has left it for others to describe in a more humble language. This is the theme assigned to me and I shall describe, in a simple way, the structure and function of the bulb, corm and the tuber.

These plant structures must not be confused with the root or any of its modified forms, as the tubercles; for the morphology and functions are utterly different from what is found in the root. In the plant there are usually two distinct parts, which can readily be noted, viz., the root and shoot, the latter being made up of the stem and foliage system, each of which may be highly differentiated. These three parts are distinctly shown in an ordinary living tree, where the three parts, roots, stem and branches with leaves are quite apparent. In the bulb, corm and tuber, there are present these structures in some form or other, although they are not so large and distinct.

The bulb is considered as an erect underground shoot, or sometimes called a leaf bud, the short stem of which is covered with relatively long and close packed scale leaves. The internodes are hardly developed. The scale leaves arising from the stem are usually thickened, and form the conspicuous part of the bulb and usually enclosing the stem. In the vigorously growing bulb the roots originate from the lower part of the stem.

Bulbs are usually spoken of as scaly bulbs, and coated or tunicated. The scaly bulbs are those in which the leaf bases are very narrow and elongated, lying adjacent to one another like the shingles on a roof, e. g., *L. Martagon* and *album*. The tunicated or coated bulbs have scale leaves, the bases of which are large, broad and concave, and are so arranged on the bulb that the inner ones are entirely covered by the outer ones, for example, as in the tulip, onion and hyacinth. The structure of a bulb can easily be made out in any one of these. When such a bulb is cut down through the middle, it is seen to be made up chiefly of swollen bases of last year's leaves. Inside there are young leaves and the delicate flower bud, which will expend with its flowers the next season. On the outside there are a few thin scale leaves. All these leaves originate from the fleshy stem at the base, known as the "button," which gives off the roots from the lower part. The scale leaves vary in number. In *Gagea* there is but one scale leaf covering the bud partially; in the tulip and fritillaria it varies from two to five, while in the lilies and hyacinths there may be a great many. When fresh, the scale leaves of the tunicated bulb are quite thick, but when old and dry they become thin and papery and peel off quite easily. Again, in some form the scale leaves are united, as e. g., in *Fritillaria imperialis*.

The function of the scale leaves on bulbs, and also on corms is chiefly as storage organs. The young shoot, the base of which they cover, where it begins to develop, withdraws food material from the scales until the large foliage leaves emerge from the ground and are able to manufacture new organic material to be used as food, which is usually in the form of starch or glucose.

Bulbs are protected from drying up by the soil surrounding them, but it is also very essential that they be protected from the attacks of insects and various other enemies. In addition to the poisonous substances for keeping

off their attacks, further protection is offered by the exhausted and dead scale leaves, which do not disintegrate completely, but remain as a protective covering. At times they form a rigid parchment-like infestation or thick reticular and latticed strands remain as a sort of a mask within which the tender bulb is enclosed and protected. Examples of this may be seen in the crocus, gladiolus, wild onion, leek and the tulip. In the axil of the fleshy scales young shoots appear as buds which ultimately form the new bulb for the next year. These later buds often remain attached to the stem and produce flowering shoots, so that it would appear that the same bulb continues to flower for many years, e. g., in the hyacinth and tulip. Again, in others, the young bulb is detached, forming a separate plant.

Midway between the bulb and the tuber is a structure known as the corm, or solid bulb; common examples of this are the crocus, gladiolus and Indian turnip. It is often mistaken for a bulb, but usually, because of its shape rather than structure. This is likewise a solid, fleshy, underground stem, being related to both bulb and tuber. It is related to the bulb because of its short, compact, fleshy stem, which is surrounded by a few thin scale leaves. In some forms these are entirely absent. From the fact that it is very short and fleshy, usually more or less rounded or depressed at the bottom, it is related to the tuber. Sometimes the name root-bulb is applied to it. It is in the fleshy rounded stem where a great deal of the surplus food is stored. The plant possessing such a structure is thus able to flower very early without waiting for foliage leaves to supply the food, or late in the season, when it needs to depend but little on the activity of the foliage leaves, for example, the crocus and gladiolus.

The corm usually bears one or more buds, the entire structure being surrounded by a tough tunic of scales. When the corm begins to grow, roots are sent forth from the lower end of the stem, the leaves and flowers of the buds expand, and the entire inflorescence appears in view. Long after flowering the foliage leaves continue their work, preparing food which is sent down to accumulate in the new bud and stem which becomes swollen, forming a new corm for the next year's flower. When this is done, the leaves die down and their bases become the protecting scale for the new corm. The corm, like the bulb, is only of one year's duration, sending off buds annually in the form of young corms. In the Fall, or after the foliage begins to die down, the young corm gives rise to leaves, the lower of which form the ordinary protecting scales around the corm and flower stalk, while the upper leaves remain small. In the axil of these uppermost leaves the flowering stem develops and produces the flowers the following year. Meanwhile, in the axil of the middle leaves on the corm, a bud, a new corm, is formed which enlarges at the expense of the parent, and thus the cycle of life goes on. All these structures are prepared long beforehand in a reduced form ready for the appropriate time to come when it may issue forth in all its glory as the "harbinger of Spring."

Probably the structure that is most frequently mistaken for a root is the tuber, of which the potato is the most typical and familiar specimen. The number of plants which produce and are produced by these structures, however, is not so great as that of the other two types. The tuber, again, is a form of an underground stem or shoot, which has become much thickened, forming a spherical or ovoid structure filled with food material that has been manufactured by the leaves in excess of its immediate requirements. The true nature of the tuber is revealed by its buds or "eyes," as we commonly call them, which indicate the nodes that have been much pushed together, and the internodes which have become much swollen. This morphological nature is clearly shown by uncovering the underground shoot of the potato plant and it will develop into ordinary foliage shoots. And if the development of tubers is prevented by cutting them off, or other means, the buds in the axils of

leaves above ground will develop tubers, thus showing clearly that the tuber is a stem morphologically. The buds are spirally arranged, similar to the arrangement of buds on stems on other plants. This may easily be shown by inserting pins into the eyes and connecting them by a string. The eyes which we find on the outside of the tuber are actually axillary buds, from which the subsequent year's growth will be produced. The scale leaves, so prominent in the bulb, which represent the subtending leaf of the bud, are so very small that they can only be distinguished on very young tubers. In older tubers they are almost insignificant, appearing as mere ridges, scarcely discernible externally. The scale leaves are placed so far apart that a big clear space is left between them, and they are never placed so close together so that they envelop one another as they do in the bulb.

Another difference between the bud and the tuber can be noted in that the scale leaves are the structures wherein food is stored, and at the same time serving as a protector for the young bud; whereas in the tuber the food is stored in the distorted stem and the scale leaf has become rudimentary, having hardly any function at all. Another difference may be noted in that a majority of cases the young bulb arises in the axils of the scales and develop subsequently into new bulbs which are not removed from the position held by the parent. It is evidently an advantageous arrangement when tubers from which new plants arise, are formed at the end of long shoots, since the new structures, thus developed, are far from the parent plant where the soil has not been exhausted of its nourishment. Most tubers, however, are very perishable structures. All those which appear as local thickenings of an underground shoot, as the potato, grow very rapidly, and then have a resting period of

about a half a year. They perish completely after having developed shoots which unfold their green foliage above ground. Generally tubers are found underground, but infrequently they are found above the soil in the axils of foliage leaves, e. g., in *Lesser Celandine* (*Ranunculus Ficaria*) where these tubers arise in leaf axils. Later they become detached, as the plant withers, and in places where they are produced in great quantities, they have given rise to a myth known as "potato rain."

Thus in these forms the bulb, corm and tuber, there are presented many homologous structures, some quite similar in structure and function. All forms are underground stems or shoots, possessing the power to store food material, either as starch or glucose, to be used by the young plant in a future time.

The significance of bulbs and tubers in the life history of plants producing them, is to develop new vegetative and floral structures with great rapidity. For example, a new plant completely equipped for work may be obtained in a very much shorter time than from seed. Such a habit, if it may be so called, enables these plants to take advantage of short seasons and still accomplish their life purpose. These plants have two distinct life aspects corresponding to a greater and lesser physiological activity, or a period of rest and one of great activity. One is exemplified in the bulb, corm or tuber, the other in bright, fresh green foliage crowned with a flower, displaying its beautiful colors. Nature has thus wisely made ample provision so that many of her floral as well as vegetative decorations of woodland, field and garden may outlive the many adverse conditions that might befall plant life, so that we may enjoy them early in Spring, late in Autumn, and at all times during the Summer.

EXHIBITION

STATIONERY.

1000 Entry Forms, -	\$2.75
Two Exhibitors' Books, -	2.00
Two Class Books, -	2.50
Six Judges' Books, -	3.00
500 Entry Cards, -	3.50
500 Prize Pastors (assorted),	1.00

Total, - - \$14.75

The above will outfit all exhibitions, save the very largest.

We have devised, for the use of Managers and Secretaries of Exhibitions, a set of Account Books, covering in detail the orderly and systematic arrangement of every item in book-keeping, from the time the Entry Forms are given out to the payment of prizes and closing up of accounts, and this system is so concise and complete that prize-winners can be paid off without confusion immediately after Judges' decisions have been rendered.

This System, once tried, is ever a favorite; it can be truthfully called the greatest Labor Saver ever placed within the reach of Exhibition Managers.

Descriptive Circulars and samples of books will be mailed promptly on application to

New Orleans, La.
News Notes.

Paul Deswert has been appointed gardener at the Charity Hospital. These grounds are rather large and well kept, having a nice greenhouse. C. R. Panter was awarded the contract for laying out the grounds surrounding the Carnegie Library at Algiers.

Otto Abel, after being confined to his bed for over two months, is at last able to sit up.

Jacob Thomas returned during the past week from Germany and says he enjoyed himself immensely while in the Fatherland.

One of the specialties of several florists in New Orleans is the raising of small rubber plants for shipping. These are propagated by layering and, owing to our long Summers, they are able to take off several successive batches. Among those who go in for rubber plants rather extensively are Jas. A. Newsham, the Metairie Ridge Nursery Company, Abele Brothers and M. Cook's Sons.

The wife of Robert Newsham died during the past week after a long and painful illness. The deceased was a native of Lancashire, England. The sympathy of the trade is extended to the bereaved husband and son.

Boston

Gardeners and Florists' Club Outing.

The Gardeners and Florists' Club held a very enjoyable and instructive outing on Saturday afternoon at the Bay State Nurseries at North Abington. The party, which numbered about seventy, left Boston on the 12:43 train and were met on arrival at North Abington by Mr. Wyman, owner of the nurseries, and his manager, Mr. Bennett. The party were first entertained to a sumptuous luncheon and then carriages were taken and the different sections of the nurseries visited; the party going on foot when something of especial interest was to be seen.

These nurseries, which were started only a few years ago, are a great credit to the owner. Altogether there are several hundred acres of land but at the present time about 100 acres are planted to stock. The collection of trees and shrubs is very fine, containing many fine conifers, as well as deciduous plants. A noticeable feature of the whole establishment is the cleanliness of everything, in fact, scarcely a weed could be seen anywhere. One section of the nurseries was devoted to herbaceous plants and contained a very fine collection, especially of phloxes, some of the newer varieties of which were very fine indeed.

A feature of the establishment was the office building and packing rooms which Mr. Wyman has recently had built and which are so arranged as to facilitate the handling of large quantities of goods during the busy season.

The next outing of the club will be at the dahlia farm of W. W. Rawson & Co. at Marblehead on September 21 when they will examine the large quantity of these flowers which are being grown there.

News Notes.

Thos. F. Galvin, Jr., surprised his friends last week by taking an auto trip to Narragansett and returning with a bride in the person of Miss Mary Francis Cleecag of Cincinnati.

The sale of stalls of the Boston Co-operative Flower Market last week proved very satisfactory to that corporation. Several hundred dollars were realized over last year's figure, the highest figure for first choice being \$102.50.

on. The houses operated at present are on leased land and will be moved within another season. The contract has already been let for part of the improvements on the new place, which consist, so far, in a range of six houses 45x300 feet, as well as a 65-foot smoke stack and boiler room and a 1,000-barrel cistern. The entire construction of the greenhouses and other buildings will be of concrete as far as it is possible to use this now all desirable material. One of the specialties of this company is poinsettias. These are grown in large quantities and shipped to the trade all over the country. Three houses are devoted to stock plants. These are planted closely on benches and a large crop of cuttings can be had every ten days or more. These root freely and at this season in a few weeks make salable plants from 2 1/2 in. pots. At present this small stock is in great demand, but about 35,000 are to be potted up to make 4 in. plants for Fall and Winter delivery. There is no part of the poinsettia that goes to waste. The old stock plants are later replanted, giving more room and make fine bracts for Christmas cutting. A temperature of about 65 degrees at night, with a proportionate rise during the day and frequent syringings to hold the mealy bug in check, are about the simplest as well as the salient points of poinsettia growing.

The Erie Floral Co., which is the property of Wm. F. Kasting of Buffalo, is located close to the present stand of the Baur Floral Co. This is well conducted by H. J. Wise, manager for Mr. Kasting. Much of interest to the grower, whether retailer or wholesale, could be found here. The concrete bench system could be seen here as its best; while there are many concrete benches now, in the way of construction this one for neatness and durability, seems to be the most desirable.

T. V. Laver is also one of Erie's most progressive florists. His greenhouses are on Sixth street. Some extension and general improvements are in progress.

The Massassagua Gardens, the residence of the Strong family, where all the delicacies in the way of tropical fruits were grown under glass, is now conducted on a commercial basis by Wm. Honeysett. The graperies are still carried on and fruit shipped to the New York market.

There are several other florists in Erie that your correspondent failed to see, but all are in a prosperous condition and the general report is that the outlook is all that could be desired.
J. M.

Coming Exhibitions.

SEPTEMBER 17-19, 1907.—Newport (R. I.) Horticultural Society, Autumn Exhibition, in Masonic Hall. Secretary, David McIntosh, Lodge road.

NOVEMBER 6, 7 and 8, 1907.—Dennison (Tex.) Civic Improvement League, Annual Flower Show. Secretary, T. W. Larkin.

NOVEMBER 6, 7, and 8, 1907.—New Haven (Conn.) County Horticultural Society, Seventh Annual Exhibition, in Music Hall. Secretary, Walter Koella, 58 Bishop street, New Haven, Conn.

NOVEMBER 6, 7 and 8, 1907.—Tarrytown (N. Y.) Horticultural Society, Ninth Annual Exhibition, in Music Hall. Secretary, E. W. Neubrand, Tarrytown, N. Y.

FIRES.

MASON CITY, IA.—The Perth Floral Company suffered a \$3,000 loss by fire on Saturday, August 24. The origin of the fire is unknown.

GREEN BAY, WIS.—Louis Otto has purchased the Reinecke greenhouses and will move them to his establishment at Neenah, Wis.

MUSKOGON HEIGHTS, MICH.—C. B. Dawes is building an addition to his greenhouses.

DES MOINES, IA.—The Grand View Nursery and Orchard Co. will erect a large brick store house this fall at East Ninth street and Hull avenue.

E. H. HUNT
The Old Reliable
FOR
CUT FLOWERS AND SUPPLIES
76-78 Wabash Avenue, CHICAGO.

Erie, Pa.

The Schluraff Floral Co. has recently purchased a very desirable tract of land on the lake shore, on which they are busy erecting a range of greenhouses for wholesale trade only. The location is on the car line that runs to one of Erie's most fashionable Summer resorts. The indications are that the selection of the site and the prospects for future business is all that could be desired. Only a part of the intended glass area will be completed this season. As much of the construction work as is possible will be made out of concrete.

Messrs. Offerle & Schaal, who have purchased the old Schluraff stand, are busy remodeling it. A large fifty horsepower boiler was being installed, two new greenhouses are well under way, besides a general system of improvements on barns, greenhouses and residence. Carnations will be chiefly grown and the stock in the field for this purpose is ample for the requirements of this new firm.

The Baur Floral Co. are at present arranging for some substantial improvements. There is to be an entire change in the plant. A desirable piece of property, within three blocks of the center of the city, has been purchased and a range of greenhouses of modern construction will be erected there-

Cultural Directions

Are leaflets written by practical men especially for the use of amateur customers. If you have a counter trade, either in plants, seeds, flowers or bulbs, you should have a supply of these leaflets on hand to present to your customers when they seek cultural information about their purchases. (The leaflets embrace over forty subjects.) We can supply them at \$2.50 per 1000, or 500 for \$1.50, and can make a reduction of those prices on large quantities. At a small extra cost we can put your imprint on each leaflet. Try a thousand and see what a help they are in selling goods. The following "Culturals" are particularly seasonable for your customers at the present time: Chrysanthemums, Dahlias, Hyacinths, Lawns, Lily Culture, Tulips, Freesia, Vegetables.

THE FLORISTS' EXCHANGE

P. O. Box, 1697 NEW YORK

New Hampshire Notes.

SOMERSWORTH.—What bustling will do has been fully illustrated by G. S. Ramsburg of this place. He came here from Woodstock, Va., in September 1906, buying a small farm of thirteen acres with house and barn. Since that time he has erected two greenhouses, each about 100x30 feet and one, including an office, about 75x20 feet. Mr. Ramsburg brought with him from Virginia his wife and five children. His house proving too small he has had plans prepared for a new dwelling to be erected in the near future. His first greenhouse was devoted to cucumbers and was later filled with chrysanthemums. He will grow general stock, but will be forced to buy many cut flowers for his rapidly growing trade in funeral work. His outside display of asters and other plants is one of the finest in the county. Associated with him is Wm. Davie, formerly with W. H. Elliott at Madbury.

LACONIA.—A. W. Putnam has left the dry goods business with which he has been connected for many years and will take his florist business into his own hands. Mr. Putnam will make no great changes this Fall, but has in mind the erection of another greenhouse a little later. He is ably assisted in his making up by Mrs. Putnam.

S. J. Purzin has bought the old greenhouses from Mrs. Dow, and will endeavor later to rebuild them at his own residence.

Mrs. Dow, although without greenhouses and store will continue to make up funeral pieces on a small scale at her home.

FRANKLIN FALLS.—The Franklin Floral Company G. H. Bartlett, manager, has just completed a new rose house, 40x30 feet.

Washington, D. C.

Typical September weather prevails with warm days and cool nights. Within a fortnight the public schools of the District will reopen and many of the out of town people will return from their Summer vacations. This will act as a stimulus to business, but, as a rule, the more wealthy class will not return until later.

Judge O'Neil, who for years has been one of the most popular justices of the peace, died during the week and was buried on Sunday; this, in connection with the demise of several other important personages, caused a good demand for funeral work of the better class.

Gladioli and asters of good quality are abundant, but do not meet with very ready sale.

J. H. Small & Sons are showing a window of excellent fancy leaved caladiums.

Mr. Clarke, of Henry A. Dreer, Inc., was in the city during the week on business for the firm.

Secretary Wilson of the Department of Agriculture is scheduled to deliver an address before a number of scientists who are to meet in this city in the near future.

O. A. C. Oehmler has just returned from his vacation at Colonial Beach, Va.

OXFORD, PA.—J. H. A. Hutchison, Locust street greenhouses, is busily engaged in his carnation field removing to his houses, including the large new one, about 30,000 carnation plants of the best varieties. They have made fine growth and are in good condition. In connection with this his crop of vegetables is fine—tomatoes in large quantity, corn, potatoes, sweet potatoes, onions, beets, cabbage, cauliflower, sunflower (for chicken feed), etc. Mr. Hutchison is up with his crops through energetic methods, notwithstanding the knock-back he received by his fall on ice last Winter.

PHILADELPHIA, PA.

QUESTION BOX

(23) **Trouble with Roses.**—Would you kindly inform me through your valuable paper what you think is the matter with the rose plants of which I sent you a sample? Also do you think that grafted tea roses (Bride and Bridesmaid), forced for two seasons, will be any good for a third season, if they are rested for two or three months?
H. G. Connecticut.

—The rose sent for examination seems very much as though it had been attacked by eel worm, although we could not find any nodules on the roots of the plant that was sent. The only remedy we can suggest is to give the surface of the bed a good dressing of fresh slacked lime; this might have a tendency to check the trouble.

In regard to carrying over the grafted tea roses for a third season, this may be done, though it would not do to let them have a rest of two or three months; that would be too long, and the plants would be injured if kept dry that length of time. We would simply dry the plants down gradually, at no time letting the bench get dust dry, and as soon as all growth had ceased and the leaves began to fall, we would cut the plants back slightly, cleaning off as much of the top soil as could be done without injuring the roots; then we would apply a two or three inch covering of new soil and well decomposed manure in equal proportions, and start the plants growing again.

(24) **Clematis.**—Why is it so difficult to establish the larger flowering clematis outdoors from plants?
Pa. Penn.

—If two or three year old plants of clematis are purchased and planted in well prepared soil; never allowed to become too dry and given a mulch for protection through the Winter time, there should be no difficulty experienced in establishing clematis of the larger flowering varieties.

(25) **Winter Salads.**—A large hotel wants me to furnish them this Winter with parsley, chives, mint and chervil. Parsley I intend to plant next month in a solid bed, using roots taken out of the garden; the chives will be old clumps, planted after exposure to frost; the mint will also be old clumps, planted in the house in September or October; I propose to make sowings of the chervil in succession of two weeks. Will the cold end of a carnation house do?
Connecticut. Mint.

—The method of growing the various salads mentioned is all right, excepting that we would not try to grow them where the temperature went below 50 degrees at night; in fact, the chives will be better if they are kept above 55 degrees. The rest of the salads will do well enough in a temperature of 50 degrees at night with a corresponding raise during the daytime.

(26) **Clunie Rose?**—Is there a variety of rose called the Clunie? We would be pleased if you could give us any information on the subject through the medium of your valuable paper. We believe it is a Scotch rose, but know nothing further.
New York. T. M.

—We do not know of any rose called Clunie. Perhaps this name has been confounded with the rose Clio, a rose of the hybrid perpetual class.

New York.

The Week's News.

Last Monday was Labor Day, and so far as the florist business was concerned, it was similar to any ordinary Sunday—very little doing and most of the stores closed at noon-time.

The New York Florists' Club will resume its monthly meetings on Monday evening next, September 9, in their new meeting rooms, 164 East Thirty-fourth street, the Murray Lyceum building. It is expected that this will be a most interesting meeting. Mr. Traendly, the newly elected president of the S. A. F., will be present, and together with many others who attended the recent convention, will give a short talk on their recent visit to Philadelphia. Owing to so much convention matter that will come up before the meeting, there will be no essay given, the one on "Water Lilies," by G. V. Nash, having been postponed until the October meeting. Secretary John Young requests that those having anything of merit to exhibit before the members of the club should kindly send such to his address, and he will see that the same is placed in the hands of the exhibition committee, and properly staged. Remember the new address of the meeting rooms: 160-164 East Thirty-fourth street. Let us have a good attendance.

Mr. and Mrs. Phil. Hauswirth and Mr. and Mrs. George Asmus, all of Chicago, have been spending a few days with F. H. Traendly at his Brooklyn residence. Mr. Hauswirth has left for Norfolk, Va., to attend to official business of the Redmen's Association, of which he is a prominent member. He expects to reach his Chicago home about the middle of the month.

The funerals of Richard Mansfield, the actor, and Robert Pinkerton, head of the detective agency, which took place here this week, called for quite elaborate displays of flowers, and more orchids could have been used had they been obtainable.

The fair and exhibition of the Schwäbischer Sängerbund is being held this week at Glendale Schutzen Park, Glendale, L. I. Sunday, September 8, will be the last day of the exhibition.

Judging from present supplies of dahlias and hydrangeas, one would gather that there is going to be unusual heavy cuts of these flowers sent into the market this season.

H. E. Froment is back from a vacation spent in the mountains, and W. Ford is back from Pennsylvania, where he has been rusticiating for several weeks.

V. Matraria and M. Le Claire, of San Francisco, were in town this week on their way to Philadelphia.

Alexander Wallace, editor of The Florists' Exchange, together with Mrs. Wallace, is enjoying a vacation in Putnam County, N. Y.

Visitors this week included H. J. Smith, Hinsdale, Mass.; William Williams and Robert Borroughs, St. Anne de Bellevue, P. Q., Canada; A. Ferguson of Dupuy & Ferguson, Montreal, P. Q.; Harry Papworth, New Orleans, La.; Mr. and Mrs. Otto Wittbold, Chicago, Ill.; Mr. and Mrs. Wm. F. Dilger, Detroit, Mich.; George Thompson, Lenox, Mass., and W. O. Roy, Mt. Royal Cemetery, Montreal, P. Q.

Carnation growers who have a surplus of young plants should advertise them in THE FLORISTS' EXCHANGE.

Sheep Manure

Kilo dried and pulverized. No weeds or bad odors. Helps nature. For garden, lawn, trees, shrubs, fruits and house plants. \$4.00 LARGE BARREL. Cash with order. Delivered to your Freight Station. Apply now. THE PULVERIZED MANURE CO. 24 Union Stock Yards, Chicago

KILL YOUR SCALE

If you want to Kill Scale on your plants Absolutely, there is only one preparation.

WILSON'S PLANT OIL

Take a can of this preparation, dilute to four times its bulk with water, and wash or spray your palms, ferns, aspidistras, smilax or any plants subject to hags or vermin and your plants will be clean. No alkali. Nothing deleterious. Dries at once.

READ WHAT OTHERS SAY OF IT:

New York Botanical Gardens, Bronx Park, N. Y. City, Sept. 5, 1906.
Mr. Andrew Wilson:—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.
Yours very truly,
GEO. A. SKENE.

Florham Farms, Madison N. J., December 8, 1906.
Mr. Andrew Wilson:—Dear Sir: Your Plant Oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.
Yours truly,
A. HERRINGTON.

PRICES:—½ pint cans, 25c.; pints, 40c.; quart, 75c.; 2 quarts, \$1.25; gallon, \$2.00; 5 gallons, \$9.00. Cash with order.

H AND C

THE HEATING QUESTION

Heating a greenhouse is radically different from other heating; it's so different that the usual heating engineers fail to give anything like a satisfactory result—a case where patronizing "home trade" is apt to prove a continual annoyance and expense. When we say heating, we have more in mind than the right boiler—there's a right way, an economical way to pipe for the most rapid circulation—it's a proposition that should be placed only in the hands of those who know the greenhouse business.

1170 Broadway, New York

Oil City, Pa.

W. M. Deyoe & Co. have just completed three new houses for carnations. These they have grown in 4 in. pots and will be put in immediately. Mr. Deyoe is not only a florist but an electrician also. He has just installed a motor for light and power in the basement of one of his greenhouses, the entire work on which was done by himself. This establishment is one of the largest in the city doing a retail business.

The Oakwood Rose Gardens have a large extent of glass and grow roses, carnations and smilax for the wholesale trade only. Their greenhouses are about three miles out from the business portion of the city. Mr. Kennedy is superintendent and reports business good.

The greenhouses of R. Reynnders are situated on Carroll avenue in front of one of the leading cemeteries; street cars pass the door. Mr. Reynnders was busy overhauling his entire plant; some extensions and general improvements were being pushed forward rapidly. When all the work is completed the Reynnders establishment will be one of the best in the city. J. M.

Titusville, Pa.

L. J. Rowe, the East Spruce street florist, has just completed two large greenhouses. This gives him twelve in all and makes an attractive plant, filling as they do nearly an entire city square. The houses are all of concrete. Three more houses will be added another season and this Fall a new boiler will be installed of sufficient power to heat the entire plant. Mr. Rowe has made a success of his business far beyond the dreams of any of the local florists a dozen years ago. He raises good flowers and finds a ready market for them both in his own and in nearby cities.

Thos. Murdock has a store on Center avenue and has some well filled greenhouses close by. Mr. Murdock is one of the pioneer florists of the city and a gentleman of the old school. He reports business good. J. M.

Baltimore.

Trade News.

The past week has been a very quiet one, business being rather slow. The weather continues fair with high temperature during the day and cool at night.

Cut flowers are very plentiful and of good quality.

A number of conventionites and stragglers from Washington and Baltimore could be seen promenading on Atlantic City's boardwalk as late as August 31.

On September 17 the Vincent Dahlia Show, consisting of 40 acres of dahlias, will no doubt attract a number of visitors from near and far. C. L. I.

FURMAN BOILERS FOR GREENHOUSE HEATING

Furman Boilers have been awarded the Certificate of Merit at Five Different Florists' Conventions. Have a record of 20 years. Over 25,000 in use.

Growers' Problems Solved by U. G. Scollay.

Cubic Content of a Ton of Coal.

Will you please advise, through the columns of your paper, how many cubic feet it takes for a ton of coal, either egg, stove or bituminous? I have heard of several persons who claim to be posted on this, but they all seem to vary in their opinions. X. Y. Z.
New York.

—I think you, as well as many other readers, should comply with the request of The Florists' Exchange when asking for information—that all writers should sign their full name and address.

The average cubic feet per short ton of anthracite coal would be about 36, for long ton 40 cubic feet. Bituminous coal for your purpose of calculation will average about 15 per cent. more space, although some qualities will take up a little more. Weights of anthracite coal vary slightly to the cubic foot, according to which particular district it may come from. The same remark applies to bituminous. The above calculations will do you for the purpose which I suppose you desire, that is, to approximate the size of a coal cellar or pit for a given amount of coal.

U. G. SCOLLAY.

THE CHRYSANTHEMUM

Arthur Herrington's New Book

The most complete and comprehensive work on the cultivation of the Chrysanthemum that has as yet been published in America. Handsomely illustrated, 168 pages, 5 x 7 inches. Price only 50 cents, postpaid.

BODDINGTON'S

CHRISTMAS SWEET PEAS

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOWBIRD.

An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white upon long stems; habit fairly dwarf, and of exceptionally free-flowering qualities. Trade pkt. 50c., 30c. per oz, ¼ lb. \$1.50, 1 lb. \$2.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Trade pkt. 50 cts., 30c. per oz., ¼ lb. \$1.50, 1 lb. \$2.50.

FLAMINGO. Color scarlet; free-flowering and early. As the crop of this variety was small, we can only send out packets this season for trial. Pkt. 25 cts., 5 packets for \$1.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation as by sowing the seed under glass in latter part of August, flowers can be cut from Thanksgiving on during the winter months. ¼ lb. 30 cts., 10c. per oz., ¼ lb. 50 cts., 1 lb. 75 cts.

BODDINGTON'S CHRISTMAS WHITE. A grand companion to Christmas Pink. 10c. per oz., ¼ lb. 30 cts., 1 lb. 50 cts., 1 lb. 75 cts.

Our Fall Bulb Catalogue now ready. It is free. Send a postcard today. It contains a list of all Seasonable seeds for sowing now, besides a collection of over

 derd, of Kendallville, Ind., a breeder and
 hybridizer of gladioli, who has an es-
 tablishment at Kendallville, was in
 South Bend recently, looking over its
 advantages and may decide to locate
 in this city, providing he can secure a
 suitable site for caring properly for his
 rapidly growing industry.

BURPEE'S NEW SPENCER
SWEET PEAS.—The following de-
 scriptions of new varieties of sweet
 peas of the Countess Spencer type are
 being distributed by W. Atlee Bur-
 pee & Company, Philadelphia, Pa.

"Burpee's White Spencer."—The grand-
 est and most magnificent sight ever
 seen in the way of sweet peas. Thus
 began the field note made in California
 last June by our inspector when first
 viewing the crop. From our own in-
 spection the previous season (1906) and
 trials at Fordhook, we think he was
 hardly too enthusiastic, although from
 examination of Etta Dyke and Purity
 as grown in England the past Summer
 we should not be surprised if the three
 varieties (of similar origin) would
 prove to be identical. This remains to
 be proven when they can be thoroughly
 tested side by side in 1908.

"Burpee's White Spencer produces in
 the greatest profusion flowers of enor-
 mous size that are absolutely pure white.
 It is white-seeded and comes true to
 the Countess Spencer type. The stand-
 ard is decidedly waved, crinkled and
 fluted; the wavy wings are so folded,
 that the keel is almost hidden. The
 standard measures from one and three-
 quarters to two inches across by one
 and three-eighths to one and five-eighths
 inches in depth. The wings are fully an
 inch wide and nearly as deep as the
 standard. The flowers are borne three
 and four to the stem and are uniformly
 well placed. The stems are extra strong
 and measure from twelve to fifteen
 inches in length.

"The vines are most vigorous in
 growth, with heavy foliage, and attain
 a height of from ten to twelve feet.
 They are nearly covered with bloom,
 while the flowers retain their enormous
 size throughout the season. Of fine sub-
 stance the magnificent flowers are un-
 surpassed for cutting and for keeping
 after being cut."

"Burpee's Primrose Spencer.—This is a
 fitting companion to Burpee's White
 Spencer. The vine is equally as thrifty
 and free flowering, but slightly shorter
 in growth, attaining a height of eight
 to nine feet. The flowers are well placed
 on strong, thick stems, ten to twelve
 inches long, and are borne never less
 than three flowers, and sometimes four
 flowers to the stem. The standard
 measures one and three-quarter inches
 across (if not quite) two inches
 across by about one and one-quarter
 inches deep; the wings are an inch
 across by one and one-eighth inches
 deep. The texture is fully as substan-
 tial as in Burpee's White Spencer.

"The color is a pronounced primrose or
 creamy-yellow throughout both stand-
 ard and wings. It is more decided in
 depth and richness of color than the
 popular Mrs. Collier, which, of course,
 it outranks in form and size. Both
 standard and wings are thoroughly
 crinkled or 'waved.' Burpee's Prime-
 rose Spencer will hold its own with any
 of the so-called 'yellow' sweet peas in
 color, while it surpasses all others of
 this color in size of flower, length of
 stem and vigor of growth. A decided
 acquisition to the Spencer type and the
 first of its color to be introduced."

W. Atlee Burpee & Company an-
 nounce that they will offer the follow-
 ing special prizes to be competed for at
 the next annual exhibition of the Na-

THE Cultural Leaflets treating on BULBS are especially season-
able at this time.
 Seedsmen and Florists who sell BULBS at retail should
 procure a supply of these LEAFLETS, and present one to each
 customer. Do this, and each purchaser will be enabled to grow the
 BULBS intelligently; in this way you make a satisfied customer, a re-
 sult always to be desired.

CULTURAL DIRECTIONS

Specially written for the use of your amateur customers. Send Twenty-
 five cents for complete sample set, which amount will be deducted from order
 for first thousand.

The universal favor in which these Directions are held, as shown by the
 many orders received therefor, encourages us in the belief that these Leaflets
 are just the neat little factor to help promote business and establish better re-
 lations between the dealer and his customer.

 PLEASE YOUR CUSTOMER, WE HAVE PREPARED

Cultural Directions

COVERING A NUMBER OF THOSE PLANTS
 AND BULBS MOST LARGELY IN DEMAND

THE "CULTURALS" have been written by experts; they are fuller, and con-
 tain more detailed directions than it is possible to embrace in a catalogue.
 Equipped with these, just hand one out with each sale, and save yourself
 considerable present and future trouble, as the customer will then be able to con-
 sult the directions, grow his plants, seeds or bulbs intelligently, and so receive
 satisfactory results, without having to continually resort to you for advice.

The following "Culturals" are now ready:

A. T. De La Mare Ptg. and Pub. Co. Ltd.
Pubs. The Florists' Exchange. P. O. Box, 1697, NEW YORK

tional Sweet Pea Society, London, England, in July, 1908: For one bunch each of Burpee's White Spencer and Burpee's Primrose Spencer, first prize, three guineas; second prize, two guineas; third prize, one guinea; each bunch to consist of from 15 to 20 sprays.

Six guineas in three prizes as above will be paid also for the best collection of not less than six varieties of the Countess Spencer type, to include one bunch each of Countess Spencer, Burpee's White Spencer and Burpee's Primrose Spencer.

The Burpee cup for flowers of the Countess Spencer type will be offered, for open competition, to all exhibitors, within any restriction as to special varieties.

Seed Crop Notes.

I have been most severely taken to task, by a well-known seedsman for saying last week that \$3 to \$5 per pound, according to the variety, is no more, in any year, than the planter should be willing to give his seedsman for first-class onion seed. It is not so very many years ago that both grower and seedsman were able to obtain, I will be very conservative and only say, fair prices for onion seed. I well remember that my old friend Mr. Meggat was decidedly of the opinion that \$1.50 to \$2.50 per pound, depending upon the variety, was low enough for a grower to sell his onion seed to a wholesale seedsman; and in large lots at that. (It may not be out of place here for me to say, that in my opinion, to William Meggat of Wethersfield, Conn., is due a debt of the very deepest gratitude by every planter of seeds, for the high-grade garden seeds he so many years distributed—and the seed trade to this day have never ceased to sincerely regret that Mr. Meggat took up another line of business; as men like him are indeed too few.) It has always been an incomprehensible mystery to me, that a large proportion of planters (and this refers to any variety of seeds) will hammer and drive down their seedsman as regards the price to be paid, trusting to the honor of the seedsman to give them always seeds of the highest grade. I think this tacit acknowledgment of the honesty and integrity of our craft is the greatest compliment that could possibly be paid to it. The time has certainly come when the planter realizes, absolutely, that as regards his onion seed he must have as a foundation of future success, seed of the highest possible grade. Now this being an established fact, why should we keep on year after year, allowing a senseless competition among ourselves (growers and seedsmen) to result in the onion seed crop going into the hands of the consumer at little or no profit, and I am forced to say often below the cost of production? A seedsman, who has spent his years behind the counter, will tell you if you ask him, that whether you tell an onion seed planter that the price per pound is \$2 or \$5, he will want a discount. This is as true to-day as it was thirty years ago, when we sold onion seed to the planter for from \$5 per pound, in a season of plenty, to \$10 and even more per pound, in a so-called bad season. I will here forestall my friend, who

thinks \$3 to \$5 per pound an exorbitant retail price for onion seed, by telling him that between 1875 and 1885, the writer personally sold over the counter four pounds of onion seed (for an acre) many times for \$40 to \$50. I understand, of course, that this was before California had become much of a factor in growing seeds. Seedsmen at that time (1875) looked askance at Western seeds and it took years to convince them regarding their high quality (but more of this anon).

There has been little change in the general crop situation during the past week, although very good rains have in many sections broken the dry spell, and thereby done more or less good. Reports come quite thickly that many shortages in the bean and pea crops will appear a little later, but I think no one has expected a full crop of either. Such weather as we have had from start to finish this season would certainly not so indicate.

From the vine seed-growing sections mixed advices are being received; in fact, I was told as far back as the Seedsmen's Convention last June in New York, that with the small acreages planted, especially of muskmelons and watermelons, no excessive yields of seed could be expected, even should the most favorable conditions prevail the rest of the season—and they certainly have not, for since June it has averaged very hot and dry.

Cucumbers and squashes have done much better than melons, and all indications at present are, that a crop of these large enough to fill contract orders will be harvested.

This past week has seen a good beginning made, in starting out from first hands, the principal varieties of Dutch bulbs, both dealers and large florists having been very impatient to receive their quota of Paper White and Von Sion narcissus, as well as the usual mixtures of tulips, crocuses, and hyacinths for their first sales. Every indication points to an especially active and profitable bulb season; the larger houses now have their retail bulb catalogues distributed, and orders are pouring in daily. The old saying that "it is an ill wind that blows nobody good," will, I think, be well exemplified in our bulb trade this Autumn, as owing to the late Spring, all bedding plants were very late in being set out; therefore, most gardens are now only in their prime. Such being the case a very long bulb season (it having already commenced) is sure to result, especially if the frost holds off, as up to the present time there have been on signs whatever of a frost.

I have some more things to say to you about the Holland bulb situation, but having used up my space will postpone my thoughts until another week.

CELERY PLANTS

Transplanted plants, extra bushy and strong. Can ship at once. \$1.50 a 1000, \$10.00 for 10,000. Cash. To close them out.

WHITE PLUME, GIANT PASCAL, BOSTON MARKET and WINTER QUEEN.

R. KILBOURN, Clinton, N. Y.

European Notes.

Doubtless, Mr. Editor, you have heard of the coy maiden who: "Vowing she would never consent, consented." Well, August has just such a record, for after withholding the longed-for sunshine when we most desired it, has at the last relented and takes its departure in a blaze of glory. While this cannot increase the quantity of our crops, it will, we hope, improve the quality, and they sorely need it, for thus far very few good samples of corn or other seeds have come to hand. Farmers are anxious to avail themselves of the high prices now ruling for grain and have not refrained from carting their crops even when heavy showers were falling. The result is, that all the samples marketed thus far are quite out of condition.

As we are not in a great hurry for any of our seed crops, with the solitary exception of spinach, we shall restrain the growers from undue haste with our seeds. As regards spinach, things have been most disheartening. Good prices are freely offered for seed that can be shipped promptly, but just as the crop has been fit to carry, down come a rain which has moistened the seed without wetting the land.

In many parts of Europe there are prospects of a water famine and this is most apparent in the seed growing areas. It will be a pity if our strong and healthy plants perish for the lack of a drink.

As regards flower seeds, nasturtiums are A No. 1 and should produce a record crop. Sweet peas, on the other hand, are not doing so well as we expected. This is especially true of the new or large-flowered varieties which do not stand unfavorable weather so well as the older sorts. At the same time, it is only the newer kinds that it pays us to grow. California has knocked all the profit out of growing the old standard sorts, but judging by results of the Reading trials, it will not do to trust to California for the best large flowered and Spencer types at present.

OUR FALL PRICE LIST OF BULBS NOW READY
HENRY F. MICHELL CO., 1018 Market St., Philadelphia, Pa.

AUCTION

W. ELLIOTT & SONS will commence their semi-annual sales Tuesday, Sept. 17, at 201 Fulton St., New York, offering at Public Sale a full line of Decorative Plants, also 24 specimen *Kentia Forst.*, measuring 12 to 15 ft., from 7 to 8 leaves, in 12 in. tubs.

W. ELLIOTT & SONS

Herbaceous Border Notes.

The months of July and August throughout a great deal of the Eastern section of the country were this year remarkably dry, consequently many of the herbaceous plants did not make such a fine showing as they might have done. Copious rains have fallen in this section during the past two weeks, many of the plants in the border are now very fine and at this season there is a great variety both of plants and colors.

Many of the phloxes are in bloom, and by the way, if you want large spikes of these plants grow them to single stems, propagate as you would chrysanthemums in early Spring and plant out the young stock when well established. Of course, the list of varieties is legion and it is a hard matter to decide which is the best. The following varieties are all good: Independence, Tapis Blanc, Coquelicot, Ornement, La Pale du Nord, Mme. P. Langier, Japonaise, Le Tour Vaugier, Le Mahdi, Epopee, Gen. Chanzy and Eclairer.

The perennial asters are many of them now very showy, especially those of the *novae-angliae* types. There are various shades of color of this aster, from the bright rose and crimson to the deep violet purple so common in some sections of New England. There is also a white form of this aster, but it does not seem to be popular. There are many hybrid asters which are good; in fact, the variety is so large and many of them so near alike that it is difficult to make a selection.

The *boltonias* are still very showy with their aster-like flowers, especially the variety *asteroides* which is now showing masses of white.

The *heleniums* are fine just now with their pretty golden or striped flowers; the variety *autumnale* is most showy at present, although a good plant is *grandicephalum striatum*.

The *vernonias* are fine late blooming plants mostly with purple flowers; the common variety *Noveboracensis* is good but some of the Western varieties are better. *Arkansana* is a very tall growing variety, and *Baldwini* is of medium height, and one of the best.

The *rudbeckias* are still very showy; the varieties *sub-tomentosa* and *triloba* are good, medium tall sorts, but, of course, the most showy are the taller *laciniata* and its double form, better known as *Golden Glow*.

The *sunflowers* have some species which are very showy at this time; one of them is *mollis*, then there is *multiflorus*, the fine double form of *decapetalus*, and one of the finest garden forms is known as *Miss Mellish*. It is a variety of *rigidus*.

One of the most showy plants at present is *Liatris pycnostachya*, with its long long spikes of purple flowers.

Lobelia cardinalis and its varieties are still very fine with their bright colored flowers. Then there is *Lobelia syphilites*, with its fine blue spikes; though, common in some sections it certainly should find a place in the border.

Cassia marylandica is a shrubby looking plant, but it is a fine border subject at present, with its pretty foliage and yellow flowers.

Sanguisorba canadensis is a native plant rarely met, with fine spikes of white flowers; it grows to a height of about four or five feet and is moisture-loving.

Veronica longifolia subsessilis is beautiful, with its rich blue flowers; this is one of the best plants of the border.

The *kniphofias* are pretty plants with their spikes of reddish flowers which give them the name of red hot poker plant. The variety *Pfitzeri* is one of the best, although *Express* is finer and will flower earlier in the season.

Funkias still have a continuance of bloom; the finest variety at present is *subcordata grandiflora* with its beautiful white fragrant flowers.

Euphorbia corollata is a rather pretty plant at present with its abundance of small white flowers.

Some of the *eupatoriums* are useful; if a good type of *purpureum* can be got it makes an imposing plant in the border, and *ageratoides* is very fine with its white flowers.

Montbretias have generally been considered not hardy and their bulbs have been treated like those of the *gladiolus*. They will do much better if left in the border, as they are perfectly hardy and at this season are very fine in bloom and useful for cutting.

Lespedeza Sieboldii is a fine plant at this season. This is often classed as a shrub, but it is properly herbaceous. It is perhaps better known as *Desmodium penduliflorum*.

If the *delphiniums* had been cut back as recommended earlier in the season they will now be in bloom for the second time. The same may be said of several of the *campanulas*.

Aeonium autumnale is a beautiful plant at present with its fine spikes of dark blue flowers.

Several of the *polygonums* are worth growing; one of the best is *amplexicaule*, but even the weedy *cuspidatum* is pretty at this season if you can keep it within bounds.

There is a nice little border plant

Specimen Evergreens FOR FALL PLANTING

Our evergreens are exceptionally fine specimen plants. They have been frequently transplanted, sheared and have been given ample room in the nursery rows. With the exception of the small sizes, used for bedding purposes, every plant will be dug with a ball of earth and the ball sewed in burlap.

The small grades of evergreens used for bedding are plants which have been given particular attention for this purpose, they are very heavy and bushy and in most cases the plants are as broad as they are tall.

Send us list of what you require, with quantities and sizes, and we will send you prices on same.

RETINISPORAS. All varieties, 12 to 18 inches for bedding, and all sizes from 2 feet to 10 feet.

ARBOR VITAE. 12 to 18 inches for bedding and all sizes up to 8 feet. An exceptionally fine lot of *Geo. Peabody Golden Arbor Vitae* in these larger sizes.

JUNIPERS. 12 to 15 inch sizes of the trailing form. 2 to 4 feet sizes in upright growing variety.

WEeping NORWAY SPRUCE. Small plants of 18 to 24 inch sizes up to 7 feet specimens.

WHITE PINE. 6 and 7 feet, trees transplanted last Spring.

HEMLOCK SPRUCE. All sizes.

RHODODENDRONS. Only hardy acclimated varieties.

We have over two hundred acres of the finest grades of ornamental trees, shrubs, and herbaceous plants, potted vines, etc.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.
J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

DES MOINES, IA.—The Grand View Nursery and Orchard Company will erect a large brick storehouse this Fall at East Ninth street and Hull avenue.

GERMANTOWN, PA.—S. Mendelson Meehan and wife have returned from an enjoyable European trip spent in England, Germany and France, finishing up at the old Meehan homestead in the Isle of Wight.

DETROIT, MICH.—Charged with having perpetrated an elaborate system of postal frauds on nursery firms, East and West, Earl W. Wales, alias Harry Yates, of Rochester, Mich., was arrested at his home by United States Deputy Marshal Duncan D. Lyon and brought to this city. He was arraigned before United States Commissioner Carrie Davison and held in \$2,000 bail to appear September 12. Failing to secure bail, he was held in the county jail.

Wales is said to have been operating through post-offices near his home for about four months. His plan is alleged to have been the old one of bogus orders, on which commission was paid, the goods being shipped by freight and eventually returned as not ordered. In this way, Wales is said to have secured several hundred dollars. Among his alleged victims were the Roeder Nurseries, Oscola, Mo., Brown Brothers, Graham Nursery Company and First National Nursery Company, Rochester, N. Y., and a nursery at Monroe. He is said to have sent in orders under several different names and from various postoffices in the neighborhood.

Seasonable Notes.

Flowering apples and crabs can be increased by budding as well as by grafting. If too late for budding, make a note to lay in stock for grafting during Winter.

Put *Pyrus Parkmanni* on the list for extensive propagation, as well as Bechtel's double flowering crab.

Common hazel nuts are good to set in low ground. They thrive there, and, in Spring, their catkins make a good showing in company with alders, pussy willows and similar trees and shrubs. These are among the earliest harbingers of Spring.

Crape myrtle (*lagerstroemia*) is easily multiplied; seeds and cuttings are the methods employed; this is the time for soft wood cuttings under glass. Hard wooded ones are made in Winter and planted out in Spring.

The supply of new peach stones is a very small one, but, as peach stones one year old grow very well, and a fair supply of these appear obtainable, there should be no great shortage of peach seed.

Scale quickly destroys trees by sucking out the sap. Better spray infested stock in the Fall as well as in Spring, to lessen their numbers. Peach trees are soon destroyed by scale.

Hedges of Rose of Sharon.

Everyone is admiring the display of flowers the Rose of Sharon bushes are making this season; the growth is fine and the flowers most abundant.

This bush is again enjoying much of its old-time popularity, a popularity attested by the many old hedges to be met with in the suburbs of our older cities. However, as in a hedge in the sense the word is used generally, it is not a shrub for use. It is more as a shrub for a division line, or for a screen, that it finds best use. It can, of course, be so pruned as to become very bushy in its way, and its then numerous shoots are tough and unyielding, and would prove a barrier to many trespassers, but as a division line of flowering shrubs is where it finds its best place.

As well understood, the flowers are produced on the long shoots of the same season, and expand one after the other along the whole length of the shoot, so that the bolder the bushes are pruned in Spring the greater the length of shoots and the production of flowers.

But few shrubs are more valued than these when in flower, for they bloom at a time—July, August and September, when flowering shrubs are scarce—and they make a great display.

When set in hedge form, if all are not of one color, care should be taken that the colors harmonize, for when set without discrimination the display is often inharmonious.

Those who propagate these shrubs do so from cuttings made in Winter, and set in Spring, also by grafting stocks raised from seeds, both of which methods are quite successful.

There are early, medium and late flowering varieties, so flowers can be had for months if the proper sorts are used when planting.

The Creeping Evergreen Euonymus.

For covering smooth stone walls, the creeping Euonymus radicans is an excellent vine. Low walls of any kind have a nice appearance when clothed with this vine, its dark, small, evergreen leaves contrasting well usually with the color of such walls.

When walls are high, some vine with heavier leaves looks better, the euonymus appearing too frail in such cases.

The euonymus clings closely and makes no unattached shoots, just what is wanted usually for furnishing a low wall. As a rule the plain leaved one is the better sort for the purpose, but should the fence to be covered be of a very dark color the variegated leaved one may sometimes be used to advantage. The variegated leaved one is sometimes planted in positions it does not suit, such as on plastered walls, where it has been noticed; and very much out of place it was, too!

An opinion is sometimes expressed that this euonymus is slow growing. This is a mistake. It is because of its small leaves that the impression of slowness prevails, and there is not much side growth to it for a while, but in upward growth, it should not be considered a slow grower at all; given good soil it will ascend a wall in a satisfactory manner.

Use of Sand in Transplanting Trees.

It has always been understood by gardeners and planters, that when transplanting trees it was necessary that the soil must be made to fit closely to their roots when in their new position. In later years, much has been

Euonymus Radicans Growing on a Wall

said and written of firming the soil about potted plants and transplanted trees, all looking to the accomplishing of the same object, the close contact of roots and soil.

Recently another excellent suggestion has been made, a suggestion made because of noticing what a help it had been already to a great many; it is to use sand for the filling in around the roots of trees until all roots are covered.

There is no question of the sand's value, it does exactly what no other plan will do as well, viz., fill in completely all the air spaces about the roots, and fill them better than all the tramping, pounding, and watering otherwise found necessary to accomplish the same object. Dry earth is often recommended for filling in about the roots, and well recommended too, because being dry it crumbles up nicely, better than wet soil will, but dry sand is far better than anything else.

Nurserymen took the hint of the value of sand from noticing its usefulness for heeling in purposes, as a sand heap is known to be a necessary adjunct to all packing houses, cold storage houses, and every building where plants are to be handled.

Let florists, landscape gardeners, and all others recognize the value of sand and use it in their operations, and they will have greater success than ever before in their future work; its use is simply to fill in about the newly set tree, until the roots are covered, then ordinary soil is used to fill up the hole.

Names of Plants.

Referring to James MacPherson's notes in Park and Cemetery, in which he says that a safe ground for those who are mystified by the various names now applied to the same plant is to take the Index Kewensis, the late Thomas Meehan was of the same opinion, and he purchased a full set of the books, and in his writings and in his business he adhered to the names as given in that work.

Hydrangea Arborescens Sterilis.

The New Sterile Form of *Hydrangea Arborescens*.

Two years ago E. Y. Teas sent the writer a small plant of the new sterile-flowered *Hydrangea arborescens*—a small plant by mail, for his trial grounds. The plant flourished, and in July following the planting, in Spring, it had two nice heads of flowers on it. This Spring it pushed out strongly, and bore four heads of flowers, all close to the one date, in July.

Noticing that reports and advertisements contained the statement that the shrub was everblooming, Mr. Teas was written to, to the effect that the little plant on trial displayed no tendency to produce but the one set of flowers, just as all other hydrangeas do. The following is Mr. Teas' reply, dated September 8, 1907:

"We have plants of the new hydrangea grown from cuttings planted in Spring and Summer of 1906. These were dug in Fall, cut back to three or four inches, wintered in cellar and planted out in the nursery during the warm spell in March. The thermometer was down to about zero in March and April, and the plants began to bloom the latter part of June.

"The second crop (I am speaking of one plant, and we have several such) is now fading. The third crop is almost perfectly full, or open, and the fourth, fifth

and sixth crops are in sight; of the last mentioned you can just discern a tiny bud. This form blooms from late June to September, or later, every day. It is not everblooming by a long shot. General Jacqueminot is a hybrid perpetual; Armstrong's Everblooming Tuberoses bloom one week every year.

"In the one locality where this hydrangea was it bloomed in dozens and dozens of gardens for nearly twenty years alongside of hundreds of *Hydrangea paniculata grandiflora*. The common people had no more sense than to dub the new plant "everblooming," because it bore flowers continually from early June to Fall. One old lady had two plants of it, and these were nearly six feet high; they were about as broad as long. She told me seven of her family were laid in the cemetery, and very often she carried a bunch of flowers for each. It was this hydrangea she relied upon.

"Last year we had hundreds of blooms and buds killed by frost on October 10; the foliage was also killed."

It is a most valuable new shrub, flowering before other hydrangeas, and with the everblooming character Mr. Teas has found it possesses, it is still more desirable. As an ornamental shrub and as one of great use to the cut flower trade, it will be much in demand.

JOSEPH MEEHAN.

Early Chrysanthemums.

At the Pittsburg and Allegheny Gardeners and Florists' Club meeting on September 3, Messrs. Nathao Smith & Son, Adrian, Mich., exhibited their new seedling chrysanthemum Golden Glow, which was a surprise, and much admired by all present. It is a fine bold, yellow Japanese, of unusual size, considering its earliness; flower, color, stem and foliage ideal.

ROSES

The past week has been a very trying one for the rose grower. The air was heavy and close, causing a soft growth, which is very susceptible to mildew and spot; and it is only with great care that a dose of either is avoided.

As the season advances the results of the Summer treatment become more apparent. Where water has been applied too liberally the plants have made a too soft and sappy growth, while, where the watering was more carefully attended to, the plants are in much better shape for their Winter work. It certainly is a great temptation to which a good many men yield, when in the long, Summer days the plants are growing nicely, to apply more water, seldom, if ever, allowing the beds to get dry. An apparently fine growth results with large foliage; but as soon as Fall arrives then comes the rub—the top growth has exceeded root development, the benches do not dry out as well, and the plants are open to the attacks of almost every disease on the calendar. Mildew perhaps is the most troublesome, especially where hot water alone is used for heating; therefore it would pay all growers to have a small steam boiler, with a single line of small-sized pipe, in their houses. Thus equipped, they can, on the first cool night, paint a little sulphur on the pipes, leave ventilators open and turn on a little steam for two or three hours each night, thus keeping their plants clean. While the sulphur fumes prevent mildew, the little heat causes a freer circulation of air, thus assisting the plants to make a stronger and better growth. But the mere fact that the steam and sulphur are used will not keep off mildew unless all other details are carefully looked after. Watering and syringing should always be done in the forenoon so that the foliage is dry by night; and before watering make sure the plants need it. A good drying out occasionally is very beneficial.

At this season of the year black spot also becomes quite troublesome. American Beauty, Richmond and even Killarney suffer from this fungus at times. To avoid it always try to maintain a dry atmosphere; never allow the houses to get too hot, and avoid all sudden changes of air. Air-slaked lime, used liberally on the benches and blown over the plants with a bellows, is about the best preventive, though Bordeaux mixture is quite effective if used in time. But to keep clear of this disease look over your plants carefully twice a week, remove all leaves touching the soil, or those affected, and little trouble will result.

For the early benched plants a little mulch will now have to be applied; this should be prepared as directed in an earlier article. It is well before putting it on to give the benches a fair dusting of pure bone meal; this should be rubbed in, and the manure then applied. Do not scratch too deep in rubbing in the bone, as the feeding roots are near the surface and easily broken. Only standard bone should be used; this costs a little more money, but it is results we are after and not first cost.

The heating plant, if not already looked over, should now be attended to. Do not wait till frost and then ask your tinsmith to come right up and repair your smoke pipes, or have your jack-of-all-trades inform you that the grates won't hold coal or that something else is wrong. These things happen very frequently.

Philadelphia.

Trade Notes.

We find the cut flower trade very quiet this week, practically nothing going on but funeral work. Large quantities of cut flowers are coming in; all the wholesale houses are deluged with asters and now dahlias are arriving in large numbers, but so far sales of these are poor.

The Leo Niessen Company has had a large run on American Beauty, but has been able to fill all orders; the principal demand was on Saturday last occasioned by the Jewish New Year festivities.

H. Bayersdorfer & Company are doing an exceptional business for this time of year; orders have come in in such large numbers that Paul Berkowitz was called home from a trip on the road to facilitate the filling of them. Many favorable comments have been made on the generosity of this firm and its treatment of the visitors to the recent S. A. F. O. H. convention. Everyone was made welcome at the establishment and provided with every comfort; the employees took visitors all through the warehouse and show rooms, but not a single order was solicited by anyone. The roof garden, with orchestra, tables loaded with good things, with 14 waiters under the supervision of one of our best caterers, will long be remembered by all who went there. The whole affair was well planned and carried out, and the praise now coming to this firm is most justly deserved.

The S. S. Pennock-Meehan Company are tearing down the properties recently purchased on Ludlow street and Ransstead street to improve and enlarge their already extensive establishment. On the Ludlow street side a new cold storage plant will be built; on the Ransstead street side a new building will be erected which when completed will be occupied by W. E. McKissick.

Robert Buist of Philadelphia recently returned from Europe via steamer New York.

Secretary P. J. Hauswirth of the S. A. F. passed through the city on Saturday last on his way to Norfolk, Va., to attend the Red Men's convention. DAVID RUST.

Newport, R. I.

Trade and News Notes.

The range of glass recently completed at Warwick Neck, R. I., by the Pierson-Sefton Company, for Senator Aldrich of Rhode Island is one of the most extensive and up-to-date private greenhouse establishments in the State. Mr. Green, the superintendent of the Aldrich estate, is enthusiastic in his praises of the workmanship and finish of these houses. The greenhouses form only one item of the vast improvements under way and nearing completion at Warwick Neck for Senator Aldrich; these altogether will, when completed, make one of the finest and most extensive private estates in New England. The extent and nature of the material for planting the grounds with shrubs and trees along with vines and herbaceous plants without number has been such that it will take at least another year before the whole place is in any kind of finished condition.

The improvements to the grounds of the W. S. Wells estate on Bellevue avenue last year necessitated the demolishing of the greenhouses and the removal of all the plants, which included a large number of magnificent palms, to a house rented of Oscar Schultz, who makes this a part of his business. It has now been decided by Mr. Wells to give up this rented greenhouse and to sell the greater number of the plants, and instead, when the season opens next year, to purchase all that will be needed for house decoration and that indeed will be no small number. There are more ferns and palms used in the decoration of this mansion inside and outside than in that of any other in Newport.

Messrs. Wadley & Smythe have had an exceedingly busy time since the middle of August; the landscape department of this firm is increasing rapidly and of late so much so that neither of the members of the firm has been here for an extended period. Ralph Armstrong conducts the Casino store. V. A. Vanicek is getting the new addition to his nursery into excellent condition. He is very hopeful of the fu-

ture of the nursery business which hopefulness he is putting into practical effect by making great permanent improvements to his property.

The show of the Newport Horticultural Society next week, September 17, 18 and 19, promises to be the biggest display of dahlias ever seen here, if not anywhere. W. W. Rawson & Company have intimated an intention of exhibiting 500 bottles of flowers; there will also be exhibits from such well-known growers as Alexander, Jahn, Burt, Sisson, Manuel, Wordel, Lathrop, Turner and Forbes.

Zeigler is getting his Broadway store fixed up in good shape for Fall business; he may, he thinks, keep open his Avenue store until Thanksgiving.

Gardenias have been unusually scarce here of late; they must have been scarce elsewhere, too, judging by the price at which they were sold here not long ago. D. M.

Indianapolis.

News Notes.

Chrysanthemums are already taking the leading role in the plans of numerous social occasions.

The thousands attending the opening of the new coliseum at the Indiana State Fair bring many State florists who are warmly received by the local craft. W. W. Coles, of Kokomo, is already here making preparations for his display of flowers.

The Florists' Athletic Association will hold its second meeting on September 11; numerous suggestions and plans are to be voted upon. A cordial welcome is extended to all.

Herman Junge is supplementing his past record with a new runaway edition. Mr. Junge had weighted his steed, a fine specimen, and entered a downtown shop, whereupon he was apprised of the horse running away and injuring two women. Disastrous results were narrowly averted as the streets were filled with the Labor Day masses.

Alfred Warner has taken a position with Henry Rieman.

E. N. Wiegand is completing a fine residence on North Temple avenue.

John Bertermann and family have returned from their Summer residence at Cumberland.

Mr. and Mrs. Robert Ellis visited retailers at Anderson, Ind., the past week. I. B.

HAIL NOTES.

DES MOINES, IA.—A terrific hail-storm struck Des Moines on the 7th inst. The Iowa Seed Company, Vaughan's greenhouses and C. Hutchinson were hit heavily. All are insured in the F. H. A. The Iowa Seed Company has been hit twice during the past month.

WASHINGTON, D. C.—The following are the correct train arrangements to the dahlia exhibition of R. Vincent, Jr., & Sons Company at White Marsh, Md., on September 17. New York express leaves Washington at 11 a. m., arriving at Coventon at about 12.45 p. m. The returning trains leave Coventon at 5 and 7 p. m. The Washington party now numbers thirty or forty, including many ladies.

PROVIDENCE, R. I.—A. M. Rennie, seedman, formerly of Rennie & Fino and later of Rennie & Thompson, has succeeded L. W. Wheeler as manager of Vaughan's Seed Store, New York. Mr. Rennie entered on his new duties last week.

RIDGEWOOD, N. J.—Wm. F. Barkham has built a new greenhouse and store in the heart of the town.

GROW MUSHROOMS

If you do not know how, procure that simple but complete and practical book called "How to Grow Mushrooms." The price is ten cents and it can be secured from this office

Special rates will be made to the trade who wish to supply their customers.

ROBERT WILLIAMSON, New Durham, N. J.

THE WEEK'S WORK.

Succulent Plants.

It may become a necessity at any time from now henceforth to remove succulent plants from the open ground to where they will have the shelter of a roof over them. Echeverias are in no way averse to a rather cool temperature, in fact, a rather low temperature suits them best, while it is on the safe side from the freezing point, and for that reason it is much better to keep them stored for the Winter in as cool quarters as safety from frost will permit, giving them very little water, as it is very little they will require. Echeverias can be propagated from leaves, but now when taking them in for the Winter a considerable addition to the stock can be obtained by separating all the young plants produced from the old ones during the Summer. These should all be removed and placed in flats or in frames until they make roots fitting them for use as serviceable stock for next year's sales. In doing this work it will help matters later on if the young offsets are graded and each grade put in by itself, in order that they will develop equally and be of uniform size in each flat or wherever else they be situated when the time comes for disposing of them.

Calceolarias.

There seems to be a somewhat general inclination to make an attempt to utilize calceolarias for bedding out purposes as they do in Europe and have done with marked success for generations. Calceolarias like a cool temperature at all times, especially the shrubby varieties. They root freely from cuttings placed in sandy soil in a cold frame in the Fall where with sufficient protection from frost they may be left all Winter, or they may be taken up when well rooted and potted, after which they should either be put into frames again or kept in a cool temperature in a greenhouse until planting time comes.

Penstemons.

Peostemons are other Old World favorites coming in now for a share of attention. These plants are capable of being propagated easily from seed or cuttings, and when it is desirable to grow stock from existing varieties by propagation from cuttings it can be done to advantage in the early Fall by making cuttings of the soft shoots proceeding from the main stems of the plants. These may be placed in pans or flats, or even in pots, making sure that the cuttings are made firm in the sandy soil. Like calceolarias, penstemons will do better if kept in a cold frame. They need no bottom heat to root. They can also be multiplied rapidly in the Spring by placing a few stock plants in gentle heat to stimulate growth to such an extent that a good crop of cuttings will soon make their appearance; these should be put in pans or in a propagating bench where only slight bottom heat reaches them.

Lilium Harrisii and Other Bulbs.

Lilium Harrisii bulbs are, or at least a large proportion of the number needed, now in the hands of growers, and those intended for very early forcing should be potted without delay. Small and medium size bulbs, or as these are commonly known to the trade, 5 to 7 and 7 to 9, are grown in larger numbers by commercial growers than the larger or 9 to 11 size, and probably the smallest size bulbs of the three are, when everything in connection with the whole transaction and work is taken account of and into consideration, the most satisfactory to grow. It may be well, how-

ever, when a demand is anticipated for choice lilies in pots, to plant a reasonable number of a large and more expensive size.

Good stock can be grown when the smaller size bulbs are planted into 5-inch pots, and the others into larger pots according to the size of the bulbs. The soil for lilies should be composed in great part of good fine loam with the addition of about a fourth of well-rotted cow manure. The addition of the latter while proving beneficial and being necessary, if it were added in a fresh state would act in a directly contrary manner; green manure should never be used in the potting of lily bulbs.

In potting the bulbs they should be placed low enough so that when the first good watering is given them only the tips will appear over the surface of the soil. This watering, and it ought to be a thorough watering, should be done directly after the bulbs are potted, and then the pots removed to frames outdoors or some other favorable situation where they can be protected from too heavy rains. When the pots are placed in position it will be necessary to cover them with finely sifted coal ashes to a depth of 3 or 4 inches. If sashes are used to cover the bulbs in the frames, it will be necessary to raise the sashes regularly in order that sufficient air will have access into the frames.

The most indispensable essential condition in lilies prior to subjecting them to forcing is that of sufficient root formation. It is well nigh useless to expect lilies to force satisfactorily if they are removed from outdoors into heat before they have made considerable progress in the task of filling the soil in the pots with roots.

It may be necessary, in course of time, if the soil in the pots is likely to become too dry, to examine and find out, and if it is discovered that water is needed, give them another thorough watering.

Dutch hyacinths, narcissi and tulips had better be planted as soon as received; no matter whether a great number will be required for early flowering or not, it will be comparatively easy to control these when covered and making roots while it is an impossibility to get them to flower satisfactorily if they are planted so late that their forcing is attempted before they have made sufficient roots. When these bulbs are to be planted in boxes the bulbs may be placed about three-quarters of an inch apart, and if the soil is put into such condition that the bulbs when pressed down will be well covered, they will be all right in that respect. Fairly good soil, clear of green manure, will suit these bulbs, but if the soil available is stiff and heavy a sprinkling of sand will be beneficial. The soil in the boxes should be 3½ or 4 inches deep. A good watering will be necessary when the work of planting for the time being is completed.

Small Ferns.

Small ferns are always in good demand and although the prices at which they are sold leave but a small margin of profit, usually they are such a sure crop when any reasonable care is taken of them that they are on the whole worth looking well after. Small ferns now in 2-inch pots should be encouraged in every possible way to make stocky, well-formed plants before they are shifted into 3-inch pots. It will not pay to give these plants much more room on benches than the pots require, but it will pay to go over them once in a while and move them about a little; this will help them to attain perfect form. With small ferns it is very important that they be produced in successive batches so that there may at all times be a sufficient number in condition to fill orders as they come in.

Palms.

For two or three years kentias have been in far greater demand relatively than arecas for decorative purposes indoors and that because it became generally known that the former were capable of enduring harder treatment than the latter. And perhaps this extended use of kentias encouraged growers in the practice of making up kentias the same as they before did arecas. Although we all know that both the commercial varieties of kentias make the finer specimens when only one is in a pot, we must adapt ourselves to present

day notions and govern ourselves accordingly. Kentia Forsteriana is the one best adapted for making up, and if a supply is needed a number in different sizes should be immediately procured.

Where facilities are available it will be well to keep young palms in houses to themselves exclusively in order that their growth may not be checked by conditions invariably present when under the same roof and in close proximity to larger and more hardy subjects. It will also be well to aid the growth of this young stock by the earlier starting of fires than will be necessary for large plants. Although dense shading will not be necessary for palms from now on, a light shading will help them retain that dark green color of foliage so much called for by retailers as well as by retailers' customers. What is perhaps fully as important in palms as good color is freedom from insect pests, and the attendant forbidding appearance of plants covered with them. It is much easier to keep palms free of these pests than to get rid of them after they get a foothold, and for that reason it is absolutely necessary to use water with as much force as is consistent with safety to keep the plants clean.

Whenever space becomes available on account of the disposal of stock, young plants likely to benefit by a shift should be potted at once in order to get them into marketable condition as soon as possible. Kentias thrive well in a moderately cool temperature if the plants are of moderate size and fairly well established; and while arecas of medium and large size get along also in a house where the temperature by and by may fall as low as fifty, young plants of arecas will not make much progress when exposed to so low a temperature.

Miscellaneous Notes.

Very soon now we will all be more or less busily engaged in harvesting and otherwise saving everything needful for future stock, such as cannas, dahlias and many other things, and in connection with that subject it may be worth while to again call attention to the importance of taking every possible precaution to have every variety go out properly labeled when the stock is shipped to customers in Spring and early Summer. It is very easy to do a great deal now in the way of straightening out matters in cases where for some reason or another varieties got badly mixed or other varieties had other than the proper names attached to them. These plants are now in full flower making the work, as we said before, of correction comparatively easy, and it ought to be proceeded with without delay. Any variety, unless it be one of superior merit, that is of certainty wrongly labeled or without any label should be discarded to prevent the possibility of it doing harm later on.

Although it is not by any means likely that the day of the cactus type of dahlia is nearly passed, actual experience tells that these are in no way so predominantly prominent as they have been; other types are regaining lost ground with surprising rapidity. This is not more the case with decorative dahlias than with the show type, although in time the decorative type may outrank the latter, especially in the opinion of growers of flowers for commercial purposes. Taking these facts, as facts, they certainly are, into serious consideration, growers should not ruthlessly destroy any good varieties of the one-time little thought of types of dahlias.

For a number of years in some parts of the country growers could not supply the demand for double pink geraniums, Beaute Poitevine especially. In those same sections of the country last Spring the demand was not so strong for pink of any kind, but for red, with a decided preference for S. A. Nutt. That is a splendid variety and one that invariably gives entire satisfaction when bedded out in any situation. M.

FACTS

If you wish to transform your store

To a palace of beauty galore,
Then all that you buy
Aschmann must supply
You'll be constantly sending
for more.

I always act as quick as I think, and have been successful; learn and do likewise.

ARAUCARIAS OUR SPECIALTY

WATCH US GROW

1907 is our 12th anniversary in a successful career in the importation, growing and shipping of this well-known and so much admired evergreen, decorative plant, Araucaria Excelsa, Robusta, Compacta and the Excelsa Glauca.

Our importation this Spring, 1907, has swollen up to the enormous number of 6,000; more are coming with the azaleas in September and October. The florists of every city from the Atlantic to the Pacific Ocean can talk of Aschmann's Araucarias.

Now is the time to buy. They will gain in their growth 100 per cent. in two or three months.

The next in rank is our Nephrolepis Ferns, of which we only grow the best selling and well-known varieties, and of which we have a big lot: Boston, Elegantiissima, Whitmani and Scottii, three large houses full, in best selling sizes, all pot grown (not bench grown).

Our ferns are not forced or grown in shady houses, but grown exposed to the sun, ventilators are open day and night. Such treatment stiffens the fronds, and makes strong, stout plants, that can be shipped 5,000 miles safely without injury to the plants in transportation.

If you so much money would make. That to pile it you'll need a big rake; Then to Aschmann you'll scurry, And buy in a hurry.

All the plants your benches will take.
ARAUCARIA EXCELSA, 5 to 5½ in. pots, 10-12 to 14 in. high, 3 to 4 tiers, 2 years old, 50c. each. Larger sizes, 5½ to 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.50-\$1.75 to \$2.00 each.

ARAUCARIA Compacta Robusta, 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.50-\$1.75 to \$2.00 each.

ARAUCARIA Glauca, 3-4-6 tiers, 2-3-4 years old, 10-12-15-18 to 20 in. high, 6 in. pots, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each.

LATANIA Borbonica, 25c. each.

The book of WATER GARDENING

By Peter Bisset
Price, postpaid, \$2.50
A. T. De La Mare Ptg. & Pub. Co., Ltd., 2 to 8 Duane St., New York

THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

KENTIA Forsteriana and **Belmoreana**, European stock, 6 in. pots, 26 to 30 in. high, five leaves, \$1.00 to \$1.25 each; 4 in. pots, 18 to 20 in. high, 35c. each.

COCOS Weddelliana, 3 in. pots, 10-12-15 in. high, 15c.-18c. to 20c. each.

ARECA Lutescens, 4 in. pots made up, three plants in a pot, 20c. to 25c. per pot.

FICUS ELASTICA or **RUBBER PLANTS**, home grown and Belgium stock, 5-5½ to 6 in. pots, 35c.-40c.-50c. and 60c. each.

FERNS, Boston, 4 in. 20c., 5 in. 36c., 6 in. 50c. each.

Elegantiissima, 4 in. 25c., 6 in. 60c. each.

Whitmani, 6 in. single plants, 60c. each;

6 in., made up, three plants in a pot, having from 20 to 25 fronds, very bushy, 75c. each; 4 in. 25c. each.

Pieroni, 4 in. 20c. to 25c., 6 in. 50c. each.

Barrowsi, 5½ in. 40c. each.

Scottii, 4 in. 20c. to 25c., 6 in. 50c., 5 and 6½ in. 36c. and 40c.

Ferns for Dishes. A large assortment in 2½ in. pots, \$1.00 per 100.

ADIANTUM Hybridum, the best adiantum for cut purposes, large plants in 6 in. pots, 60c. each.

ASPARAGUS plumosus nanus, 3 in. pots, \$5.00 to \$6.00 per 100; 4 in. \$10.00 per 100; all bushy plants.

CYCAS REVOLUTA (Sago Palm). Plants from 5 to 10 leaves 10c. per leaf, above 10 up to 35 leaves 80c. per leaf.

PRIMULA OBOVATA, in bud and bloom, best strain, 3 in. \$7.00 per 100; 4 in. \$10.00 per 100.

CHINESE PRIMROSES, 4 in. best Jno. F. Rupp strain, \$10.00 per 100.

All goods must travel at purchaser's risk.

Please state if plants are to be shipped with or without the pots.

HYDRANGEA OTAKSA, pot grown, 6 in. to 7 in., 25c., 35c. to 50c. each.

AZALEA INDICA, DEUTSCHE PERLE, for Christmas forcing, large specimen plants, \$1.00, \$1.25, to \$1.50 each; other varieties for later forcing, only best kinds are imported, 75c., \$1.00, \$1.25, to \$1.50 each.

Cash with order please.

The Canadian Horticultural Association.

On August 28 and 29, 1907, our Canadian brethren held a most successful meeting and exhibition at London, Ont., at which some excellent practical papers were read, several of which appear in our present issue.

The Canadian Horticultural Association is yet in its infancy; it is, however, growing rapidly and bids fair to be a power for good in its line in the Dominion. It counts among its members the most progressive representatives of the gardening craft in all branches in Canada. In its work it has largely followed the lines of the S. A. F. in our own country, in its earlier days, and not having yet reached the philanthropic or altruistic stage of its existence, it is devoting its energies toward a consideration of matters which, in great measure, make for the welfare of the commercial man. All of the papers presented at the recent meeting of the organization seem to have had that end in view; and the whole of them are of a "meaty" character. Particularly so is the paper of Mr. Duggan on the subject of "Up-to-date Methods of Conducting a Commercial Florists' Establishment," part of which appears in this number of The Florists' Exchange, and to which we direct the special attention of our readers.

Mr. Duggan speaks with the experience and knowledge gained in operating one of the largest commercial greenhouse plants in Canada, and his methods, which have been pre-eminently successful, can well be adapted by smaller concerns, within the limitations presented by each. His remarks on the treatment of employees, of customers, and like matters are well worth study, and of being put into practical operation by all who would prosper and be respected by patrons and well served by contented help.

In the remaining portion of his paper, which will appear in a future issue, Mr. Duggan shows conclusively that there is such a thing possible as educating customers up to the point of a proper use of and respect for credit, by restricting the time limit and insisting on cash sales wherever practicable. His statement that patrons have become entirely used to and welcome such a system is most edifying; and the lesson taught thereby is a salutary one which all in the trade, not only in Canada but also in our own country, could learn and profit by.

We congratulate our Canadian brothers on their business acumen and enterprise, and commend their methods to all concerned.

It is gratifying to note that the Canadian Horticultural Association has decided to hold its next meeting at Niagara Falls, Ont., on the same dates as those on which the S. A. F. convention will take place. If the Dominion brethren and the executive board of the S. A. F. could arrange matters so as to have joint meetings, under the auspices of each organization, setting apart a session of each society, when one body could be the guests and hosts, respectively, of the other, such a course, we think, would go a great way to further cementing the already existing friendly relations between the craft on both sides of the line; and it is just possible that one society might learn of the other something that would be advantageous to each. This plan is, in our opinion, worthy of being put into operation; the feasibility of and benefits to result from it are self-evident.

Mrs. W. J. Vesey,

President Ladies' Auxiliary S. A. F. O. H.

The Plea and Plight of the Private Gardener.

Editor Florists' Exchange:

Your long and somewhat labored editorial under the above caption is in exact keeping with the policy of The Florists' Exchange toward private gardeners of late years. Not until recently did you remove the ban which debarred members of the ancient and honorable calling from even purchasing a paper printed "for the trade only." At a later date the enormities of "gardeners' graft" was freely aired in your columns, while now some few of those who have quietly but insistently advocated a broader field for the S. A. F., are told that they need more "manliness, greater tolerance of and respect for the rights of others, and a fuller knowledge of the fact that progress never yet resulted from pursuing a dog in the manger policy."

I presume it must have been specially galling to the broad-minded editor of your paper to find that so many S. A. F. members of high standing had the temerity to advocate a change of title for the National Society, and while they did not fully carry their point, they did at least improve the title of the caudal appendage. Great reforms are not carried out in a day, and despite the stubborn opposition of the Exchange, it is not unlikely that the day is not far distant when a broader and more comprehensive title will displace even the amended one.

In quoting from a letter written by myself to a Chicago contemporary—one which, by the way, you are very fond of alluding to in your columns—you say that I described the "society's meetings in former years as being largely devoted to buffoonery." Permit me to quote what I did say: "The popular opinion of conventions rightly or wrongly is, that they are annual good times where a little business and much pleasure may be derived by the attendants. I think the conventions of late years have been conducted on a higher plane, with more practical business and less buffoonery." Your quotation was fully as garbled and unjust as was one a few weeks ago criticising President Stewart's address, but which that gentleman's journal speedily caught you up on. The "buffoonery" referred to in my quota-

tion did not particularly refer to the sports branch, rather to other undesirable features now happily less in evidence.

No one questions the fact that private gardeners have done, are doing and will continue to do good work for the S. A. F., even if the title remains as amended. Who, pray, are the members of the ancient and honorable craft who are raising a hullabaloo and predicting all sorts of disaster to and competition against the national body? Are not these largely bugaboos of your own conception? Members of the S. A. F. from past presidents downward favored a change of title, and would you deliberately slander them as not yet having "passed the childish stage of their existence?"

Dragging in the name of another society of whose very existence I know but little, is a poor argument to bolster your own case. The private gardener is hardly likely to find any good reason for affiliating himself with the S. A. F. after reading such an uncharitable and utterly inconsistent editorial. Such articles do harm to the society they are meant to assist, for they display a littleness of spirit which is contemptible.

As a private gardener said to me to-day, after showing him your article: "I think the S. A. F. needs the private gardener more than the private gardener needs the S. A. F." As a private gardener, a member of the S. A. F. and one who would fain see it rise to its opportunity and fill a bigger and broader field, which I feel sure will be its ultimate destiny, I regret that you, Mr. Editor, are floundering so helplessly in the morasses of doubt and suspicion; and my fervent hope is that a clearer conception of the sentiments of those who hold contrary views to your own may soon dawn upon you.

North Easton, Mass.

W. N. CRAIG.

[Although the foregoing communication contains irrelevancies, indicative of the peevish spirit exhibited by some of the private gardener fraternity to which we previously referred, we willingly give space to it, as demonstrating our desire to have a full and fair discussion of the subject at issue.

Our correspondent is in error when he accuses The Florists' Exchange of antagonism to the private gardener, for among that class of excellent men we number many of our most intimate friends, including Mr. Craig himself. That we are opposed to the views and traits of some of them, and openly declare our opposition to such, is, we think, our privilege, which we exercise.

As regards the vote on the recent change of name of the S. A. F. O. H., the Editor is quite satisfied with that vote. It demonstrated that there were among those voting on the question 87 sensible as against 10 misguided persons, the latter including, as our correspondent says, past presidents of the society; and if Mr. Craig had been present, as he should have been, so as to in his future contributions tell authoritatively just what is the character of the S. A. F. conventions and what actually transpires there, with his views unchanged, there would have been 11.

Mr. Craig only endorses our belief that the S. A. F., under its present title and as now constituted, is broad enough and in every other way well equipped for the private gardeners to join it, and do good work for the craft as loyal members of the organization imbued with the spirit of promoting the interests of the whole gardening profession. That is all that is required—work not words. And, we hope, all liberal minded private gardeners and others interested will get rid of the idea that imaginary obstacles exist, either in the society's title or otherwise, preventing their affiliation with an organization that can and does now benefit them as much as it could possibly do under the idealistic conditions outlined by those holding mistaken views of the matter.

For the "bugaboo" information we refer Mr. Craig to his own letter to which he has alluded, and from which we quote, this time correctly: "If the S. A. F. votes to retain its present title, it virtually means that it is to remain a trade organization and some other society will in the near future fill the center of the horticultural stage." This reads like a prediction that conveys somewhat of imagined disaster to the S. A. F., we think; for the society is to suffer, in Mr. Craig's estimation, if it does not "fill the center of the horticultural stage."

We would advise our esteemed correspondent to put as much effort and earnestness into the work of securing new members for the S. A. F., from among those of his own calling, as he does into pointing out the organization's faults and failings; and when that is done, reinforced by the additional talent thus provided, the S. A. F. may, some day, measure up to the standard of usefulness and dignity set for it by Mr. Craig and others, holding views similar to his own. Ed. F. E.]

American Carnation Society.

For the meeting and exhibition in Washington, D. C., January 28 to 31, inclusive, the Henry F. Michell Company, Philadelphia, Pa., offers a silver vase, value \$40, for the best 100 blooms of carnations in four varieties, 25 blooms to a vase, and open to private gardeners only.

ALBERT M. HERR, Secretary.

Obituary

William O'Hora.

William O'Hora, florist, Halesite, near Huntington, N. Y., died suddenly at his home this week from an attack of pneumonia. He was born in Ballyvary, County Mayo, Ireland, in 1848. Mr. O'Hora as a boy worked at agriculture, and after leaving home went to Lancashire, England, and at the age of 18 found employment with a florist. March 21, 1870, he sailed for this country and landed in Boston. He was employed by Henry G. Scudder at East Neck, where he remained four years. Later he engaged in the butcher business at Hudson City. After a few years he came back to Huntington and for ten years was with Brown Brothers, the potters, representing them on the road. In 1888 he started the florist business, in which he was very successful. Deceased married Miss Julia Whalen, of Ireland, in 1878, who survives him. Mr. O'Hora was a member of St. Patrick's church and of the Halesite fire department.

Flint S. Kennicott.

Flint S. Kennicott, one of the oldest and most prominent florists of the country, dropped to the street from the effects of a stroke of apoplexy at the corner of Wabash avenue and Randolph street, Chicago, at one o'clock on Monday, September 9, 1907, and died before he could reach the hospital. Mr. Kennicott was president of The Kennicott Brothers Company, whose store occupied the basement of 48 and 50 Wabash avenue, but a few steps from where he was stricken. The body was taken to the family home at Des Plaines, where, at this writing, arrangements for the funeral had not been made.

Mr. Kennicott had been for a long time a severe sufferer from inflammatory rheumatism, and at the occasion of the funeral of his brother Amasa, which took place but a short time since, he contracted a severe cold which confined him to his house for some time.

Mr. Kennicott came of an old and much respected family, which had been connected with the horticultural interests of Chicago for several generations. He was the son of Dr. John A. Kennicott, a noted nurseryman, fruit grower and botanist, who was proprietor of "The Grove," and for many years Editor of the *Prairie Farmer*, secretary of the State Board of Agriculture, besides holding other important offices.

Flint was born at the old homestead, March 7, 1848. His early days, out of school, were spent in his father's nursery; but from 1868 up to the time of his entering the florist's business in 1884, saving two years, during which he worked with Fred Kanst in the South Park greenhouses, he was a theatrical man, being a member of the old McKicker's Theater Stock Company. He traveled much, and married his wife on one of the trips, in Georgia, by whom he has had three children—two daughters and one son.

Mr. Kennicott was well posted on all matters pertaining to the flower business of Chicago, and a talk with him on the trade in olden days was always most enjoyable. He was a genial, affable gentleman, and was at all times glad to impart from his fund of information to those desiring it. He was a member of the Chicago Florists' Club and of the Horticultural Society of Chicago.

Much sympathy is felt for the bereaved family.

American Rose Society.

The bulletin of the American Rose Society, with the proceedings of the year embracing the very able papers of Theo. Wirth, E. G. Hill and M. H. Walsh, is now in press and these papers with the discussions which ensued, in which some of the ablest men took part including Messrs. W. C. Barry, W. H. Elliott, John Cook, W. A. Manda, Adolph Fahrenwald, E. G. Hill and Patrick O'Mara, are well related.

The certificates to be sent to life members and the certificates for exhibitors of new roses, will soon be mailed.

The Chicago people are already astir with promise of everything that can be asked for to boom roses in every shape at the next meeting and the Western people say to the Eastern folk "Join us with both hands."

BENJAMIN HAMMOND, Secretary.

Fishkill-on-Hudson, N. Y.

Reflections on Current Topics.

MR. EDITOR.—Although the reflection is somewhat late, I, with your permission, would just like to state that I observe my friend McGorum has changed his sphere of operations; he has left the company of the "intelligent and intellectual," and has joined that of the fresh and frivolous, e. g., John Birnie, John G. Esler, Job and others of that ilk. I reckon he'll feel more at home there than when rubbing shoulders with the quasi-scientific fellows, whose "botany is all Latin names," and who do their best work as "authorities" on horticulture, with Nicholson's or Bailey's dictionaries at their elbows.

McGorum designates me "The Modern Don Quixote." But the only similarity between the hero of Cervantes and myself, known to me, is that each of us considered he had a mission. The knight-errant of old fulfilled his by tilting at a windmill; I fulfill mine by tilting at wind bags, horticulturally speaking. The results may be different in each case, but the fun afforded is very much the same, and both the Don and myself have got some pretty hard knocks during its enjoyment.

McGorum's Rip Van Winkle simile is not pat. You remember Rip rued having partaken of the contents of the bowlers' flagon, and was afraid to face Madame Van Winkle on that account. Such a plight might be John Birnie's; but Job's, never. I wear the trousers—always and under all conditions.

The Late Flint S. Kennicott.

Speaking of bowling reminds me that, from reports, the S. A. F. ladies must have had a high old time at that pastime at the recent Philadelphia convention. Jemima regrets exceedingly that owing to a slight indisposition, from which I have been suffering, she was compelled to stay at home and minister to my needs. Her intention was to be present at the meeting of the Ladies' Auxiliary and to bring up the question of more ladylike sports for the S. A. F. girls than the masculine one of ten pins. She is a firm believer in the originality of her sex, and sees no credit coming to the women folks in taking to games which the men have been indulging in for hundreds of years, especially in such nasty places as bowling alleys generally are. I was sorry to read that the staid old Quaker gentlemen of Philadelphia lured the ladies into this so-called sport by the offer of cups, silver huckles and other gew-gaws as prizes; and I hope that the girls did not go to the limit of imitation, of their liege lords by filling these

cups, and passing them round, at the close of the contest. However, the ladies are, I see, to select their own pastimes next year at Niagara Falls, and Jemima advises that they draw the line at bowling, potato and sack races, and go in for something modest and becoming, like "I wrote a Letter to My Love," etc.

It must have been a great convention at Philadelphia—quite a gingery one, evidently. After I have waded through the various reports I may find something worthy of reflection.

I was attracted recently by an article in your Boston contemporary bearing the (to me) significant title "Education for 'Job.'" Being of the opinion that one is never too old to learn, I eagerly began a perusal of the contribution; but had not gone far when, alas! like many another, I found it but a mere harangue, a series of quotation and misquotation, and an irrelevant flagellation of Scotland and Scotsmen, with a few extracts from speeches of admirers of Linnaeus thrown in for good measure. The author of this literary "crazy quilt" is Robert Cameron—a man, too, to whom I suggested the rearing of a monument for the work he had done "in the interest of science." Wouldn't that jar one? And all this remarkable effusion is the result of my remark that many men, who have done more for mankind than Linnaeus ever did, are still without monuments. I stick to that opinion, one which the quotations from the eminent scientists, given by Mr. Cameron, cannot change, for they, too, are but the eulogiums of hero-worshippers, as was, in its way, Mr. Cameron's little lilt laudatory of Linnaeus. Had the panegyrics proceeded from plebeians, setting forth how Linnaeus had "made the world a better place for them to live in," instead of from some of the scientific aristocracy, then would there have been some reason to believe Mr. Cameron's quoted assertion well grounded; but the "pesky botanists," as Brother Falconer calls them, and their followers, are but a small fraction of mankind; and no sooner are they made happy by Linnaeus, the "great" man, than they immediately go to work and make themselves (and others) miserable, by nudoing a large part of what the talented Swede accomplished.

Mr. Cameron is sure I have never read the life of Linnaeus, and so out of the fullness of his heart—and knowledge—he at once enlightens me by saying the father of the naturalist was a minister and that his son refused to follow in the sire's footsteps, preferring rather the career that made him "the great man," Mr. Cameron and other great men consider him. Then our good friend launches out into a diatribe against Scotland and her religious creed, with its "narrowing" influence on Scotsmen generally, with whom, by some occult process of reasoning, he classes "Job." (Evidently, in his extensive scientific reading Mr. Cameron has failed to peruse Job's autobiography recently published in this column.)

It may be that Linnaeus's intimate knowledge of his sire and his class was accountable for the naturalist's aversion to donning the "broad cloth," but I cannot just guess what is responsible for Cameron's grudge against the clergy, unless it be that at some time or other one of the cloth may have threatened him with consignment to that "Bottomless Pit," when he "was groping in the dark" on his native heath; for as far as my information goes my good friend hails from the Thistle Land. It is somewhat strange, that from the same "influence of past generations and environments," alleged to be responsible for the "narrowness" of Job, there should have emanated a man so broad-minded as Mr. Cameron, who can so deliberately disparage his own people and their religious creeds. Scotland may be guilty of many sins, but, I think, the greatest one that can be laid to her charge, is that she has produced men of the Cameron stripe who go back on their country and kin. The Harvard man should read Scott and Burns to instill into him the patriotism he seems to lack. These men's works would benefit him, as they have benefited mankind generally, an evidence of which is found in the many monuments raised to both in appreciation of their worth to the world, more than any life or work of Linnaeus ever can do. They, too, "preached about the beautiful things in nature." The blooming broom, at the first sight of which Linnaeus is said to have fallen on his knees enraptured, has received equally high admiration from Burns, though in a less fanatical manner. But why continue? The talented Swede is entitled to the credit he has gotten for what he did in his own way and in his own line; but the results of his labors have gone but a small way to "make the world a better place to live in." The twaddle furnished by Mr. Cameron and his friend, George Moore, another purveyor to "the intelligent and intellectual" is but the ranting of enthusiasts carried away by conceit in themselves and the supposed value to the world of their profession, and in no way changes the opinion, disconcerts, or adds to the education of Job.

AMONG THE GROWERS

Floral Park, N. Y.

It was our privilege a few days ago to spend several hours on the extensive bulb farms of John Lewis Childs, under the guidance of the superintendent, Mr. I. Hendrickson.

At the time of our visit the gladioli fields were ablaze with hundreds of thousands of blossoms, the varied hues dazzling in the sunlight and presenting a picture the like of which it would be impossible for any artistic genius to reproduce on canvas. Recent rains had added much to the beauty of the growing plants, and every tree and shrub in the fence rows, as well as the plants in the fields, were full of vigor and beauty in every leaf and flower. It is truly an inspiring sight to gaze upon acre after acre of gladioli when they are in full blossom.

Upward of 125 acres are devoted entirely to gladioli, and among the seedlings we noticed many that show great improvement over present commercial types, in both the size of their flowers, the length of the spike and in the constitutional vigor of the plants. Particularly noticeable is one that has been recently exhibited under the number 27, and which, by the way, elicited much favorable comment in the exhibit of gladioli shown by Mr. Childs at the S. A. F. convention held in Philadelphia. This variety (number 27) has since been named Alaska. It is a pure white, flowers very large, and possesses a very vigorous constitution. The spikes are unusually long and the flowers are distributed so as to face all one way, a feature most desirable in gladioli.

Another seedling (number 106), a delicate lilac pink flower, slightly marked, also struck us as being a very desirable variety, and one that will be serviceable either for cut purposes or planting for effect, if ever it is disseminated.

Mr. Yerkes, the gentleman who has charge of the hybridizing of gladioli here, is of the opinion that just as good results can be obtained from natural crosses as is possible with careful, selected hand hybridization.

The collection of named varieties seems to be almost innumerable, and in a short article like this we can only attempt to mention a few, those which to us would seem to be the most desirable for florist purposes.

George Paul, a crimson variety and very similar to the variety Harvard, is a most desirable one in its coloring.

F. L. Oakley is a pleasing, salmon tinged scarlet.

Sulphur King, a beautiful and most desirable shade of yellow, is perhaps the best of all in this color.

As a mottled variety, Jay is among the best. Wild Rose is a very pretty blush pink variety; and among the rosy-crimson colored we noticed a very pleasing one named Roseann.

Contrast, the variety herewith illustrated, is a very beautiful scarlet with a white throat. The name given is very suitable and descriptive of the variety, as the contrast presented by the scarlet and white combination is both a pleasing and effective one.

To those desiring a variety possessing peculiar blending of colors, Lydia is one to be recommended. This is a mottled one that is certainly in a class by itself, so far as fantastic coloring goes. Cardinal is all that the name implies in its color; Melrose is a charming pink with a crimson throat, a very desirable one. Los Angeles, a pink one with lilac markings; Scribe, a blush white with rose markings; Lowell, pink and carmine striped; Attraction, a dark crimson variety with a white throat, are all excellent kinds, and should be included in every collection.

The nearest approach to the blue shade in gladioli is seen in the variety Blue Jay, also known as Baron Hulot. This is a deep indigo shade and a valuable addition to the list of named gladioli.

In a batch of seedlings that have been obtained out of a collection of mixed blue shades obtained in Europe, there are many promising sorts seen, each of which gives evidence, not only of pleasing color shades, but also of increased vigor and constitution.

That superb variety, America, is, of course, seen here in great quantities. The charming shade of pink so peculiar to this variety, together with its extraordinary size and number of flowers, has placed this sort at the head of all gladioli to-day. A very beautiful companion to America for planting for effect is the variety Blanche, a white of extra size and finish, though perhaps not so serviceable for cut flower purposes, the flower not having the substance that is possessed by America. As a companion to America for cut flower purposes, the variety Alaska when disseminated will fill the bill to a nicety.

Mr. Childs has over 200 acres of land under cultivation, and, in addition to the gladioli, there are immense quantities of bulbs and seeds grown to meet his extensive trade. We use the word "extensive" advisedly, for we believe the mail order trade done by Mr. Childs is the largest in America, if not on the entire globe.

Speciosum lilies are grown in almost endless quantity and in many varieties. *Lilium tenuifolium*, always

a favorite where garden lilies are grown, is one also that is grown in numbers. *Lilium Philippinense*, the Philippine lily but recently introduced, is represented by a goodly sized plantation, as also are such well-known bulbous plants as montbretias, bessera, caladiums, tritomas, oxalis, tigridias, ismene, richardias, etc.

Among the callas, several varieties are grown in quantity, but head and shoulders above them all stands *Richardia Elliottiana*, a beautiful, clear yellow flower—unlike any other yellow calla in its purity of coloring and in its freedom in flowering.

In the seed growing farm beautiful strains of phlox and zinnias are being carefully cultivated.

The collection of cannas embraces most of the well-known leading varieties, and they were in full flower at the time of our visit, presenting to view a very pleasing picture, and one most gorgeous in its coloring.

In the greenhouses belonging to the establishment, much space is devoted to gloxinias, the selection and growing of which, through years of careful work, has resulted in a very superb strain of bulbs, and for which there is a great demand. Fancy leaved caladiums form another specialty that has been carefully nurtured for

the best, the fronds standing up so well. At Messrs. H. Low & Company's N. Whitman was noted in perfect form. It appears that all are inclined to vary and it will need careful selection to keep any of the varieties true to character. N. Pieroni as first introduced was very pretty, but I have noted that in several instances it has run away from the original character.

Messrs. Brickett & Son's variety—cordifolia tessellata—which was given an award of merit by the Royal Horticultural Society, is a good fern. When calling at their nursery recently I noted that they were working up a fine stock from divisions and it appeared to keep its character well. I also noted a very large batch of seedlings which had been raised from it, but they were not sufficiently advanced to be able to judge if they would prove true to the parentage, yet the probabilities are that some further interesting varieties may be found later on. A great feature at this nursery is the enormous quantity of pteris grown; they may be counted by tens of thousands, varying in sizes from those in the seed pots up to large specimens in 6-inch pots. Although only market varieties are grown here, the proprietors have keen eyes for detecting any chance variation, and in all the sorts grown the best types are seen.

At Messrs. J. Hill & Son's nursery *Asplenium nidus* remains a special favorite; house after house of plants in various sizes are seen. All the choicer sorts are well looked after here, and some importations from South America seem likely to prove valuable.

When visiting Messrs. B. Mallar & Son's nursery I found that although we have had such sunless weather all the ericas were looking remarkably well and promise to set well for bloom. The *gracilis vernalis* was already well in flower (or, at least, some of them). The bononias are well grown here; also epacris and several of the best varieties of acacias, including Drummondii, cordata, ovata, armata and others. The New Holland and Cape plants are falling out of cultivation with many, and it is interesting to note that some of the most useful are being well cared for.

Messrs. H. Evans & Sons are also large growers of ericas, etc., and their stock this season is equal to any we have seen in former years. I also noted that they were well prepared with young stock for the following season.

At J. Fraser's nursery, I noted that cyclamen and bouvardias are well grown. The hybrid crassulas are also a feature; but the glass department at this nursery is only a minor detail, the roses, fruit trees, forest trees and hardy climbers being specialties of more importance. It is the only nursery where I have seen *Magnolia grandiflora* in its best form; the firm has been celebrated for this and *Lapageria rosea* for many years and the stock at present is large and of good quality.

At A. Smith's nursery, I found he was fully sustaining his reputation for carnation growing, Britannia (of which he is the raiser) was the most vigorous of all the sorts noted, and filled several large houses. One house, 100x25 feet, filled with Mrs. H. Burnett, showed this variety in its best form. A few blooms that were open were very fine, and the growth of the plants all that could be desired in a carnation. Many of the carnations were already housed, August 29, but large numbers remained outside awaiting the completion of three houses, each 200x30 feet. Most of the plants are grown in from 6 to 8-inch pots, and it is quite the exception to find more than one sort in each house.

In the leading chrysanthemum growers' nurseries, I find that although trade was bad last season there is no diminution in the numbers being raised this year. At Messrs. Prickett & Son's Nurseries they have over 6,000 in large pots, all in the best condition, but they appear to be later in setting their flower buds this season. At Messrs. C. Banks & Company's, which is close by, an equally fine stock is grown. Mr. Thompson, who is another large grower, has a very healthy stock. At this nursery a general collection of greenhouse plants has been grown for many years, large ranges of new houses have been erected, and these as well as some of the older plant houses are now being utilized for tomatoes and cucumbers. The pot plant trade having come to such bad prices, cut bloom and the above will receive attention and most of the pot trade be dropped.

At H. J. Jones's nursery I noted a large collection of hybrid fuchsias; these were chiefly of the corymbiflora, triphylla and fulgens types and included some very distinct varieties, several of which should prove valuable for florists' work. They are chiefly of Continental origin and have most unpronounceable names; and although I do not as a rule believe in renaming I think a departure might be made with these, for who would remember how to write such a name as Furst Otto von Wernigerode, or, Gartenmeister Bonstedt (these are two of the best varieties). Andenken Au H. Henkel is another good variety. Mary, a variety which I first saw from W. J. Godfrey, is one of the most desirable; it has long, narrow leaves and long terminal corymbs of rich crimson flowers.

Gladiolus Contrast.

Introducer, J. L. Childs, Floral Park, N. Y.

many years, and the collection on hand is a choice and comprehensive one.

Among the palms *Phoenix Roebelinii* is the leader. This variety, while not new, has only of late years been seen in quantity, and while thousands have been shipped to all parts of the country from this establishment during the last year or two, there are hundreds of thousands of seedlings in sight, and it goes without saying that the hardness of this palm, together with its pleasing decorative qualities, are such, that there will always be a good demand for all the salable plants that can be produced.

Our London Letter.

By A. Hemsley.

NURSERY NOTES.—At the fern nurseries I find that quite large stocks of the newer varieties of *nephrolepis* have been worked up. It is still difficult to say which is really the best, for I find culture makes so much difference. It would be difficult to imagine anything more beautiful than *N. todiaoides* as grown by Messrs. Rochford & Sons (the raisers); it is a perfect fern, but as seen in some nurseries it is a little too heavy. *N. elegantissima* at Messrs. H. B. May & Sons was one of

CLUB AND SOCIETY DOINGS.

NEW YORK FLORISTS' CLUB.—The September meeting of the New York Florists' Club was held in the new quarters, the Murray Hill Lyceum, 160 East Thirty-fourth street, on Monday evening last, President Charles H. Totty in the chair. Considering that this was the first session of the club following the Summer vacation, the attendance was quite good. The House Committee had a supply of refreshments on hand, which were enjoyed by all present.

In the course of the routine business, the semi-annual report of the treasurer was read, which showed a balance on the right side of the ledger of \$2,286.85. The Outing Committee made its final report, and turned over to the treasury of the club the sum of \$51.31. The committee was discharged with thanks. In a few remarks relative to the outing this year, Patrick O'Mara said that it was evident the agitation about taking some of the club's funds for prizes at this outing had resulted in a great amount of good. Mr. O'Mara also stated that he hoped at future outings some better method would be devised of distributing refreshments during the return journey of the boat, as much dissatisfaction had been felt owing to the fact that some people had more than enough of the good things provided and had to throw their surplus overboard, while others had not really enough to satisfy their hunger.

W. F. Sheridan, for the Board of Trustees, recommended that the fee for life membership in the club be made \$75.

Two names were proposed for membership: I. S. Hendrickson, Floral Park, N. Y., and Leonard Barron, New York City.

President Totty appointed a nominating committee, as follows: W. F. Sheridan, Patrick O'Mara, John Scott, John Birnie, H. Turner, Harry A. Bunyard and F. H. Traendly. This committee, in addition to its duties of presenting at the November meeting names for officers which are to be elected at the December meeting, was instructed to select two names as candidates for the office of treasurer to fill the unexpired term of L. W. Wheeler, whose resignation was made necessary on account of his leaving the city for California. The committee presented the names of W. F. Sheridan and John Donaldson, the latter declining the nomination in favor of Mr. Sheridan. On motion of R. Schultz, J. K. Allen's name was placed in nomination, and on a ballot being taken, Mr. Sheridan was elected, his election being made unanimous on motion of Mr. Allen.

Secretary Young read a letter from Mr. Wheeler, tendering his resignation, and also containing good wishes for the future welfare of the club. On motion of Mr. O'Mara the resignation was accepted with regret and the best wishes of the club tendered to Mr. Wheeler in his new home. The resignations of P. G. Mense of Glen Cove and H. C. Harris of Cambridge, Mass., were read and on motion accepted with regret.

Mr. Sheridan resigned his position as trustee, giving as a reason therefor that, as he had just been elected treasurer, it would be impossible to serve in the dual capacity of trustee and treasurer.

An appropriation of \$50 was voted the House Committee on motion of Secretary Young.

The routine business being disposed of, President Totty called upon F. H. Traendly to say a few words in regard to his recent election as president of the S. A. F. O. H. Mr. Traendly received a great ovation and in the course of his remarks, said: "I see that one trade paper has stated it was not the last convention that was worrying me; but the next one. I noticed there were some very warm sessions in Philadelphia, and I hope next year they will let me down a little easier. I am very proud of the honor the florists of the country have done me, and I wish especially to thank the members of this club for their work on my behalf. Seeing that the convention next year will be held in a city where there is no local club, and we shall have to rely a great deal on the help of the Buffalo Florists' Club, I hope that this club will also assist as much as possible. In regard to the national show, I feel sure that the club here will help to make it a great success. Some of our members have got the 'show bee' in their bonnet, and this would certainly give them a

grand opportunity to help in making a great success of the undertaking.

Mr. Bunyard being asked to say something about the recent convention, in the course of his remarks stated that he noticed there was the same old palm man with the same old palms; there was the same old bulb man with the same old bulbs; there was the same old supply man with the same old supplies, and he would like very much to see a change in the exhibits at these conventions. He could see no reason why there should not be good displays made of hardy and half hardy flowers and plants at that time, which would certainly add materially to the exhibition. Mr. Bunyard said further that while he was in Philadelphia he was working and not loafing, as many people were. The Florists' Club of Philadelphia had done so much to entertain the visitors that he would make a motion that the thanks of the club be tendered through the secretary to them for their kind hospitality, which motion was unanimously carried.

Rev. M. Pratt, sweet pea specialist, being present, was called upon by President Totty to make a few remarks. Mr. Pratt spoke enthusiastically of the work that a club like ours could accomplish in furthering the love of horticulture among the working classes. He spoke about the great good that had been done in England by the holding of exhibitions, citing cases where the artisans of some of the English towns had become so expert in the culture of certain plants that it was not uncommon for them to win prizes over the heads of professional gardeners. Mr. Pratt urged the securing of a permanent home for the New York Florists' Club, and felt sure that some method could be devised whereby that could be accomplished.

Secretary Young was the next speaker, and gave a graphic and interesting account of the recent convention from his point of view. He spoke particularly of the efforts made by the Philadelphia Florists' Club to entertain the delegates, and he felt sure that they had done everything in their power to make the visitors feel at home. He also urged that every member of the club put his shoulder to the wheel and help in every possible manner, so as to ensure a large attendance from this city at the next convention of the S. A. F. O. H., and make the administration of our fellow club member, F. H. Traendly, as president of the national society, a grand and glorious success.

J. Austin Shaw, being called upon to give a talk on the convention, responded with a poem, which he said had been written in collaboration with Rickards Brothers, they having agreed to put the poem to music and render the same during the evening.

Patrick O'Mara said he wished to re-echo what Secretary Young has said; he also stated that one of the great problems of a convention was to get the members to attend the sessions. At the convention next year, perhaps, there will not be so many social affairs nor so many sports, which are ephemeral; it is only the sessions themselves, or what is transacted there, that will be handed down to our successors and really convey what work is done at a convention. Referring to changing the name of the society, Mr. O'Mara said: "I do not see any reason why the man who does not sell the products of his own skill cannot get into this society. It is broad enough to command the fealty of everyone."

John Birnie said that while the room in which the convention meetings were held in Philadelphia was too warm, it was nice and cool in the place next door. Everything, he thought, had been said about the convention that could be said, and the only thing that he would like to do now would be to present his condolences to the Rickards Brothers, who will have to adapt the music of "Auld Lang Syne" to the poem that had been read.

Mr. Turner of Castle Gould, L. I., then recounted his experience at the convention, after which the meeting adjourned.

On the exhibition table a collection of twenty-seven varieties of gladioli were placed by John Lewis Childs of Floral Park, N. Y., among which were such varieties as Melrose, Cardinal, Wild Rose, Deborah, Governor McCormick, Francis King, America, Blanche, Harlequin, Splendor, I. S. Hendrickson, Lizzy, William Falconer, Admiral Dewey, Attraction, Princeps, Dr. Hogg, Contrast, Alaska, etc. Highly commended was the verdict of the award committee.

Harry Turner of Port Washington, N. Y., showed six plants of a new strain of *Celosia pyramidalis*. Each of the plants was dissimilar in color, but the flower heads all showed the same character. A tasselled form of celosia, different from any we have ever before seen, is one that not only is very beautiful but, we think, a valuable addition to the celosias. Mr. Turner informed us that this strain is the result of careful hybridizing, using the best English strains to work from and is fixed so that the type comes true from seed. The committee awarded this exhibit a certificate of merit.

At the Home of Primroses.

The illustrations herewith present views of scenes at the establishment of John F. Rupp, Shiremanstown, Pa. Mr. Rupp is well known as an expert grower of primroses, the seed of which he disposes of in large quantities. He also grows a general line of other stock, in the cultivation of which he is very successful.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words: each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 6297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Washington, D. C.

GUDE BROS., 1214 F Street, N. W. We excel in high-class flowers and design work of every description; quick service, reasonable charges and liberal treatment have placed us on top. Try us.

Milwaukee, Wis.

THE C. C. POLLWORTH CO., Wholesale Florists, will take care of all your Retail orders for the delivery of flowers anywhere in Wisconsin.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BEEDELMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

FOR THE RETAILER

For reproduction on this page, we solicit from our readers engaged in the Retail Trade, good, clear photographs of subjects that are of general interest, such as store interiors, designs of different classes, new delivery wagons, etc.

Flowers at Funerals.

In the Australasian National Nurseryman is a report of a meeting of the Nurserymen's Association of Victoria, in which appears a discussion on flowers at funerals, of which the following is an extract:

"The chairman said that his attention had been drawn to the agitation against the distribution of flowers at funerals. It might not be a matter for the association to interfere with, but it seemed strange that ministers of religion should trouble themselves about the matter. The expense of supplying flowers at funerals was not taken out of the church funds, and why anyone should interfere with the time-honored custom of paying their tribute of respect to the dead many failed to understand. It seemed a very small matter for ministers of religion to interfere with. He felt inclined to ask them to mind their own business. (Several members: 'You're about right.') The flowers came from friends and relatives of the deceased as a token of respect and a last tribute to their memory. The flowers did not come from the deceased, but from friends, and it savored of interfering with the liberty of the subject. (Hear, hear.) It would seem rather harsh if they admonished their friends for leaving a bunch of flowers on the grave of one of their relatives or friends. (Hear, hear.)"

It does not appear from this on what grounds ministers of religion object to flowers at funerals. Our earliest recollections are of flowers being connected with these occasions. Friends bring them to the house as a last token of affection for the one they have lost, and because they feel it to be the last thing they can do for the dead. And many of us know of cases where the living have decorated the graves of the dead weekly for years. If there were displays of flowers for ostentation's sake it would be proper that ministers rebuke it, but such cases are rare and do not detract from the commendation which the general display of flowers by friends as it now exists deserves.

J. M.

National Council of Horticulture.

There will be a meeting of the National Council of Horticulture at the Inside Inn, Jamestown Exposition, Va., immediately after the second session of the Congress of Horticulture on the afternoon of September 23, 1907. It is hoped there will be a good attendance as matters of importance on the future policy of the council are to be considered.

Three of the national societies—seedsman, florists, and nurserymen—have each appropriated two hundred dollars toward the press bureau work of the council for the coming year. Plans for conducting this work should be worked out. Other matters which may be presented will be given all possible consideration.

All national horticultural bodies are invited to be

Up-to-Date Retail Management.

(Paper read by Mr. Brown, Manager The Rosery, Toronto, before the Canadian Horticultural Association, London, Ont., August 29, 1907.)

By "Up-to-date" we must mean successful, and the success of a business is largely due to the individual.

Necessary Qualifications.

The qualifications are so numerous that for one man to be possessed of all, or even a majority of them, he would indeed be remarkable. Decidedly the most important qualification is executive ability, followed very closely by magnetism, an almost super-human foresight, then in succession to suit our opinion, temperament, control, artistic taste, appearance and fluency of speech. The first obstacle to face the managing head of a retail establishment is confidence; if he be owner the confidence of his assistants, if he be an employee the double difficulty of gaining the confi-

force upon them a dollar's worth more, and create in another flower buyer the impression that florists are robbers. When you do find a customer who seems to think that he is being taken advantage of, tell him carefully, a few of the difficulties of procuring such flowers at such a season. This is where fluency of speech is necessary, but be careful not to overwork it. There are some with whom it would be better to laugh it off. Study your customer, and also remember a fine bunch with one, is twenty dollars' worth, with another, fifty or seventy-five cents worth.

Don't suggest orchids to a carnation pocketbook if you can help it.

Always make it a pleasure, and never appear condescending in executing any commission for those who patronize you.

If you are clever, if you have the tact of gaining the confidence and respect of your trade, you can very soon create the kind of trade that is both profitable to you and advantageous to them. Teach

gins and ends. Let us consider a case in point. Let us say that a grower has started to bring in some very fine carnations, and they are scarce, therefore we take all he has; a few weeks pass and the grade falls, or the grades of other growers improve, and are bringing in superior stock to our first man. We have only use for the best. We take it, and we cease to purchase from grower number 1; in my estimation we are justified. Unfortunately, owing to a dearth of commission houses in Canada, it is sometimes a hardship on the grower to force him to look for a new market when flowers are plentiful. It is an unfortunate situation, but a decided case of "survival of the fittest." Then again, we are in the habit of taking a majority, perhaps all, of the stock of a grower. The day dawns when we find ourselves with a surplus. The tendency is to expect the retailer to take all offered. Such being impossible, we are compelled to turn our supplyman away with the result in many cases of his being offended. There again is a problem for the retail management to overcome. The solution must be left to the individual, but remember, Mr. Grower, if you force your stock when it cannot be used you might "kill the goose that lays the golden egg."

from the legitimate to the ridiculous. The claim may be advanced, "Well, we can get that price and sell all we have." But that is very poor justification, and great lack of foresight. Let me give you, Mr. Grower, the experience of fifteen years' retail business under varied conditions, and that is, that not one-half of that early stock is sold by the retailer, but it is rather "consumed" in design work, and if it was not for the necessity of being so called "up-to-date," compelling us to carry that early stock, it would pay both branches of the trade, under present conditions, to keep it from sight and use the stock in designs until such times as sane prices should prevail. That season is fast approaching, and to me it has always caused the heaviest pangs of regret to see so many would-be purchasers turned away from our business, perhaps to return only when forced to do so by weddings or funerals.

Designs.

Another and always important point in retail management is the designing. In this connection it is entirely with the individual. Good taste is essential, and where there is any uncertainty in color combination don't do it, but rather keep

Group of Delegates at Annual Meeting of Canadian Horticultural Association, London, Ont., August 28 and 29, 1907

dence of his employer and fellow-employees, and I desire to impress the fact of the absolute necessity for confidence among those who are associated together for the success of their business. Where harmony is lacking, there will be little success, for where every sense of our artistic nature must be always on the alert, if there be discord, the finer touches, the little spontaneous actions, which go so far to make success in the flower business, are sure to be absent, and sooner or later our ever ready competitor will annex our trade.

Another great point is to gain the respectful confidence of your customers. The only way to do this is to be honest in your dealings. Let them see that you are ever ready and anxious to serve them honestly and well, teach them (do not assert) that you are more capable than they of choosing varieties and grade of flowers, and because your customers are wealthy do not imagine that they are anxious to squander their wealth in your establishment, rather you should sell them a dollar's worth less than

your trade that they may give you a specified limit of money, with perhaps a limited choice of varieties, and let you do the rest. The opportunity for increasing the value of your customers without antagonizing them is far greater by this method than any other I know. Also, you are enabled to move the stock that is plentiful and good, instead, as is very often necessary, when bound by a positive order, to give scrubby stock of an off-crop variety. There is one disadvantage in the preceding statement, and that is there is sometimes a temptation to take advantage of your opportunity, and palm off poor and long-kept flowers. Don't do it if you value your trade.

The Purchasing Department.

I now come to the section of retail management, where real difficulties are faced, where the greatest uncertainty prevails, where, if there be any lying awake at night, we can always look for the cause—the purchasing department.

I feel that in beginning this section, I am, perhaps, laying myself open to severe criticism, but it would be unfair of me to pass without mentioning this most vital part in retail management.

We have here the greatest opportunity to show our fairness and honesty, but the open question is where fairness be-

Advertising.

In advertising a retail business, and we are strong in the belief that "it pays to advertise," there are splendid opportunities to show good management as to the kind that pays best. I will leave to the over-zealous lady with program space in a good cause to explain to you.

Variation in Prices.

One of the chief obstacles of the retail manager, and a subject that needs rapid and up-to-date adjustment, is the unstable and unjust prices that prevail in some varieties at the beginning of their season; I will mention the chrysanthemum. Why should we be compelled to pay prices that range from twenty-five to fifty cents at the beginning of the season for stock that later would go begging at ten, is more than I can understand. It is unjust and unreasonable. Unreasonable of the grower to exact it, and unjust to himself and the retailer, at the very commencement of the season, to drive away many would-be customers, who after hearing the price, gasp for breath and break for the open air, in many cases never to return. Thereby is lost a prospective buyer who would later in the season have helped consume the surplus stock that is so ruinous to the grower, in that it tumbles the price

to the tried and accepted. In passing, it might be well to remark that many colors that were supposed to clash are now quite acceptable. Take, for instance, pink and yellow. Enchantress and single daffodils are very beautiful under artificial lights; also pink and blue; Killarney (that wonderful rose) and pale blue ribbons form one of the most soft and artistic effects imaginable. I specify the above to show that hard and fast rules cannot be set in combination of colors in our business. The artistic taste of the retailer is tested here. Be very careful where you experiment, though.

A study of colors and color values would be beneficial to all of us, as flowers differ greatly in shades, according to the lights to which they are subjected.

The foregoing are only a few of the many questions that face the management of a retail flower store.

Up-to-dateness and success are greatly a matter of individual ability, backed by personal magnetism.

In closing, let me say to you, Mr. Manager, be honorable. Study the requisites of your particular people, keep active, profit by the experience of others, always try to improve, work for the mutual good of your customers; then you will benefit yourself and your associates, and if you have the executive ability, you are what I understand to be an up-to-date retail manager.

Up-to-Date Methods for Conducting a Commercial Florist's Establishment.

(Paper read by T. W. Duggan, Managing Executor of the H. Dale estate, Brampton, Ont., at the Convention of the Canadian Horticultural Association, held at London August 28, 1907.)

I have no recipe for making florists rich quickly, nor have I anything new to tell you. My only excuse for attempting a paper of this kind is my inability to refuse the request of our indefatigable secretary, with whom I wrestled for a period, and then became a victim, hoping that Blucher or night, or anything might come to help me out.

I do not know that many of the facts stated, or suggestions offered, will apply to all classes of florists, or greenhouses. I have not had the experience of very small beginnings, and indeed, as you well know, am not a florist by training, but have to do principally with the management of a large grower's trade.

I trust I may be pardoned for making references to myself, for I have no desire to obtrude my personality, or for referring to the Dale Estate, which is too big and prosperous to need advertising in this manner, but it will be impossible for me to contribute a paper on this subject without referring to our business and its management.

In the time allotted I cannot hope to refer to many items that should be governed by every day common sense, but in passing may say that no detail is too small to have our very best attention. In everything that is done, one's very best efforts should be put forth and no looseness allowed in any direction. Preachers divide their subjects into several headings and, while I am not much of a parson, I shall take the liberty of suggesting three main thoughts: first, character; second, capacity; third, cash; in importance in the order in which they are given.

Treatment of Employees.

Nothing in this world exceeds character. It permeates every part of life. The work of employees and the confidence of customers will be affected by the character of the management. We must give our co-workers every consideration, to be able to get out of them the "best possible," and to treat them in a spirit that will cause them to feel that they belong to the business, and are recognized, not as machines, but integral parts of the firm. Probably nothing touches a man quicker than the pocket, and I think that our growers, and other assistants who merit it, ought to be paid every dollar that the profits of the business will afford. It is our custom to revise the wages of the whole staff at the end of every business year, which with us is the 30th June, and give such increases as the merits of the men might reasonably call for, taking into consideration the annual profits. I believe that when men realize that their actions are being scrutinized, not for the advantage of the employer only, but also to give opportunity of reimbursing them, our men will work with a zest and consequent success that cannot otherwise be obtained. Since I have had the management of the Dale Estate, some seven years, the wages of our men have been materially increased, running from 25 to 50 per cent., and I do not know that we have arrived at high water mark yet. In connection with our business I have honestly endeavored to consider the financial obligation to them even more than my own, so much so, that while the above percentage of increase has been made since Mr. Dale's death, the executors have not asked for, nor received, any increased allowance, although the burden has been very much heavier, and the business five times greater than when we first took charge. Men, however, are not influenced by money consideration alone, and I have felt that it desirable to treat them, not as hirelings, but as associates, as good as I am in every respect, and make them feel in every possible way that they are necessary parts of our successful business, and to the visitor and public generally bring them forward as deserving of notice and praise. Out of business, too, I think they ought to be recognized as equals, which they are, and I believe it is possible to do all this and still have all the respect that is due to the management. Although we have a staff of about 120 men, more than half of them growers, we have remarkably few changes, and have not in seven years lost more than two or three men that we would have cared to retain.

Treatment of Patrons.

Allow me to turn away in the relation of character from ourselves to our patrons. In this respect I was glad to follow in the footsteps of the founder of the business, Harry Dale, than whom I believe a more honest grower never lived. His ideal was a high grading, and a stick to it under all circumstances, and it is well known to the trade that we have followed this out in every respect. The customer ought to know what

he may expect when he gives an order, and neither scarcity of stock nor any other contingency is an excuse for departing from the proper line of conduct. We believe it is very shortsighted policy for the grower to attempt to substitute a lower grade for a higher grade under any circumstances. It might pass unnoticed, or, being noticed, without comment by the consignee, but it is a suicidal policy that will injure the business. It will not do to get the confidence of your customer, and think you have him, and then take advantage of his trust. Every consignment ought to consist of stock selected and packed as if his business were dependent upon the result of that shipment, and once your customer believes that he can depend implicitly upon the character of the grower, his business is not likely to go elsewhere.

Capacity.

As to the second item, capacity, I do not pretend to be able to give the members of this association any pointers on how to grow stock. That is not the purpose of this paper, nor have I the ability to contribute anything in that direction if it were desired. There must, however, in any medium sized business at least, be some capacity for management as well as for growing. The late Henry Dale, who was a king among rose growers, and a very clever mechanic as well, had sense enough to recognize his deficiency in this respect. I remember very well his sending for me, and telling me honestly that while he could

may of course be made up as an adjunct to any town in the Dominion, and the business would likely be proportionate to the size of the town, but I believe every such business must be owned and have the personal conduct of the proprietor. I do not believe any small or medium sized business, say under 50,000 feet of glass, can be managed and made profitable by a company with directors, manager, and other officers to be paid out of dividends.

Modern Buildings Necessary.

There can be no question about the desirability of most modern buildings, with the best class of construction, very best quality of glass, frame work kept well painted, and greenhouses kept scrupulously clean. It is a positive hindrance to the trade and to our business success, and is, in my opinion, altogether inexcusable to allow greenhouses to become in the condition in which many are found through lack of proper care.

In connection with our business, which is wholesale exclusively, we have not thought it wise to have a retail store. When I joined the late Henry Dale, he had a retail store on Yonge street, Toronto, and I came to the conclusion that it was hardly fair to the trade, either there, or elsewhere, to depart even to this extent from our wholesale feature, and on my solicitation the store was closed. Mr. Dale lived to indorse my view as being absolutely correct, and I have not yet changed my opinion. Furthermore, we have lived up to our professions of selling to the trade only, and

of the orders, and has to use a great deal of head work in very quick time, is paid a bonus for satisfactory and prompt handling of orders. So rapid has the system become, that at times we have received a telephone message, packed two boxes, and reached the railway station in time for the express train nearly half a mile away, in so much less than five minutes that if I were to tell you exactly you might doubt the statement.

Division of Labor.

Before passing this item of capacity, I might say that I have found it of great benefit to divide the responsibilities of work in the greenhouses. We have a general foreman, under whom are assistant-foremen, one for each department, viz., one for engineering work, one for steam fitting, two for roses, one for carnations, one for chrysanthemums, one for valley and orchids, and so on in the different departments. These men are in immediate contact with the other members of the departments who are advised by them. When the management, or the foreman, or one of the assistant-foremen, desires to offer any suggestions (and such are always courted), or to make any changes in plans, a cabinet meeting is held by the manager with the foreman and his assistant foremen in consultation, and at intervals meetings are held for the discussion of things that pertain to the Estate; in this way not only showing confidence in these men, but bringing about results that are often beneficial. These men are specially considered and remunerated at the end of the year, and in instances where suggestions have been made by growers not holding special position, where the Estate manifestly benefited by the thought, immediate recognition was given, and a knowledge of these facts is bound to give valuable help to the management.

Advertising.

As to advertising, no rule can be laid down for any one business. We have never done much advertising, because most of the time the demand for our goods has been greater than the supply, but where we have had stock to offer in unlimited quantities we believe it has paid us to advertise in the trade journal, and I refer, of course, specially to our own Canadian journal, which is improving so much in every respect, and ought to be patronized. There can be no question about the advantage of advertising if you have stock that ought to be sold, and there is any uncertainty as to the demand. Advertisements should be honest, fresh, and to the point, not leaving them in week after week without any change, and in some cases longer than the season of the goods spoken of. For instance, I have seen in our trade journal, carnation cuttings advertised when all carnation cuttings had been sold, and the season too late for sale, even if any existed. Furthermore, I believe in plain facts being stated, and not so-called funny or smart phrases, which, to my mind, do not appeal to the up-to-date man of business. For instance, I have just received an advertisement with an imitation fishing line and hook, headed "Do you hook on?" I was not the kind of sucker to be caught by that kind of bait, and at once threw the advertisement into the waste paper basket without further reading.

(To be continued)

New Geranium Dagata.

Courtesy Richard Vincent, Jr. & Sons Co.

grow roses, do steam fitting, and other mechanical work, he felt that the business must have some better management than he could give to it, and asked me to join him and take charge of that part of the business. The results speak for themselves. A doubling up of this nature, or even a partnership, may not in many instances be either wise or desirable, even to get the benefit of business training, but there ought to be, on the part of the grower, a study of up-to-date business methods as followed in the building up of other concerns, and a certain portion of time given to that phase of the situation. Where possible, one of the family ought to be trained for business, as well as for growing stock, and in this way be able to give assistance as the older heads become incapacitated.

My five years with Harry Dale, and subsequent seven years, have taught me that growers have something else to think of besides producing their wares. In beginning a business there must be first the consideration of situation. I believe that no business of this nature can be established very distant from a large city with very much hope of attaining any great size, partly because of the benefit of the adjoining city trade, but principally because of good railway facilities, which are vital to building up any large greenhouse trade. While Brampton is not a large town, it is practically in the suburbs of Toronto, having the immediate benefit of all the railways centering in that city. A smaller business

not to the public, with this exception, and at rare intervals, where a demand for our flowers comes from a locality far distant from any place where our goods are handled by the trade, and there has not been time to direct service elsewhere, rather than disappoint, we have filled the order. This trade is discouraged, however, is not desired, and never given heed to, excepting where a refusal would carry unnecessary disappointment. The public, however, cannot in any instance obtain goods from us direct in any town or city where our goods are handled by the trade, and we believe that growers cannot be too particular in this respect. It is a duty to our customers that will pay, as well as make us feel that we are living up to our professions.

Promptness.

Another requisite that is exceedingly important is promptness. The cut flower business calls for quick action, and there must be no loafing or dilatory conduct in the way an order is handled. The trade is always a quick one, and must be handled with alacrity. An order that is expected to-morrow morning ought to arrive then, so far as we are concerned. Our driver, for instance, who has the important position of taking our consignments to every express train that leaves the town, is paid so much per week, and a bonus every week that trains are not missed, and I might say that not more than twice a year is a bonus missed. Our head shipper, too, who has charge

New Geranium Dagata.

Among the newer geraniums there are some of very special merit, especially in the Brunt race, which comes nearest to the American type, and in Dagata we have an ideal variety the premier of the 1905 novelties and the grandest of all of M. Brunt's many magnificent introductions which are acknowledged to be the standard of geraniums the world over and represent the highest development of this plant at the present time.

The plants are dwarf, robust but compact growers; the foliage is extremely large, the leaves sometimes measuring ten inches in diameter, of a heavy leathery texture, dark green with slight zone. The individual flowers are semi-double and magnificent in size and substance; the trusses are gigantic being as large as hydrangeas, and are produced in marvelous profusion on long stiff stems. The color is a remarkable shade of rose mauve with a large blotch of white at the base of the upper petals, having the appearance of a white throat. The plant has all the good points of the Brunt race, such as perfect habit, growth, resistance to all temperatures, uninterrupted bloom, and ease of cultivation, making it the finest pink geranium that we have for all purposes. We predict that it is the coming pink geranium. It has been favorably commented on in the Revue Horticole, the leading French horticultural journal and won the highest honors at the International Floral Exposition in Liege.

R. A. VINCENT.

White Marsh, Md.

(27) **Ants in Chrysanthemums.**—Is there anything which could be applied to plants in a chrysanthemum bench, without doing injury, that will stop the ravages of the white wood ant? They started to attack plants in a small portion of the bench, but are spreading to an alarming extent, and there is danger of the whole bench going to ruin.

Maryland.
H. W.
—To check the ants from spreading over the benches make a mixture consisting of one-third Fowler's Solution of Arsenic and two-thirds common sugar syrup. Scatter a few drops of this near the ants' runways. To keep the ants from the plants, syringe with warm water in which carbonic acid has been dissolved at the rate of one ounce of acid to one gallon of water. Give a second application in a few days, if necessary.

(28) **Red Spider and Thrips on Asparagus.**—We would like to know of some safe remedy to clear our smilax and Asparagus Sprengeri of thrips. We enclose a sample of Asparagus Sprengeri that seems to be affected with rust. If so, would like to know the cause and a remedy. We grow all on raised benches in high and light houses.

New Jersey.
C. B.
—The spray of asparagus sent for examination was infested with red spider, to get rid of which, forceful spraying of clear water should be given every favorable morning. For the thrips, try spraying regularly with one of the tobacco insecticides. See that every part of the plant is covered when spraying, and repeat the operation at intervals of two or three days until the insects are destroyed.

(29) **Disinfecting Manure.**—What chemical can I use with pig dung to entirely destroy the odor?

Massachusetts.
H. Q.
—We do not know of any chemical that has been used for that particular purpose, though we presume any drugist will be able to supply a disinfectant that will answer the purpose. If it is desired to use the pig manure for a fertilizer, it is safe to say that if chemicals are used with it to kill the odor, the fertilizing properties of the manure will be destroyed to a certain extent, and we would suggest that instead of using any disinfectant, the manure be mixed with other barnyard manure, and allow the whole to become thoroughly decomposed before using.

(30) **Lettuce in Cold Frames.** Is it possible to grow a marketable crop of lettuce in cold frames for the trade during the holidays? Could it be grown under plant bed cloth, or would glass be necessary? What variety of leaf lettuce would you recommend, and when should I start the seed? What distance in the frames would you recommend?

Pennsylvania.
SUBSCRIBER.
—In order to produce good lettuce for the holiday season it is necessary to have a warm and light greenhouse, and we think it would be folly to attempt lettuce culture in frames with the idea of having a crop fit to market at that season of the year.

(31) **Treatment for Carnation Victory.**—Will you kindly outline treatment for carnation Victory? It did not do very well with me last season, many blooms coming semi-double. Perhaps soil was too heavy or house too cold.

New York.
M.
—Mr. Webber, one of the introducers of Victory, informs us that the variety does well with a night temperature anywhere from 48 to 52 degrees, 50 degrees probably suiting it the best. His soil is a sandy loam, and the plants do well, but there are some growers who have been very successful with Victory and who have a heavy soil. So far as general treatment goes, the variety has done finely growing in a house planted to other kinds also, and Mr. Webber believes that the same general treatment afforded other varieties of carnations will be equally successful with Victory.

LAGER & HURRELL, - Summit, N. J.

Experience with Lilies for Easter Trade.

(Paper read by A. Gilchrist, Toronto Junction, before the Canadian Horticultural Association, London, Ont., August 28, 1907.)

Be on time with your Easter lilies. It is just as important to be in time with your lilies as it is to catch the last train for the convention. A few days late with your lilies and all the profit of the Easter season is gone. You may try to persuade yourself that the weather, or the bulbs, or something else is the matter, but remember you are the main factor in the affair. Don't depend on luck to have your lilies in bloom. Some of you will doubtless remember the old rhyme who tried to make poetry out of this and it turned out to be philosophy. Perhaps it is worth repeating here. What he had to say might save you a world of trouble on other occasions than lily forcing. He said, "Luck is pluck with your sleeves rolled up, working to make it come out. Bad luck is sitting on a stump with a pipe in his mouth waiting till it comes out." This subject of lily forcing for Easter has been treated so often by practical men, and in every conceivable way, that I cannot add anything new on the subject. However, as I understand that the title of my paper is my experience, I may state the case squarely—my experience differs very little from other growers. I have been uniformly successful since I started to grow lilies in having them in on time for Easter, not missing one season. I attribute my success to care and to having a command of temperature, in different houses, carrying them from house to house, so that they may be all in on time, keeping in mind the fact of \$10 to \$12 per 100 blooms, or after Easter \$3 to \$5 per 100, a profit or loss in the season's crop. In leaving your lilies in one temperature there will be from one to six weeks in difference of time in flowering. To have them all come in on time requires constant care and attention, and if there is more work attached to removing them from house to house, yet "Happy is the man who takes pleasure in his work."

Differences in Bulbs.

How to procure good bulbs is a more difficult matter than the growing of them. Bermudian Harrisii were, at one time, all that could be desired, but alas, greed and cupidity have destroyed the business. Of the last lot of bulbs I bought for Harrisii, only about five per cent. were Harrisii, the rest being a poor quality of diseased longiflorum. I have given up Bermuda stock altogether, and depend on Japan bulbs. Here again the little brown man is immoral commercially. The ordinary longiflorum is generally a mixed lot. For convenience I will classify the different types, number 1, short, narrow leaves and more floriferous than the other types, really the only type worth growing; number 2, long, broad, leaves with few flowers; not profitable; number 3, leaves incurved, dwarf, few or no flowers. As soon as I detect this sort I dump them on the rubbish heap, for it does not pay to give them room in the house. The multiflorum, if you can be sure of getting them true, are really the best, but I have been disappointed again and again in purchasing this variety. I have ordered from reliable men, but they are helpless in the hands of the growers who are entirely to blame. The Azores lily bulbs have proved more reliable, comparatively free from disease, much easier to force. Their only fault is that they have not

enough flowers to the bulb. No doubt this might be remedied by careful selection. It is a question in my mind if it would not be more profitable to use storage bulbs. They could be more easily grown and produce better results with the assurance of getting them in on time. They have now got the storage of bulbs down to a science.

As to Home-Grown Stock.

The next question to arise would be, could the bulbs not be grown profitably in some part of our own country? If they could be ripened properly it would be of less importance to secure them early. No doubt some soil and climate could be found within the bounds of our own country, then we would not have to go so far afield (7,000 miles), for our stock. Even if the bulbs cost more money to grow in our own country we might be reasonably sure of getting what we purchase. The experimental stations should take up this work and if successful, and a proper location found, capital and experience would soon take hold and make it a success, and a great benefit would accrue to the trade.

The lily is one of nature's gentlemen, coming in a pure, undefiled nature with beauty and fragrance. Man has done nothing to improve the lily. It has been said: "The lily has no poor relatives." However, a few more flowers to the plant would make it more profitable to the florist, and that is the line most to be desired.

Cultural Methods.

My mode of culture differs so very little from other growers that it is not necessary to take up your valuable time describing what you already know. But I shall state in as few words as possible some of the distinct features of culture. Have your soil prepared in the summer that it may be in good condition for potting when your bulbs arrive. Do not delay potting one hour after their arrival. Have good loam, four or five parts to one part of well rotted manure. According to the loam, rich or poor, I put 7-9-inch bulbs in a four-inch pot, shifting after they are four or five inches high and well rooted. After potting put them into a violet temperature. In this northern locality it is not worth while putting them outside, for it soon becomes too cold to make quick root action. I prefer keeping them very dry as they make stronger and better root. As soon as well rooted, gradually raise the temperature to 65 or 70 degrees. If buds are showing four weeks before Easter they will be on time, but it is safer to have them five or six weeks. Japan bulbs require hard forcing to get them in, especially if Easter is early. It is much easier to grow lilies than to tell you how to do it in a short convention paper. I cannot go into all the minute details of culture. Good judgment and experience are absolutely necessary. Taking into consideration the vagaries of the weather, the change of the date of Easter, lily growing is no sinecure. The public is able and willing to pay good prices, and there is no earthly reason why the florist should not have a fair remuneration for his labor. Do not get stampeded into the belief that lilies are too plentiful. The last few days before Easter will clean them all out. Some one had the audacity to say that florists were not business men. That may apply to the growers but not to the store men, some of whom I am sure would make a success in Wall Street.

Carnation growers who have a surplus of young plants should advertise them in THE FLORISTS' EXCHANGE.

THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

The best crimson carnation, if well grown. Fine plants 5c., second size 4c. ASPARAGUS Sprengeri, 3 in. pots, big, bushy plants. None better to be found 5c. 200 for \$9.00.

R. G. HANFORD, Norwalk, Conn.

WE HAVE A NICE, CLEAN LOT OF STRONG PLANTS OVER AFTER PLANTING, WHICH WE OFFER AS LONG AS THEY LAST, [AS FOLLOWS:

Mrs. M. A. Patten, Victory, Crimson Glow, Enchantress at \$8.00 per 100.

We have also some extra strong plants of Welcome at \$12.00 per 100. This variety is decidedly the best sport of Mrs. Lawson; it is rose pink in color and far superior to the parent. The New York Florists' Club award committee who saw it growing, scored Welcome over 90 points.

DAILLEDOUZE BROS., Flatbush, BROOKLYN, N. Y.

FIELD GROWN CARNATION PLANTS READY NOW

Strong, Healthy, Field Grown Plants of the following varieties:

Enchantress	100	1000	White Lawson	100	1000
Lawson	\$6.50	\$60.00	Robert Craig	\$6.00	\$55.00
Patten	5.00	45.00	Victory	7.00	65.00
Queen	6.00	55.00	Queen Louise	5.00	45.00
Lieut. Peary	6.50	60.00	Boston Market	5.00	45.00

250 of any one variety at 1000 rate.

NOVELTIES FOR 1908

HARVARD: Glowing crimson (the real Harvard color). This variety will take the place of all other crimsons as it is very free and the blooms are of the finest as to size and quality. It is a very rapid grower and the habit is ideal. Rooted Cuttings, \$12.00 per 100, \$100.00 per 1000.

FAUST: A brilliant scarlet. This variety will replace all of the commercial varieties of this color owing to its extreme productiveness, many plants last December having 20 buds and blooms to the plant. A fine one for the Xmas trade. Rooted Cuttings, \$6.00 per 100, \$50.00 per 1000.

REMEMBER WE GUARANTEE SATISFACTION.

REVIEW OF THE MARKET

NEW YORK.—There was a little better business doing last Saturday and Monday, occasioned, no doubt, by the Jewish New Year festival, and, for the time being, most of the good stock cleared out fairly well. Tuesday morning, however, trade resumed its Summer dullness and, taking into consideration the fact that the new crops of both roses and carnations are increasing daily, it can easily be understood that the commission man has quite a problem on his hands to find an outlet for his constantly increasing supplies.

Special American Beauty roses brought as high as 30c. each on Monday; many were offered at half that price on the following day. Bride and Bridesmaid roses range anywhere from \$5 down to 25c. per 100. Very few of the top grade are coming in, while of the bottom grade there are too many on hand.

Carnations as yet are rather short in stem and the price, of course, is governed accordingly; \$2 per 100 is considered an outside figure and not always obtainable.

Gladioli are coming in heavily, and are meeting with fair demand, as the prices remain low.

Dahlias are becoming more of a feature, and in addition to the cactus and decorative types that are in the market, some good single flowers are appearing.

Lilies that are perfect in flower and stem bring as high as 5c. each; there are some short-stemmed blooms arriving, however, that fetch less than half that price.

Asters remain quite cheap; \$2 per 100 is about all that the very best can be made to realize, and there is such a glut just now of flowers that seem to have suffered from the warm, damp weather, that the average returns must necessarily be disappointing.

The supply of lily of the valley is ample for all demands, and there is no change in values.

Smilax and asparagus have shortened up in supply, which is no doubt a good thing, as there is no particular demand just now for green material of any kind.

CHICAGO.—There is a steadily improving feeling apparent in the Chicago market with an increase in shipping and a seasonable call from the local dealers, with still more stock in several lines than can be assimilated readily. Roses, with the exception of American Beauty, gladioli and asters are all in bountiful supply. Carnations are improving in quality and increasing somewhat in quantity. It is apparently a sure sign that there will be plenty of Killarney this coming season from the fact that there are so many short stemmed ones coming in at present from young plants.

W. K. W.

BOSTON.—The past week has been fairly good for business all around. Flowers of first class quality are none too plentiful, consequently prices have been satisfactory. Asters are, perhaps, the most plentiful of any flower now in season, and there have been some good ones, too, which have commanded top notch prices. Of course, there has been a raft of smaller grades which sell very cheaply.

Roses are fairly good. Carnations are improving every day. Gladioli are plentiful, also, lilies cosmos are abundant; and sweet peas are better than they were a week ago.

J. W. D.

ST. LOUIS.—Business of late has shown but slight improvement. The retail trade is not yet steady and will not be so until all the society folks return home. All four wholesalers were loaded down with stock of all kinds last week, but that which comes in is as yet not what one would call first class, and the demand is slow. The only good call is for American Beauty. Long grades of these are a scarce article just now. Mediums sell at from \$12.50 to \$15 per 100; shorts, \$6 to \$10 per 100. Other roses, such as Bride, Bridesmaid, Richmond and Killarney, are not first class, and with short stems, making the price very cheap—\$1 to \$2 per 100. Maman Cochet roses, white and pink, sell at from \$1 to \$1 per 100, according to the length of stem.

Carnations are still coming in in poor shape; a few good Enchantress are arriving; most of the other stock is from the field, prices being not over

\$1 per 100 for the best. Asters are still very much of a glut, and many more come in than there is demand for, with prices cheap; the best go at \$2 per 100, but the bulk bring only \$1 per 100. Outside of roses, carnations and asters the market has not much, except tuberose, which sell at \$2 and \$3 per 100. Smilax, asparagus, fancy and common ferns are in plenty.

ST. PATRICK.

INDIANAPOLIS, IND.—The opening of the Autumn season has been a most generous one. Retailers, without exception, have been remarkably busy with funeral work, which affords relief for the masses of garden flowers at a profitable figure. Other lines of trade—counter demand and decorations—give evidence that vacation days are over.

Thousands of asters, a large part of them select ones, are brought to market daily. Prices generally are 75c. to \$1.50 per 100. Never before were there so many amateurs besieging the retailers with these flowers, which have grown luxuriantly in the dooryards this season. Cold storage Harrisii lilies are always welcome at \$12.50 per 100. Roses have made decided advances toward improvement in color, stem and foliage. Good Bride, Bridesmaid and Killarney are received at \$4 to \$5 per 100. Liberty and Richmond are selling well at \$5 to \$7 per 100. September American Beauty are worthy of praise at \$5 to \$25 per 100; many extra orders are received for them.

Carnations, with Enchantress leading are once more a factor in the market at 50c. to 75c. per 100; the demand for them is always strong. Hardy hydrangeas, in combination with highly colored flowers, are eminently adapted for large funeral pieces; \$3 to \$5 per 100 buys the best.

Green goods are a scarce article; any growers having good smilax will find immediate relief in the Indianapolis market.

I. E.

FIRMS WHO ARE BUILDING.

MERIDEN, CONN.—John J. Bonell is building a new greenhouse, 60 x 18 feet, for carnations.

PEEKSKILL, N. Y.—Dean Ferris is erecting a palm house and store and installing a new boiler.

MARION, ILL.—J. B. Copeland is enlarging his greenhouse capacity to meet the demands of his increasing business.

LONGMONT, COL.—William Butler and George Delude are building a new greenhouse as their growing business demands more space.

MADBURY, N. H.—William H. Elliott, is building a new greenhouse 1,200 feet long and 58 feet wide. His present greenhouse is 550 feet long and 50 feet wide.

ATHOL, MASS.—George Sutherland has made further additions to his greenhouses by building an extension to the main building out to a line with the new greenhouse.

NORTHBORO, MASS.—George A. Brigham, Whitney street, will in the near future build a new greenhouse, 60 feet long, and will devote it to the raising of early vegetables.

Notes from Holland.

Now that all the early bulb crops have been lifted and dried, shipments have at last been started and are now being pushed with all possible vigor. The general demand being better than was at first expected, all tulips on the hands of the growers have been sold at good prices to the dealers, and no surplus, with the exception of a few of the common late flowering varieties, is likely to be left. Dutch hyacinths are of fine quality and are clearing off well. Of the French stock there is rather too much in the market. Crocus are being sold at a premium and scillas are also scarce this season. Narcissus have gone up in price somewhat and especially double whites are scarce; but Spanish iris are moving slowly and at any rate do not sell as well as the English iris, of which considerable stock was frozen last Winter. Generally speaking it looks at present as if all bulbs on hand will be sold before the shipping season is over.—Horticultural Trade Journal.

THE STANDARD TREATISE ON GARDENING.

THE GARDENER'S ASSISTANT

New Edition.

UNDER THE DIRECTION AND GENERAL EDITORSHIP OF

WILLIAM WATSON

Curator, Royal Gardens, Kew.

Thoroughly Up-to-Date; The Recognized Authority on Gardening; Most Distinguished Contributors; Lavish in Illustration; Indispensable to Practical Florists and Gardeners, to Country Gentlemen and the Amateur. A Complete Encyclopedia of Gardening. The Leader Among Gardening Books.

For the past half-century THE GARDENER'S ASSISTANT has maintained its unique position as the **standard treatise** on practical and scientific horticulture.

The publishers in this new edition have given this monumental work such a **complete remodeling, revision and extension** as will enable it to hold in the twentieth century the place which it worthily filled throughout the latter half of the nineteenth. It is so thoroughly up-to-date, and is so comprehensive in scope, as to constitute a **complete encyclopedia** of all that is known about the science and art of gardening. No one who wishes to excel in gardening, either as a business, or a hobby, can afford to be without it.

THE GARDENER'S ASSISTANT is a compendium of all operations of the garden and arboretum; from the formation of the garden and plant-houses to the cultivation of all kinds of plants, whether for use or ornament: trees, shrubs, herbaceous and alpine plants, stove and greenhouse plants, orchids, ferns, succulents; fruit, both under glass and in the orchard or kitchen-garden, and vegetables of all kinds.

Everything has been done that could be done to elucidate the text by the free use of **illustrations**. These represent recent gardening appliances, houses, heating apparatus, flowers, trees, diagrams, schemes for laying out the garden, methods of pruning, etc. In fact, wherever a picture would be useful a picture is given. Moreover, in addition to the black-and-white text illustrations, there are twenty-five full-page black-and-white plates, and eighteen colored plates of flowers and fruits, specially prepared for the work by eminent artists.

THE FIRST PORTION of the work deals with **GENERAL PRINCIPLES**; THE SECOND PORTION is devoted to directions for the **CULTIVATION OF DECORATIVE PLANTS OF ALL KINDS**—stove, greenhouse and hardy trees, shrubs and herbaceous plants; THE THIRD PORTION treats upon **FRUIT CULTIVATION** in all its branches, both under glass and outside; and THE FOURTH PORTION upon the **GROWTH AND MANAGEMENT OF VEGETABLES AND HERBS**.

THE GARDENER'S ASSISTANT has been made the **SOUNDEST and MOST PRACTICAL**, as it is unquestionably the **NEWEST and MOST UP-TO-DATE**, Book on Horticulture.

SEND FOR PROSPECTUS.

We have obtained the exclusive right to the sale of this invaluable work in the United States. It is elegantly printed, on thick, durable paper, in two handsome imperial 8vo. volumes, substantially bound in Roxburgh, half leather, cloth sides, marbled edges, about 1300 pages.

PRICE, delivered free, by express, to any part of the country, cash with order, \$15.00. Money refunded if not satisfactory. Or, we will send purchaser the two volumes on receipt of a first payment of \$4.00 and six monthly payments thereafter of \$2.00 each.

Washington, D. C.
Trade Notes.
Funeral work constituted about all the business done last week. Some dahlias are beginning to come in. There is a copious supply of excellent asters and gladioli, but they move slowly.

There was a large influx of people into the city the past week, principally the working class, returning from their Summer outings; this will tend to help business to some extent.

Almost all of the local growers have their crops housed and are about in shape for the Fall trade.

The weather has been very favorable for newly set plants in the houses, and much needed rains have come to the relief of the outside crops of asters, dahlias, etc.

The trade generally is looking forward with pleasure to the outing at R. Vincent, Jr. & Sons Company, White Marsh, Md., on September 17, which promises to be no less enjoyable than the one a year ago. A special coach will probably be run from Washington for the accommodation of florists and their friends. **JAS. L. CARRERY.**

NORTH BRANCH, MINN.—Grass-hoppers are threatening destruction to fruit trees, and many orchards may be destroyed if some methods are not used to check the pests.

By Peter Blasnet. Price, postpaid, \$2.50

A. T. DELAMARE PTG. & PUB. CO., LTD.

2 to 8 Duane Street, New York.

Baltimore.

Trade Notes.

Trade conditions continue rather slow; stock is reported as being plentiful with an increased demand for funeral work.

Almost all the local florists have planted their carnations very early and the condition of the plants at this time is very promising. The same may be said of chrysanthemums.

The Gardeners and Florists' Club held its meeting on September 9 at the Florists' Exchange Hall. The Philadelphia cup and the Michell trophy, won at the recent S. A. F. convention, were on exhibition and very much admired. The bowlers were also congratulated on their success. The club hopes to have a number of prominent Philadelphians and Washingtonians as its guests during the Vincent Dahlia Show on Tuesday, September 17. A special train will convey the Baltimore delegation, with its visitors, to the Vincent establishment at White Marsh, via B. & O., at 11 a. m. on the date mentioned. At 7:30 p. m. the Philadelphia and Washington bowlers will be entertained at a bowling match and lunch to be held at the Monarch bowling alleys, Fayette and Eutaw streets.

Additional work done at the club meeting was making arrangements to attend the Maryland Horticultural Society's Summer meeting in Jamestown, Va., September 24 and 25. R. Vincent, Jr., opened the question of labor which was followed by a very interesting discussion.

A Destructive Hailstorm.

A very severe hailstorm visited the western section of this city, about 6 o'clock Saturday evening last, doing great damage to greenhouse and other property. It came from the north and practically broke every pane of glass on that side of the greenhouses. The losses are as follows: Iowa Seed Company, 20,000 feet; Vaughan's greenhouses, 14,000 feet; Julius Ledig, 2,000 feet; Lambert's greenhouses, leased by Trillow, 3,000 feet; Hutchison, 2,000 feet. The damage to stock is considerable, as everything was in good shape for Fall. Immediately Mr. Page, of the Iowa Seed Company, heard of the storm he stepped to the telephone and ordered 80 boxes of glass, and is busy today (Sunday) preparing to get it in. W. T.

PORTLAND, ORE.—Martin & Forbes are installing a new heating plant for their five greenhouses.

SPRINGFIELD, ILL.—A. C. Brown has returned from his vacation, which was spent in New Mexico.

New Orleans, La.

News Notes.

Frank Faessel, First and Magazine streets, has been quite successful with carnations grown on raised benches in the open. On account of our soggy subsoil it has always been thought impossible to succeed with carnations in the lowlands of Louisiana, but it looks as if Mr. Faessel has solved the problem. He has found such varieties as Mrs. Lawson, Enchantress, Queen, Lady Bountiful, Cardinal, etc., to not only bloom well under his system, but to give fine large flowers, and he will next year increase his planting considerably.

Charles Eble is well pleased with the praise bestowed on his new fern at the S. A. F. convention, also with the honorable mention award given by the committee. This is the second award the fern has received in about a month, as the New Orleans Horticultural Society at its last meeting awarded it a certificate of merit. This fern will undoubtedly be a favorite with everyone as soon as a large enough stock can be worked up to place it in commerce. It is without question one of the most pleasing varieties. Mr. Eble proposes calling it Ebleana gracillimum.

All speak highly of the way the Philadelphians entertained the visiting members.

The next meeting of the Horticultural Society will be held at the residence of P. A. Chopin, one of the society's ex-presidents. All look forward to spending a pleasant evening. CRESCENT CITY.

SAN JOSE, CAL.—Orchardists throughout Santa Clara County are exercised over the appearance in several sections, of the brown day moth. The pest is reported to be devouring leaves on fruit trees.

was taken ill with diphtheria at Phila-
delphia, are pleased to hear that he is
on the road to recovery. Those who
were attacked with ptomaine poison-
ing from this section have all recov-
ered and returned.

Knud Gunderstrup and Mrs. Gun-
derstrup returned last week from their
European trip.

A walk through the North side of
the floral district showed up some fine
field grown carnation plants at Wieter
Brothers.

Peter Reinberg's stock is looking
well, but if any preference should be
expressed at the present writing it
ought to be placed to the credit of
the houses of Richmond roses which
are now very promising.

The funeral of Robert A. Pinkerton,
which was held here last Saturday, called
for a great many floral designs. Ernest
Weinhoeber had the family order, also
taking charge of arranging the vast num-
ber of designs and sprays of flowers
that accompanied the remains from New
York.

Murphy of Grand Rapids, Mich., vi-
sited this city on Monday. W. K. W.

Boston

Exhibits from Children's Gardens.
The exhibition of products of
children's gardens at Horticultural Hall
on Saturday was in every way a very
creditable one and quite an improvement
on any like exhibition given by the
Massachusetts Horticultural Society. Es-
pecially fine were the collections of
vegetables from the Cobbett school of
Lynn, and the flowers from the Tracy
school of Lynn. Roger Newton Perry of
Worcester took both first prizes for vege-
tables and flowers from a child's home
garden; his exhibits were very credit-
able and showed that he would soon
join the expert class.

News Notes.

The sale of choice of stalls of the
Park street flower market on Saturday
was very satisfactory. Prices averaged
higher than last year, and several new
growers have joined the market. The
highest price paid was \$97.50 and nearly
all the stalls were sold.

Tuesday the Gardeners and Florists'
Club commences its Fall meetings, and
judging from the outlook the attendance
will this season be better than ever in
the history of the club.

Welch Brothers have rearranged
their packing room and are now ready
to begin a large and busy season. Their
sales this Summer have been very satis-
factory, and as they have recently added
many new growers as well as buyers to
their lists their prospects for a good
season is the best they have ever had.

The directors of the Boston Co-opera-
tive Flower Growers' Association held
their regular monthly meeting on Satur-
day at which only routine business was
transacted. Next month they will hold
their annual banquet and meeting for
election of officers.

William Aylward will sell for W. D.
Howard of Milford in the Park street
market. Mr. Howard is a noted carnation
grower, some of the finest flowers in
Boston have come from his place.

Recent visitors included Victor Berg-
mann with Ernst Wienhoeber Company,
Chicago; John Dunbar, Rochester,
N. Y.; and J. G. Morley, Los Angeles,
Cal. J. W. DUNCAN.

Spencer, Ind.

Through the courtesy of Bertermann
Brothers' Company, Indianapolis, Ind.,
I am able to announce a dahlia show for
September 26, to which the trade are
invited. Bertermann Brothers' Company
have kindly given their store for the
display and are devoting their time and
energies to the success of the show abso-
lutely gratis.

There will be about five hundred var-
ieties of dahlias in the different types and
classes. Every florist within reach of
Indianapolis should make it a point to
attend the show. It is hoped that this
will be a forerunner of the organization
of a dahlia society in the Middle West.
There will be a vote taken on the best
ten varieties for florists' use.

News Notes.

Martin Reukauf, representing H. Bayersdorfer, Philadelphia, called on the trade the past week. He had a lot of fine samples at the hotel, where the trade bought heavily for their Winter supply.

T. F. Judge, a representative of the Seranton Florists' Supply Company, was a caller the past week. This is Mr. Judge's first trip here, and he reported satisfactory business in all lines.

Frank J. Farney, a representative of A. L. Raudall Company, Chicago, is in the city calling on the trade with florists' supplies.

We also had a call from C. Brown, Detroit. Mr. Brown is on his way to Mexico to look after his mining property.

Harry Ellison, of the Ellison Floral Company, met with a painful accident last week by breaking a large pane of glass and cutting his arm clear to the bone. His mother, who is head of the firm, is still at Grand Rapids, Mich., with her daughter, and is expected home this week.

Oswald Amless, a florist who resides at 3520 Ohio avenue, was accidentally drowned the past week while crossing on the ferry at East Carondelet, South St. Louis. The body was recovered the next day, and the funeral took place Thursday afternoon.

F. C. Weber, Theo. Miller and Fred. H. Meinhardt and their wives, who spent ten days at French Lick Springs, have returned home much benefited by their stay.

Mrs. Klockenkemper and her daughter have returned home from a visit to the Jamestown Exposition, where they went from the Philadelphia convention.

Miss Newman and Miss Armstrong have returned from their summer vacation which they spent at the dells in Wisconsin, and are ready for a hard season's work.

A. Y. Ellison has left the city and will hereafter reside in Chicago. He would make a good man for their florists' bowling team, which seemed weak at the late convention.

The St. Louis Florists' Club will on Thursday install its officers-elect. The new officers are all hard workers and say they will instill new life into the club, with social features for each meeting. President-elect Will Young, who is back from his Eastern trip, states that he will make this the banner year of the club in point of attendance. A chrysanthemum exhibition, to be held in the club's rooms during the month of November, is contemplated. The new officers should be encouraged by the members and attend the meetings more regularly during the coming season.

Now that the Fall trade is about to open, our four wholesalers, Messrs. Kuehn, Berning, Smith and Augermuller, are all making big preparations to handle the business, which from all indications will be large. At Berning's, Otto Bruning is manager; at Smith's, Will Ossie will be in charge, assisted by Christian. Eddie Gerlach is the manager at Kuehn's, assisted by George Schrieffer, and Fred. Alves will manage for Augermuller. All of the above firms have made much needed improvements and are ready to handle their trade in a satisfactory manner.

ST. PATRICK.

PROVIDENCE, R. I.—A new cold storage house has just been completed by N. D. Pierce of the Norwood Floral Company.

BLOOMINGTON, ILL.—The Phoenix Nursery Company have started extensive improvements on their land at Normal, adjoining the greenhouses they erected last year. They will build a new storage cellar, 150x30 feet, and three more greenhouses.

What is the Best Way to Appease the Voracity of the Storeman for Greens?

(Paper read by D. J. Sinclair, Toronto, at the Convention of the Canadian Horticultural Association held at London, Ont., August 29, 1907.)

When asked to prepare a paper on this subject, I was very much at sea as to the answer that would be expected, and also how to treat the subject that the members of this association might receive the most good from any discussion that might follow.

First, what does the term greens imply? I take it for granted that all greenhouses, as well as the different varieties of imported southern greens, are included, which will make a list something like this: Greenhouse—smilax, Asparagus plumosus, Asparagus Sprengeri, cut nephrolepis and adiantum; hardy greens—native ferns, galax, lencothoe, boxwood and southern smilax.

Now, I am not here to tell anything of the merits or demerits of the various greens mentioned, how they can be used, etc., as you are all conversant with that part of it, but what you do want to know is, how to sell carnations at fifty cents per dozen, when they are three dollars per hundred wholesale, and put in a nice lot of green (gratis), asparagus preferred, and make money. There is the question that many retail florists have to face to-day. No florist will worry over what to cover a design with, what to back a spray with, or what to decorate a house or church with. The day for these worries is at an end. With the present system of cold storage all these southern greens are successfully carried through the whole season, and it is only a matter of time and we will find the Canadian trade using the southern hardy greens as extensively, proportionately, as they do in the United States. But with the more extensive use of imported green our greenhouse stock will be, to a certain extent, crowded out. A few years ago smilax was used almost exclusively for covering designs. Now hardy ferns and galax are used to quite as good effect, and much cheaper. This makes it more difficult to get smilax when it is wanted on account of the small quantity grown. Asparagus still holds its own for a cut flower green, and here comes the perplexing question, how to give away the asparagus that costs three to four cents per spray with the cut flowers, or how to charge extra for it without offending the customer. It has been suggested that the retail florists get together and agree upon some kind of uniformity in this, as well as other questions, but the great difference in the store's locality and class of customers makes it very hard to do this. It is simply up to the florist and his clerks to use their heads a little and they will soon get wise to the way some of the shrewd flower buyers are using them. As an instance: A sells carnations at seventy-five cents per dozen, gives the green; B sells his at sixty cents per dozen, charges extra for the green. A customer of A goes to B's store and buys, but is horrified at being charged extra for the green, and informs B that A always gives the loveliest lot of asparagus "fern" with the carnations, and does not charge extra. The purchaser, of course, does not for a moment intimate that the price at A's was seventy-five cents. B will, nine times out of ten, give the green to a customer, and save a fuss. Here is the mistake. B has made a precedent and it is impossible to break away from this precedent when the customer comes back again. The best plan is to have a rule and stick to it. Either have a price so as to give green, or, if you decide to charge extra for the green, make that the rule and stick to it. Some florists make it a rule to give hardy fern with cut flowers, but if the customer insists on asparagus then charge extra for it.

One question that might be asked is, can asparagus and smilax be sold profitably cheaper than they are at present? The largest and most extensive growers of these greens tell us that the present price is as low as these can be sold for and have a fair margin. It is therefore up to the retailer to educate the public to either one system or the other. Either charge a price so as to be able to put in the green, or make it a rule to charge extra for it. Which system is the better is a question that has many debatable points, each system having its advantages and disadvantages. One thing, however, I do know and that is that the retail florist who gives the asparagus and smilax uses the most.

Buffalo, N. Y.

News Notes.

This has been Old Home Week in Buffalo, and it has been fittingly celebrated by the masses with one or two splendid parades daily, and other attractions. All this naturally had a tendency to keep customers out of the stores, and also the clerks; in fact, it has been one long holiday. It has been one of the duller weeks in the florist line; however, it brought a great many visitors to town, and some benefit must be derived therefrom, even if we do not feel it just at present.

The local florists trimmed their windows for the occasion. S. A. Anderson's window showed a log cabin with the old well, brook and farmyard. This was indeed very appropriate, and was greatly appreciated by the public. This fine piece of work was done by Joseph Sangster.

W. J. Palmer & Son had a miniature arch with the inscription "We open our City to You." From all directions came miniature trains all bound for Buffalo station, which was also represented; also soldiers, Indians, and various other nations were shown marching through the arch. This window was a decided success.

The McKinley monument was dedicated by Governor Hughes on Thursday, September 5, and Palmer showed in both his stores a miniature facsimile of the monument made of white asters.

D. B. Long's very neat McKinley souvenir cards, which he got out especially for Dedication Day, sold very rapidly in two of the local stores.

George Stewart paid Buffalo a visit on Saturday; he is now located in Goderich, Canada, and is on a short trip through the country getting ideas for a new house which he intends building this Fall.

A. L. Barnett of Reed & Keller, New York, was in town and reports business very good.

Charles Netch showed a fine float in the Labor Day parade, using laurel, palms and bunting; and as a special feature he had a little girl holding a large design.

The Florists and Gardeners' Union made a good showing in the Labor Day parade, carrying a large vase of American Beauty roses. The local papers spoke very highly of their creditable showing.

W. H. G.

Rochester, N. Y.

Trade Notes.

The long drought has been broken by good showers, and while it is perhaps too late to do much good for some crops, to the florist and nurseryman having Fall or early digging it has been of incalculable value.

Notwithstanding the dry weather, carnation plants in the field look well, having that short, healthy stocky growth, so desirable in well grown plants. With the coming of the rains, planting operations are in full swing among the growers.

In the cut flower market, business has been dull, and the supply of good material short. Asters, of course, form the chief commodity, and being short in stems and small in flower, realize low prices. A great many, too, have been blighted in the field, caused undoubtedly by the dry spell, and this has been a heavy loss to those who have good reputations in this article.

Quite a number of *Harrisi* lilies from cold storage bulbs have been disposed of lately, and seem to find ready sale for funeral work mostly.

Perhaps an advisable idea would be to keep bulbs in cold storage, for a succession of flowers, as they can be put to a variety of uses the year round. Kept at a temperature of 34 degrees in cold storage, the bulbs remain plump, and with ordinary care can be had in bloom in from eight to ten weeks after planting.

Visitors from the convention city have been plentiful here, mostly Western florists on their way home.

A. H. Salter and George Hart, both of whom were at convention, seem to never tire of repeating to us some incidents of that occasion.

J. M. Keller has been on a vacation in Canada.

The News.

Once more back into the harness after four weeks of vacation at Manistee, Mich., I find that so far as business was concerned my assistant could well handle it.

Asters have been over-abundant and selling cheap; still, extra good, long-stemmed stock did reach 2c., but hundreds and thousands have sold at 50c. per 100. Roses are improving rapidly and American Beauty, Bride and Bridesmaid are selling fairly well. Carnations are scarce; but as long as asters last the former will not be missed very much. Chrysanthemums will start the ball rolling. By the way, I saw a few in a Chicago window last Thursday and also Friday; they were only fair and did not seem to be selling very fast.

The Jabez Elliott Flower Market has just received a new dressing of paint.

I was sorry to miss the convention. We all like to meet and greet our friends at least once a year. I notice some talk of changing the name of the grand old society. Don't you do it. Let well enough alone. The name is all right; let the members do a little missionary work among the craft in each one's locality, and I believe the membership will grow. I am very glad I was not the only missing member; I see there were others.

E. G. G.

SPRINGFIELD, ILL.—The Illinois State Florists' Association has changed its head offices from Joliet, Ill., to this city. For the present, the headquarters of the society will be located at the office of President Albert T. Hey, 819 South Second street. The secretary of the association is Professor A. C. Beal of Illinois University at Champaign, who will continue in that position. The decision to remove to this city was made at a meeting of members of the association held on August 10 at the Leland hotel. Some slight changes were made in the constitution at that time, including the increasing of the number of directors from seven to nine, and the length of their terms from one to three years.

The next annual meeting will be held in this city during the second week in February. At that time a magnificent floral display will be made.

While the organization is comparatively young, having been effected in 1905, the members are proud of what they have already accomplished. The membership numbers 150 of the most prominent florists of the State. Through their efforts, the last Legislature was induced to appropriate \$15,000 for the establishment of a floral experiment station at Champaign, the first of its kind in the United States. The station is in charge of the secretary, Professor Beal, and it is believed will prove highly important in increasing interest in the growth of flowers.

E. H. HUNT, General Agent
76-78 Wabash Avenue, Chicago, Ill.

DES MOINES, IA.—The Society of Iowa Florists held its meeting here recently. Although the convention was not large, a very enthusiastic session was held. Vice-president Judson A. Kramer of Cedar Rapids was elected president and Charles N. Page of Des Moines succeeded himself. Secretary Wesley Green was re-elected, and Peter Lambert of Des Moines was made treasurer, vice W. A. Harkett of Dubuque.

A paper by J. T. D. Fulmer of Des Moines, who is ill in the East, on "Bedding Plants, Their Use and Abuse," was read by the secretary. The following papers were read by the authors: "Cannas," J. T. Temple of Davenport; "Thrips and Red Spider," Wm. Trillow of Des Moines; "Color Effects in Arranging Flowers," M. K. Zimmer of Woodbine, and "The Best Method of Glazing Greenhouses," by J. A. Kramer.

The next convention will be held in Des Moines during fair week in 1908. It was decided to hold a two days' convention next year, as one session gave insufficient time in which to accomplish the work.

We sold all the Stevia that we had, through the advertisement.

BY LIZZIE PAGE HILLHOUSE.

A complete text-book and guide to the care, cultivation and propagation of all plants in the garden and the home.

The volume is written by a woman for women, in plain, concise language, easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within reach of all.

12mo., 232 pp.; profusely illustrated, with complete and ready reference index to all plants enumerated. Price, Cloth, \$1.00; Paper, 50 cents.

To Retail Florists. The old thought, that it was dangerous for a customer to know much about the care of plants, has passed away, being superseded by the newer and more intelligent one, viz.: that the more successful a customer is with plants, the greater quantity will he or she buy.

We offer Special Inducements to all who wish to handle this book. It is a good seller.

The Week's News.

We are getting our August weather this month—too much humidity and rarely a clear sky; decidedly uncomfortable most of the time; unfavorable to plant growth under glass; and, most disagreeable for the hay-fever victims, of which there are a few in the trade, unfortunately.

The Jewish New Year, which all good orthodox Jews have been celebrating this week, is ten days earlier than it was last year, and this in a great measure explains why the flower business for this festival has not reached the proportions that have been noticed in previous years. A great many are still sojourning at the Summer resorts, and the flower trade has suffered to quite an extent, no doubt, on that account.

Some of the largest floral designs that we ever had the opportunity of seeing (and we have seen some big ones), were noticed in Brooklyn last week, and were from the store of James Mallon's Sons. Particularly noticeable for their size and beauty were a broken column and a standing wreath.

The Lord & Burnham Company have secured the contract to erect a conservatory at the home of W. J. Jewett, Colorado Springs, Colo., to cost \$6,000.

The Pierson U-Bar Company are erecting a greenhouse for R. Trowbridge, New Haven, Conn.

O. V. Zangen, seedsman, Hoboken, N. J., has opened a wholesale florist business at 55 West Twenty-sixth street.

John Dowsett, well known to the trade in this city, has established a teaming and contracting business at Glen Cove, L. I. Mr. Dowsett reports splendid success in his new venture.

A rather elaborate and ponderous floral design was turned out from one of our city stores this week in the shape of a miniature replica of the Actors' Fair, which was held in one of the theaters here last Winter. The scene presented was the body of the theater with booths, stalls, etc., at which prominent people of the Thespian Order were in charge. Wax figures, correct models of those whom they were made to represent, and dressed accordingly, were used, and were, no doubt, a very costly item in the reproduction. Smilax, pink roses and sheet moss were the materials used chiefly in addition to the wax figures mentioned. Taken as a whole, the reproduction was well conceived and executed, and, no doubt, brought to the recipient much joy and pleasure. It was presented to the manager of the Lyceum Theater on Monday evening.

Mr. and Mrs. E. C. Ludwig, Allegheny, Pa., have been spending a few days in the city on their way home from the Jamestown Exposition.

Wm. P. Craig and John Berger of Philadelphia, Pa., and F. Lautenschlager, Chicago, Ill., were among the visitors in town this week.

Wm. Elliott & Sons, 201 Fulton street, will commence their Fall plant auction season on Tuesday next, September 17. W. J. Elliott will be the auctioneer, and will sell under the hammer a choice line of decorative plants including some specimen Kentia Forsteriana 12 to 15 feet high.

For Greenhouses, Graperies, Hot beds, Conservatories, and all other purposes. Get our figures before buying. Estimates freely given.

CANADIAN NEWS

TORONTO.—The show of plants this year at the Toronto Industrial Exhibition was an excellent one. The new building is well designed and adapted for the purpose of a horticultural show and therefore is very much better than the old one. The plants exhibited were generally better than in former years and the competition keener. The committee offered a silver medal to the competitor making the most points; four being given for first prize, three for second, two for third and one for fourth. Mr. Houston of the Central Prison won the medal, with Mr. Chambers of Exhibition Park a close second. T. McVittie, gardener to Sir H. M. Pellatt, and D. Robertson of Reservoir Park, also ran close.

The ferns shown this year were very good, and most of the foliage plants were in fine condition. The groups arranged for effect were quite up to the usual standard. Mr. Collins of the Allen Gardens won first prize with a fine lot of plants, well arranged; T. Mantion was second; T. McVittie, third. This group had a splendid lot of well colored plants, but Mr. McVittie made the mistake of crowding them too much, thereby spoiling the effect. Mr. Mantion took fourth prize with a very nice group.

A new section was a group of flowering plants. There were four competitors. Fred Good of Exhibition Park put up the winning group, Wm. Houston, Central Prison, taking second. T. Mantion was third; O. E. Collins, fourth. Their groups were all attractive, but none of them was of a high character, and there is no doubt if this section is continued the exhibits will be better in the future.

The flowering plants were, as usual, not first class, and there is considerable room for improvement. J. Stephens,

SYSTEMATIC...
BOOKKEEPING

EXHIBITION

STATIONERY.

1000 Entry Forms, -	\$2.75
Two Exhibitors' Books, -	2.00
Two Class Books, -	2.50
Six Judges' Books, -	3.00
500 Entry Cards, -	3.50
500 Prize Pastors (assorted),	1.00
Total, -	\$14.75

The above will outfit all exhibitions, save the very largest.

We have devised, for the use of Managers and Secretaries of Exhibitions, a set of Account Books, covering in detail the orderly and systematic arrangement of every item in book-keeping, from the time the Entry Forms are given out to the payment of prizes and closing up of accounts, and this system is so concise and complete that prize-winners can be paid off without confusion immediately after Judges' decisions have been rendered.

This System, once tried, is ever a favorite; it can be truthfully called the greatest Labor Saver ever placed within the reach of Exhibition Managers.

SEND YOUR ORDER FOR A COPY NOW.

A. T. De La Mare Ptg. & Pub. Co., Ltd.

The Lenox (Mass.) Horticultural Society will hold an exhibition of chrysanthemums, plants, orchids, roses, carnations, fruit and vegetables on October 23 and 24, 1907. George H. Instone is secretary.

gardener to F. B. Fudger, Esq., made three entries and took first prize in each of them. This is an example to some more of our gardeners in private places who might do much to improve several sections at our shows. Wm. Jay & Son exhibited a nice table of seedling coleus, many of them being very attractive.

The show of cut flowers this year was much below the standard. The dry season is partly to blame for this. It has been customary in the past to show the cut flowers in the second week of the show. This time they were called for the first week, and some of the exhibitors failed to note this change, and so were not prepared. The show of roses and carnations was very poor. The designs and make-up work go in this week.

**THE Cultural Leaflets treating on BULBS are especially season-
able at this time.**

Seedsmen and Florists who sell BULBS at retail should
procure a supply of these LEAFLETS, and present one to each
customer. Do this, and each purchaser will be enabled to grow the
BULBS intelligently; in this way you make a satisfied customer, a re-
sult always to be desired.

CULTURAL DIRECTIONS

Specially written for the use of your amateur customers. Send Twenty-
five cents for complete sample set, which amount will be deducted from order
for first thousand.

The universal favor in which these Directions are held, as shown by the
many orders received therefor, encourages us in the belief that these Leaflets
are just the neat little factor to help promote business and establish better re-
lations between the dealer and his customer.

TO SAVE TIME, QUICKEN SALES, AND AID YOU
PLEASE YOUR CUSTOMER, WE HAVE PREPARED

Cultural Directions

COVERING A NUMBER OF THOSE PLANTS
AND BULBS MOST LARGELY IN DEMAND

THE "CULTURALS" have been written by experts; they are fuller, and con-
tain more detailed directions than it is possible to embrace in a catalogue.
Equipped with these, just hand one out with each sale, and save yourself
considerable present and future trouble, as the customer will then be able to con-
sult the directions, grow his plants, seeds or bulbs intelligently, and so receive
satisfactory results, without having to continually resort to you for advice.

The following "Culturals" are now ready:

Seed Trade Report.

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., presi-
dent; M. H. Duryea, New York, first
vice-president; F. W. Bolgiano, Wash-
ington, D. C., second vice-president; C.
E. Kendel, Cleveland, O., secretary and
treasurer; Leonard H. Vaughan, Chi-
cago, assistant secretary.

BOSTON, MASS.—Geo. C. Thomp-
son, formerly of R. J. Farquhar & Com-
pany, has connected himself with H. E.
Fiske Seed Company and has entire
charge of the flower seed and bulb de-
partment of that firm.

PROVO CITY, UTAH.—The Carpen-
ter Seed Company of Provo, has filed ar-
ticles with the Secretary of State showing
a capitalization of \$20,000 in 200 shares,
and the purpose of engaging in a whole-
sale and retail seed business. G. U.
Carpenter, president; Wealthy Graham,
vice-president; Addie Carpenter, secre-
tary and treasurer, all of Provo, and
Maude Hopson and Albert Hopson of
Grand Junction, Colo., constitute the
board of directors.

PHILADELPHIA, PA.—Messrs. W.
Atlee Burpee & Company say that the
demand from England for the firm's two
new sweet peas—Burpee's White Spen-
cer and Burpee's Primrose Spencer—
described in this column last week, prom-
ises to be so large that the concern was
afraid it would not have enough seed to
offer generally to the American trade.
Mr. Earl, however, is in California now
for the purpose of ascertaining the exact
quantity of seed harvested.

IMPORTS OF SEEDS, ETC.—Sep-
tember 9.—C. C. Abele & Company, 48
cases bulbs; M. T. Buckingham, six
cases bulbs; Continental Despatch, nine
packages bulbs; W. Elliott & Sons,
seven cases bulbs; C. A. Haynes & Com-
pany, three cases bulbs; W. Hagemann
& Company, 116 cases bulbs; J. W.
Hampton, Jr., & Company, 175 cases
bulbs; Peter Henderson & Company, 57
cases bulbs; C. F. Meyer, 128 cases
bulbs; Mallus & Ware, 2,394 cases
bulbs; McHutchison & Company, 10
cases bulbs; T. C. Pollock, two cases
bulbs; P. K. Pollok, 16 cases bulbs;
P. R. Pierson & Company, two cases
bulbs; C. B. Richard & Company, 55
cases bulbs; J. P. Roosa, five cases
bulbs; C. D. Stone & Company, 224
cases bulbs; Schultheis & Company, six
cases bulbs; Stump & Walter Company,
24 cases bulbs; J. M. Thorburn & Com-
pany, four cases bulbs; Jan. Terkuile, 21
cases bulbs; Vaughan's Seed Store, 133
cases bulbs; Weeber & Don, three cases
bulbs; H. Darrow, two cases plants.
September 12.—Lee, Higginson & Com-
pany, 200 bags seed; J. Monroe & Com-
pany, 200 bags seed; J. M. Thorburn
& Company, 21 bags grass seed; Peter
Henderson & Company, 200 bushels seed.
September 13.—R. M. Ward & Company,
14 cases bulbs.

Seed Trade Notes.

The Autumn bulb trade is now well
under way, the past week having put
into the consumers' hands an enormous
number of catalogues. Apropos of this,
I cannot but wish that some plan could
be formulated, by which those customers
who buy yearly, not exceeding a good
handful of bulbs, could be restricted to,
we will be liberal and say, a few cata-
logues. But many of them seem to have
about as many catalogues as they plant
individual bulbs.

This should be a good bulb season; the
wholesale seedsmen have large stocks and
their quality is more than average good.
The tulips and narcissus are better in
quality than the hyacinths and crocuses,
but none are really much below the aver-
age. Prices are very firm.

The condition of the crops, and the
general outlook as regards the final re-
turns of seeds, have not changed much
during the week. From Connecticut
most unfavorable reports keep coming
in, especially as to the late varieties of

sweet corn. This to, do well, requires two conditions, namely: moisture and heat; the season just closing has been dry and cold. You can easily foretell what the results of such continued weather must be. All varieties of late sweet corn are very backward, and all are dried-up badly. Whatever may be eventually left to be called a crop, will depend entirely upon the time before we have a hard and killing frost; in any case the crop will be very light indeed. I have seen various estimates, as low in one case as ten per cent. of the average.

It certainly does not now look as if there would be a surplus of seeds in any direction; especially in the great staples, like sweet corn, peas, beans, and onion seed. There is one factor, however, to be considered by dealers, in regard to peas, beans and corn; and that is, that since the canning factories have been turning out such splendid products, as they have during the past few years especially, the retail demand for these seeds has not increased in any such proportion as for all other garden seeds.

But it will not be long now before the preliminary wholesale price lists of our larger seedsmen will in a large way settle this all-important question; and the trade in general know what their seeds for the season of 1908 will cost them.

V.

AMERICAN VARIETIES OF GARDEN BEANS.—A most exhaustive and valuable monograph (bulletin No. 109, Bureau of Plant Industry) on this subject, prepared by W. W. Tracy, Jr., assistant botanist, vegetable testing gardens, has just been issued by the Department of Agriculture. The monograph is illustrated and contains, among other things, a list of nearly all the garden beans catalogued to-day in America.

In his remarks on "Rules for Description," Mr. Tracy says:

"To simplify varietal nomenclature and avoid confusion in variety descriptions, it is necessary to adopt the following rules for the use of names and description of types.

"Type names.—After a varietal type is described, it is next necessary to decide which of the many names applied by seedsmen to the type shall be selected as the one by which the type shall be known. Generally the name first used should be adopted, but as the original name sometimes goes out of general use or even disappears altogether from the trade this rule is not always practicable. Even though possible to determine which name was first used, there yet remains the doubt as to whether the old name represents at the present time the same type as when first used. Another type may have been adopted, as, for example, an improved strain may have appeared in the old type, and this may have been given a new name and called a new variety. In course of time seedsmen, in receiving orders for the old variety, may think it best to fill such orders with seed of the improved strain instead of with that of the old type, which they may have discarded altogether. This is what seems to have occurred with Horticultural Bush, so that instead of sending out the old type nearly all seedsmen now send out Ruby Horticultural Bush, which was developed from Horticultural Bush.

"Confusing names.—Some names are undesirable because so similar to others as to be easily confused with them; others because so many worded as to be bewildering and inconvenient. In regard to the latter point, it is generally safe to drop from variety names all such words as improved, selected, perfected, extra, select, choice, superior, celebrated, fine, true, and most words in the possessive case.

"Source of seed.—As different seedsmen sometimes recognize quite different types for the same variety, it becomes

important that the names of seedsmen be given upon whose samples variety descriptions are based. It does not seem worth while, however, to publish occasional or temporary errors which occur in supplying seed orders. Mistakes in variety types are sometimes unavoidable, and the reliability of different seed houses is ascertainable only by a large number of tests, much larger, in fact, than it is usually profitable to make. The question of locality for bean varieties has not yet become important in the United States. This is largely because most of the seed at present is obtained from a few well-recognized localities, and also because it is not yet certainly known whether beans coming from particular localities are really superior to those from other localities. No mention is therefore made in the following descriptions as to where the seed samples were grown. Most of the Kidney bush sorts, however, were probably grown either in New York, Michigan, or Wisconsin, and most of the pole and Lima varieties in California.

"Variety forms.—In comparing vegetable varieties a regular order of description should be followed. Some kind of variety form is necessary to avoid omission of the qualities on which information is desired, as well as to make reports orderly, precise, and comparable with those of other experimenters."

European Notes.

The spell of sunshine chronicled last week was of very brief duration and within 48 hours northern Europe was enjoying (?) a bitterly cold wind, which in midland and eastern England was accompanied with snow and hail.

In the Riesen-Gebirge and in the Brocken in Germany, the thermometer has dropped to 28 degrees (Fahr.) and snow has fallen without interruption for twenty four hours. The Dutch growers report that they do not get two dry days in succession and that the damage done to their pea and spinach crops is very serious.

The threshing of rape seed is almost impossible, and the prices quoted and maintained are well high prohibitive, and this in spite of the fact that French seed is being freely offered at much lower figures.

The latter article has a very bad reputation, except for crushing purposes, and some of the houses on your side have good reason to know that this indifferent reputation is fully justified.

Sweet peas are doing very much worse than reported last week and are already being offered at prohibitive prices. Recent reports received from California are simply disheartening, and in one case reveal a very singular method of cultivation.

Simultaneously with the report in one of the English trade papers that the crop of onion seed in California will be very much larger than was anticipated comes the report from Germany that the crop in that country is in many places an entire failure. As the crops in Northern France and England are insignificant the prospective California surplus will find a ready market.

Just an afterword: Will our friends in the land of the free kindly prolong their vacations while there is opportunity; they will not be troubled with any early deliveries this season of

EUROPEAN SEEDS.

Show of National Sweet Pea Society, England.

Editor Florists' Exchange:

The 1908 exhibition of the National Sweet Pea Society has been definitely fixed for July 24 and will be held in the Horticultural Hall, Westminster. I send

this early intimation so that the friends who propose to honor us with their presence on that occasion may make their arrangements accordingly.

To our great regret N. Sherwood does not feel equal to undertaking the position of president. The writer would like to see W. Cuthbertson, J. P., nominated for the post. He has a fine record in the trade generally, knows all about sweet peas and is one of the two original promoters of the Bicentenary celebration.

A Winter trial of Christmas flowering varieties is being carried out by C. Foster at the University College, Reading. The Algerian, Englemann, and Zvolanek strains, together with Burpee's earliest varieties, are being tested. Any of our American friends who have arranged to enjoy their Christmas turkey in England will be able to make comparisons under very favorable conditions.

The Rev. E. Arkwright, who is enjoying a vacation in his native land, writes me that owing to the ravages of the parasite (Drobanche) in Algeria he is compelled to dig out the soil two feet deep and two feet wide and fill in the trenches with decayed manure and a thick covering of leaf mold in which he sows his seed, and on no account to use a particle of the native soil. Surely he deserves his success.

S. B. DICKS, F. R. H. S.

N. B. July 24 happens to be the writer's birthday. Verb. sap. sat.

Some Good New Lilies.

Recent explorations in the far East have brought to light several meritorious liliiums, new both to botanical science and to horticulture. Chief of these is L. Henryi, the "yellow speciosum." Interest in this vigorous and handsome species is increasing, it being asked for in quantities as large as 25,000 bulbs for a single decorative planting. It is needless to say it is not on the market in such numbers. Planters must still content themselves with this fine species by the dozen or hundred at good round prices for even such limited quantities.

LILIUM SUTCHUENENSE, from Western China, is a very bright and graceful species of the tiger lily type. The blooms are orange red, with black-purple spotting and have reflexed petals like our native swamp lilies. It grows tall and the stems are heavily clothed with very narrow leaves. It appears to be entirely hardy, our trial bulbs wintering perfectly with no protection but their earth covering. Though the blooms are perhaps not so large it is far more refined and decorative in growth and appearance than any tiger lily we know. It will doubtless become a great favorite when it can be had in quantity.

LILIUM MYRIOPHYLLUM is still very scarce. The only bulbs we could procure were small and gave but two blooms each. It is a distinct species of the L. Browni type, and is also native to Western China. Our plants grew dwarf, scarcely rising more than a foot high, the stems being densely clothed with narrow one-nerved leaves. The flowers were large, full-trumpet shaped, white and yellow inside with rosy-purple markings outside. They were very handsome and faintly fragrant. If myriophyllum turns out a good grower and as hardy as other fair Chinese species it will be extremely desirable.

LILIUM YOSHIDA. This is a most interesting lily grown by Herr Max Leichtlin, of Germany, from seeds collected in the Philippine Islands by a Japanese botanist in Herr Leichtlin's employ. It appears closely allied to L. myriophyllum and the provisional name of Yoshida has not yet been sanctioned by botanical usage. Small bulbs procured from the raiser two years ago bloomed for the writer this Summer. The plants appear to be fairly vigorous growers and hardy enough to endure frosting of the bulbs, but ours were not exposed over Winter. The leaves are narrow and closely crowded, while the flowers are very elegant trumpets over five inches long, pure white inside, flushed with rose-pink outside, and quite fragrant. It is an elegant variation of the pleasing Browni type of oriental lilies.—W. V. F., in Rural New Yorker.

OUR FALL PRICE LIST OF BULBS NOW READY

HENRY F. MICHELL CO., 1018 Market St., Philadelphia, Pa.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

(32) **Caterpillars Destroying Ferns.**—I send you a piece of a fern frond to show you the manner in which our plants are being eaten. Kindly advise what is the cause and what can be done. F. R. La.

—This, from the appearance of the fronds, is the work of caterpillars, and a close examination of all the stock and benches should be made, when we think the insects will be discovered and can easily be destroyed. A good dusting of slacked lime between the plants and underneath the benches will aid as a check, but the quickest way is to hunt for the caterpillars and kill them.

(33) **Treatment for Hydrangeas in Tubs.**—Kindly give me the best treatment for hydrangeas in tubs that have finished blossoming. Shall I cut the past blooms off? How shall I treat these hydrangeas in tubs, so as to have them in good shape for next year? L. S. Conn.

—To care for hydrangeas through the Winter, we cannot do better than give the following advice, which appeared in The Florists' Exchange some time ago:

"A well lighted place that is frost-proof—either a cool greenhouse or a pit—is a satisfactory place to keep the hydrangeas through the Winter. They are usually taken indoors about the end of September and gradually dried off, this process being commenced some time previous to their being housed. They remain indoors, gradually losing their leaves, until the following March. Then they are taken to a greenhouse where a little heat is kept and gradually started into growth again, receiving occasional weak liquid manure. During September, before they are housed, the faded flowers should be clipped off, and if they are not out of shape or too large, no other pruning is necessary. Should they be getting too large, the longer growths should be cut back to within three or four eyes of the old wood."

As it is only from the wood made this year that the flowering shoots will come next season, it will be seen that just as little pruning as possible should be done.

(34) **Begonias for Name.**—Please name enclosed four varieties of begonias. Mass. O. A. C.

—Number one could not be identified from the leaves alone; send a few leaves with the full length of the stem attached, and a few of the flowers, also; then perhaps we can tell what the variety is. Number two: *Begonia metallica*; numbers three and four: *Begonia rex* var.

(35) **Mint.**—Please inform me how to cultivate mint, indoors, such as is used for fancy drinks. MINT. New York.

—To grow mint indoors, we would procure some old and well established plants, divide the roots into clumps having four or five leads, plant them in boxes that are four inches deep, or in a greenhouse bench, using a rather stiff and well enriched soil. Give a temperature of 50 degrees at night with a corresponding raise during the day; syringe daily after growth starts, so as to keep down red spider, and be careful about giving water until growth does start, as very little will be needed until then.

(36) **Time to Sow Stocks.**—When should stocks be sown to have them in flower by February or March? Would plant on raised bench. F. Penn.

—To have stocks in flower during February and March, we would sow the seeds early in November.

GERANIUMS

Rooted Cuttings, ready October. Nutt, Buchner, Doyle, Poitevine, Ricard, Vlaud and others, \$10.00 to \$15.00 per 1000. Orders booked now.

Ernest Harris, Delanson, N. Y.

Specimen Evergreens FOR FALL PLANTING

Our evergreens are exceptionally fine specimen plants. They have been frequently transplanted, sheared and have been given ample room in the nursery rows. With the exception of the small sizes, used for bedding purposes, every plant will be dug with a ball of earth and the ball sewed in burlap.

The small grades of evergreens used for bedding are plants which have been given particular attention for this purpose, they are very heavy and bushy and in most cases the plants are as broad as they are tall.

Send us list of what you require, with quantities and sizes, and we will send you prices on same.

RETINISPORAS. All varieties, 12 to 18 inches for bedding, and all sizes from 2 feet to 10 feet.

ARBOR VITÆ. 12 to 18 inches for bedding and all sizes up to 8 feet. An exceptionally fine lot of **Geo. Peabody Golden Arbor Vitæ** in these larger sizes.

JUNIPERS. 12 to 15 inch sizes of the trailing form. 2 to 4 feet sizes in upright growing variety.

WEeping NORWAY SPRUCE. Small plants of 18 to 24 inch sizes up to 7 feet specimens.

WHITE PINE. 6 and 7 feet, trees transplanted last Spring.

HEMLOCK SPRUCE. All sizes.

RHODODENDRONS. Only hardy acclimated varieties.

We have over two hundred acres of the finest grades of ornamental trees, shrubs, and herbaceous plants, potted vines, etc.

Write for Trade Catalogue.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.
J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

Preparing Stock for Orders.

In large blocks of trees there will always be various sizes owing to inequality of growth. This difference will exist in both caliper and height. There is far more regard paid to both height and caliper than in years gone by. The caliper of a tree tells a good deal to one accustomed to trees, and when given together with the height the party knows very nearly what the tree looks like without seeing it. For this reason nurserymen list much of their stock with height and caliper given and they find it of great advantage, tending to make sales of such trees more satisfactory to both buyer and seller.

To facilitate the getting off of orders it is becoming the practice of many firms to take the caliper of blocks of trees in early Autumn, when the girth has reached its maximum, placing marks on each tree to designate its height and caliper. This saves time when the saving is of great importance, as ordinary diggers can be sent to get out an order, permitting experienced hands to attend to matters of more moment just then.

Transplanting Trees at Night.

It has long been known that budding trees, when transplanted in the evening, are more likely to thrive than those moved in the daytime, says The Garden. A French expert has gone a step further and claims that distinctly beneficial results follow the transplanting in the dead of night.

Budding trees or plants of any kind in leaf are better set in the evening than at any other hour of the day, because there is less transpiration in darkness than in light; and if given water when transplanted there is some recovery from the check, which always follows a transplanting, before daylight returns. Vegetable growers are aware of this as well as florists, and all who have to do with transplanting seedlings while in their growing state. This is why the shading of plants is called for. The greater the light, the greater the loss of moisture, hence the utility of transplanting in the evening, allowing of some recuperation of the plants during the time of darkness.

As to the "expert's" hour of midnight for the work, the hour of sunset would be the choice of those who have had to do with such things. Such work done then, with plenty of water given to the plants, would be the very best time of the day for the operation.

The Flowering Ash, *Fraxinus Ornus*.

Some time ago The Florists' Exchange illustrated the plume-like flowers of the flowering ash, with a few notes concerning it. A writer in Gardening Illustrated praises this tree and among other things says of it: "This, a native of the south of Europe, is a small or medium-sized tree, in general character like the ash, but less vigorous in growth. The principal distinctive character—whence the name is derived—is the large open plume-like panicles of flowers, which are of a greenish-white color, very sweet-scented, and borne in great profusion about the end of May. Like the common ash, the European *ornus* succeeds best in pretty good soil, and in a moderately moist, rather than a very dry situation."

The tree is so beautiful when in flower that the wonder is it is not common in plantings. As a fact it is very rare, excepting in nurseries, the public seeming unacquainted with the tree and its merits. Its flowers are far superior to those of any other ash; indeed, the entire tree is rather unlike an ash, so much so that for a time it was classed as a distinct genus, under the name of *Ornus europæus*. All ash trees prefer deep, moist soil, making a growth then very superior to what is made when growing in dry ground.

Lagerstræmias in the North.

That the Lagerstræmia indica is not a hardy shrub north of Washington is a source of regret to all who are familiar with its beauty in the South. It lives out as far as Philadelphia, perhaps farther, but cannot be relied on to endure the Winters of Philadelphia, unless in a favorable situation. When it does pass through a Winter unharmed is when it is growing on an elevated, though sheltered site, where its wood becomes thoroughly ripened. When near a dwelling and

the plants have been well ripened as described, many cases are known where no injury occurred to them in Winter. That it is thorough ripening of the wood and not temperature alone that controls the safe wintering of this and many other plants is shown by the behavior of them in England. In that country, where the Winters are not nearly as cold as our own, the erape myrtle will not withstand as much cold as here, and many another instance could be given. About Philadelphia it usually winter-kills nearly to the ground, but if soil, sawdust, ashes or like material be piled around its base, sufficient old wood remains sound to permit of a growth which will give a nice display of flowers in late Summer.

Many nurserymen and florists grow a few plants in tubs, housing them in a cold shed in Winter, in which way they keep in good order and are beautiful objects on a lawn when in bloom.

Propagation is from seeds, soft cuttings in Summer, or hardwooded ones in Spring. Old wood cuttings are to be treated as other shrub cuttings are, made during

shape it was permitted to grow, so we have a tree with three or four leaders, instead of the one that is usual for ash trees to have. This bushy growth, however, is pleasing in this case; and as the tree stands where a driveway circles it, it is really very much in place, and suggests the use of a bushy tree, instead of one with but a single trunk in any similar position. This tree stands on the slope of a decline where there is abundant depth of soil and sufficient moisture the whole season through; and this is exactly the conditions this and all ash trees desire. When in such situations there is a wealth of foliage never seen in trees growing in poor, shallow soil; and we think this applies more particularly to the English ash than to any other one.

The European ash has many varieties in cultivation, but aside from two or three good ones they are not of much account, except to those who desire to possess full collections. Of those of merit place must be found for the weeping forms, one of which has green shoots, the other yellow ones. Both make branches of a hori-

Fraxinus Excelsior, European Ash.

Winter, kept cool in sand until Spring, then planted in the open ground.

Fraxinus Excelsior.

Among large sized trees of Europe to be found on the grounds of many of the older estates here the European, or English ash, *Fraxinus excelsior*, is one of the most prominent. In the days of the early settlement of this country by the adventurers from Europe the trees of their own country soon found a place here, and it was in this way the ash mentioned came to be so prominent.

Our own country is well represented in the way of ash species, many of them possessing great merit, but there is still a place found for the English ash in general plantings, its vigorous growth, black buds and handsome green leaves, making it a much valued species.

The tree we have the pleasure of presenting in our illustration is of a different style of growth from that usually seen. Probably it was cut down to the ground when young, causing it to form several leaders, in which

zontal growth rather than weeping, and this is more particularly the case with the golden barked one. There are two other good varieties: one, *acutatifolia*, has spotted leaves which are very pretty early in the season; the other, *aurea*, is so called because of the golden bark, which is particularly beautiful in the Winter season. As said, there are other varieties worthy of a place where a collection of every kind is desired.

The propagation of ash species is accomplished by sowing the seeds, which ripen in October. It is generally supposed that these seeds require a year and over in the ground before growing. This is not always the case. Sown as soon as ripe without having been dried out, they will often come up in Spring following, but when kept dry and not sown until Spring they lie a year before germinating. The varieties are readily increased by budding or grafting.

One ash, the *F. ornus*, is called the manna ash, and is a beautiful one to grow for its ornamental character as a flowering tree, meriting its other common name "flowering ash."

FERN S

Adiantum Cuneatum, from 4-in. pots, \$15.00 per 100. Cash with order please.

ROBERT WILLIAMSON, New Durham, N. J.

California Plant Notes.

I think it may be safely said that the most attractive annual of this State is *Mentzelia Lindleyi*. The flowers are two to three inches in diameter, of a beautiful golden color, with a red center. The stamens are numerous, erect, giving the flower the appearance of that of *Hypericum Moserianum*. The plant is of a silvery color, as are most of our natives, and a large bed in full bloom is a gorgeous sight. Why this plant is not in general cultivation is difficult to understand. The writer has been in the State now eleven years, yet this is the first one that he has seen, and henceforth it shall have a large place annually in grounds he cultivates.

To the resident of regions where rains fall in Summer and the relative humidity is up around the 75 per cent. mark, the statement may seem incredible that vegetation of an annual nature should come forth on a desert where neither fog, dew nor rain is known for at least four months of the year and the ground becomes so warm during the day as to destroy insect life that is precipitated upon it, yet it is a fact that such do exist. Of these, one is known as dove weed, *Eremocarpus setigerus*. Great stretches of plains are made to look silvery because of this plant covering them, after vegetation produced by Winter rains has disappeared. Its seeds are about the size of a grain of wheat, and form food for doves, hence its name. The plant is covered with minute bristles, irritating to the touch, but the odor is agreeable. It is said that the Indians used leaves to catch fish with; strewn upon the water they were eaten by the fish which were thereby stupefied and captured by hand.

Another plant is the turpentine weed (*Trichostema lanceolata*) that covers the stubble fields after grain is harvested. The flowers are of a dark blue color, and give the landscape a charming appearance. On the leeward side of an acreage of these plants the odor that fills the atmosphere, about sundown, is delightful; but to handlers of the plants it is positively offensive. P. D. B.

NEPHROLEPIS

WHITMANI, 2 1/4 in. \$5.00 per 100; 3 1/2 in. \$25.00 per 100.

FERN S, Boston, 2 1/4 in. \$3.00 per 100.

Henry H. Barrows & Son, Whitman, Mass.

Observations in France.

It was often a wonder to me what was all meant by the expression "La Belle France," "the beautiful France." But I do not marvel any more, now that I have visited the greater portion of that country. Indeed, in the good old Summer time the landscape of that country in every direction, is charming to behold. There is hardly a speck anywhere out of cultivation. When joined with it all are the pretty, quaint, low storied white stone homes of the peasants, the handsome trees, of which the tall poplar is most in evidence, and the most perfect public roads (kept up by the government) even and as level as a floor and polished white, lined along the borders with a great profusion of the red poppy and the blue corn flower, which are among the chief of the wild flowers of France. Another pleasing aspect is the absence of fences everywhere, making the whole seem like one vast farm under one single ownership. Ditches compose the division of farms and fields, these being bridged wherever necessary for convenience. If there are fences, then they are of the hedge order, or are formed of piled stones.

I never saw finer crops of wheat anywhere in America than France produced this season, averaging in many quarters 30 to 35 bushels per acre (the market price at the time was about \$1.15 per bushel); their oats were, in many fields, six feet or more tall; what seems to be most in favor is the variety called "Side Oats," their potato plants were dark-greenly vigorous and healthy looking and full of blossoms; the crop frequently runs to 300 bushels per acre. France has a prohibitive tariff against the potato bug, and that critter is unknown as yet there. All other crops looked fine, such as barley, flax, lucerne, clover, vetch, horse beans, tree cabbage, sugar beet, mangold wurzel, etc. In fact, it looked like big crops for the French farmer this year.

The French method of farming does not run to about one thing, either corn, wheat or cotton, as is the general practice in the United States, but there is a great deal of diversification in France. Of course the grape is generally cultivated and the production of wine is enormous. Wine in France is nearly as cheap as water. In truth, I hazard a statement, that there is nearly as great a consumption of wine there for drinking as there is of water, especially since the great Parisian doctors have cautioned the people throughout the country not to drink water unless it has been boiled. But to calm our temperance friends, I will say that notwithstanding this wine drinking, I saw no drunkenness in France, they apparently know the value of moderation in drinking.

The climate of France is delightful neither too hot in Summer, nor so cold as the New York climate in Winter. While the telegraph was reporting you as suffering from the heat in July, we were sleeping under blankets every night in France; and in the evening and early morning light overcoats were worn. Owing to this coolness of the nights, and lack of heat during the day, Indian corn and melons will not mature in France. It, however, is the ideal climate for all other kinds of vegetables, and especially for the production of seeds. Lettuce grows there to perfection and seeds beautifully; so do peas and beans cabbage and its family; all the roots such as beet, carrot, rutabaga, turnip, parsnips, etc.; and the onion just delights in the French soil and climate. I have seen onion under culture for seed in California, but I am compelled to say that I have never seen finer cultures of onion than France produces in the upper sections of the country. On many plants there were as many as five seed stems to a bulb, great, thick, sturdy stems which bore immense seed pods. But there will be no overproduction of seed, no more will be realized, perhaps, than enough to cover the usual demand from that country.

From what I saw of the results of a good deal of American grown seed that was sown in France this year, I am impelled to say that there must have been a good deal of hard kicking this season by the customers of some of the American seedsmen. The seed in question was horribly mixed; it was not only one variety that was at fault, but all the varieties were bad, such as Red Wethersfield, Yellow Globe Danvers and White Silver Skin; some were less than fifty per cent. pure, showing a mixture of three or more kinds. This will necessitate considerable culling on the part of those who grow for seed, as the impure bulbs will all have to be thrown away when final selection is made for seed. I will refrain from comment about the grower (or growers) who will furnish such seed to his customers, except to say that the French growers are above suspicion as to any such course, for to be guilty of it would ruin any grower for all time.

France raises several varieties of onion which appear to be harder than any of the so-called American sorts. These should be introduced into the United States. They are as follows: Red Flat Ardenes, the full grown bulb, of which measures from 2½ to 3 inches in diameter, and from 1½ to 1¾ inches in depth from the crown to the bottom of the bulb. The skin is a dark brickish red; it keeps solid and sound till away into the following Spring. It is a handsome onion.

Red Brunswick is a flat onion, about the same size as the Red Ardenes. It is, perhaps, the hardest of all the onions. Its form is handsome; its color a dark purplish red, so dark as to appear to be a blackish brown, probably due to the many blackish brown broad lines which run lengthwise over the surface of its purplish red skin. The skin has a beautiful gloss, like that on a dyed Easter egg. A long keeper.

Bonnegarde (Good Garden) onion. A yellow flat variety, averaging 2 1-8 inches in diameter and 1 1-8 inches from crown to bottom. Its color is very like that of the Globe Danvers, a very darkish yellow with a good pinkish yellow shade. Owing to its good keeping qualities it also is called "Long Keeper" in France. Pale Flat Red Onion; color pale red with a dark yellowish shade; average size 2 1-8 inches diameter by 1 1-4 inches from crown to bottom; also a very long keeper. TRAVELER.

A THERMOMETER FOR THE SMOKE STACK.—If one is desirous of burning a minimum of fuel during severe weather he might well gain some idea as to how close his wishes are being met by having a thermometer fixed in to the smoke pipe from the boiler to the chimney. It is stated that many boilers do their best work and show the greatest economy of fuel when the gases leave the boiler at about 300 to 400 degrees Fahrenheit. When the temperature is higher than this it is held that there is some waste of fuel but not so much as the high temperature would indicate. The use of a thermometer might help materially to advise one how well he is playing fireman, for after all there are as many ideas regarding the proper way of heaving in the coal, adjusting dampers and abstracting ashes as there are days in the year.—Metal Worker.

THE WEEK'S WORK.

Dracenas.

Dracenas now in 5 and 6-inch pots
 and to remain in these until sold, will
 require care to keep them in first-class
 condition. Feeding at the proper time,
 in moderation, will not only help them in
 retaining their bottom leaves without
 which much of their value is lost, but
 it will keep them growing and develop-
 ing color as their growth proceeds. When
 feeding with manure water it should be
 done with care, so as to keep the liquid
 from the foliage as much as possible,
 and in case more or less accidentally
 comes in contact with the leaves, clean
 water should be applied in order to wash
 off the manure, and go down to the roots
 of the plants.

Just before the application of fire
 heat dracenas are liable to receive too
 much water at the roots, but these plants
 seldom suffer because of too much mois-
 ture in the atmosphere. They delight in
 frequent syringings and sponging, too, if
 the time could be given to that tedious
 method of keeping them clean.

Crotons.

Crotons are of immense value to flo-
 rists during the dark days of Winter.
 In many ways these plants are made to
 do service, especially when they are
 available in medium size stock and of
 good color. Crotons will now be rapidly
 developing their rich tints of color, and
 nothing aids them so much as bright
 sunlight. It will be well to close the
 houses of crotons, and dracenas too, for
 that matter, as early in the afternoon
 as circumstances will permit; thus shut-
 ting them up early will benefit the plan-
 s in many ways, especially in the event
 of delay in starting fire heat.

Nephrolepis.

Nephrolepis of the improved types,
 growing on benches, will very soon get
 more or less damaged if they are not
 examined at intervals and all decayed
 fronds removed. The fine decorative
 varieties are much more liable to get
 spoiled in this way than the old Boston
 fern, and I think, N. Scottii is next in
 hardness in that and other particulars.
 There is nothing that has such a ten-
 dency to lighten the color of ferns as
 faulty watering; a frequent drying of
 the roots at a time when growth should
 be uninterrupted will play havoc with
 ferns of all kinds, and so will, what is
 commonly known as keeping them in a
 soaked condition. Careful watering and
 judicious overhead syringing, with a
 reasonable amount of moisture in the
 houses always, will pay in results.

Geraniums.

Geraniums intended to be grown into
 choice stock for sale as pot plants should
 be rooted in small pots; if possible place
 them from the start so that they will
 not in the least suffer from overcrowd-
 ing. In growing these geraniums for
 the purpose referred to, they will make
 finer plants and flower better if they are
 kept shifted regularly until they are in
 the pots in which they are to be sold.
 The buds should also be kept cut off
 until then. Well grown geranium plants
 in 4½ or 5-inch pots, well furnished
 with foliage and large trusses of bloom,
 are well worth having.

Snapdragons: Mignonette.

Don't forget to give snapdragons gen-
 erous treatment from now on; encour-
 age them by cultivation to develop long
 spikes of flower. Only by having such
 can it be possible to grow them with
 profit. Mignonette grown in small pots
 intended for benches should not be left
 in the pots until the plants show signs of
 suffering.

Bouvardias.

The removal of bouvardias from the
 open ground is always attended with
 some danger, but if they are kept well
 shaded for about a week after being
 transferred and also kept close and the
 atmosphere rendered humid with fre-
 quent syringing, they will not likely feel
 the strain a great deal. If the plants
 are set in the benches immediately they
 are taken in, and it is intended to flower
 them, the shade referred to as being nec-
 essary for the first few days should be
 of such a nature that it can be easily re-
 moved, because after the plants are fully
 recovered they will need all the light
 they can get.

Prices Advertised in these Columns are for THE TRADE ONLY—When Writing Please Mention THE FLORISTS' EXCHANGE.

Bougainvillea Sanderae.

Among the plants that should now receive some attention, because of its being adaptable for Easter work, is *Bougainvillea Sanderae*, which if generously treated will give immense satisfaction as a pot plant. Plants after being potted should be kept shaded for a few days to enable them to get to work in the new soil. They should be started somewhat cool and grown on in a slightly increased temperature as they develop. *Bougainvilleas* delight in good rich soil and plenty of water when in an active state of growth.

Miscellaneous.

There is danger in leaving stevias outdoors any longer; if they have not been housed, no time should be lost in doing so.

Most of us are aware that rubber plants succeed well in a house without shade, provided the atmosphere is moderately moist, and we know also that they will grow well, or continue to look well, when left out in the open ground in uncovered frames in bright sunlight. I saw a number in such a place the other day; if there are others take them in at once.

Well grown cyclamen plants mean sure money to the grower, and this certainty of good prices makes it worth while to give the time and attention necessary to produce good plants—the only kind profitable to grow. There is great danger of damaging cyclamen just at this stage of the game; they should not be checked; but allowing them to remain any time in an overheated and close atmosphere will mean ruin to them. A temperature of about 50 degrees suits them, with a place as near the glass as possible, gradually bringing them into the full sunlight with plenty of air when the weather permits. Cyclamen now as at all stages, but perhaps more than ever now, require great care in watering, and just as much care in keeping them clean and rid of insect pests.

It makes no difference what method is adapted in rooting geraniums, they will require attention one way as much as the other. All dead or decaying leaves should be regularly removed; if allowed to remain many cuttings will be lost before potting time comes.

The time to commence making preparations in anticipation of the demand for certain things made up in certain attractive ways is not within a few days or even within a few weeks of the day when such things will be wanted; it is always best to be on time with everything. Thanksgiving is not yet a while, but it will be here without fail. Get things into shape, so that they will be ready or as near ready as possible for that festival. Although in the past plants have not felt the force of Thanksgiving to any great extent, there is reason to believe the demand then is increasing.

Small ferns grown in cold frames should be removed indoors before the weather gets cold enough to make the covering of the sashes a necessity. If there is no special object in view in keeping them outdoors it will hardly pay to be constantly on the watch to protect them.

The temperature conditions from now on for a few weeks will most likely be just suitable for cinerarias in frames; these plants delight in a cool temperature and while it is to their liking they go on growing without interruption. Some one may be benefited by the oft repeated warning not to allow cinerarias to get potbound until they are ready to flower; the same may also be said of primulas.

In whatever stage calceolarias are in they should never be allowed to get crowded; they will require to be shifted whenever they need it for their uninterrupted development.

It may be well now to remember that seed of at least one variety of *salvia* was very scarce last Spring, and all was rather low in germination proportionately. It is not even now too late to save seed from healthy plants that produced well developed flowers.

English ivy is very seldom found to be so plentiful as to overcrowd the market. Cuttings may still be put in now in flats, pots, or in benches indoors; those well rooted in frames may be potted up and kept growing right along.

Cuttings of *Aucuba japonica* will root readily, and although there is not very much money in their cultivation into large specimens when the price of imported stock is considered, still it will be well to have a few hundred plants. There are many ways of utilizing them.

ALBERT M. HERR,

"ASPARAGUS"

To Close Out. Fine two inch stock. Plumosus, at \$2.50 per 100. Deluxus. A fine novelty at \$5.00 per 100. Robustus. Four inch at \$5.00 per 100.

Lancaster, Pa.

Prices Advertised in these Columns are for **THE TRADE ONLY**—When Writing Please Mention **THE FLORISTS' EXCHANGE.**

FOUNDED IN 1888

Weekly Medium of Interchange for Florists, Nurserymen
Seedsmen and the Trade in General

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president; Jas. H. Griffith, secretary; David Touzeau, treasurer; Alex. Wallace, editor. The address of the officers is the address of this paper.

P. O. Box 1697.

Telephone 3765-6 Beekman.

CHICAGO OFFICE: 127 East Berwyn Avenue.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Price on application.

YEARLY SUBSCRIPTIONS.

United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by express Money Order, Draft on New York, Post Office Money Order or Registered Letter. The address label indicates the date when subscription expires and is our only receipt therefor.

REGISTERED CABLE ADDRESS:

Florex, New York.

ADVERTISING RATES.

One-half inch, 75c.; 3/4-inch, \$1.00; 1-inch, \$1.25, special positions extra. Send for Rate Card showing discount of 10c., 15c., 25c., or 35c., per inch on continuous advertising. For rates on Wants, etc., see column for Classified Advertisements.

Copy must reach this office by 12 noon Wednesday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

PAMPHLETS RECEIVED.

NATURE MENDERS.—Fredk W. Kelsey, New York.—Taking his cue from a remark of Bacon to the effect that "He who plants a garden doth mend Nature," Mr. Kelsey has gotten out a helpful booklet, showing how by the proper use of such plants as rhododendrons, kalmia, evergreens, roses, etc., "Nature" can be mended to good advantage and soon brought into complete harmony with human art and endeavor.

THE NEW EDITOR OF THE GARDENERS' CHRONICLE, London, Eng.—We understand that the new editor of The Gardeners' Chronicle, in succession to the late Dr. Masters, F.R.S., is to be Professor John Bretland Farmer, M.A., F.R.S., F.R.H.S., and a member of the Scientific Committee, who will take up the duties of his important office at the end of the month. A well-known writer in the Agricultural Economist states that though still a comparatively young man, Professor Farmer has had a distinguished career and has crowded into a short period an immense amount of solid work. "He was born at The Mythe, Atherstone, near Nuneaton, on April 5, 1865, and after the usual preparatory education proceeded to Magdalen College, Oxford, at the age of 18 years, where he soon gave a good account of himself. Thus, it is recorded, that in 1887 he gained first-class final honors in natural science, and in the same year was appointed Demonstrator of Botany to the University, a post which was held until 1892. In the meantime he became a Fellow of Magdalen College, in 1889, and was appointed assistant Professor of Biology in 1892, the latter important office extending to 1895. Subsequent to this came the appointment as Professor of Botany at the Royal College of Science, London, a post which has been held with the highest credit to the present time." Professor Farmer's appointment to The Chronicle is a most admirable one, and the proprietors are to be warmly congratulated on their choice. He is no "top shelf" botanist or "dry-as-dust" scientist, but a brilliant and delightful instructor and "a charming personality."—The Nurseryman and Seedsmen.

BOOKS RECEIVED

DAFFODILS, NARCISSUS AND HOW TO GROW THEM. By A. M. Kirby. Publishers, Doubleday, Page & Company, New York.

This volume, which forms part of The Garden Library series of the publishers, is an excellent, practical work, just such a book as one would expect from the pen of a man of Mr. Kirby's known ability, who during his long and large experience as head of the bulb department of the house of Peter Henderson & Company, New York, has gained a knowledge of the subject on which he writes possessed by but few. As the publishers remark in their announcement of the volume, it contains "all that is really worth while about these most popular of Spring bulbs, written from the standpoint of American conditions." The book is especially valuable because the ratings given to each variety show what they are capable of under conditions in America. The garden value of the variety has been kept prominently in mind, even in the classification, leading for example to the group of the "lesser trumpets."

The text naturally divides into two parts: (1) Cultural, including commercial production of cut flowers in the field and under glass; (2) A critical appraisal of all the varieties commonly in the trade (about 500) costing \$5 a bulb, and less. This is a most informative part of the volume, showing much painstaking care and a thorough acquaintance with the work in hand. The giving of the prices at which each variety designated can be purchased may or may not have its advantages; it at least imparts a somewhat "catalogue" character to this part of the work and is something unusual in books of this nature.

The comprehensive and carefully selected lists of sorts for various cultural purposes will be found of especial value, both to the gardener and cut flower grower.

The book is handsomely and profusely illustrated, the illustrations being designed to show the characters of the leading sections, and follow in natural sequence. A "Key to the Daffodils," by Wilhelm Miller and Leonard Barron, forms a serviceable appendix.

Copies of this very useful book can be obtained from the publishers of The Florists' Exchange.

HOW TO LAY OUT SUBURBAN HOME GROUNDS, by Herbert J. Kellaway, Landscape Architect. Publishers, John Wiley & Sons, New York. Price \$2.

Mr. Kellaway says his book has been written to serve as an aid to those with moderate incomes wishing to secure beautiful home surroundings. His teachings are not intended to deal with the treatment of large estates, or to explain the many principles of landscape architecture, but only as an incentive to good taste. As such we find the volume eminently fitted for the purpose in view. It is concise and practical, and the various illustrations, plans and maps it contains are helpful and suggestive.

In these days, when the desire of people, having the means to gratify it, to possess tasteful home grounds is so pronounced, and seeing that the florist is often called upon to perform the necessary operations, Mr. Kellaway's book will be welcomed as a valuable assistant to those having the carrying out of such undertakings in charge, to all of whom we recommend the volume, copies of which can be supplied by the publishers of The Florists' Exchange at the price named above.

THE FLOWER TRADE IN THE PHILIPPINES.—Wednesday, says a Manila paper, was a red letter day at Dell's, Floral Depot, 42 Escolta, as upon that day some thirty beautiful American Beauty roses were gathered from the gardens at Singalon. This is the largest cutting of any one day for American Beauty, as only about eight in any one day, have previously been secured.

A large variety of plants is now being imported from Australia and Japan, but most of the roses are being imported from America. Many varieties of roses are now being cultivated successfully at their gardens and a fine assortment is now kept in stock at the Depot, at 42 Escolta.

The Secretary of Agriculture knows and cares a great deal more about the practical qualities of fruits, forests, flowers, and cereals than he does about their scientific Latin names, says Leslie's Weekly. So when he saw, carved under the allegorical figures adorning the front of the new building of his department in Washington, the words "Fructus," "Forestes," "Flores," "Cereales," he asked what it all meant, and when he was told that these were the Latin equivalents for the agricultural products just enumerated, he curtly ordered that the dead language be "cut out" and plain English substituted. Even if "fructus," "forestes," and "cereales" were good Latin—as they are not—Secretary Wilson would be justified in condemning the practice of carving classical inscriptions without rhyme or reason on our public buildings. In the case of apt quotations from Latin or Greek it may be allowable, but in such instances as the one which excited the ire of our "farmer-secretary" it smacks of affectation.

Chrysanthemum Society of America.

Appointment of Committees.

President Loveless has announced the committees to examine seedlings and sports on dates as follows: September 21, 28; October 5, 12, 19, 26; November 2, 9, 16, 23, 30, 1907.

Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of \$2 should be forwarded to the secretary, not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports, to receive a certificate, must pass three committees.

PHILADELPHIA.—A. B. Cartledge, chairman, John Westcott, Wm. K. Harris. Ship flowers to chairman, 1514 Chestnut street.

CINCINNATI.—R. Witterstaetter, chairman, James Allen, William Jackson. Ship blooms to Jabez Elliot Flower Market, care of Janitor.

CHICAGO.—J. B. Deamud, chairman, Andrew Me-Adam, George Asmus. Ship to chairman, 51 Wabash avenue.

BOSTON.—Elijah A. Wood, chairman, William Nicholson, James Wheeler. Ship to Boston Flower Market, 1a Park street, care of chairman.

NEW YORK.—Eugene Dailedouze, chairman, William Duckham, A. Herrington. Ship flowers to New York Cut Flower Company, care of chairman, 55 to 57 Twenty-sixth street; all flowers to be on hand by 2 p. m. on day of examination.

The official scales of the C. S. A. are as follows:

For Exhibition Purposes	For Commercial Purposes
Color	Color
Stem	Form
Foliage	Fulness
Fulness	Stem
Form	Foliage
Depth	Substance
Size	Size
Total	Total

The following gentlemen have been secured to pass on the exhibits at the New York show to be held November 6 to 8, 1907: Eugene Dailedouze, Flathush, N. Y.; James Wheeler, Brookline, Mass.; William N. Craig, North Easton, Mass.

This show promises to be the best the society has ever held. Make your arrangements so that you will not be obliged to miss it. Send to the secretary for a list of premiums, and try to recall if your dues are paid for 1907.

Work of Committees.

CINCINNATI, September 7, 1907.—Golden Glow (Japanese incurved), exhibited by Nathan Smith & Son, Adrian, Mich.; scored 90 points, commercial scale.

DAVID FRASER, Secretary.

P. S.—The judges speak very highly of this variety and say it is O. K. in every way, and will be a valuable addition to the early flowering sorts. It was shown in Pittsburg, on September 3, in fine shape. D. F.

SOCIETY FOR HORTICULTURAL SCIENCE.

The program of the fifth annual meeting of this society, to be held in connection with the meeting of the American Pomological Society at the Jamestown Exposition, September 24, 25 and 26, 1907, has been issued, and is as under:

The Relation of the Adam's Fund to Horticulture—L. H. Bailey, Cornell University.

Importance of Bud Variations and Mutations in the Development of Citrus varieties—Herbert J. Webber, Cornell University.

Originating New Fruits—G. B. Brackett, U. S. Pomologist, Washington, D. C.

The Origin and Improvement of Some Horticultural Varieties in Ohio—W. R. Lazenby, Columbus, O.

Mendelian Characters in Tomatoes—U. P. Hedrick and N. O. Booth, New York State Experiment Station.

Mendel's Law Applied in Tomato Breeding—A. G. Craig, Pullman, Wash.

On Methods of Breeding for Disease Resistance—W. A. Orton, U. S. Department of Agriculture.

The Plan and Side Issues—C. S. Crandall, Urbana, Ill.

Plant Breeding as a University Course—John Craig, Cornell University.

Seasonal Influence in Carnation Crossing Relative to Seed Production—William Stuart, Burlington, Vt.

The Technique of Hybridizing the Potato—E. M. East, New Haven, Conn.

Experiments in Strawberry Breeding—S. W. Fletcher, Agricultural College, Mich.

Breeding to Overcome the "Little Peach" disease—L. R. Taft, Agricultural College, Mich.

Variations in Swayzie Apple Seedlings—W. T. Macoun, Ottawa, Can.

Xenia in Apples—C. P. Close, College Park Md.

The meetings will probably be held in the Court of the States Exhibit Palace. The time of meeting will be announced at headquarters at the Inside Inn, where reduced rates have been secured for members of the society. This hotel will also be headquarters for the other horticultural societies which convene during the week of September 23-28. It is quite likely that some of the meetings will be held jointly with the American Pomological Society.

OUR READERS' VIEWS

Education for Job.

Editor Florists' Exchange:

It appears to me that Job must now be in a most pitiful state of mind if that sublime literary production of Harvard's famous horticulturist has met his eye. That certainly was a masterful effort of the champion of Linnaeus and to most people it will appear as though the author had little need of calling to his assistance in support of his stand the utterances of such lesser lights as Dr. Britton and Professor Goodale. "A little knowledge is a dangerous thing" without doubt, but a little knowledge combined with a great deal of conceit and presumption is doubly dangerous, if the possessor (which is not often the case) is taken seriously. "The loud laugh bespeaks the vacant mind." Even if it does, what of it? If other minds can be freely drawn from and the product given to the world labeled one's own, except on rare occasions when great weight is necessary to drive home a truth.

Poor Job! Poor Scotland! How I grieve for both. Their sun has set for ever. Job's ancestors in that far off country groped aimlessly in the dark and obtained only a little light which is now extinguished completely by that absorbing luminary attached to America's famous seat of learning. "We can easily understand the influence of past generations and environment on men like Job;" but it is very hard to understand the influences responsible for the amazing display of rot we occasionally see exhibited and are forced to endure. Scotland and Scotsmen were, I always thought, given too much credit for the work of civilization, and it is about time that the truth should be known and their true measure taken. The truth has been spoken and their measure taken at last, with effect disastrous alike to Job and the poor country that produced him. Poor Job! Poor Scotland! How I grieve for both, and how I desire to rush in and snuff the candle that reveals your nakedness despite the conviction that exposure is necessary in order that other men and other countries receive their just reward.

"Linnaeus was a great man." A greater man than Linnaeus has just been revealed by the light of a little candle in the hands of a poor patient scribbler groping in the dark and biting at the pesky little things in his way.

Job is well posted as most of his countrymen are on Burns, Scott and the Shorter Catechism, but what does it amount to to be posted in all of these? Burns was only a poor rhyming farm hand, and Scott a lawyer of fair standing who resorted to writing books for a living. As for the Shorter Catechism it takes a Scotsman to tell anything about it; but all of these, what do they amount to in the light thrown on them by that luminous, educationalist at Harvard? Poor Scotland! Poor Job! How I grieve for you both. X. Y.

(The foregoing communication was crowded out of former issues.)

Cameron and The Scotch.

Editor Florists' Exchange:

"Breathes there a man with soul so dead,
Who never to himself hath said:
This is my own, my native land."

Although citizens of another country, conforming to its laws and regulations and upholding it at the cost of life, as many have done, still there remains, or should remain, in each a feeling that above everything else the place of birth comes first, when there is any sentiment; and there are few instances, indeed, where it is otherwise. And the man who goes opposite to his feelings for a monetary consideration or gallery exhibition is sadly lacking in the general make-up of mankind.

In your Boston contemporary last month there appeared a scathing rebuke of Scotland and Scotchmen in general. I have been so busy that I have not had a chance to answer it. Job, with all his faults, lent his aid in last week's issue of The Florists' Exchange to us poor, fogged Scotchmen. Had it been any other than Cameron, himself a Scotchman hailing from Inverness, he should have been put down as lacking mental power or perhaps discretion.

There is little use in going into a discussion on the Scotch race, or what they have accomplished, their customs, religion, etc., but by reading Mr. Cameron's article we are led to believe that Scotchmen know the Shorter Catechism, Burns and Scott, but probably along general literary lines they are sadly deficient. Robert,

when he is hard pressed for an effective phrase, goes to Burns to find it, as was shown in a lecture by him on the West Indian niggers, which he ended with "O wad some power," etc.

Perhaps to get a jolt at some one I attended the lecture that night at the Boston Club, and according to Robert's way of thinking the nigger of that clime is in a fair way to get wings; and, I suppose, he classes them in literature and wit ahead of any other nation. Wm. R. Smith of Washington—everyone knows him the world over—is a man at whose feet Robert could sit and, leaving the nigger out, learn something; Mr. Smith wasn't ashamed at an S. A. F. convention some years ago to say that Burns was his prophet, priest and king. Probably the influence of peat reek and braxy, inhaled and eaten by Robert's forefathers, is beginning to ooze out of him. He left Scotland young, before it got too strong.

We, very few of us, have had the advantages Mr. Cameron has had. We can't travel through the Continent and all over the British Isles with, I am led to believe, expenses paid. We can't get expenses paid to hobnob with Poulteney Bigelow at Panama. We haven't the advantages of breathing the air of aristocratic Harvard, or the advantage of her library or the views of her learned professors. What education we have received was paid for by our hard-working fathers at the Scotch schools, and advanced by ourselves, sometimes with the aid of a lantern in the boiler room Winter nights; and Robert's forefathers' clan when they weren't using the tallow dip were perhaps, as it has been alleged, making a raid on some weaker clan and carrying off what they could lay their hands on.

I wonder if Lionneus had gone to the Cameron clan in years gone by, would he have made any converts? I myself never heard of Linnaeus before Robert brought him to notice; but I want to know, honestly, if this wasn't some soft soap thrown in the way of the Swedish Prince, who lately came on a visit to Boston? It is alleged that all the high dignitaries in Boston were taking lessons in Swedish and looking up Swedish history to give the Prince the glad hand, some even tracing their descent from that race.

We have learned about the Mendel theory; now it is the Linnaeus proposition, and the downtrodden private gardener; but what the commercial man wants to know, is how to make two roses grow where one grew before, same as Birnie did in the case of the geranium. I think if Cameron would leave the old musty tomes alone and aid us on the last named subject he would get a monument that would pierce the clouds, and the inhabitants of the other planets would look down and say, perhaps in Gaelic, "That's for Cameron." So thinks

R. T. MCGORUM.

Some Reflections.

Editor Florists' Exchange:

REGARDING FOREIGN POSTAGE.—Knowing what good cause our English and German friends have for their recent protests regarding the insufficient postage we very often put on our foreign letters, and having had my special attention called to this matter by a letter from Messrs. James Carter, Dunnett & Beale, of London, England (in The Florists' Exchange of April 20, 1907), from which I would quote the following: "Scarcely a mail passes in the season that we do not have to pay an excess of six cents. The mail rate from the United States of America is five cents, and when there is only a two-cent stamp put on a letter, it leaves a deficiency of three cents which, according to our postoffice rule, we have to pay double on. We put this down often to the carelessness of the office boy, but it is quite a tax on us all the same." I would say all of us most earnestly wish not only to save our correspondents every annoyance, but also to be most courteous to them. I cannot therefore but feel that a little thought given to this matter will be well spent. I am convinced that want of thought causes the whole trouble. Our American postage unit of letter weight is one ounce, but the foreign unit is one-half ounce. Again, we use a two-cent stamp for each unit and fraction; but the foreign unit rate is five cents for each unit and fraction. Still again, should a domestic letter be short of postage, our Government collects only the exact shortage; but abroad the authorities collect double the shortage of postage. As an example, say a letter that weighs an ounce has a two-cent stamp put on it and is mailed abroad; when that letter arrives at its destination the addressee has sixteen cents to pay. We do not stop to consider what an expense, to say nothing of the annoyance, we have caused our foreign correspondents in the past; they certainly have shown "Job's patience."

I would in this connection call your special attention to the fact, that on October 1, 1907, there will be a most radical change in the rate of the first-class postage to foreign countries. A most substantial reduction will be made, as follows:—Five cents for the first ounce, and then three cents for each succeeding ounce. By this

you will see that a letter of two ounces will after October 1, 1907, cost for postage eight cents as against twenty cents now. But I believe the most valuable feature of the change in the foreign postage rate will be the making the unit basis one ounce, for there are such a large proportion of letters that weigh a little over a half ounce; and again, it will very much simplify matters to have the unit of all letter postage, both foreign and domestic, one ounce.

MEDALS FOR FLORISTS' CLUBS.—I have been very much interested in an article in a recent number of the London Garden, regarding the method pursued by the National Sweet Pea Society to encourage the cultivation of this flower. As it is so exactly in line with what the writer would like to see our own Rose Society, and in fact all our special societies inaugurate, I will quote very briefly from the London Garden:—"The efforts put forth by the National Sweet Pea Society, for the purpose of extending a love for and the cultivation of sweet peas, have met with very great success; so much so that in the schedules of local horticultural societies, classes for sweet peas now frequently figure largely. This has led to many requests for the National Sweet Pea Society's medal, to be offered as a prize for sweet peas, and it has also led to requests for advice concerning rules, arrangement of classes, etc. To meet these requests, the committee has now decided upon the following scheme of affiliation. Societies subscribing \$2.50 per annum (i.e. 10s., 6d.) are entitled to one of the National Sweet Pea Society's silver medals, to be offered as a prize for sweet peas only; also to one copy each of the society's annual and other publications; to one ticket of admission to the society's London exhibition; and to nominate one of its members to represent it at the annual and other general meetings of the society. Committees wishing to take advantage of this scheme should write to the secretary of the National Sweet Pea Society."

Some such plan as this appeals very strongly to me, as a most excellent way to accomplish great good; as between such national societies as our S. A. F., our American Rose Society, and all the others doing special work along advanced lines of horticulture. We must do something to bring out and encourage all that is best in our local florists' clubs and other kindred organizations, no matter how small they may be; and as regards the smallest local societies, they need the helping hand of such a scheme the most, for the simple reason that a very small organization cannot for many years hope to infuse very much of value into any of its awards (apart from its money prizes). On the other hand, a medal award from an official source would create the extreme limit of competition, and be prized by the fortunate exhibitor as one of his most cherished possessions. Again, the local society would, of course, appoint its best members to award such a prize; and it goes without saying that no committee chosen for any purpose would feel the responsibility of its duties more keenly. Such a plan would do much to add interest and raise the standard of the local organization. Unless our small clubs can be assured of some such help from those sources which are so amply qualified to give it, their growth will continue as in the past to be very slow.

Nor is this matter wholly one-sided; the parent society by obtaining first the additional membership of the local society, and then its yearly subscription to defray the expense of any such medals, would substantially increase its usefulness.

M. B. FAXON.

THE LONDON (ENG.) CUT FLOWER TRADE.—At Covent Garden market it is estimated the English trade in cut flowers is more than \$30,000,000 a year, says an Exchange. In the busy season, from October to June, the value of the cut flowers handled every day at Covent Garden averages \$100,000. The enormous trade in flowers is made up of many classes—from the costly hot-house flowers sold by West End florists to the cheap violets, roses, carnations, etc., sold in their season by hawkers in London streets. The floral decorations for important social functions during the London season represent many thousands of dollars every year, but are really only a small proportion of the trade.

NATIONAL NUT GROWERS' ASSOCIATION.—For the Jamestown convention present arrangements contemplate the holding of four sessions, beginning at 2 o'clock p. m., Thursday, September 26, with two sessions on the 27th and one the morning of the 28th. The general meetings will be held in a convenient hall in the States Building, while committee work will be assigned rooms as needed. Headquarters have been provided at the Inside Inn. The program is of particular interest, and all the speakers are specialists in the assignments given them.

The Market Growers' Journal suggests the formation of a National Society of Truck Growers, and cites as an example of the benefits resulting from organization the great strides made in the florist business since the founding of the S. A. F. in 1885.

Dutch Bulbs.

Abstracts from a Paper read by A. Henderson of Vaughan's Seed Store, Chicago, before the Wisconsin Horticultural Society, August 28, 1907.

Propagation.

The propagation of the bulbs is an important and interesting subject, both for the horticulturist and the botanist; and the history of the mode in which these plants are reproduced is perhaps the most delightful phase of their life story.

They may be multiplied by seed, but this is for the most part a long and tedious process, and usually only employed in the case of raising hybrids. Too many years elapse before the bulb is mature enough for flowering, and the patience of the cultivator becomes, consequently, exhausted. The hyacinth, for instance, demands a youthful immature career of some five or six years before it can feel energy and power and ripeness enough to throw up a flowering spike, and when considering that this bulb, if found worthy to be grown, requires twelve to fifteen or twenty years of careful artificial propagation before a moderate stock can be had, it is therefore necessary for some other method to be used in increasing the stock.

The method of propagating the hyacinth used to consist of making two or three cuts across the base of the bulb, after removal from the ground. When placed on the shelf to dry, it was not long before numbers of tiny young bulbs were formed at the margin of each slit. This, however, did not give the desired number of offsets and a new method has been discovered which is in general use. As soon as dug, the bulbs are taken and the base scooped out so that a large bowl-like cavity is formed, lined with the transverse surfaces of the fleshy scales. The bulbs are then put out in the field and covered with sand and left there for fourteen days (this heals up the bulb where it has been cut), after which they are taken into a shed and spread on a rack. After several days it will be found that at the surfaces of the scales inside the cavity have formed a large number of young bulbs of very small size, representing so many individual plants. These are allowed to remain there until the tissues of the parent bulb have all dried out and are then detached and sown out in the open ground. It will take six years to grow a full-sized hyacinth from such a bulblet.

Tulips and narcissus are propagated from offsets which form at the base of the parent bulb, the strongest bulbs being grown on in order to raise these offsets and are called "mother bulbs." The mother bulbs in the case of the tulip are planted separate and will produce the following season eight or nine bulbs or bulblets, according to how prolific a variety it is. The mother bulb itself disappears, as the tulip is like the gladiolus inasmuch as the bulb that produces the flower dies and a new bulb forms in its place, all that is left of the old bulb being the dry scales. Bulbs received here are usually in their third year. The narcissus is also propagated from offsets, but the old bulb does not die as in the case of the tulip, although it will sometimes break up into offsets altogether and in this way become lost.

Outdoor Planting in America.

Outdoor planting of Dutch bulbs in this country is increasing every year and they certainly deserve to be more liberally planted still.

Where beds are to be solidly planted with Spring flowering bulbs, the soil should be well prepared in the first place. A rich, sandy loam is undoubtedly preferable, but perhaps the most essential part of all is that the beds have perfect drainage, so that there will be no danger of water standing during the Winter, to rot or weaken many of the bulbs. The soil should, if not naturally sandy, have a good coating of sand and should be dug to a depth of at least fifteen inches. Well rotted cow manure is the best fertilizer that can be used, but a liberal sprinkling of fine ground bone will also be beneficial. The beds are better if raised a few inches higher than the surrounding ground. The depth at which bulbs should be planted depends mainly on the variety, but a simple method is to put the bulbs down at least twice their own depth. After the first hard frost and before severe freezing weather sets in a mulching of from six to eight inches of coarse litter or leaves, covered with some fir or pine branches to prevent scattering by the Winter winds, should be put over the beds. This will prevent the alternate freezing and thawing of the ground. This mulching should be removed on the appearance of Spring. It is better to take it partially off at first, thus leaving a light protection until the plants appear above ground.

In the hardy border, bulbs may be planted to great advantage in patches among the hardy plants. They will not only look well and make the border look showy from earliest Spring, but they have a thorough chance of ripening the bulbs and need not be disturbed from year to year for this purpose. I would recommend especially the late flowering class of tulips such as *Gesneriana*, *Bouton d'Or* and the *Darwin* class.

There is another plan of planting Spring flowering bulbs, which, to the lover of natural effect, is perhaps the most pleasing. This is planting in the lawn or in semi-wild land. In many places no better effect can be gained than from large patches of narcissus above the green sward. In a closely kept lawn only such small and early flowering varieties as crocuses and scillas may be planted, but what can be more pleasing in a semi-wild place than patches of the different narcissus and in shady places the erythroniums, trilliums, etc.? When this style of planting is adopted each variety or color should be in large patches, if space will permit, the larger the better. Nature always plants in this way.

For planting outside or inside I would always recommend the use of named hyacinths and only single varieties. For the best list of named hyacinths I cannot do better than give the list published recently in one of the trade papers:

Charles Dickens, beautiful pink, fine formed large spike, one of the finest pink hyacinths.

General Pelissier, brilliant carmine, compact spike, very early.

Gertrude, rosy pink, compact spike and large bulb. Being of erect habit, it is excellent for bedding.

Narcissus Empress.

Photo by John F. Johnston.

Gigantea, fine blush pink, large compact spike. The name indicates its character, as it has a giant spike.

Roi des Belges is one of the finest scarlet hyacinths; keeps its color longer than any other scarlet.

Lord Macaulay, deep carmine pink with white eye, the brightest of the dark reds. Extra large and compact spike, a splendid hyacinth.

Moreno, extra fine pink, very large spike and bells.

Baroness Van Thuyll, pure white, large compact spike.

British Queen, pure white, grand spike.

Grandeur a Merveille, a fine bluish white, very large spike.

La Grandesse, extra fine snow white, large spike, and fine formed bells, grand flower. This is an exhibition variety which has no equal among the single white hyacinths.

Mme. Van der Hoop, pure white, extra large bells. Very fine bedder on account of its erect habit.

Baron Van Thuyll, dark bright blue, large compact spike.

Charles Dickens, dark porcelain blue.

Grand Lilas, extra fine porcelain blue, grand large spike and bells. One of the finest light blue hyacinths.

Grand Maitre, deep porcelain blue, broad large spikes and very large bulb, a grand variety.

King of the Blues, deep glossy blue, large compact spike, the finest dark blue hyacinth in cultivation.

Lord Derby, light porcelain blue, one of the finest light blue hyacinths, broad spike.

Queen of the Blues, light blue with silvery appearance, extra fine large spike, splendid flower.

The following are among what I would consider the best early tulips for bedding: Artus, scarlet with yellow base; Belle Alliance, scarlet; Chrysolora, yellow; Duchess of Parma, red bordered with yellow; Cottage Maid, rose pink shaded on white; Keizerkroon, red with yellow border; La Reine, white; Joost Von Vondel, white; Pottebakker, scarlet, white and yellow; Prosperpine, carmine rose; Vermilion Brilliant, scarlet; Thomas Moore, orange; Prince of Austria, orange scarlet. Of the doubles Crown d'Or and Imperator Rubrorum, scarlet; Tournesol, red and yellow.

In addition to the foregoing we must not forget the late flowering class which are thought by many to be the finest tulips of all; they certainly are being more freely planted as their merits become better known, but there is still room for improvement. The following are among the best; *Gesneriana*, *Spatulata*, *Major*, scarlet with bluish black base; *Bouton d'Or*, or *Ida*, yellow; *Isabella*, or *Shandon Bells*, rose; *Sweet Nancy*; *Golden Crown*, yellow streaked red; *Picotee* or *Maiden's Blush*, white margined rose; *bizzards*, *hyblæms*, odd and interesting varieties.

I must also say an especial word for the Darwins; these I consider the finest of the late flowering class. Their stems are long and stiff, often two and one-half feet high in good garden soil. Once planted in a favorable location they will come up each year for four or five years. Of these the named sorts are still rather

Beds of Tulips and Pansies fronting the Statue of Religious Liberty, Fairmount Park, Philadelphia.

expensive, but the following can be had at reasonable prices and are certainly worth growing: Glow, Gretchen, Salmon King, White Queen, Clara Butt.

Parrot tulips are also to be mentioned in the late flowering class of tulips, and while some objection to them may be raised on account of the stem being too weak to hold the flower erect, still their peculiarly toothed petals and brilliant combinations in colorings make a welcome addition to the late Spring flowers.

List of narcissus for bedding: Yellow Trumpets, Glory of Leyden, Emperor, Henry Irving, Golden Spur, Bicolor Trumpets, Victoria, Empress, White Trumpets, Mme. DeGraaf. Incomparabilis section—Sir Watkin. Double Orange Phoenix did remarkably well with us last season at Western Springs, Ill. In single varieties, Poeticus probably is the best and most satisfactory of all narcissi for outdoor plantings.

Advantages of Connected Houses.

Paper read by George Robinson, Montreal, before the Canadian Horticultural Association at London, Ont., August, 1907.

The first consideration in constructing, maintaining and running a commercial establishment is economy, and this style of house is certainly to be recommended in this respect for several reasons. First among these is economy in land investment. This is a great consideration, especially among florists in close proximity to a city where land is quickly becoming too valuable for florists' uses. The connected style of greenhouses will allow the florist the use of practically every foot of land, thereby realizing the same amount of produce from two-thirds the amount of land required to erect separate houses upon.

Savings Effectuated.

There is a great saving in cost of construction and up-keep. The sides of greenhouses are costly to erect, and are a source of expense forever afterward. This is the part of a house where decay sets in and has to be renewed frequently—not to mention houses getting out of shape and glass loosening all over the roof to be lifted out some fine cold, windy night. A stronger construction is obtained in block houses at less expense for foundations, and the wider the block naturally the greater the saving in construction and maintenance.

There is also a great saving in fuel in favor of connected over separate houses. Houses in block twenty feet wide require ten runs of steam pipe to maintain a rose temperature in our locality; if separate the same size house requires fourteen runs. This means 40 per cent. additional boiler plant, 40 per cent. additional piping and 40 per cent. additional fuel. Add to this the expense of extra mains and returns, which are needed for separate houses, and which in some cases have to run underground, or possibly outdoors, and you will realize the advantage of connected over separate houses.

When we first built connected houses all sorts of trouble was predicted for us from the heavy snow storms which we experience in our latitude; while, as a matter of fact, we have had practically no trouble at all. Iron being a conductor of heat, the snow will melt during ordinary snow storms nearly as fast as it falls. On the other hand, after a very severe storm I have seen the gutters full of snow from ridge to ridge. Two days afterward the gutters were clear, while the north sides of the separate houses were partly covered with snow owing to the ice hanging on the eaves and preventing the snow from sliding off. Of course, this applies to iron construction. I would not, under any circumstances, favor connected houses with wooden gutters in this locality; but with iron gutters and a run of steam pipes under each gutter no trouble will be experienced from snow. Not only is the glass clear, practically all Winter, when light means growth; but the breakage of glass is practically nil unless under exceptional circumstances such as we had to contend with last Winter, when it was raining and freezing at the same time, forming a coating of ice all over the glass, which as it thawed slipped down in chunks and broke the glass on the opposite roof. This has only happened once in four years, and in consideration of the advantages above named we are willing to overlook this one break.

From the Growing Standpoint.

Regarding the advantages of connected over separate houses from a grower's standpoint, I would not like to go on record as saying that better results can be obtained in block houses; but will try and point out some of the advantages of large blocks of houses over smaller separate houses for the cultivation of flowers or plants.

It is a recognized fact that a better circulation of air can be obtained and a more even temperature maintained in a large than in a small house, for the reason that in separate houses variations of heat and cold are localized, mainly owing to the fact that the bulk of the heating pipes have to be placed near the sides of the houses, which is the coldest part. This is especially the case in small houses, and every grower knows the trouble and loss resulting from this excessive heat. Not only does red spider breed here, but the plants next the pipes always have a dried-up appearance, which is not noticeable before heavy firing commences, and which disappears entirely after firing ceases. On the other hand, in a block of houses the heating pipes can be dis-

Narcissus Mme. de Graaf.

Photo by John F. Johnston.

tributed in single or double runs along each and every path and a more even temperature, without excessive heat in any one part of the house, can be obtained.

Advocates of separate houses claim better light by the prevention of the roof of one shading its neighboring house and by the admittance of light at the sides; but the modern construction of connected houses has so reduced the light obstructing features of the roof as to much weaken the force of the contention. An iron gutter five inches wide throws very little shade, and this shade is not stationary by any means. The shadow cast by the gutter moves with the sun, and there is absolutely no space in connected houses that cannot be utilized to full advantage. On the other hand, the advantage that advocates of separate houses claim in the increasing of the width, and consequently the height of separate houses, is in itself an argument in favor of connected houses, since as far as side light and equal distribution of heat are concerned, there is practically no difference between a single house 150 feet wide or a block of connected houses 150 feet wide; but the circulation of air will be much more perfect in the block of houses than in the said single houses.

For the wholesale grower of cut flowers connected houses have a great economical advantage over separate houses, and the produce from these blocks certainly cannot be excelled by the produce of separate houses; that fact is strongly in evidence at such places as the Dale estate, J. H. Dunlop's, J. Gammage & Sons and lots of smaller establishments throughout the country.

For the retail grower who grows a little of every-

thing, connected houses may not be such a great advantage as to the larger grower, unless two or more houses of one class of plants are grown, when connected houses can be built and prove a success, both from a grower's and an economic point of view.

But whatever houses you intend to build, be sure and use iron gutters or eaves as the case may be, not only for the lasting qualities, but for the sake of light in Winter and the saving from non-breakage of glass.

To Get at the Cost of Production of Greenhouse Stock.

Abstract of paper read by W. W. Gammage before the Canadian Horticultural Association at London, Ont., August, 1907.

Cost finding is a unit of an accounting system, and it is to the bookkeeper, or accountant, that we must look for final and accurate information. But first it is necessary to supply him the data from which to tabulate and conclude a system. From the foreman, or manager, he must receive an accurately kept account of the time each workman occupies with each house, or portion of house, the amount of space occupied, the length of time the house, or portion of house is occupied with each size or variety of plant. To the grower's time, and length of time the house is occupied with a crop, must be added an accurately estimated cost of heating based on the number of feet of radiating surface in the house, the size and value of pot, the value of seed, cuttings, or plants. This is best done by a card system, keeping a separate daily record of each man's operations, each sub-foreman, or grower, filling in his card accounting for the time, number of plants handled, new stock added, stock taken out, etc. From this card entries can be made to a properly ruled sheet or card. These sheets also act as a perpetual inventory, and on large places are indispensable to the sales manager. In turn these are tabulated and to the stock and operating expense are added the fixed expenses, such as interest, taxes, insurance and other general non-productive expenses, which are easily arrived at. By dividing the total by the number of feet of bench room we arrive at the average fixed expense per foot.

In houses where several varieties of plants are grown and are continually being either added to or taken from, the cost can be arrived at by keeping a debit and credit account of stock and averaging weekly or monthly expenses. To find the cost of growing roses, carnations, violets, etc., is easier than that of pot plants, inasmuch as it is usually on a large scale and more time is occupied with each operation, such as the preparation of soil, emptying, refilling and planting the houses, after which it is principally routine work with but little variation. However, it is necessary to take all the expenses for a whole year to find the actual cost. The total number of blooms divided by the total expense will give the cost per bloom, but as in most places both cuttings and plants are sold, then it will become necessary to keep record of the time and place occupied by these and by deducting this from the total expense and dividing the balance you can arrive at the cost per bloom.

To do all of this may seem like a great deal of work, but it is only one portion of the general operation of your business, and is just as necessary in this as in any other line.

Importation of Phoenix Roebelinii.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Washington, D. C.

GUDE BROS., 1214 F Street, N. W. We excel in high-class flowers and design work of every description; quick service, reasonable charges and liberal treatment have placed us on top. Try us.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLORAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLORIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas.

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYRES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

CLUB AND SOCIETY DOINGS.

AMERICAN POMOLOGICAL SOCIETY.—The meeting of the American Pomological Society will be held on the Exposition grounds, Jamestown, Va., September 24-26, 1907. The opening session will take place in convention hall, September 24 at 3 p. m. President Goodman will occupy the chair. Addresses of welcome, on behalf of the Exposition, will be made by President H. St. George Tucker, and on behalf of Virginia by Samuel B. Woods, President State Horticultural Society, to which Colonel C. L. Watrous, of Iowa, will respond. President Goodman will then deliver his address; after which committees will be appointed. The following is the balance of the program prepared:

Second Session, September 25, 9:30 a. m.

(Held in Court of States Exhibit Building)

Diseases and Insects

A Promising Treatment for Control of Brown Rot of the Peach—Mr. W. M. Scott, U. S. Bureau of Plant Industry.

Some Features of the Work in Deciduous Fruit Investigation of the Bureau of Entomology—Professor A. L. Quaintance, U. S. Bureau of Entomology.

Control of Pear Blight on the Pacific Coast—Mr. M. B. Waite, U. S. Bureau of Plant Industry.

Reports of Committees.

Third Session, Wednesday Afternoon, 2:30 p. m.

Fruits and Their Improvement

Notes on New Fruits—Colonel G. B. Brackett, U. S. Pomologist.

Some Notes on Figs—Professor H. N. Starnes, Georgia.

Fruits of Canadian Origin—Mr. W. T. Macoun, Ottawa, Canada.

Deductions from Experience in Breeding Orchard Fruits for the Upper Mississippi Valley—Mr. C. G. Patten, Iowa.

Present Status of Citrus Breeding—Dr. H. J. Webber, Cornell University Experiment Station, Ithaca, N. Y.

Fourth Session, Thursday, 9:30 a. m.

Election of Officers.

Orchard Management

The Prune in Oregon—Mr. H. S. Giles, Salem.

The Cherry in Oregon—Mr. C. E. Hopkins, Spring Brook.

Features of Fruit Growing in Hood River, Oregon—Professor C. I. Lewis, Corvallis.

Mountain Peach Growing—Mr. G. P. Miller, Romney, W. Va.

Early Apples in the Eastern States—Mr. J. L. Soper, Magnolia, Del.

Fifth Session, Thursday, 2:30 p. m.

Reports of Committees.

Score Card—Professor F. A. Waugh, chairman.

Inspection—Mr. W. A. Taylor, Colonel C. L. Watrous.

Operation of the Canadian Fruit Marks Act—Mr. A. N. McNeill.

Nomenclature—Colonel G. B. Brackett, Professor W. H. Ragan.

Historical

History of Fruit Growing in Florida—Professor H. Harold Hume, Glen Saint Mary.

History of Fruit Growing in Virginia—Professor J. L. Phillips, Blacksburg.

History of Fruit Growing in Maryland—Mr. J. W. Kerr, Denton.

History of Fruit Growing in North Carolina—Professor W. F. Massey.

History of Fruit Growing in West Virginia—Professor T. C. Johnson, Morgantown.

History of Fruit Growing in Georgia—Mr. P. J. Berckmans, Augusta.

Fruit Growing in Ohio—Professor W. R. Lazenby, Columbus.

Do Present Commercial Standards Promote Fruit Consumption?—Mr. W. A. Taylor, Division of Pomology, Washington.

Railway Rates: It has been impossible to secure any concession from the transportation companies.

Hotel: Headquarters will be established at the Hotel Elliott, Ocean View, Va., one half mile from the exhibition grounds; rates, \$2 per day for room, breakfast and supper.

St. Louis Florists' Club.—The regular monthly meeting of the Florists' Club was held last Thursday afternoon. The attendance was not as large as expected, owing to the fact that most of our growers are very busy now housing plants and finishing up repairs for the Fall.

President Irish presided with twenty members present, including all the new and old officers. All committees made full reports and were discharged with thanks.

Walter Retzer of the St. Louis Seed Company made application for membership. L. M. Van Hook, a grower, and D. Bood, a retailer, were elected to membership by a full vote.

After the routine work had been disposed of the newly elected officers were installed. The president appointed ex-presidents Dunford and Guy to assist in the installation ceremonies. With a few appropriate remarks, President Irish turned over the chair to his successor, William C. Young. The average attendance the past year was twenty-five. The treasurer's report showed that the new officers will have plenty of money to work on the coming season. A vote of thanks was extended to the retiring officers.

The question box contained a number of interesting inquiries which brought out a lively discussion among the carnation and rose growers. Before adjourning President Young announced that refreshments would be served in the room below, where all the members

spent a few hours in conversation for the good of the club.

The next meeting will be held Thursday afternoon, October 12, in the same meeting room, 810 Olive street, Burlington Building. ST. PATRICK.

NASSAU COUNTY (N. Y.) HORTICULTURAL SOCIETY.—The third annual exhibition of the Nassau County Horticultural Society will be held at Pembroke Hall, Glen Cove, on November 5, 6 and 7. The preliminary schedule has been issued and shows a list of 103 classes, divided into ten sections. Some of the classes are open only to private gardeners while in others only commercial growers may compete. In the children's exhibits there are classes in which no florists' or gardeners' children may compete and others into which only these will be admitted.

In every class the society gives cash prizes, the leading class in each section being awarded three prizes, and all of the other classes two or three. There are a number of special prizes given by outsiders which may be competed for by members of the society only. Among these prizes are a silver cup presented by Scott Brothers, of Elmsford, N. Y., for fifty carnations arranged for effect. Commercial gardeners are barred from this competition. Mrs. John Alvin Young, of Werhawold, presents \$10 for the best twelve American Beauty, and \$10 for the best six heads of lettuce. Adolph Janacke, of Floral Park, gives \$5, divided into three prizes for six double geraniums, in pots not to exceed 6 inches. Mr. Janacke also gives \$10 for best Phoenix Roebeleni. F. R. Pierson Co., Tarrytown, N. Y., gives a silver cup for the best twenty-five Winsor carnations, this competition for private gardeners only. The silver cup presented by J. H. Troy for best collection of outdoor roses, to be won three times to hold, will be competed for. Peter Henderson & Company, New York, give \$10, divided into two prizes, for best collection of twelve dishes outdoor grown vegetables.

The judges will be James Ballantyne, of Tarrytown; A. Shultheis, of College Point; Peter Duff, Orange.

Phoenix Roebeleni.

Editor Florists' Exchange:

Under separate cover I send you photograph (herewith reproduced) of some imported plants of Phoenix Roebeleni taken after they had arrived in Europe recently; they are considered the finest specimens collected. They were sent here by C. Roebeleni, after whom this plant is named, and I am pleased to tell you that these plants will soon find a home near New York.

Its vigorous habit and usefulness for decorating has made this palm popular here; and now that seed can be obtained at a favorable price it will shortly be universally used for all kinds of decorative work. Last year I distributed a large quantity of seed through the medium of our New York house. (The Yokohama Nursery Company.)

Many of the Belgian nurserymen are growing this plant, and at the coming Ghent quinquennial exhibition it will be much in evidence; it shows its true character both in small and in large plants.

The gentleman seen in the picture is W. Hennis of Hildesheim, the importer. A. DIMMOCK.

London, Eng.

Where to Plant Horse Chestnuts.

Occasionally horse chestnuts are found as street trees, a position they are not at all fitted for. The reflection of heat from the paved street causes the foliage to burn and blight, often causing the foliage to disfigure the trees in Summer. On the other hand, plant trees of it on a lawn where there is none of the trials of a street for them to undergo, and see the difference! No burning of the leaves, but trees of lovely green foliage, lasting until late in Autumn.

The horse chestnut delights in a moist, cool situation, but it demands coolness of soil; conditions it meets with to a great extent when it grows in sod.

The common European horse chestnut is well known to everyone, and when of mature age is one of the grandest trees extant. The double-flowered variety of it, alba plena, possesses all its good qualities in addition to having double flowers, which are a great merit. Single flowers are preferred by many, but there is no gainsaying that double ones are far more lasting, and in the case of the horse chestnut the panicles of blossoms last a full week longer when they are double.

The red-flowered horse chestnut is one of the most beautiful of flowering trees. It does not make as large, massive a tree as the common one; otherwise its habit of growth is similar. Where its original home is seems undetermined. It is credited to this country by European authorities, but just to what part, or where, is unknown. It is, however, a beautiful tree, its leaves being of a bright shining dark green, forming a splendid groundwork for its large panicles of bright red flowers. As both it and the other horse chestnuts are easily transplanted, this adds greatly to their popularity, as does the fact that to increase the common one from seeds and the others by budding or grafting, is a comparatively easy operation. JOSEPH MEEHAN.

Dahlias at White Marsh, Md.

Upon invitation of Messrs. R. Vincent, Jr. & Sons Company, a large delegation of florists from Baltimore and vicinity, together with a good many from Philadelphia and Washington, visited the extensive nurseries of that well known firm on Tuesday, September 17, 1907. The packing and shipping department buildings had been transformed into a bower of bewildering color by many thousands of specimen cut blooms of dahlias, artistically arranged, with evergreens in background. Wide paths and the staging of the exhibits in such an excellent manner insured the most convenient inspection.

More than 250 varieties of dahlias were shown, and the greatest interest was manifested by those present. Many notes were taken and the Vincents and their staff of workers had to answer many questions as to the merits of certain sorts that were singled out. A number of exceptionally good seedlings and novelties were shown with everything in their favor to make them a number one commercial varieties.

The outdoor display was also pronounced by everyone a thing of marvelous beauty. Forty acres of dahlias in full bloom is a sight which makes a lasting impression upon all having the good fortune to see it.

The ladies committee of White Marsh also demonstrated to the hundreds of visitors that it knows how to provide for them; a bountiful repast was another feature of the day. The crowds of visitors were admirably handled. A number of wagons and carriages were kept in constant motion between Cowenton Station and the dahlia fields for one hour, until everyone was lauded at the establishment.

After spending nearly five hours among the dahlias everybody, with a bunch of flowers of his own selections left by the special train at 5:10 p. m.

An unfortunate and what nearly proved a disastrous accident happened to the train conveying the florists from Cowenton on the homeward journey. As the florists' train was backing at the junction, the New York express crashed into it, throwing the engine down the embankment. The lives of the florists and their families were saved by the breaking of the coupling connecting the locomotive with the coaches, which remained on the track, and, happily, no one was injured. I am writing this at the Bay View Junction signal station where the wreck occurred, and will send fuller particulars later.

The following were among those present:

From Baltimore.—Mr. and Mrs. Robert Graham, Mr. and Mrs. J. J. Perry and son, Mr. and Mrs. M. Richmond, Mr. and Mrs. Thos. Patterson, Mr. and Mrs. Henry Hess, Mr. and Mrs. C. L. Seybold, Mr. Stevenson, Mr. Madson, Mr. and Mrs. James Boone, Mr. Cole, C. S. Bradley, David Broadfoot, N. Flitton, J. Glass, K. Christy, George Brown, C. Wagner, F. G. Burger, Henry Seybold, Mr. and Mrs. Kuhlmeier, Mr. and Mrs. Theodore Hemberger, Leopold H. Wieman, Mr. and Mrs. Fred. Locher, Sam Cansly, Otto Guertel, Wm. Kramer, John Wieman, Sam Graham, Ed. Herman, Mr. and Mrs. W. J. Johnston, J. Anderson, W. B. Sands, Henry J. Thomas, F. Corse, G. M. McCormick, H. Wagner, J. C. Cole, R. Halliday, Wm. Feast, Wm. Fisher and Adolph Bernhardt.

From Washington.—Peter Bisset, Wm. H. Ernest, George H. Cook, Robert McLennan, Mr. and Mrs. Geo. Schaffer, W. F. Gude and family, A. Gude and family, J. L. Carbery, C. Hoover, Mr. and Mrs. George Field, J. E. Anderson, Otto Bauer, E. Mayberry, Mr. and Mrs. Wm. Clark, Jacob Minder, J. J. Barry, Mr. and Mrs. Ed. Symonds, N. S. Hammer, Theo. Dietrich, John Robertson, Mr. and Mrs. Chas. McCauley, Mr. and Mrs. Christian Shellhorn.

From Philadelphia.—John Westcott, Fred Lahman, E. Dungan, Frank Adelberger, J. Rosnosky, Wm. Falk, Wm. Graham, Wm. Robertson, J. Dadds, Leo. Niessen, Dennis Connor.

Other visitors were.—Mr. and Mrs. F. C. Bauer, Govanstown, Md.; Mr. and Mrs. Lotz, Brooklyn, Md.; Mr. and Mrs. Geo. Morrison, Uplands, Md.; Mr. and Mrs. Cook, Catonsville, Md.; I. H. Moss, Govanstown, Md.; Mr. and Mrs. Wm. Fraser and family, Ruxton, Md.; Wm. Lehr, and Henry Lehr, Brooklyn, Md.; E. A. Seldevitz, Arlington, Md.; Michael Hannigan, Catonsville, Md.; Geo. Kalb, Catonsville, Md.; Mr. and Mrs. Anderson, Ruxton, Md.; Mr. and Mrs. Chas. Wagner, Woodbrook, Md.; Philip B. Welsh, Glen Morris, Md.; Thos. Sears, Boston, Mass.; John Keppinger, Glenholm, Md.; Fred Lapp, Rossville, Md.;

Mr. and Mrs. W. J. Kennedy, Pikesville, Md.; Adam Repp, Catonsville, Md.; Henry Reinhard, Orangeville, Md.; Mr. and Mrs. John Rider, Brooklyn, Md.; Chas. Uffler, Evergreen, Md.; C. Akehurst, White Marsh, Md.; F. Lautenschlager, Chicago, Ill.; Chas. R. Rider, Brooklyn, D. C.

CHAS. L. SEYBOLD.

Up-to-Date Methods for Conducting a Commercial Florist's Establishment.

(Paper read by T. W. Duggan, Managing Executor of the H. Dale estate, Brampton, Ont., at the Convention of the Canadian Horticultural Association, held at London August 28, 1907.)

(Continued from page 374.)

Prices.

As to prices, this is a tender, but vital part of our inward workings. I do not believe in combines, and have never had part in one, but I believe there should be an intelligent arriving, as near as possible, at the cost of an article, and then the selling at a fair price. I may be

Cash and Credit Sales.

Now as to the last item, cash. If a man treats his men well, grows good stock, grades properly, packs carefully, is prompt in his delivery, and hands over in good condition to the express company for his customer the order that he has been entrusted with, he is entitled to charge a fair price, and to get the money. Undue credit is a curse to business. Fortunately by degrees it is becoming lessened in every respect, and I believe that the success of large firms, like the T. Eaton Co. and Robt. Simpson Co., is due largely to the strictly cash basis, which is the only proper way of transacting business. What right has the grower to pay for his stock, pay for his employees for growing, pay for his coal, and be out thousands of dollars each month, with an uncertainty as to whether or not he is going to get it back? When at his request, I first looked into the affairs of the late Henry Dale, I found that he neither knew how much he owed nor how much was due him. Although the business then was not more than one-tenth what it is now, there was then on his books past due for any period from one month to two years, about \$8,000, or about six months' business, a

account, and our C. O. D. list now is larger than our ledger account. We have also gone so far as to make it a rule with our customers that if a draft for July account for instance, is not paid on the 15th of August, all shipments must cease until the amount is liquidated. I believe, gentlemen, that it is in the interests of our trade customers, as well as to our own advantage, to insist upon such prompt payment. If the coal dealer gives long credit to the grower, and the grower gives long credit to the trade customer, and the customer gives longer credit still to his patrons, it brings a long chain of misfortunes to every one concerned. We ask no more time than we give. Everything we buy is paid for in cash, and in no other way could we possibly run our business and give our customers proper value. Our losses during the seven years of business have not amounted to one-half of one per cent. of our output, and indeed our margin of profit we find so small, that we could not afford to do business at the prices we charge on any other basis. Many of our customers at first not overly pleased at limited credit, have since told us that we did not gain as much as they by their being compelled to limit their own local credit, and thereby reducing their losses; we believe that no grower is doing his trade customer a kindness in extending a credit beyond the month following delivery of goods, indeed some of our very best customers, and best off financially, will not have goods other than on a C. O. D. basis, some others insisting upon paying each week, finding that they will attend to their own collections better when these payments have to be made. The express man, telegraph man, telephone man, etc., call monthly—why not the florist?

Know Your Customers.

I do not pretend to say or think that I have covered all the ground in this crude paper, the first I have ever attempted. The running of a greenhouse concern is not an easy task by any means. It requires us to be hard at it, and always at it, in fact, during the seven years that I have had the management of this business, I have worked harder than during the fourteen years preceding. I have not even been able to take time to visit more than a few of our customers, and believe this is a disadvantage. One's trade customers ought to be personally known to the grower, but in an endeavor to build up a large business, which is now about 750,000 square feet of glass, and nearly five times as large as it was when Mr. Dale was unfortunately taken away seven years ago, I have found it necessary to devote every possible moment of time and all my energies without much relaxation.

In connection with this paper I have not knowingly withheld anything that seemed important and hope that something said, while not new, may stir us up to better efforts and greater success. We do not know it all. There is much to learn all the time, and when we think that we have arrived at perfection it is about time for us to quit. There is something new and something better obtainable all along the line of our production. With eyes open, minds concentrated and energies unflagging we can yet produce varieties finer than those yet known. We must not be too slow in discarding what has become out of date and tiresome to the public, and replacing with something that appeals to ever varying demands.

Ours is a noble calling. Let us look and act as if we realized it. The clergyman and physician minister to the sick, and so do we, in some instances with greater success. Our mission extends to the sorrowing on one hand, and to joy in every phase on the other hand. In short, we are partners with nature in endeavoring to make life bright and enjoyable by assisting in the production of what is most beautiful and fragrant. The very atmosphere and loveliness of our greenhouses ought to spur us on to efforts that shall not only enrich us to a moderate degree, but shall make for us a good name, that is rather to be chosen than great riches.

Damage by Hail in Iowa.

Our illustrations show portions of the greenhouse plant of the Iowa Seed Company, as they appeared after the hail storm on Saturday, September 7, 1907. The storm broke 12,000 feet of glass in this firm's establishment; it also broke a great deal of glass in the places of other florists in west Des Moines, but it did not hit the east side florists.

CHICAGO.—C. F. Wood, Louisville, Ky., was a visitor last week returning from the East. Incidentally he mentioned that the loss of his concern, Wood, Stubbs & Co., in its recent fire had been adjusted, and that the net loss, exclusive of loss of business, temporary expenses, etc., had proved to be less than \$3,000.

Vaughan's Seed Store has ready for delivery its 1907 Autumn catalogue embracing twenty-five pages of bulbs, perennials, greenhouse, and decorative plants, shrubs, fruit and ornamental trees and Fall seeds.

Greenhouses of Iowa Seed Company, Des Moines, After Recent Hailstorm.

frank enough to say that it has been our policy to intimate to some other large growers what we consider is a fair price, and to invite their following suit, but we have never endeavored to ascertain what prices they charge, or found fault with their following or otherwise what we consider to be fair and proper. I have, however, an utter contempt for growers who will ask for price lists, intimating their intention to follow suit, and use the prices for cutting on. When a price is fixed as a proper one, and lists sent out, that price ought to be adhered to strictly. It is our policy never to deviate, and one customer is served to the same advantage as the other. I believe that the building up of some large business concerns is largely because of three things:

- First, careful buying
- (in our case, careful growing);
- Second, one price;
- Third, cash sale.

great deal of which of course was never got in. On suggesting to Mr. Dale the advisability of refusing credit in some instances altogether, and of curtailing credit to even our best customers to a limited time, he objected most strenuously, and said that customers would not buy stock when they were looked to for prompt payment. This necessitated purchasing all his supplies on credit, with all sorts of liabilities floating around. Knowing that this sort of thing was bound to end in one way only, he called in help, as I have stated in a former part of this paper, but still did not care to have his customers drawn on at limited time. However, on insisting upon that course as a proper business one, I subsequently succeeded in extending our C. O. D. list, and in reducing the maximum credit to 30 days from the end of each month. This maximum has since been decreased to the 15th of the month following for payment of each month's

Cincinnati.

News Notes.

Trade is looking up and all good stock is selling at sight. Bride and Bridesmaid roses bring 2c. to 6c.; American Beauty, \$1 per foot; asters, \$1, \$1.25 and \$1.50. Carnations are not much in evidence as yet, but the outlook seems good for Fall and Winter business. Our rose growers report their plants looking fine. The weather now is a little warm, the temperature ranging between 70 and 80 degrees; a little cooler would be welcome. The advent of chrysanthemums will be welcomed, when the real business will start.

An attempted robbery was made September 10 on L. H. Kyrk's wholesale house; it was evidently the work of street urchins, for they failed to gain an entrance and no special damage was done.

C. J. Ohmer, nephew of the writer, left Sunday morning for San Diego, Cal., where he will be married at noon, September 25, to Miss Alice French, daughter of Dr. J. M. French, ex-police surgeon of Cincinnati. The couple will come immediately to this city, where they will reside.

Mr. Elberson of New Brighton, Pa., has been in the city during the past week selling flower pots.

Quite a number of large wedding orders have been booked by Julius Baer for the near future.

C. J. Jones of the Walnut Hills Floral Bazaar has remodeled and refitted his salesroom on Walnut Hill.

Frank Huntsman has been on the sick list for several weeks, but is gaining slowly. E. G. G.

Grand New Double Daisy

A SPORT from that great money making single variety, **Queen Alexandra**, that everybody grows to a good profit. You can do better with this. The flowers are large, averaging three inches in diameter, and none of the flowers come single at any time of the year. It blooms freely either under glass or outdoors. Young stock, out of 2½ inch pots, ready for delivery January 1st, \$25.00 per 100. **ORDERS BOOKED NOW.**

THE FERNERY, M. THAU, Mgr., 1421 Charles St., North, Baltimore, Md.

Chicago.

By invitation of the executive committee of the Horticultural Society of Chicago a large representation of the committee men and others who contributed to the success of the last flower show were entertained at dinner at the Union restaurant on Monday evening last. A special event of the evening was the delivery of a number of the society's silver medals, from the new die secured by Mr. Hutchinson on his recent trip abroad; but one of the principal objects of the gathering was a consultation regarding the coming show. There were about thirty present, including several members of the executive committee of the society, exhibitors in the different lines at the last show as well as members of the committees and representatives of the press. After discussing an excellent menu the post-prandial exercises included an expression of opinion as to the possibilities and probabilities of the coming show and a great many ideas and suggestions were introduced.

After the dinner party adjourned the executive committee held a meeting to further complete arrangements.

Phil. J. Foley telephoned to the Horticulture Society meeting on Monday evening that it would be impossible for him to participate, owing to the arrival that evening at his home of a young lady weighing eleven and a half pounds.

W. K. W.

Illness of Edgar Sanders.

We regret to learn of the serious illness of our old and much respected friend, Edgar Sanders. His daughter, Mrs. Victor, with whom he makes his home, informs us that Mr. Sanders is now more or less delirious at times, and has ceased to take any interest in what is going on around him. Happily, he suffers no pain. His physician holds out no hope of his recovery, and says it may be a matter of two or three months before the end comes. Mr. Sanders had another shock about six weeks ago; his right side is now completely paralyzed, but he can still feed himself with his left hand. His appetite is good; but it is feared that his once active mind will soon be a blank. The doctor has forbidden all save his immediate family access to his bedside.

We feel sure the hosts of friends in the trade will deeply sympathize with Mr. Sanders in his present affliction, and join with us in extending heartfelt sympathy to his family. Few men in the florist business were held in higher esteem than this dear old man, of whom it may truthfully be said he had no enemies.

DETROIT, MICH.—The Scotten estate has presented its collection of rare plants and beautiful palms to the park commission and Commissioner Breitmeyer wants the council to allow him \$1,500 to erect a building in which to house the collection. The present floriculture building on Belle Isle is crowded to the doors and there is no available space for the plants.

NORTH WALES, PA.—The big smokestacks have arrived for the Florex Gardens greenhouses and are being put in place; they are each 60 feet high.

FACTS

If you wish to transform your store

To a palace of beauty galore,
Then all that you buy
Aschmann must supply
You'll be constantly sending
for more.

I always act as quick as I think, and have been successful; learn and do likewise.

ARAUCARIAS OUR SPECIALTY WATCH US GROW

1907 is our 12th anniversary in a successful career in the importation, growing and shipping of this well-known and so much admired evergreen, decorative plant, Araucaria Excelsa, Robusta, Compacta and the Excelsa Glauca.

Our importation this Spring, 1907, has swollen up to the enormous number of 6,000; more are coming with the azaleas in September and October. The florists of every city from the Atlantic to the Pacific Ocean can talk of Aschmann's Araucarias.

Now is the time to buy. They will gain in their growth 100 per cent. in two or three months.

The next in rank is our Nephrolepis Ferns, of which we only grow the best selling and well-known varieties, and of which we have a big lot: Boston, Elegantisima, Whitmani and Scottii, three large houses full, in best selling sizes, all pot grown (not bench grown).

Our ferns are not forced or grown in shady houses, but grown exposed to the sun, ventilators are open day and night. Such treatment stiffens the fronds, and makes strong, stout plants, that can be shipped 6,000 miles safely without injury to the plants in transportation.

ARAUCARIA EXCELSA, 6 to 8½ in. pots, 10-12 to 14 in. high, 3 to 4 tiers, 2 years old, 50c. each. Larger sizes, 6½ to 6 in. pots, 2-3-4 years old, 3-4-6 tiers, 60c.-75c.-\$1.00 to \$1.25, each.

ARAUCARIA Compacta Robusta, 6 in. pots, 2-3-4 years old, 10-12-15 to 18 inches high, 3 to 4 tiers, \$1.50-\$1.75 to \$2.00 each.

ARAUCARIA Glauca, 3-4-6 tiers, 2-3-4 years old, 10-12-15 to 20 in. high, 6 in. pots, \$1.00-\$1.25-\$1.50-\$1.75 to \$2.00 each.

LATANIA Borbonica, 25c. each.

KENTIA Forsteriana and Belmoreana, European stock, 6 in. pots, 25 to 30 in. high, five leaves, \$1.00 to \$1.25 each; 4 in. pots, 18 to 20 in. high, 35c. each.

Club News.

The meeting of the Gardeners and Florists' Club on Tuesday evening was well up to the standard; one hundred and fifty members were present when President Westwood introduced the speaker of the evening, R. G. Leavitt of the Ames Botanical Laboratory, North Easton. Mr. Leavitt had for his subject "Hybridization," and gave a very instructive talk on the hybridiza- tion of species, illustrating his remarks by sketches on the blackboard. The talk was from a scientific standpoint and was a little out of the ordinary to what the club has been accustomed, and was on that account all the more in- teresting and appreciated. Ten new members were elected. It was decided to extend the Philadelphia Florists' Club a vote of thanks for the many courtesies shown by them to the Boston members who attended the recent S. A. F. convention.

On the exhibition tables were two extra well grown geranium plants from the hands of an under gardener—Wil- liam Nickerson. They were the varie- ties S. A. Nutt and La Brette and were awarded first and second prizes respec- tively. Carl Blomberg exhibited a hy- brid nymphaea which was awarded a re- port of merit, and Fred. J. Rea re- ceived honorable mention for a vase of Helenium autumnale rubrum. Other exhibits were begonias from F. L. Palmer; outdoor grown tea roses from George Page, and a pretty new veronica- like shrub from Jackson Dawson of the Arnold Arboretum.

Many of the members expect to visit the dahlia collection of W. W. Rawson & Company at Marblehead, on Saturday, leaving Boston on the 12:40 train. J. W. DUNCAN.

Philadelphia.

News Notes.

A party of the florists and gar- deners went down to White Marsh, Md., on Tuesday to visit the Vincent Nur- series, and spend a social evening with the trade there. We hear a serious ac- cident almost befell them; the special train was taking a siding to allow an express to go by. The express came along before the other locomotive had got clear and knocked it over; for- tunately the couplings broke and the cars of the special did not leave the track, so only a shaking up was received by the florist passengers.

The chief event this week was the dahlia and outdoor flower show of the Pennsylvania Horticultural Society. Ex- hibits were not so large as last year owing to the want of rain. There are, so far, very few dahlias in bloom in this State. The L. K. Peacock Company of Atco, N. J., sent a very nice col- lection, most noticeable among them being a large number of new singles.

Prizes for outdoor cut flowers were won by Mr. James W. Paul, Jr. (Jo- seph Hurley, gardener), and Mr. Sam- uel T. Bodine (A. G. Williams, gar- dener), in the order named. For hardy perennials Mr. John W. Pepper (Wm. Robertson, gardener), was first. Col- lection of dahlias, Mr. James W. Paul, Jr., was first, Mr. Samuel B. Brown (Joseph Crowthers, gardener), second. James Dean, Freeport, L. I., is visit- ing with John Westcott at Waretown. DAVID RUST.

NOVELTIES FOR 1908

HARVARD. Glowing crimson (the real Harvard color). This variety will take the place of all other crimsons as it is very free and the blooms are of the finest as to size and quality. It is a very rapid grower and the habit is ideal. Rooted Cuttings, \$12.00 per 100, \$100.00 per 1000.

FAUST. A brilliant scarlet. This variety will replace all of the commercial varieties of this color owing to its extreme productiveness, many plants last December having 20 buds and blooms to the plant. A fine one for the Xmas trade. Rooted Cuttings, \$6.00 per 100, \$50.00 per 1000.

REMEMBER WE GUARANTEE SATISFACTION.

REVIEW OF THE MARKET

NEW YORK.—Excepting for a few special grade roses which are anything but plentiful just now, there is very little demand in the cut flower line. Long-stemmed American Beauty, when carrying a perfect flower, will bring 25c. each, but the majority of them do not carry this grade of bloom and have to be sold at figures below that price, while the short-stemmed flowers are quite difficult to dispose of. In the case of Bride, Bridesmaid and Mme. Abel Chatenay, there is a quantity of short-stemmed, half-open stock coming in; few of really good grade are received, and while special flowers when obtainable may bring 5c. each, the bulk of the short-stemmed flowers fetch 50c. per 100 or less.

There are quite a few more catterpals in the market than has been apparent for some time; the demand for them is somewhat erratic; still prices are held fairly firm.

Asters are so plentiful that such a thing as a fixed price is out of the question.

Carnations are now quite plentiful, though so far as fancy grades go there are none being received as yet; prices range anywhere from 50c. to \$1.50 per 100. The first lot of chrysanthemums appeared on Monday, and before long we shall no doubt have regular daily supplies in quantity coming into the market. Gladiolus are as plentiful as ever, and prices remain unchanged; America still leads all others so far as values received for this class of flowers go. Lilies are rather more plentiful than they have been for some time, and the same remark applies to lily of the valley, prices for both of which are, if anything, weaker than they were a week ago.

Dahlias, in some quarters, are extremely plentiful, and with the weather so hot as it has been this week, it seems impossible to get anything like a profitable price for them.

CHICAGO.—The return of Summer weather which reached this section the latter part of last week and stayed with us continually into this week, had not only a depressing effect on business, particularly local, but also depreciated the quality of stock which was none too good before. Though there is very little activity in any line at present the most pronounced glut appears in asters. Carnations, which are constantly improving in quality and increasing in quantity, find a ready sale compared to other lines, and some of the houses report a good shipping business though, as a whole, the Summer conditions prevail, and it is noted that of late years there is a steady tendency to prolong the dull season so that no particularly busy times are expected before October. W. K. W.

BOSTON.—There has been little change the past week; trade has been fair. Asters which were good a week ago are now rather poor stock and there is a great surplus. Roses have improved in quality somewhat and there is a brisker demand for the better grades. Carnations are improving in quality; prices remain about as a week ago. Some growers bring in such flowers as physostegia and tritomas, and there seems to be a ready sale for this class of stock. Lilies are plentiful. Sweet peas continue good. Lily of the valley has a fair demand. J. W. D.

INDIANAPOLIS.—Fair week, with its thousands of visitors, served as a check upon the prosperity of the one preceding. Counter trade amounted to little. There was neither much decorating nor funeral work. Numerous inquiries indicate that October is to be a lively wedding month.

Thousands of asters are again accumulating; no outlet is obtainable for any but the best grades at 75c. to \$1.50 per 100. Harrisii lilies are on hand in large quantities at \$12.50 per 100. A few Speciosum rubrum lilies remain at \$7.50 per 100.

Roses, in larger quantity and of finer quality than at any time during the Summer, are finding a listless market at prices beneath those generally quoted; many are shipped to surrounding markets. Good Bride, Bridesmaid and Killarney are obtainable at \$5 to \$6 per 100. Excellent Kaiserin Augusta Victoria and Richmond bring \$6 to \$7 per 100. American Beauty are in unusual condition at \$5 to \$20.00 per 100.

Carnations, generally, have advanced to \$1 per 100; 35c. to 50c. is the retail for them per dozen.

Dahlias are a prominent feature in

the flower market; they are now at their best and are wholesaling at \$1 to \$2 per 100. Masses of golden rod serve as an effective background in the window displays. Smilax and asparagus, both kinds, are still difficult to obtain in this section.

Tomlinson Hall market reports a very dull week; a large portion of the asters brought there find no buyers. I. E.

ST. LOUIS.—All along the line we hear of some improvements in trade among the most prominent retailers. The past week a number of large designs for funerals were executed and quite a few store decorations and a few weddings. Shipping trade, too, is showing some improvement. All we need is cool weather during the day to make the trade steady. The cool nights help the young stock, which is coming in more plentifully, especially roses. In these Richmond, Killarney, Souvenir du President Carnot and Kaiserin Augusta Victoria of fine color are arriving, but not with extra long stems and a little soft yet. The best of these bring \$1 per 100, but the bulk are sold very cheap, as the good trade, as a rule, does not buy short-stemmed stock, which is sold in bulk at \$10 per 1000 and in some cases cheaper. American Beauty are bringing a good price, with a big demand for all grades; extra long are as yet scarce; in other grades the price runs from \$1 to \$2 per dozen; very short ones, \$6 to \$8 per 100.

Carnations show good improvement as to flower, but are coming in with very short stems; 50c. to \$1 per 100 is the price on these; a few extra good bring from \$1.50 to \$3.

Asters are as plentiful as ever and only the best white bring any price; the bulk does not realize over \$1 per 100. Plenty of pink and purple asters had to be dumped the past week; a few more weeks will find them out of the market. Tuberosa stalks are selling well at \$2 and \$3 per 100. Gladiolus are over for the season. Violets, chrysanthemums and cosmos will soon be seen in this market. Pine Clematis paniculata has been arriving, coming in well for decorations and funeral work.

In greens everything one wants can be had at the present time. Smilax is selling well at \$12.50; Asparagus plumosus and Sprengerii also go well. Adiantum and common ferns sold briskly the past week.

ST. PATRICK.

CHANGES IN BUSINESS.

BROWNSVILLE, ORE.—E. Russ has located here and will soon begin the erection of a greenhouse.

DANVERS, MASS.—Shirley & Fowle, florists, are now established in their new location on Ash and Hampshire streets.

DENVER, COL.—The Colorado Floral Company has been incorporated by E. P. Peterson, Rose Peterson and Charles T. Bicker; capital, \$50,000.

BALTIMORE, MD.—The Flower Garden, 334 West Baltimore street, formerly run by Thomas Vincent, has been purchased by George F. Lurssen. Quite a number of changes have been made on the premises, and the store makes a very fine appearance.

CHESTER, PA.—C. P. Muller, the West Third street florist, is making arrangements to move into the store adjoining the building now occupied by him. Mr. Muller is making numerous improvements to his greenhouses at Thirteenth street and Providence avenue. Two more rose houses will be built.

FIRMS WHO ARE BUILDING.

WOOSTER, O.—B. H. Thorne is building a large addition to his greenhouse plant.

YPSILANTI, MICH.—J. G. Worden is building an additional greenhouse. It will be used principally for growing lettuce.

WOBURN, MASS.—Joseph Farrell, corner of School and Merrimac streets, is making preparations to erect a greenhouse, 190 by 30 feet.

VINCENNES, IND.—Charles F. Raker, corner of Seventh and Hart streets, is tearing down his old greenhouse and will in the near future build a new one to take the place of the old one that was recently destroyed by a destructive hail storm.

The Week's News.

According to the almanac, Autumn is here. Outdoor flowers are being harvested and the crop is certainly a big one; the plant auction season has commenced; bulbs from across the seas are arriving ready to be planted, but the high temperature prevailing indicates that things are out of tune. It is more like Midsummer, and Fall business will undoubtedly not materialize until Fall weather comes—almanacs and flower crops notwithstanding.

There is one branch of the trade, however, that does not seem to be affected by weather conditions, and that is the florist supply line. Mr. Reed of Reed & Keller, who, by the way, has just put some novelties on the market in the shape of plant pedestals in the old mission style of woodwork, and which, no doubt, will meet with a great demand from the trade, informed us that in all his thirty-five years' experience in the florist supply line, he never saw orders come in so thick and fast as they have done recently. This would indicate that retailers throughout the country are placing orders freely for supplies, and have confidence in the coming season being an exceptionally good one.

As an illustration of what a good flower and plant stand is worth in a city like this, we may state that at the new hotel Plaza, a hotel that has been remodeled and made up-to-date in every particular, some competition among the larger florists of the city has been made in their efforts to secure the plant and flower privileges in this building. Charles Thorley was the successful competitor, and rumor has it that for this privilege he will pay \$15,000 per year—quite a nice sum of money to pay for rent.

Frank Millang, wholesale florist of 55 West Twenty-sixth street, is back at business again after an enjoyable Summer spent in Europe.

J. R. Fotheringham, the well-known traveler for F. R. Pierson Company, Tarrytown, N. Y., will shortly leave for England, and while there will visit the prominent chrysanthemum shows of that country.

Phil. Kessler is making a business trip to Connecticut and Massachusetts this week.

The first chrysanthemums of the season were sent in by Dailedouze Brothers on Monday, the 16th inst. The variety was Marquis de Montmort and the flowers realized \$6 per dozen.

W. H. Taplin, who is well known in the trade, is now located with Dailedouze Brothers at their Flatbush establishment.

Anton Schultheis, College Point, L. I., has returned from an extended trip to Germany. He had a most enjoyable time while abroad and comes back in the best of health and vigor.

Sealed bids or estimates are being sought by the Department of Parks of this city for furnishing and planting trees and shrubs in McLaughlin Park, Borough of Brooklyn. Bids will be received until 3 o'clock p. m., Thursday, September 26, 1907.

About October 1, J. W. Bebus will commence business as grower and importer of horticultural requisites and sundries at 17 West Forty-second street, with greenhouses at West Hoboken, N. J.

The seventy-sixth annual exhibition of the American Institute will consist of dahlias, herbaceous flowers, ferns, palms, etc., and will be held on Tuesday,

Wednesday and Thursday, September 24, 25 and 26, in the Berkeley Lyceum Building, 19 and 21 West Forty-fourth street.

Julius Vacherot, vice-president of the National Horticultural Society of France and chief gardener of Paris, has arrived in New York, and will remain in this country until the end of October. On Sunday last an article was published in the New York Times on street trees for the city, written by Mr. Vacherot.

The opening auction sale of the season, at Wm. Elliott & Sons, which was held on Tuesday of this week, was the best inaugural sale the firm has held in years; buyers were present from Troy, Albany and Buffalo, N. Y., and from Scranton, Pa.

St. Louis, Mo.

News Notes.

The newly elected trustees will call a meeting of that body, with President Young and Secretary Bentzen who are ex-officio members, to prepare a program for the October meeting, which they say will be an interesting one and bring the members out.

H. C. Irish, who is secretary of the National Council of Horticulture, announces that a special car will leave Kansas City, Mo., on September 20 to carry the members of this council, as well as those of the Missouri Horticultural Society and the American Pomological Society and any of the local club members who wish to go with them, to attend the meetings of the bodies mentioned at the Jamestown Exposition, September 23 to 27. All who desire to go should address Professor Irish at once, care of the Missouri Botanical Garden.

The announcement of the appointment of J. F. Ammann as assistant superintendent of the Illinois State Fair pleased his many friends in St. Louis. He is the right man in the right place to make a success of it. A great many in the trade from here will no doubt take a run up to Springfield on September 30 and assist our Edwardsville friend in his work.

Messrs. Bouche and Kern, two of our best landscape gardeners, are at work laying out the grounds of the new City Hall at St. Charles, Mo. These men have to their credit many finely provided places and public parks about the city.

Charles Juengel's place on South Fourteenth street is in fine shape for the Fall season. His two new houses are finished. He is much pleased with the work of Mr. Thompson, who built them.

Ex-vice-president Cannon missed the club meeting Thursday, on account of finishing the work on his new houses.

L. M. Van Hook, the newly elected member of the club whose place is at Ferguson, St. Louis County, Mo., will consign to this market extra fine carnations and violets.

John Burke, who had his place closed all Summer, has again opened up at the old stand, 607 Locust street. He reports good trade.

Dave and Andy, the heads of the cut flower department at Waldbart's, reports that the boss is on his way home, having left the other side the 13th of this month; he will arrive here next week.

ST. PATRICK.

The Elm City Nursery Co. are offering on page 396, an exceptional opportunity to get some strong field grown Hardy Herbaceous Plants at unusually low prices.—adv.

Baltimore.
News Notes.
Halliday Brothers have nearly completed two additional houses to their greenhouse establishment at North avenue.
Miss Annn Elizabeth Brown, daughter of George O. Brown, who has been for so many years the Horticultural Editor on the staff of the Baltimore Sun, was given in marriage to Mr. Otto Scherf on September 14. Mr. Brown is an honorary member of the Baltimore Gardeners and Florists' Club.
Wm. Lehr, ex-president of our club, seems happy and contented as a beneficiary.
There have been various additions made to our park system lately. Patterson Park District, Druid Hill District, and Carroll District have been enlarged by the purchase of especially desirable pieces of land. The Park Board, with the expert advice of F. L. Olmsted, has made great progress toward getting the necessary park areas for the future development of a metropolitan park system and boulevards which will almost entirely encircle the city. C. L. SEYBOLD.

BRIDGEWATER, MASS.—At the recent show of the Plymouth County Agricultural Society and Bridgewater Grange, J. K. Alexander took first prize for dahlias.

News of the Week.

Wm. Allen, assistant superintendent of Mount Auburn Cemetery, has been appointed superintendent of Home-wood Cemetery, Pittsburg, Pa. Mr. Allen is well known among the craft here, as he has been active in meetings of the Massachusetts Horticultural Society and the Gardeners and Florists' Club, and has been secretary of the New England Cemetery Association since its organization.

John K. M. L. Farquhar will visit the Jamestown Exposition this week where he will deliver a lecture on "Horticulture in the Eastern States," before the Congress of Horticulture, to be held in connection with the American Pomological Society meeting.

Henry M. Robinson & Company have again leased the counter in the front part of the Park street flower market for the sale of florists' supplies. This firm is well pleased with its Summer business, and prospects look bright for a busy season ahead.

W. N. Craig and Robert Cameron were judges of the Horticultural Department at the Taunton Fair on Tuesday.

WHOLESALE AND RETAIL FLORIST

ROSE and CARNATION blooms our specialty. 100,000 plants to cut from. Also rooted cuttings of carnations. All latest varieties. Orders promptly attended to.
THE WORCESTER CONSERVATORIES
WORCESTER, MASS.

James Macklin will handle the products of Charles Potter of West Boylston in the Park street market. Mr. Potter is known as a grower of fine chrysanthemums, carnations and violets. The F. W. Fletcher Company, Auburn-dale, are making a specialty of Physostegia virginica grandiflora, an improvement on the old variety. It sells well under the popular name of Texas health. Thos. Pegler is their salesman in the Boston flower market.

Wm. Nicholson brings to the market some fine tritomas which seem to find ready sale.

New Bedford, Mass.

Trade Notes.

Business has been very quiet in this section the past week with the exception of last Sunday, the 8th. The Cemetery Board has inaugurated Flower Sunday and from reports it has proved a good thing for the trade. The demand was good considering the time of year. E. H. Chamberlin reports that he could have sold twice as many aster blooms. The city will observe the same function next year. The Cemetery Board sent out over 3,000 notices to lot owners announcing the inauguration of Flower Sunday. The only drawback the present year was the rainy weather, preventing many from attending to this duty. This day has been observed successfully in Springfield, Mass., and many other cities.

There is an abundance of flowers just now. Asters are in plenty, also carnations form the new plants. Asters retail at from 35c. to 50c.; carnations at from 25c. to 50c. per dozen. Violet stock is looking very good, and will soon be housed; Princess of Wales is the variety mostly grown here.

The Winsor carnation at the Murray establishment in Fairhaven is looking fine.

H. V. Soule, at the North End, has some fine Boston ferns, which find ready sale.

Sweet peas are about all gone for this season.

We are still having hot weather in this section.

HORTICO.

SPRINGFIELD, O.—The Springfield Florists' Club has maintained a steady interest in its meetings during its first year just passed, and at its annual meeting in October, a new corps of officers just elected will be installed, as follows: George H. Mellen, president; Charles W. Schmidt, vice-president; George D. Leedle, secretary; Leman Bradford, treasurer.

PHILIPS, N. Y.—A destructive hailstorm occurred here on September 6, 1907, which, accompanied with a big wind, uprooted trees and ruined the apple, pear, peach and general farm crops for miles throughout the country. The storm lasted about an hour, hailstones of great size falling. The glass in the Oaks Greenhouses suffered considerably.

greenhouse roses the "red Kaiserin" is well worthy of note.

The regular September meeting of the Chicago Florists' Club was held at Handel Hall on Thursday evening of last week, and although several matters of importance were announced the attendance was only about an average one. C. F. Wood of Wood, Stubbs & Company, Louisville, and J. G. Morley, superintendent of parks of Los Angeles, Cal., were guests of the evening and addressed the meeting.

The report of the picnic committee showed that the affair had been such a financial success that a return of thirty-nine per cent. had been made to all cash contributors.

Notice was taken of the recent death of one of the oldest members, Flint S. Kennicott, and a committee composed of J. C. Vaughan, Andrew McAdams, and P. J. Hauswirth, was appointed to draft resolutions.

The question was opened, and occasioned not a little serious and humorous argument, as to the advisability of commission men and wholesalers accepting the consignments of asters and other Summer flowers from amateurs or others who were not to be classed as factors in the market during the Winter months.

A general discussion of the coming meeting of the American Rose Society was then entered into, and it was decided that at the next meeting, on October 10, an invitation should be extended to all local growers who would be interested and that the clubs from Lake Forest and Lake Geneva be requested to attend and combine with Chicago in the endeavor to make the next meeting of the Rose Society the most successful in its history.

H. Cheeseman of the Vaughan's Seed Store staff returned last week from a couple of weeks spent at his old home in New York State and the Adirondacks, where he went after the Philadelphia convention.

The Rhinebeck violets which are now arriving daily are not only early but very good.

George R. Scott took a short trip to Milwaukee on business last week.

C. S. Ford of Philadelphia reached the city last week returning from the West.

There has been no end of trouble with the telephone service recently, and there seems slight hope for relief until the great "phone question is permanently settled.

W. L. Palinsky, who was deprived of his annual treat of indulging in the festivities of the S. A. F. convention by ill health, is now about again.

After his painful experience in Philadelphia, E. A. Kanst has returned and is rapidly regaining his former sound health and good spirits.

At A. L. Randall Company's the Fall season opens under most favorable auspices. This being the second year of the supply department it is encouraging to note that the business shows a large advance over its status a year ago this time, and the cut flower department has shown throughout the Summer a perceptible increase over the corresponding month of last year.

The wire business with the Winter-son Seed Store has shown a remarkable increase lately, so that it has been necessary to work that department nights to fill large orders recently received.

Vaughan & Sperry opened the week with a very good shipping business. Mr. Sperry was expected home from the West on Monday.

C. M. Dickinson is recuperating at Benton Harbor.

A. E. Lutey, Houghton, Mich., and R. Lutey, Ironwood, Mich., were visitors to the market on Monday.

Sam Graff will shortly leave for Seattle, Wash., where he will enter business arrangements which are not yet complete.

John Starrett is once more back at his old stand with the E. F. Winter-son Company.

William Lorman of the Randall force was married last week to Miss Theresa Georgan, and the young couple are now on their honeymoon tour. A large representation of Mr. Lorman's co-workers were present at the nuptials.

At the special election on Tuesday, part of the George Witthold office building was, as has been the recent custom, used as a polling booth, and John Zech was absent from his store during the day while fulfilling his duties as election inspector in his precinct in the twenty-sixth ward.

W. K. Wood.

THE AMERICAN CARNATION

Syracuse, N. Y.

New York State Fair.

The 150,000 visitors to the State
Fair saw one of the finest horticultural
exhibits ever put up in this section. The
immense building was filled to overflow-
ing, and plans are already on foot for
devoting more space next year to this
section of the fair. Messrs. P. R. Quin-
lan, Walter Meneilly & Son and W. J.
Quinlan were the largest exhibitors.
P. R. Quinlan's immense groups of
palms, ferns, stove and greenhouse
plants, tuberous rooted begonias, cannas
and pelargoniums were all fine. Walter
Meneilly & Sons showed similar groups;
their stove and greenhouse collection con-
tained some very nice clean healthy, well
grown stock, their begonias, being espe-
cially fine. W. J. Quinlan, gardener to
Mr. W. Burns, was the largest exhibitor
in that class and had some very fine
groups of palms, ferns, begonias, etc.

Owing to the backwardness of the sea-
son and heavy rains of the past two
weeks, the quality of the cut flowers was
hardly up to the standard, but there was
an immense showing. The group at-
tracting the greatest attention and ad-
miration was put up by Arthur Cowee,
Berlin, consisting of an assortment of
unrivaled gladiolus. His display was
made in the shape of a pyramid some
twenty feet high, and contained thou-
sands of spikes of his best varieties.
Among the many calling for special men-
tion were Victory, light yellow, with
dark crimson throat; it is a great keeper,
the spikes shown having been cut eight
days before the show and were good to
last another week. This variety is a
new seedling. Reme is another new
seedling; it is a beautiful fine white with
lower petals lavender. The spikes grow
5 to 6 feet in height. This is a great
acquisition and will prove very valuable
for design work, owing to the delicate
markings. Mildred is a very beautiful
flaked salmon pink. Seedling 605, rose
pink throat splashed with wine color
tipped white. Meadowvale, snow white,
two lower petals very slightly penciled
with carmine. This will prove very use-
ful for design work.

The immense resources of Mr. Cowee
are evidenced by the fact that he is main-
taining an exhibit at Cleveland, O., con-
taining 40,000 blooms, and another at
Jamestown calling for a continuous
showing of 5,000 flowers.

In the other classes of cut flowers the
largest exhibitors were C. Beckstead, Os-
wego; Benson, Menetto; P. R. Quinlan,
Meneilly, W. J. Quinlan and others.

James Vick's Sons, Rochester, N. Y.,
made a splendid showing of their beauti-
ful strain of asters and were awarded
first prize. Their stand was most arti-
stically arranged with a collection of
melons and other vegetables grown from
their own seed. The commendable fea-
ture of this exhibit was the absence of
monstrosities; everything shown was
just what one wants for the table.

Park Superintendent Campbell had
charge of this department, assisted by
G. Harris; all their arrangements gave
great satisfaction to the exhibitors. C.
Vick, Rochester, and W. Hewson, Buf-
falo, acted as judges.

One of the most pleasing and attrac-
tive displays in cut flowers was put up
by the school children of Syracuse and
immediate vicinity, who belong to the
Syracuse Evening Herald Gardening
Club, which was organized four years
ago by Miss Jenkins, head of the Her-
ald, for encouraging the love of flowers
among the school children. It has proven
a greater success than was ever antici-
pated. The Herald had a partition of
its own, 50 ft. x 28 ft., and this was
filled to overflowing by the bouquets
brought by the little ones who took the
greatest interest in arranging their flow-
ers. Three prizes were awarded to
schools making the largest and best dis-
plays, and fifty individual prizes were
given for bouquets of asters, candytuft,
sweet peas, nasturtiums, marigolds, pan-
sies, etc. Several very pretty designs
were made by quite little children.

THE BEST WAY

to collect an account is to place it with the
National Florists' Board of Trade

56 Pine St., New York

WHY? Because many debtors will pay
the Board fearing otherwise a bad rating in
our Credit List. Full information as to
methods and rates given on application.

Last Spring 50,000 packets of seeds
were sold to the school children at one
cent a packet, and the show just held
was the product from them. When start-
ing the club Miss Jenkins had no idea
of making a profit out of it and does not
wish for it, and it will be readily under-
stood that she comes out on the other
side of the ledger, as the prizes alone
amount to \$100, besides other expenses.
Your correspondent had charge of the
exhibit and will look after the club next
year.

Governor Hughes visited the show and
expressed himself as greatly pleased with
it. H. Y.

Indianapolis.

News Notes.

The flower display at the In-
diana State Fair about equaled that of
former years. Much comment pro and
con is heard as to the advisability of
the florists exhibiting there in the fu-
ture unless extensive changes in the
premium list take place. The same situ-
ation that confronts the management of
all other flower shows—namely, that of
having the best retailers staking their
reputation on a fifty or seventy-five dol-
lar premium—is the problem. The ad-
mirable way in which the premium list
of the National Flower Show has been
arranged in this respect is the only solu-
tion, in the writer's estimation. John
Rieman and E. A. Nelson carried off
most of the honors, a few of which fol-
low: Best pair of baskets, John Rieman,
first; E. A. Nelson, second. Best
two funeral pieces, John Rieman, first;
E. A. Nelson, second. Best display of
palms, E. A. Nelson, first. Best display
of cut flowers, E. A. Nelson, first. Best
flower arrangement, E. A. Nelson and
John Rieman. Judge Stelhom in the
last decision was unable to pick out the
winner, so decided to award both con-
testants a blue ribbon. E. T. Barnes of
Spencer, Ind., exhibited several hundred
dahlias which were much in favor. Wil-
liam Hack displayed many varieties of
gladiolus. The amateurs' display, a
source of much interest in former years,
was entirely lacking this time.

The Indianapolis Florists' Social Club
held its second monthly meeting Wednes-
day, September 11. Approximately
forty-seven members of the craft have
joined this organization, so a prosperous
career is almost assured. The following
officers were elected for the ensuing year:
President, Sidney Smith; vice-president,
Fred. Huckle; treasurer, Ernest Rieman;
sergeant-at-arms, George B. Wiegand.
A constitution and by-laws was
also adopted. Monthly assemblies are
to be held in the various social quarters.

Walter Bertermann has returned from
New York.

Visitors: Walter A. Mockler, Mil-
waukee; Mrs. Behrens, Middletown, O.;
W. Steele, Crawfordville; and E. G.
Hill.

Bertermann Brothers Company are ar-
ranging for a large display of dahlias
Thursday, September 26. E. T. Barnes,
Spencer, Ind., the grower, expects to
show something like five thousand flow-
ers. All florists are invited. The E. G.
Hill Company intends exhibiting its
Rhea Reid rose on this occasion.

I. B.

Washington, D. C.

Trade Notes.

Fall weather with comfortable
temperature has prevailed during the
past week, and there are some indica-
tions of early frosts. The amount of
stock coming in is equal to all demands,
and of good quality. Funeral work still
constitutes the chief call. Cool weather
is increasing the supply of dahlias each
week, and asters are still plentiful. The
water lily season has about closed with
the exception of a few night bloomers
which do not sell very fast.

Stores are beginning to lose their
usual Summer-time appearance and take
on that of the Fall. There are some
handsome window displays.

The eye of local florists is turned on
the trip to R. Vincent, Jr. Sons Com-
pany's place on the 17th; everyone re-
members with enthusiasm the trip of
last year. This will probably be the
last outing of the club this season.

JAS. L. CARRERY.

MUNCIE, IND.—Robert Waggoner
was recently called to Portland by the
death of his father, John Waggoner, who
for many years conducted a greenhouse
in this city.

Prices Advertised in these Columns are for **THE TRADE ONLY**—When Writing Please Mention
THE FLORISTS' EXCHANGE.

Kalamazoo, Mich.

Business Bits.

With the opening of the schools and colleges trade in local circles slowly begins to show some signs of life. On the whole, the past Summer has been quite productive of funeral work, and retailers express themselves rather pleased with the amount of business done. To the writer, however, it seems as if the prices at present prevailing are altogether too low for a margin of profit. Asters are offered at 10c. to 15c. per dozen; gladiolus, 25c.; roses, 50c. to 75c. and so on, at some stores—certainly too cheap for profit on meagre sales.

For a year or so prices have averaged too low here, and it is to be hoped the present season will show better values in all lines, as there is no evidence to prove that the cheap prices have moved the public to make extra purchases.

The season opens with two important changes of interest to the craft—one the passing of the Dunkley Floral Company, which was the oldest establishment in this part of the State. The place was sold to G. Van Bochove and Brother and dismantled and the business discontinued. The town will not suffer any loss of area of glass on this account, as these enterprising gentlemen have again enlarged the Rose Hill range to more than the amount of the Dunkley plant; they have increased their carnation planting to 60,000 this season, and roses and other stock in proportion. I am told the stock at both places is in good condition, and everything is in readiness for a good season's business.

The Central Nursery Company is considering an offer for the disposal of and subsequent re-organization of its plant, and it is probable that the deal will go through. I understand the indebtedness of the company amounts to something above \$100,000—a shining example of high finance in seven short years.

S. B.

Grand Rapids, Mich.

Trade News.

Weather conditions lately have been very wet and cool here.

The Western Michigan State Fair was held the fore part of the week. Wednesday is always the big day: it rained hard and it looked as if the fair was to be a financial failure, but clearing weather Thursday morning brought out such a record-breaking crowd, that, with a good day Friday, saved the fair from loss. In the fruit and flower hall the exhibiting florists were Crabb & Hunter Floral Company, Grand Rapids Floral Company. As usual, the most interest centered around the big floral piece, as we are wont to term it, also the fancy baskets. Crabb & Hunter Floral Company was first with a 4-foot broken wheel; Chadwick, second, with a lyre and crescent combination about 5 feet in height; the Grand Rapids Floral Company was third, with a gates ajar. In the fancy basket contest, Crabb & Hunter Floral Company were first; Grand Rapids Floral Company, second; Chadwick, third. For roses the Grand Rapids Floral Company took first; Crabb & Hunter Floral Company, second; Chadwick, third; American Beauty, Grand Rapids Floral Company, first; Chadwick, second.

In the plant classes, Crabb & Hunter Floral Company won first for general collection of hothouse and greenhouse plants, first for collection of ferns, specimen fern. This firm had altogether a total of 17 firsts and 8 seconds, out of 26 entries. The Grand Rapids Floral Company won first for collection of palms, also for spec. palm, taking 9 firsts and 12 seconds; while Charles Chadwick won in the design and cut flower department 3 seconds and 3 thirds.

The exhibits were away in advance of those seen here for some years. Wencil Cukerski, superintendent of parks, acted as judge and gave great satisfaction.

Business is beginning to pick up a little, and occasional runs of funeral work have provided an outlet for large quantities of flowers that would otherwise have gone to waste. Carnations from early plantings are beginning to flower, but so far the supply is below the light demand. Roses are scarce and the stems of medium length, but the quality of the flowers is good. There are large numbers of asters to be had, and of a quality not often seen here; it seems the season has been just about right to grow good asters this year. Field grown carnations plants are the finest stock benched in years, and selling plants

in the field are of that firm, clean sort, sure to do well when put inside. Some previous seasons' plants have been soft; but not this one.

El Cross is building a palm and fern house; Bruinslot & Sons, two lettuce and cucumber houses; Wealthy Avenue Company is putting in a new boiler, new chimney and rebuilding the houses adjoining the boiler room. Crabb & Hunter Floral Company is taking off the ribbed or skylight glass from a 200-foot house planted to roses, and replacing it with ordinary glass. Skylight glass is probably all right for palms, ferns, and such stock, but for cut flowers it is a failure. For instance, roses come soft, particularly after a few days of cloudy weather. In July, with continuous sun, it's not bad, but July doesn't last the year round.

GEO. F. CRABB.

Los Angeles, Cal.

Consternation was spread among citrus fruit growers of this State several months ago by the discovery of white fly, the terror of the industry wherever it gets a foothold. This was in orchards four hundred miles north of the great orange and lemon growing districts of Southern California; nevertheless fear seized the growers in this part of the State lest the pest should be introduced here. The entire horticultural machinery of the State was immediately set in motion to exterminate the insect, by pruning the trees of every limb and burning the brush, also fumigating. This was in Marysville, a month ago, on the grounds of W. S. Tevis, a private park of great beauty, previously referred to in these notes. Immediately the trees were fumigated, and men with a thorough knowledge of insect life have been placed on guard at the points named to watch the vegetation and report on the effectiveness of the work done. The magnitude of this industry on this coast will warrant growers to make tireless efforts, and be at great expense to keep this menace out of the State. Thirty million dollars' worth of the fruit is sent out of the State annually, and if the acreage planted the past two seasons comes into successful fruiting, twice that amount of money will be the revenue to our growers within the next decade.

P. D. BARNHART.

STORRS, CONN.—The committee on new buildings for the Connecticut Agricultural College announce that the contract for the greenhouses have been let to Lord & Burnham Company, New York, the buildings to be erected at a cost of \$20,000, and that the design of Davis & Brooks of Hartford had been accepted provisionally for the horticultural building. The greenhouses will consist of a range of six iron and glass houses covering 110 square feet of ground. One house will be for specimen plants, such as palms and tropical plants for educational purposes, one for carnations, one for rosea and the others for the propagation of plants under different temperatures.

Double Glass Sash.

The Sunlight Double Glass Company is the name of a corporation organized recently in Louisville, Ky., to introduce a decided novelty in hot-bed methods, says The Market Growers' Journal. The inventor of the sash, William S. Bodley, who has been a market gardener near Louisville for fourteen years, says that the heavy labor and expense involved in the use of ordinary hotbed sash, caused him four years ago to try to do away entirely with shutters and boards and the necessity of covering and uncovering the glass every day. Mr. Bodley had seen double glass windows in houses in the North and in Pullman cars and knew that the cold could not penetrate the dry air between the layers of glass, so he set to work to get up a sash for hotbeds or cold frames on the principle of the double glass window. Sunlight sash was the result.

The sash is made as are the ordinary frames, but there are two sets of grooves for the glass instead of one. No putty is used, but in each groove at regular intervals there are stops that prevent the glass slipping back toward the top of the sash and at the laps are small rust-proof springs to hold the glass exactly and securely in place to exclude the cold and retain the heat. If a pane is broken a new one can be slipped in at the bottom in a second.

Mr. Bodley says: "The sash has its extra value mainly from the air space between the two layers of glass. It admits the light of the sun or the light of a cloudy day, but does not allow the cold to get in and it does not allow much of the heat stored in the box by the light to get out."

"I applied for my patent and had the first Sunlight sash made four years ago," said Mr. Bodley in telling of his invention, "and I have subjected them to the severest tests every Winter since then. In 1903, 1904 and 1905 the thermometer went below zero several times, but my cabbage, cauliflower, and lettuce plants under the double glass alone without any other covering and without bottom heat, not only escaped the injury, but did better than any I have ever grown in many years experience under ordinary single glass sash with bottom heat and board covering."

"The double glass makes it practicable to use the cold frame method with entire safety and with little labor. I believe that my patent double glass sash will work a revelation in the Winter growing of plants and that gardeners who use it will have an immense advantage over those who do not. The saving in labor and in lumber makes the double glass method far cheaper than the old way and the superiority of the plants that are grown in the steady warmth and the constant light of the double glass makes the crop far more profitable in the end."

DAVENPORT, IA.—The monthly meeting of the Tri-City Florists' Club was held Thursday evening of last week at the home of Ludwig Staack of Rock Island. John T. Temple and Theodore Ewoldt, delegates to the State convention at Des Moines, made their report.

THE NEW DUNNING BOILER

The simplest, most easily cared for, most economical, most reliable and satisfactory, that was ever made for use

IN GREENHOUSES.

With the "New Dunning" you can regulate the heat in any part of the Greenhouse, and keep an even temperature all through the season, with perfect accuracy, and with the least fuel and work.

It is made of fine steel (not cast iron) and will never crack.

It has no packed, screwed or pushed connections. All joints are plate to plate, with hot driven rivets, and absolutely tight.

It has no tubes, horizontal or vertical. The fire surfaces are vertical. No nooks or crevices for soot.

Inside boiler surface perfectly smooth. No lodgment of mud, sediment or scale.

Two fire-boxes, and thin water chamber between them. Two shells, and thin water chamber between them. Fire travels twice the length of boiler, and is all used in heating the water.

Water drains off to last drop.

The "New Dunning" burns hard coal, soft coal or wood.

It lasts longer, and costs less to maintain, and does better work, than any other boiler.

It is used by U. S. Government in many departments.

GERANIUMS

We have 100,000 in 2-inch pots ready for immediate shipment at prices running from \$2.00 per 100 Standard varieties up to novelties at 50c. each. We will send one thousand in twenty good varieties, our selection, single and double, for \$18.00, or five hundred, twenty-five each of twenty good varieties, for \$9.25.

Below we give some idea of how our varieties and prices run. Our special Geranium catalogue will be sent you for the asking; it has descriptions and prices of 175 and over of different varieties.

DAGATA. Beautiful shade of rose mauve, the Premier of Bruant's 1905 novelties, large semi-double flowers; strong robust grower. 50c. each.

PAMELA. Cannell's 1906 novelty, single large pure white center, followed with shading of rosy lake and bold outer margins of reddish scarlet. 50c. each.

EUGENE SUE (Lemoine 1905). Single; brilliant orange scarlet; white eye, splendid large trusses, stands the sun well and is an excellent bedder. 20c. each; \$1.50 per doz.

ALLIANCE. 1905 novelties, an Ivy and Zonal hybrid, has the habit of a Zonal and the flower of an Ivy. Lilac white upper petals blotched crimson maroon. \$1.50 per doz.; \$10.00 per 100.

DOUBLE GEN. GRANT. Bright vermilion scarlet. 40c. per doz.; \$2.00 per 100.

LA PILOTE. Semi-double; brilliant scarlet. 40c. per doz.; \$2.00 per 100.

JEAN VIAUD. Semi-double, brilliant rose pink, with white throat, strong robust grower. 40c. per doz.; \$2.00 per 100.

TIFFIN. Single bedder, rich glowing scarlet crimson. 1906 introduction by Lewis Ulrich. Tiffin, Ohio. \$2.00 per doz.; \$10.00 per 100.

BERTHE DE PRESILLY. A beautiful shade of silver rose, double, same habit as S. A. Nutt. 60c. per doz.; \$3 per 100.

E. H. TREGO. Dark rich dazzling scarlet; has considerable Ivy blood in its nature which shows in the finish of its flower and foliage. 75c. per doz.; \$4.00 per 100.

PETER HENDERSON. Large semi-double flowers and trusses, bright orange scarlet, splendid habit. 75c. per doz.; \$4.00 per 100.

FLEUVE BLANC. A pure white semi-double of the Bruant type, strong, vigorous, but dwarf grower. \$1.50 per doz.; \$10.00 per 100.

MRS. E. G. HILL. The standard light salmon single. 40c. per doz.; \$2.00 per 100.

S. A. NUTT. More used than any other dark red Geranium, the standard either as a bedder or a pot plant. 40c. per doz.; \$2.00 per 100.

PELAGONIUMS

In Good Variety. \$1.50 per doz.; \$8 per 100.

A MESS OF MUSHROOMS at all seasons
Growing in your Cellar
40 CENTS in postage stamps together with the name of your dealer, will bring you, postpaid, direct from the manufacturer, a fresh sample brick of Lambert's Pure Culture MUSHROOM SPAWN
the best high-grade spawn in the market, together with large illustrated book on Mushroom Culture, containing simple and practical methods of raising, preserving and cooking mushrooms. Not more than one sample brick will be sent to the same party. Further orders must come through your dealer. Address,
American Spawn Co., St. Paul, Minn.

Your Money is well spent when you advertise in
THE FLORISTS' EXCHANGE

THE Cultural Leaflets treating on BULBS are especially seasonable at this time.

Seedsmen and Florists who sell BULBS at retail should procure a supply of these LEAFLETS, and present one to each customer. Do this, and each purchaser will be enabled to grow the BULBS intelligently; in this way you make a satisfied customer, a result always to be desired.

CULTURAL DIRECTIONS

Specially written for the use of your amateur customers. Send Twenty-five cents for complete sample set, which amount will be deducted from order for first thousand.

The universal favor in which these Directions are held, as shown by the many orders received therefor, encourages us in the belief that these Leaflets are just the neat little factor to help promote business and establish better relations between the dealer and his customer.

TRY SOME!

BIG BUSINESS ASSISTANT

TO SAVE TIME, QUICKEN SALES, AND AID YOU
PLEASE YOUR CUSTOMER, WE HAVE PREPARED

Cultural Directions

COVERING A NUMBER OF THOSE PLANTS
AND BULBS MOST LARGELY IN DEMAND

THE "CULTURALS" have been written by experts; they are fuller, and contain more detailed directions than it is possible to embrace in a catalogue. Equipped with these, just hand one out with each sale, and save yourself considerable present and future trouble, as the customer will then be able to consult the directions, grow his plants, seeds or bulbs intelligently, and so receive satisfactory results, without having to continually resort to you for advice.

The following "Culturals" are now ready:

AMARYLLIS (Hippeastrum)	CROCUS, Snowdrop and	MUSHROOM CULTURE
ANNUALS FROM SEED	Schila Sibirica	ONIONS

Seed Trade Report.

AMERICAN SEED TRADE ASSOCIATION

George S. Green, Chicago, Ill., president; M. H. Duryea, New York, first vice-president; F. W. Bolgiano, Washington, D. C., second vice-president; C. E. Kendel, Cleveland, O., secretary and treasurer; Leonard H. Vaughan, Chicago, assistant secretary.

NEW YORK.—Alfred Emerich, representing Messrs. Vilmorin, Andrieux & Company, Paris, France, will reach New York about September 28, and will pay his usual visit to their American customers in the seed trade. All communications for Mr. Emerich should be addressed care of H. Frank Darrow, 26 Barclay street, New York.

MATTIUCK, L. I.—At the Republican County and First Assembly District conventions here Tuesday night, September 17, John M. Lupton was re-nominated for member of Assembly. This will be Mr. Lupton's third term. He is a popular candidate and has been a popular official. His name was received with cheers in the convention.

MICHIGAN BEANS.—According to the monthly statement of the Michigan Department of Agriculture, the bean yield in the southern counties of that State is estimated at 82 per cent., of a full crop, in the Central counties 78 per cent. and in the Northern counties 88 per cent.

CAULIFLOWER ON LONG ISLAND.—The outlook for cauliflower on Long Island is better than for the past four years, says C. L. Allen, in the Market Growers' Journal. Three weeks ago the general prediction was a total failure of crop this year and that because there had not been a rain for seventy days—the most severe drought ever known in that section. There were a few farmers however that said "we will have a fine crop yet" and they were right.

PINE SEEDS IN VERMONT.—The increased interest in forestry in Vermont and all other parts of the country has created an active demand for seed of the common white pine. This matures an abundant crop of seed only once in three or four years, and when a seed year comes the crop must be harvested or one must wait another period of years. This year, 1907, is a seed year in Vermont. Requests are coming to the forestry department of the agricultural experiment station at Burlington from parties, both within the State and outside, who wish to purchase pine seed.

THE ONION CROP.—Jerome B. Rice Company, Cambridge, N. Y., says in its annual report concerning the onion crop this year: "There has been a falling off in acreage in the United States of something over 2,000 acres and a total shortage in yield of quite half a million bushels as compared with the crop of a year ago, and taking it as a whole we might say that the quality of the stock being harvested is hardly up to the average. As a rule the onions average small in size and show a considerable percentage of 'thicknecks' and picklers, and this is especially true of the West, where they suffered from extreme wet and cold weather in the Spring, which retarded growth, and an abundance of weeds during the growing season, all of which is not conducive to the production of first class storage stock. The crop is fully three weeks late in maturing and many of our correspondents report the onions as still green and growing."

Seed Trade Notes.

The largest portion of our Fall trade is made up of bulbs and grass seeds, and I hope a few thoughts concerning these important staples may prove of interest. The bulb season is now well started, and every sign points to a great volume of trade this Autumn, at both wholesale and retail. The past fortnight has seen the largest distribution of elegantly illustrated catalogues of "Bulbs For Fall Planting," ever known in this country—catalogues that have in themselves cost a mint of money. But the sure returns that are very closely ahead well warrant this enormous outlay by our seedsmen. The time is not far back when Fall bulbs were a very small side issue with most seed dealers; in fact, it was a general custom to put a page or two of hyacinths, tulips, crocuses, narcissi and lilies, with some times a few other sorts, in the back part of the Spring seed catalogues, and that was all the advertising this sort of stock received. I can well remember when even the larger firms had nothing in the way of a Fall bulb catalogue, and when they did finally commence to issue one, how extravagant the whole matter seemed to the average seedsmen—such an outlay of money was simply foolish: "Why," they said, "the bulb catalogue will cost as much as all the bulbs you sell will come to." And so thirty years ago, bulb catalogues were few and far between; and in most cases only little circulars.

As I write I have before me a bulb catalogue for the year 1870, published by one of the largest and most important seedsmen of those times; and for size it is sixteen pages, without the least sign of an illustration. As against this, I have to-day received from the same firm a most gorgeous publication devoted to the same goods, but what a difference; every one of the sixty or more pages is replete with interesting cultural matter and handsomely embellished with the most artistic and finest quality of half-tone engravings.

When we recall the limited Fall trade in bulbs of, say, twenty-five years ago, and compare that business with the sales that will be made during the next few weeks, the wonderful increase is, of course, very marked. Nevertheless the volume of sales of the present season will not appeal to many of us at their true greatness, and for this reason the Autumn bulb trade has not been a business of quick growth; it is the combined results of many decades of very gradual but steady increases every year, until at last the glorious sales of the present have been made possible. I think all will admit that it has only been within the last few years, that those dealers who keep seeds in connection with other lines of business, have absorbed firmly the great and what will be found to be the lasting fact, that the trade of the Autumn in bulbs is no longer a little adjunct to a seed business. It is one of the great factors of that business. I have put this matter strongly, but no stronger than its importance deserves. Every dealer who can sell seeds in the Spring, can sell bulbs in the Fall. It is not necessary to start with a long list of varieties and kinds. For the average over-the-counter business some good mixtures of the most popular and consequently fastest selling sorts of the Dutch bulbs will be all that is required, until a dependable trade has been developed. If I were ordering from my wholesale seedsmen an assortment of bulbs, never having kept bulbs before, I would start with a fair

number of each of the following: Single hyacinths, mixed colors; double hyacinths, mixed colors; early single tulips, mixed colors; double tulips, mixed colors; single narcissus, or daffodils, assorted varieties; Paper White narcissus; double narcissus, von Sion; Liliun Harrisii; Liliun auratum; Chinese sacred lilies; lily of the valley; crocuses, various separate colors, and mixed; Freesia refracta alba; snowdrops, single and double sorts.

No one appreciates better than the writer, that Fall bulbs to a dealer who has never kept them seem a strange and perishable class of stock, but you will be surprised how soon you will become used to handling them, and how satisfactory they will become as a trade bringer at a comparatively dull season in all lines of the horticultural business.

As regards the profits on this line of stock, you can, of course, obtain from your wholesale seedsmen a full line of both wholesale and retail catalogues which will supply you very minutely with all these details. The list of kinds I have above suggested is a very safe and conservative one to start with; nothing will be easier than to take orders for rare and less called for varieties, ordering such as sold from your wholesale seedsmen, until such times as a steady demand warrants you in carrying a more assorted stock. You will surely find the Fall bulb business not only a trade bringer but also a very profitable line of goods in themselves.

The past week has been a very favorable one for the crops on the whole, the weather having generally been wet, warm, and forcing. Field corn reports show that fully 75 per cent. of the crop is now out of danger from frost—and this seems to have infused a little easier feeling all around. There has, however, been frosts in Canada and the Northwest, so the growing weather will probably soon have an end.

IMPORTS OF SEEDS, ETC.—September 10.—Davies, Turner & Company, 49 bushels garden seed; P. H. Petry & Company, nine cases bulbs; Wakem & McLaughlin, 46 cases bulbs; Maltus & Ware, 203 cases bulbs; International Forwarding Company, one case bulbs; Schultz & Rueggaber, 46 cases bulbs; Schall & Company, 15 cases bulbs; C. D. Stone & Company, three cases bulbs. September 14.—C. B. Richard & Company, 17 packages palm leaves. September 17.—Downing & Company, 25 cases bulbs; Davies, Turner & Company, three cases plants; J. Dunn, nine cases bulbs; H. F. Darrow, two cases plants, two cases bulbs and roots; Wm. Elliott & Sons, 13 cases bulbs; Hensel, Bruckmann & Lorbacher, four cases bulbs; J. W. Hampton, Jr. & Company, 92 cases bulbs; A. Hollander & Company, 19 cases bulbs; Hutcheson & Murray, 18 tubs plants, one case plants; W. Hegemann & Company, 39 cases bulbs; Knauth, Nachod & Kuehne, four cases bulbs. September 18.—J. M. Thorburn & Company, 13 packages seed; Schultz & Rueggaber, 46 cases bulbs; Vaughan's Seed Store, 16 cases bulbs; R. M. Ward & Company, 437 cases bulbs. September 19.—J. M. Thorburn & Company, 19 bags seed. September 21.—British Bank of Nova Scotia, 334 bags seed. September 23.—A. H. Post & Company, 48 packages seed.

The American Carnation Price \$3.50
A.T. DeLa Mare Ptg. & Pub. Co., 2 Duane St., New York.

European Notes.

For the first time since May we have to chronicle a full week of brilliant sunshine with not a drop of rain to dampen our crops or our spirits. The shade temperature even in sunless England has reached a maximum of 78 degrees which is fully 10 degrees above the official average.

This has enabled us to secure as much of our spinach as has not been beaten out on the land, and shipments can now be made.

The excessive heat of our Indian Summer is affecting the mangel crops previously attacked by the black aphid in a most disastrous fashion. The whole plant dries up almost suddenly and the crop previously estimated at, say, 1500 pounds per acre will not turn out 500 pounds of good marketable seed. While this particularly affects the crops growing in England, the French beet growers also report a reduction of fully 50 per cent. on the June estimates.

The expected big surplus in nasturtiums will not materialize; a kind of blight has struck many of the plants and some of the more delicate variegated leaved varieties are drying up prematurely. There will be an ample supply of the stronger growing sorts.

Just one word of advice to those who make a specialty of florists' flower seeds. Owing to the lack of sunshine the seeds of primulas, cinerarias, pansies, etc., have ripened very slowly, and although they dry they can hardly be all fully matured. If these are sown before the Spring they will take a much longer time to germinate and the growth will be irregular. Our friends should therefore urge their clients to exercise a little patience and not to disturb the soil too soon. Even after a good season such a precaution is wise, but this year it is an absolute necessity.

EUROPEAN SEEDS.

Novelties for 1908.

Apart from sweet peas the supply of floral novelties is not very abundant. The south of France offers a new race of giant Comet aster with one flower on the top of a long stiff stem. Three colors—white, rose, and pale blue—are already in existence, but it will hardly arouse any great amount of enthusiasm.

E. Benary has a beautiful rose-colored variety of the aquilegia long spurred hybrids and will doubtless have further novelties to offer later on.

Haage & Schmidt's list will include:—Anchusa capensis alba, Gilia tricolor violacea, Rudbeckia fulgida compacta, Phlox Drummondii nana compacta, Chamaelion and Verberna hybrida compacta Rosamond, all of which can be easily recognized by the (in some cases unwieldy) names. They will also offer Begonia dichroa, beautiful both in leaf and flower and of great value to florists. Dianthus laciniatus Mephisto, a charming variety, with some flaming colors quite in accord with the suggestive name. Nigella diversifolia, which resembles a pretty campanula with the flowers the wrong way up; and Phacelia campanularia Cesia, a lovely porcelain blue variety of this popular annual.

Cooper, Taher & Company are introducing a new Primula sinensis named Orange King, quite distinct in the color, which is a pale rosy salmon overlaid with orange. The plant is very robust and free flowering. Also a new strain of the Madame Perret pansy named "Lucienne," in which the colors are mostly of golden and bronzy brown shades, while the plant is in every respect the counterpart of the parent variety.

Otto Putz has two new colors in the Princess May class of stocks that will find ready acceptance. They are: Princess Henry, snow white; Princess Victoria, white and brilliant rose. This trio of charming Princesses are extremely early, well adapted for forcing, produce a large percentage of doubles, have the dark glossy leaf of the wall-flower, and are intensely fragrant.

Hurst & Son have a new and very compact form of Chrysanthemum tricolor, which has been named Silver Queen.

Dippe Brothers have developed the deep blood red color in the mammoth column stock, a grand novelty.

Roemer, in addition to new pausies of which the giant red Victoria is the best, has developed a new strain of

HENRY F. MICHELL CO., 1018 Market St., Philadelphia, Pa.

(37) **Marguerite Carnations.**—Is the Marguerite carnation hardy? How long will the plants live in the ground? Will they come into bloom sooner the second season? Will it be profitable to lift some and put them into the benches of the greenhouse? C. M. S.

Mich.

—Marguerite carnations will live over a second year if they are well protected through the Winter months, though they do not flower very profusely the second season—at least, that has been our experience. There is not much use in lifting the plants at this time and placing them on the benches in the greenhouse, as they do not flower sufficiently to pay for the trouble.

(38) **Furnace to Burn Flower Pots.**—Will you please let me know how to build a furnace to burn flower pots, and how long it requires to burn 8-inch pots?

—Will some reader kindly supply the desired information?

(39) **Camellias.**—What kind of soil should be used to grow camellias in 3 or 4-inch pots, and should the plants be fed?

La.

S. S.

—Camellias require a very rich soil, though care should be taken that no fertilizer is used, only such as is thoroughly aged or decomposed. A compost similar to that used for roses, with enough coarse sand added to insure quick drainage, will be found suitable for camellias; and if the plants are kept in small pots after they become root-bound, a little feeding once in two weeks with weak liquid manure will be beneficial to them.

Fern for Name.—S. E. B., Mass.—The fern is *Adiantum Capillus-veneris*.

Aster for Name.—The aster looks like *Vick's Daybreak*, but we would advise sending a few flowers to James Vick's Sons, Rochester, N. Y., for positive identification.

(40) **Scale on Fruit Trees Under Glass.**—I have some rather large trees of lemons, oranges, limes and mandarins planted in a greenhouse, and at present they are pretty well covered with San Jose scale. The insecticides recommended for this scale are: Scalicide, Iloricum, viz., lime, sulphur and salt mixture, Kil-O-Scale, and Whale Oil Soap, but it is recommended to use them when the plants are dormant and lose their leaves. Now the above mentioned trees never lose their foliage, and I don't know when to use such insecticides, and what to do at present to clear the trees from the scale. Can you advise me?

New York.

A. P.

—To remove the scale from the trees mentioned, we would advise using Fir Tree Oil. This can be procured from any of the seed houses, and full directions are furnished with each can. Use the oil of the same strength as is recommended for killing mealy bug. Although we have never used the Fir Tree Oil for San Jose scale, we feel safe in saying that from our experience with that oil, it will kill the scale, and will not injure the trees, if used according to the directions.

(41) **Sidalcea Malvaeflora Listeri.**—Please tell me what the plant *Sidalcea Listeri* is, or what it looks like, and greatly oblige.

New York.

W. M.

Sidalcea malvaeflora Listeri is described in Bailey's *Cyclopedia of American Horticulture* as follows: *Sidalcea malvaeflora*. Stems erect or ascending, 1-6 ft. or even more, sparingly hirsute; leaves green, small, incised-erectate, the upper ones 5-cleft or 5-divided, segments narrow and entire or broader and pinnate-lobed; flowers, 2 in. or less across when fully expanded, purple, California. Var. *Listeri*, Hort. (S. *Listeri*, Hort.), known also as "Pink Beauty," has satiny pink flowers. It is of European origin.

NURSERY DEPARTMENT.

Conducted by Joseph Meehan.

AMERICAN ASSOCIATION OF NURSERYMEN.

J. W. Hill, Des Moines, Ia., president; C. M. Hobbs, Bridgeport, Ind., vice-president; George C. Seager, Rochester, N. Y., secretary; C. L. Yates, Rochester, N. Y., treasurer.

Making California Privet Cuttings.

Kindly let me know when and how to make California privet cuttings. I want to raise them in a cold frame. Also about how far apart they should be placed.

H. E. S.

—If you have in mind the raising of this privet from green wood cuttings, it is too late for this season. When the shoots are half ripe, say from June until August, is the proper time for this work. But you can use the hard wood later on and every cutting will grow. At any time after New Year's—earlier if you wish—cut off all the long shoots of this season. Cut them into 6 to 8-inch lengths, tie in bundles, and bury them in sand in a cool place where the temperature is almost at the freezing point. As soon as Spring opens set out the cuttings in the open ground, and every one should grow.

To Destroy Web Worms on Walnut Trees.

We would like to inquire through your nurserymen's column what can be done to prevent the ravages of the walnut tree web worm? Can tarred cloth or wadding be relied upon, and if so, how should it be used, and when? Our trees are too high to destroy the webs by burning, and as they overhang cement walks they are unsightly nuisances—both the trees and the blackened walks—and still we hate to sacrifice the trees.

Ind.

S. A. H.

—As the nests cannot be reached to burn them, you have still the chance to destroy the worms by spraying the trees with arsenites. A good destruction of worms at this time would go a long way toward ridding your trees of the pests, as they deposit their eggs on the twigs of the tree, from which come the enemies the next season. Next year, should any of the caterpillars appear, the spraying could be done early before any material damage was effected.

Pruning Evergreen Hedges.

This is the month in which to give the final pruning to evergreen hedges and evergreen trees where it is needed. Hedges of this character are usually pruned twice a year—in June and in late Autumn. The pruning done now is wholly to bring the hedge into shape, while the earlier one was for the main purpose of thickening the hedge, while shaping it at the same time.

The pruning must be done now in the colder States or not at all until next year. Cutting off the outer twigs exposes to light and air the inner ones, which are always tender from having been without full light and air. These tender shoots need a month or two to become hardened before freezing weather comes, hence pruning is called for, say two months in advance of cold weather, by which time the additional light and air will have hardened the shoots that they stand cold without injury.

Taking the Middle States as a guide, there is not much freezing until the close of November, and hedges or single specimens of evergreens may be pruned safely until, say, the middle of the month of October.

In the case of single specimens of evergreens they are rarely so bushy that the inner branches are without much light, and in cases of this description pruning may be done later.

In recent years retinisporas, Japanese hollies, yews and other evergreens not used as hedge plants years ago are now often to be seen in such positions, but among them all there is none so really useful as the hemlock, old favorite as it is, and it thrives, too, in partly shaded places and stands clipping well.

White Ash Seedlings.

The efforts of the officials of the United States Department of Agriculture to promote interest in forestry matters has led to attention being called to the white ash as one of many trees of value to the forester. It makes a tree of useful dimensions in a short time; and its value in so many ways, because of the toughness of its wood, has been known for years. Nurserymen find more demand for ash trees than they did when their use for ornamental purposes was the only one considered, and this brings a greater call for the seeds. Fortunately, the ash rarely misses a crop of seeds and then the cost is but little. Seeds ripen in October.

Ash seeds require to be sown in the Fall unless kept in moist sand all Winter. They will then grow in Spring, but if kept dry all Winter and sown in Spring they will lie in the ground a year before sprouting.

It is surprising the number of nurserymen and seeds-

men who do not know the difference between the white and the green ash. Practically all the Western men call the green ash white ash, and sell seeds and seedlings of it for the white. The green ash is native to the West while the white is not, at least, the white is not nearly as common there as the green. The distinction is important as the white ash is far superior to the green for forestry purposes, making a larger growth. The tree is larger, the leaves are larger and so are the seeds. The leaves of the ashes are of a compound nature, and both the whole leaf and the leaflets of the white are larger than those of the green, and the under side of the leaves is almost of a gray color, while those of the green are of the same green color on both sides.

The green ash is *Fraxinus viridis*, the white, *F. americana*, or *F. alba*. As a street or avenue tree the green ash is sometimes preferred, because it does not make the heavy growth of the white one.

Evergreens for Tubs.

The use of evergreens for beautifying dwellings in Winter is becoming more general every day. They are useful all the season through, from the first days of Winter until Spring comes, and even for Summer use they are often met with on lawns, placed near dwellings and along pathways.

A great deal of attention has been paid of late to the producing of sorts of evergreens suitable for this purpose, of good outline, rather pyramidal than

Stripping Leaves from Trees.

There is no better season for the planting of deciduous trees than in early Autumn, although to many, the fact that the foliage is still green acts as a deterrent to the work. But to the nurseryman of the day this does not stop his work. He knows that the functions of the leaves are practically over and that as early planting makes the success of the operation assured, it is better to strip the leaves and plant the trees even at the expense of more time and perhaps of some little disadvantage to the tree in the loss of its foliage early. It is wonderful how well deciduous trees do when planted in September and October. It is really a loss to wait until the foliage falls of its own free will, for then the freezing weather of Winter is not far away and there is not time for the transplanted stock to get roothold in advance of it.

The stripping of the leaves is a tedious job, and when trees are large there is no other practicable way to do the work but by hand. In the case of trees of but a few feet in height they can be buried under ground for a few days, which will take off all the foliage. At the last nurserymen's convention a machine was exhibited for stripping off leaves, which if it works right will be the very thing needed.

Fraxinus Americana.

Our American white ash, as the *Fraxinus americana* is called, ranks high in merit as an ornamental tree, and still higher as one valuable for timber. When seen in its wild state it is rarely in a position where it can develop as it should, and as it is capable of doing, its companion trees, for it is rarely alone, preventing its full development. Give it room, and it forms a tree of pleasing outline. What it can do is shown by the specimen we found growing in one of our parks, which is herewith illustrated. It is a young tree, comparatively, and it is now one of much beauty of outline; and even when this ash becomes old it usually retains the shape it has grown up to, and we therefore expect the one illustrated to be a handsome tree still 20 years from now.

As we remark elsewhere, there is sometimes confusion in the minds of some persons regarding the distinguishing of this and some other of our native sorts, notably the green ash, *Fraxinus viridis*, but there need be none. In the first place, the *viridis* never makes a large tree. It is never of the size of the white ash of our picture, being a rather low growing, spreading tree. Then the foliage is of a good distinctive character. The leaves of the white ash are larger, and the under side of them is of a grayish white color, always, while those of the green ash are green on both sides. We have known nurserymen to turn over a leaf of an ash in doubt and decide after looking at it whether it was a white or a green one.

Looking at the tree before us, those accustomed to ash trees would decide from glancing at it that it belonged to the white ash, *Fraxinus americana*.

This species has been known and is still known by some under the name of *F. acuminata* and *F. alba*, but properly it is *F. americana*.

There are two other species of ash that make imposing looking trees and yet are rarely met with in many collections—the blue and the black ash, *F. quadrangulata* and *F. sambucifolia*, respectively. It often happens that a certain species gets a start as the leading one and becoming well known is asked for and planted exclusively by those who do not know there are others as good; and this appears to apply to the ash family. We think the blue and the black equally as worthy of a place on lawns as the white, yet the call is for the white. In these cases it is usually the fault of the nurseryman in not having a good stock of the sorts not well known. This also applies to oaks. The call is all for red, scarlet, black and white oak, while *falcata*, *nigra* and *obtusiloba* are as desirable, or more so, and are simply not planted because but few know of their value; and if they did they would not be able to find them in nurseries.

As a shade tree on lawns, the white ash is often used. There is ample foliage to protect from the sun's rays, without its being so dense that air cannot penetrate it, in this way constituting an ideal tree for the purpose.

JOSEPH MEEHAN.

Fraxinus Americana.

spreading, and with foliage that when several kinds are near each other there will be contrasting colors.

A good selection can be made from the following kinds: balsam and Douglas spruce, box bushes, Lawson cypress, evergreen euonymus, Japanese and other hollies, junipers, white, Norway and hemlock spruce, cembran and white pine, retinisporas in several varieties, yews, American and Chinese Arbor vitae.

From the foregoing list a collection such as is generally met with could be got together, one that would please.

The potting or boxing of the plants should be done soon, well in advance of Winter, that they be well established before housing time comes. There will be no need to give these evergreens any care at all after they are potted beyond putting them in a half shaded place and giving them an abundance of water for a week or two.

A collection of such potted evergreens set about a florist's establishment adds to its interest and attractiveness.

Grand New Double Daisy

A SPORT from that great money making single variety, **Queen Alexandra**, that everybody grows to a good profit. You can do better with this. The flowers are large, averaging three inches in diameter, and none of the flowers come single at any time of the year. It blooms freely either under glass or outdoors. Young stock, out of 2½ inch pots, ready for delivery January 1st, \$25.00 per 100. **ORDERS BOOKED NOW.**

ROSES

Though the end of September has arrived, the weather would be more seasonable for August or July. There has been but little need of artificial heat in the houses, with the result that, for this time of the year, the flowers are exceptionally small. Under these conditions the buds seem to suffer a great deal from thrips, for which a remedy has been sought for years. A great deal has been written about this pest and various remedies to exterminate it tried, mostly manufactures of tobacco; but, while these have proved of some value a large number of buds were practically ruined each season, especially on American Beauty and Bride. There is a remedy, however, which is very economical, easily applied, and if used regularly, will keep down the pest. It consists of a 2-inch potful of Paris green, three pounds of brown sugar, dissolved in one barrel of water. Spray the plants with a compressed air sprayer, twice a week, and there will be no more deformed buds. Needless to say, the mixture cannot be used by every one, for if too strong, the leaves will become spotted; but if prepared as directed, no harm will result. Wherever this remedy has been tried, good results have invariably been obtained. The amount of the mixture falling on any leaf or flower is so very small that there is absolutely no danger of any one being poisoned by it in any way.

Flower shows will be in order in a very short time, and rose growers should give ocular demonstration at these exhibitions of what they can produce. Don't think that there is "nothing in it." The actual value of the few blooms shown is nothing compared with the satisfaction of knowing your flowers are equal to those of your neighbor; and above all, it helps to make the show, which is a direct benefit to all growers; for it is at these exhibitions where flower buyers are made.

Do not close down the houses too early in the afternoon, and at this time of the year always leave several inches of air all night, if not too stormy. To keep the temperature from going too low use a little heat when necessary. Keep the benches somewhat on the dry side until a little more heat can be used. Too large a supply of water used at this season accounts for a good many failures in rose growing.

Boston.

The Outing at the Rawson Farm.

It was a representative gathering of the Gardeners and Florists' Club that turned out to see the dahlia collection of W. W. Rawson & Company at Marblehead on Saturday afternoon. All told there were 150 members present, and as the weather was excellent a very enjoyable and profitable afternoon was spent. The party left Boston on the 12.40 train in two special coaches, Maurice Fuld, the genial manager of the firm, being on hand and seeing to the comforts of all. The dahlia collection of Mr. Rawson is not extensive fields of several varieties, but it is a testing ground where a large number of varieties are grown so that the public may see and make their own selections. There are some 900 kinds grown, but the average dahlia fancier would want to discard nine-tenths of them. Again so many of the varieties are so near alike that it is needless for the average grower to cultivate many of them. Many of the newer varieties, like W. W. Raw-

News Notes.

The New England Cemetery Association members held a banquet at the American Home on Friday evening in honor of their secretary William Allen, who leaves to take charge of Homewood Cemetery, Pittsburg. One of the pleasant events of the evening was the presentation to Mr. Allen of a set of gold cuff links.

Mrs. Abbie Conant of Waban has added an automobile for the quick delivery of her products.

Houghton & Clark had the decoration for the convention of the liberal religious educators at the Unitarian Building this week.

Among Bostonians at the Jamestown exposition are W. W. Rawson, J. K. M. L. Farquhar, W. J. Stewart and W. C. Strong.

A. S. Parker of Stoneham has some of the finest asters seen in this market. Mr. Parker is a large grower of these flowers and has been very successful with them this season.

W. H. Elliott has completed about one-half of his new greenhouse at Madbury and has commenced planting the same with roses. The other half will not be ready to plant for some time. The size of this greenhouse, according to plans, is 1200 by 59 feet, but Mr. Elliott is now inclined to make the length 1800 feet. John Pritchett has resigned his position with Mr. Elliott and goes to be foreman for the J. A. Budlong & Sons Company, Auburn, R. I.

Maurice Fuld of W. W. Rawson & Company gave a talk on dahlias before the North Shore Horticultural Society on Friday of last week.

Wm. R. Nicholson and E. Allan Peirce have gone to New York to look around among the growers there.

F. J. Dolansky of Lynn is back from a three months' trip in Europe. Penn is remodeling his store on Bromfield street.

Violets made their first appearance this season, the past week.

Lewis Smith of Tewkesbury surprised his friends by getting married last week.

Hoffmann the Back Bay florist has acquired the store adjoining his, and having remodeled the same, it now gives him one of the finest florist stores in the East.

H. M. Robinson & Company are handling some fine southern smilax; they report bronze galax as scarce and of poor quality, no new crop coming in till the middle of November. New crop green galax has arrived and is of fine quality.

The business of the G. A. Sutherland Company, which has been carried on by James F. Burke since Mr. Sutherland's death, has been discontinued.

J. W. DUNCAN.

son, Governor Guild and Mrs. Gordon Abbott, were seen in fine shape and were approved of by everybody.

The needs of the inner man were well taken care of in a tent on the lawn where refreshments in unlimited quantities were served. It is not dahlias, however, that will take up the time of all the members during a whole afternoon, and one of the exciting events was the ball game gotten up between the married and the single men. The former were ably captained by F. E. Palmer, the latter by George Butterworth. E. J. Rogean acted as umpire. The score stood 12 to 5 in favor of the married men. On return to the station a vote of thanks was passed to Mr. Fuld for the able manner in which he had entertained the visitors. The party reached Boston early in the evening but in time to be in the midst of a thunderstorm which was then encircling the city.

Dahlia Field of W. W. Rawson & Company, at Marblehead, Mass.

FERNS FACTS

Bench, Boston, Pieroni, 3 in. 6c., 4 in. 10c.;

The following popular varieties are now
at their best and are exceptional values at
the price. Prepare for early Fall sales.

NEPHROLEPIS Bostoniensis. Fine stock
from beds, ready for 3½ in. and 4-in. pots,
\$5.00 and \$8.00 per 100, according to
size.

NEPHROLEPIS Cordata Compacta. From
beds for 3-in. and 4-in. pots, \$4.00 and
\$6.00 per 100.

NEPHROLEPIS Pieroni. Very strong from
3-in. pots, \$5.00 per 100. From beds, for
3½ in., mostly 4-in., \$5.00 and \$8.00 per
100.

NEPHROLEPIS Scottii. Thrifty from 2½
in. pots, \$3.00 per 100. Extra strong from
beds for 3½ in. and 4-in. pots, \$6.00 and
\$10.00 per 100.

NEPHROLEPIS Whitmanii. The most beau-
tiful among Sword Ferns. Strong 2½ in.,
\$6.00; sturdy 2-in. plants, \$10.00 per 100.
Fine 4-in. plants, \$20.00 per 100.

wise.

ARAUCARIAS OUR SPECIALTY WATCH US GROW

1907 is our 12th anniversary in a suc-
cessful career in the importation, growing
and shipping of this well-known and so
much admired evergreen, decorative plant,
Araucaria Excelsa, *Robusta*, *Compacta* and
the *Excelsa Glauca*.

Our importation this Spring, 1907, has
swollen up to the enormous number of
6,000; more are coming with the azaleas
in September and October. The florists
of every city from the Atlantic to the
Pacific Ocean can talk of Aschmann's
Araucarias.

Now is the time to buy. They will
gain in their growth 100 per cent. in two
or three months.

The next in rank is our *Nephrolepis*
Ferns, of which we only grow the best
selling and well-known varieties, and of
which we have a big lot: Boston, *Elegan-
tissima*, *Whitmanii* and *Scottii*, three large
houses full, in best selling sizes, all pot
grown (not bench grown).

Our ferns are not forced or grown in
shady houses, but grown exposed to the
sun, ventilators are open day and night.
Such treatment stiffens the fronds, and
makes strong, stout plants, that can be
shipped 6,000 miles safely without injury
to the plants in transportation.

ARAUCARIA EXCELSA, 8 to 5½ in. pots,
10-12 to 14 in. high, 3 to 4 tiers, 2 years
old, 80c. each. Larger sizes, 6½ to 6 in.
pots, 2-3-4 years old, 3-4-6 tiers, 60c.-
76c.-\$1.00 to \$1.25 each.

ARAUCARIA Compacta Robusta, 6 in. pots,
2-3-4 years old, 10-12-15 to 18 inches
high, 3 to 4 tiers, \$1.60-\$1.75 to \$2.00
each.

ARAUCARIA Glauca, 3-4-6 tiers, 2-3-4
years old, 10-12-15-18 to 20 in. high, 6
in. pots, \$1.00-\$1.25-\$1.60-\$1.75 to \$2.00
each.

LATANIA Borbonica, 26c. each.

KENTIA Forsteriana and *Reinoreaana*, Eu-
ropean stock, 6 in. pots, 25 to 30 in. high,
five leaves, \$1.00 to \$1.25 each; 4 in. pots,
18 to 20 in. high, 25c. each.

THE WEEK'S WORK.

Ferns.

Now is the time to get plants of
Boston fern and its improved varie-
ties into shape for market. Some grow-
ers still cultivate these in benches and
defer the potting of them for some
time longer. The wisdom of that prac-
tice may be open to question; certain
it is that plants left growing in bench-
es until within a few weeks of the
time when they are offered for sale
do not have the same contented ap-
pearance when offered to customers as
those that have been grown from
small plants continuously in pots, or,
at least, have been potted for some
time. It is quite true that these ferns
grow more luxuriantly when they have
the unlimited freedom of bench space
and soil, but it may be just as true
that the check they often receive when
they are potted more than counterbal-
ances the former gain.

Ferns newly potted require careful
watering until they get established;
a regular watering such as is given
other things will not be enough, be-
cause if they get dry, as they are very
liable to do, they will very soon show
evidence of it in the way of yellow
fronds and a general lusterless appear-
ance which is decidedly against them.
Large specimen ferns should be moved
frequently and be gone over carefully
and all decayed portions of fronds re-
moved. Medium sized plants will also
be benefited by moving them and turn-
ing them around, at least once a week,
exposing the weak sides so that they
will have a chance to furnish them-
selves uniformly before they are offer-
ed for sale.

Crotons and Dracaenas.

Well covered and well furnished dra-
caenas are very profitable plants espe-
cially for the Christmas trade. While
large plants are very desirable they
cost so much to produce that it is
doubtful if they are as profitable as
small and medium sized stock for mak-
ing up into baskets, dishes and hamp-
ers by florists at Christmas and all
through the holidays. The trouble
with dracaenas with many growers
is, however, that they will not take on
color until they get developed into
fairly large specimens, and this may in
a measure be accounted for by the
common practice of growing these
plants under shade too long. They will
not color when the glass is heavily
shaded, and for that reason they
should now be given light in order
that at least the top leaves will show
good color. Dracaenas of such varieties as
terminalis, *Lord Wolsley* are, because
of their characteristic narrow, grace-
ful foliage, more valuable for florist
uses than the broad-leaved varieties.
Large plants of well colored broad-
leaved sorts, such as *Pere Charon*,
Mayor and Mandaiana, are very de-
sirable for specimens and sell readily
during the Winter when colored foli-
age plants are most in demand.

Crotons need all the light they can
possibly get now, in order that they
may develop all the coloring they are
capable of producing. Crotons are in-
dispensable to florists during the Win-
ter, and not only, as with dracaenas,
can attractive arrangements without
number be made when crotons are at
hand in variety and in various sizes,
but large well-colored specimens are
readily disposed of and as readily made
use of for the brightening up of show
windows and other parts of store
places. It will be well, especially dur-
ing the little time that may elapse be-
fore fire heat is applied to these plants,
to water well and carefully during the
early part of the day; the same with
syrring, and to close up the houses
very early in the afternoon.

Slugs are persistent enemies of dra-
caenas; they are especially voracious at
this time. Many of these pests can be
caught by placing pieces of potato

ORDONEZ BROS.

P. O. Box 105 MADISON, N. J. Tel., 143 Madison

among the pots early in the evening, returning later for the destruction of those feeding on the feast thus provided.

Mignonette.

Mignonette growing in benches filled with good soil should now be getting into good stocky plants if they were thinned out properly. Mignonette thrives only when well nourished, and for that reason it will be well, especially in cases where the plants are of necessity grown in somewhat shallow benches, to feed with liquid manure freely. It will also benefit the plants if the soil is kept sweet by a light surface stirring at frequent intervals. A top dressing of loam and well rotted cow manure with the addition of a little bone meal will help the plants wonderfully in the development of large spikes of flowers.

Antirrhinums.

Antirrhinums for early flowering should be kept going ahead without a check. There is no question but these can be grown profitably if they are grown well, but there is no profit in antirrhinums in Winter if only common stock is produced. High cultivation is necessary in order that the spikes may attain large size and the flowers substance. Good soil and sufficient water are essential to their proper development.

Early Forcing Bulbs.

It cannot be too often repeated that the most important consideration in the early forcing of bulbs is that of having them make sufficient progress in the formation of roots before they are excited into making top growth, by placing them in a warm temperature and exposed to light. There is very little danger of failure with bulbs of any kind if they are allowed to fairly well fill their flowering pots, or flats, with roots before they are introduced into heat. And although the exigencies of anticipated demands and other unavoidable conditions may make it necessary to hurry forcing, it is always well to start reasonably low, the better enabling the plants to stand a little rushing, if that be necessary, subsequently. It should be carefully seen to that lilies and other bulbs, covered with soil or ashes, but without the protection of sashes outdoors, do not get too much water; it will also be necessary to examine those under cover to ascertain if they are in need of water.

Gardenias.

Whenever bottom heat is available it will be well to put in a batch of gardenia cuttings for early flowering next year or for the sale of the plants in 3½ or 4-inch pots, for which there is a growing demand, especially for good stock. Gardenia cuttings are quite easily rooted if a gentle bottom heat is kept up from the time they are put in the sand. The cuttings should be shaded from the full sunlight for at least a week after inserting them in the sand. Light sprinkling at frequent intervals will help them to hold their own and a good watering is necessary to settle the sand and render them firm therein.

It may be the case that gardenias in hedges all through the Summer grew very rank and failed to flower freely. It might pay now to lift out of the benches every other one in each row of plants, thereafter renovating the soil for the benefit of those remaining, with a good compost. Those taken out may either be potted or planted in another bench. More flowers may be confidently expected from this mode of treatment.

Fuchsias.

Now that fuchsias are beginning to come into favor both as pot plants and for planting outdoors in Summer, it may be well to call attention to the fact that large plants can be stored for the Winter in any frost-proof shed or cellar, in much the same way as lemon verbenas are wintered over. These old plants will simply require a little pruning back in the Spring, and a re-potting, to make them serviceable again.

The New Varieties of Nephrolepis.

Both the latest introductions of nephrolepis, N. Amerpohli and N. todesoldes, are well worth growing, and

It is also safe to predict a brisk demand for them for quite a while or until some other novelty of this type of fern puts in its appearance. They are, as already said, beautiful things, and it will be well for everyone not already possessed of one or more plants to get in a supply without delay in order that something may be made out of them while they remain in the novelty class.

Miscellaneous.

SWAINSONA is an excellent thing for cutting at any time of the year. More than likely numerous cuttings will be now available; a number of these should be put in the sand to root. Care should be taken that they do not wilt at any time and temporary shading will be necessary to avoid that.

PRIMULAS and CINCERARIAS in frames outdoors need constant attention, so much so in fact that it may be fully as well to remove them to a cool well-ventilated greenhouse where they can be looked after properly with less trouble than outside. One important essential in the growing of these plants is to keep them supplied with pot room from the start until they are in their flowering pots, and for that reason every plant needing a shift should be immediately accommodated.

HYDRANGEAS growing in the open ground outdoors may soon be potted in good rich soil, always allowing liberal accommodation for the roots of the plants to develop, because only by so doing can healthy plants with large flowers be obtained. Plants in pots outdoors all Summer will from now on be rapidly getting into a condition favorable for forcing. There need be no hurry getting these under cover yet a-while, because the longer they can be allowed to remain outside in safety from frost the better condition they will be in. Hydrangeas need a thorough ripening of their wood before being temporarily stored away to rest to fit them for forcing in early Spring for Easter sales. D. M.

Weekly Medium of Interchange for Florists, Nurserymen
Seedsmen and the Trade in General

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president; Jas. H. Griffith, secretary; David Touzeau, treasurer; Alex. Wallace, editor. The address of the officers is the address of this paper.

P. O. Box 1697. Telephone 3765-6 Beekman.
CHICAGO OFFICE: 127 East Berwyn Avenue.

ILLUSTRATIONS.

Electrotypes of the illustrations used in this paper can usually be supplied by the publishers. Price on application.

YEARLY SUBSCRIPTIONS.

United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by express Money Order, Draft on New York, Post Office Money Order or Registered Letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

REGISTERED CABLE ADDRESS:

Florex, New York.

ADVERTISING RATES.

One-half inch, 75c.; 3-4-inch, \$1.00; 1-inch, \$1.25, special positions extra. Send for Rate Card showing discount of 10c., 15c., 25c., or 35c. per inch on continuous advertising. For rates on Wants, etc., see column for Classified Advertisements.

Copy must reach this office by 12 noon Wednesday to secure insertion in issue of following Saturday.

Orders from unknown parties must be accompanied with cash or satisfactory references.

Chrysanthemum Society of America.

Appointment of Committees.

President Loveless has announced the committees to examine seedlings and sports on dates as follows: September 21, 28; October 5, 12, 19, 26; November 2, 9, 16, 23, 30, 1907.

Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of \$2 should be forwarded to the secretary, not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports, to receive a certificate, must pass three committees.

PHILADELPHIA.—A. B. Cartledge, chairman, John Westcott, Wm. K. Harris. Ship flowers to chairman, 1514 Chestnut street.

CINCINNATI.—R. Witterstaetter, chairman, James Allen, William Jackson. Ship blooms to Jabez Elliot Flower Market, care of Janitor.

CHICAGO.—J. B. Deamud, chairman, Andrew McAdam, George Asmus. Ship to chairman, 51 Wabash avenue.

BOSTON.—Elijah A. Wood, chairman, William Nicholson, James Wheeler. Ship to Boston Flower Market, 1a Park street, care of chairman.

NEW YORK.—Eugene Dailledouze, chairman, William Duckham, A. Herrington. Ship flowers to New York Cut Flower Company, care of chairman, 55 to 57 Twenty-sixth street; all flowers to be on hand by 2 p. m. on day of examination.

The official scales of the C. S. A. are as follows:

For Exhibition Purposes	For Commercial Purposes
Color	Color
Stem	Form
Foliage	Fulness
Fulness	Stem
Form	Foliage
Depth	Substance
Size	Size
Total	Total

The following gentlemen have been secured to pass on the exhibits at the New York show to be held November 6 to 8, 1907: Eugene Dailledouze, Flatbush, N. Y.; James Wheeler, Brookline, Mass.; William N. Craig, North Easton, Mass.

Preparing for the Fall Shows.

It is none too early to begin active preparations for the forthcoming Fall flower shows. The majority of the premium lists for these exhibitions have been distributed, though some of these have appeared too late to be of much benefit to intending exhibitors, especially of chrysanthemums. In this connection we recommend the practice of the Massachusetts Horticultural Society, which at this early date has announced the principal features of its shows that will be held next year in January, March and May. Advance notice of this nature is of decided advantage to all interested in these exhibitions.

The public generally continues unabated its enthusiasm in horticulture and the products of the horticulturist—an enthusiasm fostered and encouraged by the school garden and civic improvement movements. It remains with the trade to help maintain this gratifying condition, and the flower show furnishes an excellent means to that end. Several schedules include classes for amateur and children's exhibits; this is an excellent plan, bound to be productive of much good, and is worthy of every aid that can be given it.

It is gratifying to note the practical assistance and encouragement rendered by prominent trade firms to the promoters of flower shows, by the donations of special prizes offered in competition. We think we are safe in saying that more of this has been done for the present year's exhibitions than has been the case heretofore. Waiving the business side of such prize offers, so far as concerns the donating firms, their action is decidedly stimulative, conducing to enlarged competition, and making for more comprehensive and interesting shows.

There is still a well grounded belief that in the matter of arrangement and display at our exhibitions there is much room for improvement. There are yet too many of the "hay-cock" groups of plants in evidence, and other settings and features that belong to a bygone age. Originality and uniqueness should be the aim of all associated with the making of a flower show—not to the extent of grotesqueness or a travesty of good taste; but keeping as close to natural effects as the circumstances allow. We have faith in the ability of the craftsmen to break the monotony in flower shows, so prejudicial to their attractiveness and financial success; and a little forethought and consideration bestowed on this aspect of the exhibition question will not be without its beneficent results.

Of the many details upon which the success of a flower show depends the most important is publicity. We have observed, with much satisfaction, the desire on the part of the city and provincial press to publish information relative to flower shows and other educational undertakings of that nature. Every advantage should be taken of this praiseworthy disposition. Supply the newspapers with plenty of data concerning your forthcoming show from which a readable "story" can be written; begin this work timeously early and keep it up until the event takes place. It will bring its own reward.

Advertising of the show in various available forms should not be overlooked. There are a number of ways of doing this advantageously—through the local press, in street cars, at railroad stations, by posters in the windows of merchants, by circulars, handbills, etc. In short, when one enters the show business, he must adopt showman's methods, to make a success of the venture; and in this connection, we are inclined to think that too little attention is given to the matter of publicity, the greatest essential of all.

To facilitate the work of the judges and secretary there is nothing better than a good set of flower show stationery. That gotten up by the publishers of The Florists' Exchange, is, as far as we know, par excellence. It has been commended for its utility, ease of application, and expediting character by such men as Willis N. Rudd and other managers of exhibitions. Samples of the various documents composing the set, together with information as to the price at which it is sold, are sent on application.

All signs point to plenty of first-class stock, increased enthusiasm and keen competition in connection with the Fall shows this year, confirming the anticipation of a record-breaking exhibition season for 1907. May our most sanguine hopes be realized!

The Council of the Royal Horticultural Society of England has appointed George Dickson, head of the firm of Alexander Dickson & Sons of the Royal Irish Nurseries, Newtonards, a Victoria medallist. Mr. Dickson is well known in this country as a famous rosarian.

We have on hand several of the other papers read before the Congress of Horticulture at the Jamestown Exposition, September 23-27, 1907; they will appear in future issues of The Florists' Exchange.

OUR READERS' VIEWS

A Defect in the Scotsmen's Criticism.

Editor Florists' Exchange:

Pardon me for butting into a Scotsmen's riot. While it is somewhat amusing to hear the clans discuss Burns, Scott and the Shorter Catechism, I note that the whole band, from Birnie to Job, quote Burns correctly, but never a word from the Catechism. Have the oatmeal horticulturists forgotten or departed from the teachings of their early days? JOHN G. ESLER.

Uniform Names of Plants.

Editor Florists' Exchange:

I am pleased to find that Joseph Meehan has called attention to "a safe ground for those who are mystified by the various names now applied to the same plant." The Kew Index and supplements are the only safe guides extant. The Index Kewensis is expensive, however, and for those who cannot afford it, permit me to call attention to the invaluable "Kew Guides," which are practically supplements of the Kew Index, but give only the plants in cultivation in the gardens—that is, the majority of species and well marked varieties in cultivation anywhere.

These handy little "Guides" are not advertised and but little known in this country. They may be obtained by sending international postoffice orders to the Director, Royal Gardens, Kew, London, W., England, for the following amounts: Ferns, 7½d.; Conifers, 3d.; Tender Monocotyledons, 11½d.; Orchids, 8d.; Tender Dicotyledons, 2s. 11d.; Herbaceous Plants, 2s. 6d.; Trees and Shrubs, 1s. 10d. That is about \$2.50 altogether; and the nurserymen and florists, for this small sum, will be put in possession of a set of guides to uniform naming, which all agree is so eminently desirable.

It must not be expected that any "Sassafras Sassafras" or "Benzoin Benzoin" nonsense is given, other than synonymy, for the late Vienna convention repudiated all that, together with recent changes of many time honored names used the world over by gardeners of all sorts and botanists alike.

When these works are obtained, however, the next thing will be to use them. Go over the catalogues name by name. Then even Messrs. Meehan may drop "Corylus japonicus."

Trenton, N. J.

JAMES MACPHERSON.

Editor Florists' Exchange:

Joseph Meehan, whose invaluable articles in The Florists' Exchange I have been following for years, has recently quoted with approval James MacPherson's advice that beginners should follow the names of plants as given in the Index Kewensis. To this advice I beg to take exception.

One reason for this is, that Index Kewensis pays no attention to varieties. The species is the only unit it recognizes, and the horticulturist is largely, if not chiefly, interested in varieties, since they commonly represent an improvement over the original species.

A still more fundamental objection is that Index Kewensis contains hundreds of unsolved riddles and self-contradictions. In saying this, I do not criticise adversely this superb work, which is the botanist's first appeal in monographing any genus; but no botanist ever accepts the judgments of Index Kewensis as final. It is merely a starting point for investigators; whereas in Bailey's Cyclopaedia of American Horticulture we find all these genera worked over by specialists who have unraveled many of the puzzles and inconsistencies indicated by Index Kewensis.

Moreover, I doubt if there are fifty copies of Index Kewensis in America. In other words, there is only one work that attempts to describe all the species and varieties cultivated in America—namely, Bailey's Cyclopaedia of American Horticulture. It is all right enough to use Index Kewensis for names of species introduced since the publication of Bailey's work (which is practically complete up to the year 1900), but Index Kewensis accounts for fewer names in which American gardeners are interested; fewer than Bailey's Cyclopaedia of American Horticulture does. The latter does not claim to be a final work, but it certainly ought to be adopted as the standard of nomenclature by all horticultural societies, seedsmen, nurserymen and florists simply because it is the only available one, since Index Kewensis costs too much for a private person to own and contains no descriptive matter.

As a matter of fact, Bailey's Cyclopaedia is now so recognized by many of the leading horticulturists of America. I suppose that I have received thirty or forty catalogues of leading seedsmen and nurserymen that have been standardized with Bailey's work.

WILHELM MILLER.

The Plea and Plight of the Private Gardener.

Editor Florists' Exchange.

As a private gardener and a member of the S. A. F. O. H., I desire to express (in as few words as possible) my feelings in reference to the relations between the private gardeners as a class, and the commercial florists as a class, consequently to the above named organization, and request the favor of sufficient space in your columns for that purpose.

While my opportunities for personal intercourse with either florists or other private gardeners are limited, I must say that I consider the bond of fellowship between members of either branch of horticultural industry (or profession) and myself, equally strong. I certainly have a high regard and respect for the men who have honorably carried, or are carrying, commercial undertakings to a successful issue, financially as well as artistically.

While the private gardener's position may entail attention to more diversified and vexatious details, and may develop higher cultural skill, the commercial florist is obliged to carry the burden of financial responsibility; and I do not consider either of these occupations more elevated or dignified than the other.

I think that we are all inclined to display some egotism in reference to our profession. While it is certainly a highly honorable one and is, without doubt, one of the great factors in the development of refinement in the human race, it is not more so than are many others. Honorable men will make any business or profession honorable.

Perhaps I am brought in personal contact with commercial florists, as a class, too seldom to determine the feelings of florists in general toward private gardeners, but my experience has been that, when I have come in contact with them, I have generally, if not always, been accorded all the courtesy due me.

I certainly feel honored in being a member of the different florists' organizations in which I hold membership, particularly so in being a member of the S. A. F. O. H., and I respectfully submit the opinion that I think membership in that organization will prove beneficial to most private gardeners.

Increased membership and interest in the society among the ranks of private gardeners, with a feeling of "charity toward all, malice toward none," and while conceding the rights of others, standing firmly for their own rights, would be of great benefit to the society. I am sure. Such action by a considerable number of private gardeners would prove conclusively whether the society has been or is sincere in its professed friendliness of feeling toward and interest in other branches of horticultural industry than that of commercial floriculture. I certainly can see no good reason why there should be any general feeling of unfriendliness between those engaged in the two branches of the profession, and without descending to mawkish sentimentality, why they can not meet upon the broad plane of universal brotherhood and good fellowship.

I am afraid that we as members of the S. A. F. O. H. pursue the same methods that we do as American citizens politically, paying little if any attention to the selection of the men who are to fill our public offices and administer the business of the people, and kick because the business is administered badly.

I trust that your readers will pardon me for imposing upon them my little preachment, and regret that I could not make it as entertaining to them as the contributions of Messrs. Birnie, McGorum, Job, Cameron and others. I must plead as my excuse, the best of intentions, and trust that they will accomplish some better purpose than making paving for that region where friend Carmody (according to his own statement) has such a satisfied and satisfactory patronage.

I. L. POWELL.

New York.

Press Comments on a Burbank Achievement.

"And he gave it for his opinion," wrote Swift, "that whoever could make two ears of corn, or two blades of grass, to grow upon a spot of ground where only one grew before, would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together." If this be true as a general proposition, what must Luther Burbank deserve who grows seventy-three varieties of apples on a tree which Nature designed should bear but one? To call Mr. Burbank the greatest grafter in the United States, is a compliment, not an offense.—Brooklyn (N. Y.) Eagle.

Luther Burbank has grown seventy-three different kinds of apple on one tree. It's unfortunate that trees like that didn't grow in the Garden of Eden, for then Eve couldn't have made up her mind which one to eat. On second thoughts, however, it's just as well there wasn't. Eve might have eaten them all.—New York American.

The report of the annual meeting of the American Association of Park Superintendents, held at Toronto, Ont., August 15-17, 1907, has been issued by the secretary.

CLUB AND SOCIETY DOINGS.

Massachusetts Horticultural Society.

The following additional special prizes are offered for the Chrysanthemum Show, November 8, 9, 10, 1907. Entries must be made at least three days prior to the opening of the exhibition.

For the best arranged table of cut chrysanthemum blooms; all classes admissible; tables to be 8x6 feet; for commercial growers only; four prizes.—\$10, \$30, \$20, \$10.

For the best decorative arrangement of cut chrysanthemums, with Autumn foliage or other suitable material, filling a table 8x6 feet; all classes admissible; for retail store florists only; four prizes.—\$10, \$30, \$20, \$10.

For the best vase of one hundred chrysanthemum blooms, of one or more varieties, in the society's large China vases; tasteful arrangement will be considered; offered by George R. White; four prizes.—\$40, \$30, \$20, \$10.

For the best vase of fifty roses, of any one variety; three prizes; (first prize offered by Francis Skinner).—\$50, \$30, \$20.

For the best six vases of carnations, distinct varieties, fifty blooms each; four prizes.—\$40, \$30, \$20, \$10.

For the best made up center piece of growing plants, suitable for a table of eight covers; offered by the Gardeners and Florists' Club of Boston; three prizes.—\$12, \$8, \$5.

For the most tastefully decorated table of fruits, 8x6 feet; Autumn foliage and berries may be used to produce a pleasing effect, and the fruits may be of either native or foreign production; four prizes.—\$40, \$30, \$20, \$10.

For the best collection of vegetables of fifteen varieties, not more than two kinds of any one variety admissible; the number of specimens of each variety must be the same as given in the annexed scale of points; tasteful arrangement will be considered; to assist in the decoration of the collection parsley or other vegetable greenery may be used; mere size of specimens shown will not necessarily entitle the exhibitor to the highest award; for private gardeners only; four prizes; first prize a silver cup valued at \$75, offered by R. & J. Farquhar & Co.; the Society offers second, third, and fourth prizes.—\$25, \$15, \$10.

Note.—Savoy, red, and common cabbage will be classed as distinct; so will Cos and cabbage lettuce; also lima, string, and shell beans. Separate dishes of tomatoes will, however, be classed as varieties of one species; this will also apply to celery, potatoes, and other vegetables. Melons are excluded.

Only vegetables fit for table use must be exhibited; ripe corn and dried beans are debarred.

This class will be judged by the appended scale of points and is for competition by private gardeners only. Scale of points to be used in judging Special Collection of Vegetables.

WM. P. RICH, Secretary.

ST. LOUIS HORTICULTURAL SOCIETY.—The regular monthly meeting of this society was held last Tuesday afternoon at the residence of C. C. Sanders. In the absence of the president, Ex-president Harry Young presided. Ten members were present, including the officers. This meeting was held for the purpose of the selection of the hall for the Fall flower show and the completing of the final premium list, also to fix the dates on which the show is to be held. It was reported that the new hall in course of construction belonging to the United Railways, at the corner of Park and Vandeventer avenues, would be completed in time for the exhibition, and that the manager, Mr. McCullough, of the United Railways, would give the use of the hall free for the show, the hall being 100x100 feet. This very kind offer was accepted with thanks. The dates agreed on were November 12 to 15, inclusive.

The final premium list will be ready next month, and no doubt will contain a number of good prizes which will bring out keen competition among the growers and retailers. The Shaw prizes, amounting to 500, are always a feature at our shows. This also includes the Henry Shaw medal, valued at \$25, which is available for a species or variety of plant of decided merit, for cultivation, not previously an article of North American

commerce and introduced to such commerce by the exhibitor during the present year. Only one of these medals has been taken during any of our local shows, and it is hoped by the Director of the Garden that a number of entries will be made for the medal this year.

Those present at this meeting were Fred C. Weber, Theodore Miller, O. G. Koenig, F. H. Meinhardt, John Steidle, Alex. Waldbart, A. Jablonsky, Harry Young, C. C. Sanders and C. Nicholson. Mrs. Miller, Mrs. Koenig and Miss Meinhardt were also present, and were entertained by Mrs. Sanders and daughter. All sat down to a lunch after the meeting, and in this way a pleasant afternoon was spent.

ST. PATRICK.

MORRIS COUNTY GARDENERS AND FLORISTS' SOCIETY.—An unusually large attendance was present at the September meeting of this society. Most of the time was spent in making arrangements for the flower show to be held in Madison, N. J., on October 31 and November 1 next. There seems to be an abundance of promising material in the way of chrysanthemums, roses, carnations and vegetables in the neighborhood, which augurs well for the exhibition. The prizes, too, are liberal, over \$500 in cash premiums are offered. One gentleman donates \$50 in one prize for 24 chrysanthemum blooms in 24 varieties; another promises a silver cup for six white and six pink. The first named prize is open to all and the second is for members only.

George H. Hunt is to read an essay on "Orchids" next month and Lager & Hurrell offer to put up an exhibit to encourage the speaker.

John Heeremans, superintendent at Glimpse-wood Manor, Morristown, N. J., announced that he has resigned his present position to accept another where the field is wider and the opportunity greater. Mr. Heeremans has been connected with this society for a number of years; he served two terms as presiding officer and has always been a willing member of committees where there was work to do. No sacrifice was too great for him if it furthered our interests. He was also a most successful exhibitor at our shows. Resolutions of regret, which showed our estimate of him, were adopted by a rising vote and a copy ordered engrossed and presented to Mr. Heeremans. He retains his membership, and expects to do so for many years to come, he says. Success to him.

E. R.

Charles Patrick Barry.

Charles Patrick Barry died Friday night, September 20, 1907, at his home, No. 421 East avenue, Rochester, N. Y., aged 55 years. Mr. Barry had been in poor health for some time. He leaves his widow and three children, Harriet, Alfred and Thomas Barry; a brother, William C. Barry, and a sister, Mrs. Bernard Leisching.

Mr. Barry was born in Rochester and took an active part in its development. He was associated with his father in the nursery business up to the time of the latter's death, was vice-president of the Ellwanger & Barry Company and of the Ellwanger & Barry Realty Company, and was a director of the Rochester Trust and Safe Deposit Company. He was prominent in educational affairs and was treasurer of the Rochester Summer School on Lake Champlain.

Henry A. Jones.

Henry A. Jones, well known to the trade, especially in the Southern and Eastern States, as a traveling representative of Ralph M. Ward & Co., New York, died at the home of his daughter, Mrs. Florence J. Barton, Cromwell, Conn., on August 23 last. His illness was of short duration, he having been attacked with acute indigestion while on the road; he hurried home, but died in four days.

Mr. Jones was a man of many sterling qualities, genial and very companionable, and made a great many friends during his travels. He was born in Baltimore, Md., February 29, 1840. His parents died when he was quite young, leaving him to shift for himself. Most of his education was obtained by studying after working hours in the evening. During the war and for several years after he was chief clerk in the Quartermaster General's Department at Washington, D. C. He also held other responsible Government positions during his life. He leaves four daughters and one son.

Charles Schleeter.

On Saturday, September 21, Charles Schleeter, florist, Louisville, Ky., died at the aged of 42 years. Mr. Schleeter was well known among the local florists, having been connected with the trade for more than 20 years. A widow and several children survive him.

A. R. B.

A World-Famed French Horticulturist.

Among living horticulturists there is probably no name better or more favorably known the world over than that of Victor Lemoine of Nancy, France. For over half a century this painstaking gardener has been enriching our gardens and grounds with the products of his skill as a most successful plant hybridist, as well as an importer of new plants, and to-day, in his own line he probably stands unrivaled.

An appreciative account of the life and work in the field of horticulture of this eminent French nursery-

honorary member of the National Horticultural Society of France, and of several other organizations. M. Lemoine is a corresponding member of the Massachusetts Horticultural Society.

Our German contemporary gives a list of the novelties originated by M. Lemoine, by crossing and hybridization, and as well as enumerates his introductions of new plants from all parts of the globe, from 1852 to 1907. It is a most comprehensive and instructive compilation, of especial value to horticulturists everywhere.

Lemoine's first work was in securing the double-flowered portulaca in 1852; this was followed two years later by the first *Streptocarpus hybridus* in four or five forms obtained by crossing *S. biflorus* and *S. polyanthus*. The list of Lemoine's importations and new plants of his own raising occupies several pages of our contemporary, closing, as we have said, with 1907, in which year he introduced *Columnea glabra major* and *C. magnifica*, two magnificent Gesneriaceads from Costa Rica, the discoverer being M. Carlos Wercklé; *Hydrangea arborescens grandiflora* from N. America in which every flower is sterile and the corymb very large. In this year he brought out *Begonia Gambetta*, a bedding variety in the way of B. Lafayette; single-flowered zonal pelargoniums Colonel Poirine and Vicomte de Vogüé; *Anemone japonica Calice rose*, and A. J. Enchantement, and several new astilbes.

Among the new things which will appear in 1908 are several Winter flowering begonias, seedlings of

maculatus, Lemoinei rosace and Lemoinei Voie lactée. Among deutzias: Lemoinei, discolor grandiflora, Lemoinei Avalanche, Lemoinei Boule rose, myriantha, gracilis fastuosa and gracilis candelabrum. Among the double lilacs, particularly Lemoinei, Mm. Lemoinei, Dr. Masters, Comte de Kerchove, Président Loubet, Miss Ellen Willmott, Waldeck-Rousseau, René Jarry-Desloges and Victor Lemoine; of the single flowering lilacs: Congo, Pasteur and Réamur. Among the Lemoine seedling fuchsias are Mrs. E. G. Hill, Christophe Colomb,

Deutzia scabra X D. discolor purpurascens.
From Möller's Deutsche Gärtner Zeitung.

man appears in the issue of August 10, 1907, of Möller's Deutsche Gärtner-Zeitung, from which the subjoined particulars are taken.

Victor Lemoine was born in Delme, Lorraine, on October 21, 1823. His forefathers were gardeners. He obtained the groundwork of his general education at the College of Vic-sur-Seille, after leaving which he traveled considerably, gaining his horticultural experience in such establishments as those of Baumann in Bollweiler, Louis van Houtte in Ghent and Mieliez in Lille. He went to Nancy in the year 1850, and with but small means in his possession entered into the business of a commercial nurseryman. In appreciation of his work he has been the recipient of many honors. In 1894 his native country made him an officer of the Legion of Honor, and England has bestowed upon him the Veitchian medal, the first recognition of this kind given to a foreigner. He was honorary vice-president of the Central Horticultural Society of Nancy, and

Hybrid between *Deutzia corymbiflora* and
D. discolor purpurascens.
From Möller's Deutsche Gärtner Zeitung.

Emile de Wildeman and Bertrade. Then there are *Asparagus-siberianus*, *Pavonia intermedia kermesina* and *Exochorda Alheri macrantha*. Of phlox *Eclairer*, *Flambeau*, *Etna*, *Pêcheur d'Islande*, *Jocelyn*, *Matilde Sero*, *Coquelicot*, *Maximilien*, *Poussin*, *Tapis Blanc*, etc. Of the herbaceous peonies, *La Fiancée*, *Mme. Emile Lemoine*, *La France*, *La Lorraine*, *E. G. Hill*, *Sarah Bernhardt* and *Alsace-Lorraine*. Of the *Anemone japonica*: *Vase d'Argent*, *Mout Rose*, *Turban*, *Couronnement*, *Diadème* and *Le Nain rose*.

Space forbids more than a reference to his work among *gladiolus*, *monstretias*, *delphinium*, *potentilla*, *pyrethrum*, *primula*, *heuchera* and *penstemon*.

Truly, as our transatlantic contemporary remarks it is a great and grand success in horticultural work, upon which Victor Lemoine can look back over these 55 years, and gardeners in every land are thankful to him for what he has striven and for what he has obtained.

Deutzia Myriantha.
From Möller's Deutsche Gärtner Zeitung.

Gloire de Lorraine, and of *B. socotrana X B. Pearcei*, a peony with large double flowers of the color of the rose *Soleil d'Or*, a hybrid of *Peonia lutea* crossed with a double-flowering variety of *Peonia Moutan*.

Of the numerous plants introduced into commerce by M. Lemoine, the following he considers the most meritorious: among importations—*Clematis erecta flore pleu*, *C. integrifolia Durandi*, *C. Davidiana*, *C. Marie Boisselot*, *C. La France* and *C. Mme. Baron Veillard*, *Hydrangea paniculata grandiflora* and *H. arborescens grandiflora*, *Carpenteria californica*, *Polygonum baldschuanicum*, *Deutzia Vilmorinae*, *Viburnum Carlesii*, *Spiraea Aitchisonii*, *Asparagus retrofractus arboreus*, *Begonia Baumannii*, *B. fulgens*, etc.

Of those of which he himself is the originator, he regards the following list as among his best: *Tuberous-rooted begonias*, *Martiana grandiflora*, *Lafayette*, *Washington* and *Gambetta*; other begonias, *Gloire de Lorraine*, *Vésuve*, *Perle Lorraine*, *Corbeille de Feu*, *semperflorens elegans* and *argenteo-guttata*. Among zonal pelargoniums, *Gloire de Nancy*, *Belle Nancéienne*, *Paul Louis Courrier*, *F. V. Raspail*, *Paul Crampel*, *Emile Zola*, *La Favorite*, *Deuil de Miribel* and *Colonel Poirine*; the large flowering kinds, *Mme. Thibaut*, *Citoyen des deux Mondes* and *Le Vésuve*. Of clematis, *Otto Froebel*, *Lucie Lemoine*, *Etoile rose*, *Viticella kermesina*, *La Nancéienne*, *Mathieu de Dombasle* and *erecta grandiflora*. *Weigelia*s, *Abel Carrière*, and the early flowering sorts, *Floral*, *Le Printemps*, *Conquérant*, *Glorieux* and *Avant-Garde*. *Philadelphus*, *Lemoinei*, *Lemoinei Avalanche*, *Lemoinei Mont Blanc*, *Lemoinei purpureo-*

A Visit to a Noted Peony Farm.

I have just had the pleasure of visiting J. F. Rosenfield of West Point, Neb., who is one of our most practical and careful peony growers, as well as one of the most progressive. He has about 600 varieties and I should judge about 250,000 plants. His sales are enormous. He is discarding the retail trade and devoting himself to the wholesale business. His land is a deep, rich, sandy loam, the ideal soil for peonies. He is raising seedlings by the thousands from the choicest seed. It was he who originated Golden Harvest and Floral Treasure—both excellent varieties. Golden Harvest is a boon to the West and Northwest. The flowers are of exquisite beauty, and the plant is one of the hardiest of all. It is a great favorite in the Dakotas, Minnesota and Manitoba. It blooms the first year and all the years. Floral Treasure took the prize at the Chicago peony show.

The Coming Peony.

Mr. Rosenfield is very conservative. He says: "I have hundreds superior to most of the importations, but I shall not name them and will sell them by colors." What he is after are those of superior merit. He, with the rest of us, thinks there is room for improvement among the crimson. While many of them are good, they are not good enough. He has selected one which after testing for years he thinks will fill the bill. It is the deepest red, or crimson, very large, full flowers, borne on a long, strong stem—a very prolific and annual bloomer. He has now about 200 of them, but will not put them on the market for a year or two. He sent one to the trial grounds at Cornell University so that visitors to the next annual peony show can see it. Of course, we cannot always tell by the first bloom what a plant will do. I expect to go out and see them myself on his grounds next year. He is very painstaking in his efforts to keep everything separate. Different standard varieties are kept in blocks, and so much care is taken, that there is but little roguing to be done and very few, if any, stray ones appear.

He is saving seeds from the very choicest kinds, secured from Dessert of France and other leading growers. His list comprises the finest of Europe and America. From these he will raise thousands of plants and discard everything but the finest. Single ones, except in rare instances, are thrown away, and the rest many of them far superior to most of the foreign ones, will be sold by colors.

His home is an ideal one. The house cost \$8,000. His wife died several years ago, leaving eight children, most of whom remain with him. This is the way he solves the problem. I saw two of them who were taking hold of the work as though they owned it and were pushing things just as if they knew how. One was eighteen and the other sixteen years old. Said he: "I want my boys to be independent, to earn something and have money of their own, and know what it is to earn it and learn how to keep it. I pay the oldest \$18 a month and the youngest \$12. How a boy will work and how he will love his work if he is paid for it." This is different from the sad little fellow who said: "Yes, the pig is mine, but the pork is father's."

One of the favorite standard sorts is l'Esperance. Perhaps this is not the correct name. Mr. Ward thinks it should be Duchesse de Nemours (Guerin), but no matter, the name l'Esperance has stuck to it so long that it will probably wear it. It is a splendid, radiant pink—a full, double, beautiful flower, and about the earliest of the chinensis family. It is a great money-maker in the West where it comes in in time for Decoration Day. It is of such superior quality and fragrance that the blooms sell by the thousand, and whole fields are cleared of flowers to satisfy the demand. He keeps large blocks of thousands of this variety, and finds they are growing in favor. On these grounds one can see the vast difference between home-grown and imported stock. Those from Dessert of France were almost infinitesimal in size, and it will take eight years for them to come to blooming strength. His own of the same age were about six times as large and full of vigor.

Mr. Rosenfield favors the idea of having the American Peony Society's exhibition at Minneapolis a year from next Summer, so that we can show the great Northwest what is in store for them. To tell the truth, Minnesota can raise finer blooms than Nebraska on account of cooler air.

We canvassed the future of peony growing. Most of what he has sold so far went East. Nebraska is to be filled, and billions are needed for the great Northwest, only we must first wake the people up to see what they are. Thousands of men and women never saw a peony and have no conception of its hardness and imperial splendor. We want a campaign of education which will open all the gates for the incoming of this Queen of Beauty.

C. S. HARRISON.

York, Neb.

Federation and Co-Operation.

By J. C. VAUGHAN, CHICAGO.

Read before the Congress of Horticulture at Jamestown Exposition, Norfolk, Va., September 23-27, 1907.

Following a general horticultural meeting at the World's Fair, St. Louis, November 10, 1904, and a second meeting of a committee of seven at Chicago, July 20, 1905, the National Council of Horticulture was organized. Its objects, as then stated, were:

1. To fraternize and concrete the horticultural interests of North America.
2. To consider questions of public policy and administration which are common to these organizations.
3. To act as a bureau of publicity in the interests of reliable information pertaining to horticulture in its broadest sense.

Its composition as follows:

1. The membership shall consist of two delegates elected or appointed by each national horticultural society, with nine delegates at large.
2. The Council shall elect an executive committee of nine persons, at least five of whom shall be delegates at large.

This Council has held, approximately, semi-annual meetings since that date, and while these meetings have not been largely attended, number three of the stated objects has been carried forward with remarkable suc-

Now as to the second object for which the National Council of Horticulture was organized: "To consider questions of public policy and administration which are common to these organizations."

All who have attended with reasonable regularity the meetings of our national societies realize how much time is spent and often wasted on discussion of subjects most properly handled by committees, and further how often the work of such committees is the same in the different societies. I may mention as examples the subjects of transportation, of customs, of postage, and some sides of the nomenclature question.

Now the work of each of the above committees from a single society, were it done in connection with another national society, would be much more effective, and still more were they all combined. A committee on customs, or on transportation, with the backing of all the national societies in horticulture, would mean something when presenting their claims for consideration to the proper authorities. Instances are not lacking where similar combinations, representing all the branches of a great industry, have appeared before the officials of a great national exhibition and insisted upon and secured the proper recognition and awards, which would never have been given them or even have been considered, had not such a general committee been in existence.

The need for fair consideration of horticultural interests at the national exhibitions well known to everyone, who has marked the very apparent errors in buildings, in classifications, and in premiums at many of them, and certain it is that horticulture in its broadest sense has not been rightfully considered at these exhibitions, and never will be until our interests act together as they can do through the representatives they now have in the National Council of Horticulture, by regularly elected delegates, and by the co-operation which this brings about.

Because of the few actual workers available in its ranks the difficulty of frequent meetings because of the widespread locations of its members, and its lack of funds for traveling expenses, the Council has not taken up actively other lines of its work above mentioned, but it must be done, and the growth of the Council and the willingness of its membership to contribute funds, prove that its further work will surely be taken care of in the reasonably near future.

As soon as more frequent meetings can be had and a fair attendance be counted on, the broader questions of nomenclature and international co-operation on similar lines will be in order.

It is not, and has never been, the object of the National Council of Horticulture to take up any work which up to the present time is the exclusive work of any single national interest, but to act only as a representative body of these various interests on lines which are common to them all and which no one can claim the right or privilege to take up and do for the others. For instance, the organization of a national congress of horticulture would hardly be the duty of the national apple growers, florists, or nurserymen, but can well be conceded as coming within the province of a Council like this, organized and supported by these separate interests and made up in its membership by actual delegate from the various societies, combined with non-commercial members interested in the educational side of horticulture, and without commercial interests, against whom no charge of commercialism or commercial interest in the work can be made.

It is the intent of the Council to elect from its non-commercial members its permanent chairman. While the present temporary chairman is from the commercial delegates, yet it has been his aim to so conduct the affairs of the Council that no charge of commercialism interest in the work can be made.

WILLIAM ALLEN, who has just received the appointment of superintendent of Homewood Cemetery, Pittsburgh, Pa., succeeding superintendent Woods, who died last July, was born in Glamorganshire, Wales, where he learned the trade of a gardener. When still a young man he came to America and entered the employ of James H. Rowditch of Boston, landscape engineer. For the past twelve years he had been at Mt. Auburn Cemetery, Cambridge, Mass., where he was assistant superintendent.

Homewood Cemetery is 400 acres in extent, of which 300 are undeveloped. Mr. Allen is well known as secretary and treasurer of the New England Cemetery Association.

Deutzia gracilis Candelabrum

From Möller's Deutsche Gärtner Zeitung.

cess, mainly through the earnest and unselfish labor of the Council's secretary, H. C. Irish.

So effective and obviously valuable to the seedsmen, florists, and nurserymen, has this publicity bureau proven, that the national societies representing these three interests have, at their annual meetings, after full consideration and discussion, voted liberal sums to carry on this work, and I believe that no one of such organizations has ever voted similar sums for a work practically established outside of its membership, and I am sure that no case has been similarly supported by all of them.

It is not denied that any one of the horticultural interests in America having a national organization could undertake similar work, but it is conceded that with the moderate funds available and obtainable from each society, a much better showing can be made, and with greater economy, by carrying forward the work as it has been undertaken by the Council; and its position in this regard is now well established.

One word further as to the possibilities and value of this enterprise to the commercial interests above mentioned. So urgent has become the demand for reliable horticultural information from the leading daily and weekly newspapers of the country, that bureaus have been organized to supply this information, and such articles are being sold regularly, although the articles supplied by the National Council of Horticulture have been sent out free.

I am satisfied that if the Council had more funds to work with, enabling it to produce desirable newspaper articles, these having so far been written free of charge, we might almost establish the bureau on a self-supporting basis by selling some of the articles to a selected list of the largest daily newspapers.

It will be readily understood that the articles sent out under the authority of the Council carry weight and could be more readily sold than those undertaken by private individuals.

CONGRESS of HORTICULTURE

at
JAMESTOWN EXPOSITION,
NORFOLK, VA., September, 23-27, 1907.

The Congress of Horticulture convened at Convention Hall, Jamestown Exposition, Norfolk, Va., on Monday, September 23. Warren H. Manning presided at the opening session. A paper on "Soils" was read by Professor P. H. King, of Madison, Mich., in which he spoke of the productivity of soils as influenced by composition and structure.

Dr. A. F. Woods, assistant chief, Bureau of Plant Industry, United States Department of Agriculture, read a paper on "Plant Pathology." He stated that plant diseases are caused to a greater extent than is usually realized by one crop farming, too short and unwise crop rotations, improper methods of fertilizing and culture, with destruction of humus and the life and fertility of the soil; careless methods of propagation and use of varieties not adapted to soil and climate. All these factors should be better understood and taken into account.

A paper on "Insect Enemies" was read by Mr. A. L. Quaintance, of the Bureau of Entomology, United States Department of Agriculture, in which he stated that of 40,000 species of insects so far recorded in America, only about 1,200 ought to be regarded as injurious. At present the battery for insect warfare consists of: (1) various poisons, as Paris green, etc.; (2) various caustic, soapy and penetrating sprays, more especially for sucking insects; (3) poisonous gases; (4) utilization of parasites and predaceous insects, etc.; (5) cultural methods, as Fall plowing, rotation, pruning, etc.; (6) employment of plants resistant to insect attack for grafting stock; (7) mechanical methods, as worming for borers and legislation to prevent destruction and dissemination.

A paper on "Breeding and Propagating Florists' Flowers" was read by W. N. Rudd, of Mount Greenwood, Ill. W. W. Rawson, of Boston, read a paper on "Vegetable Growing," giving practical methods for commercial growing, both outdoors and under glass.

"Cut Flowers" was the title of a paper by F. R. Professor, Tarrytown, N. Y.

Professor F. W. Rane, of Boston, talked on the subject of "Forest Trees," saying there were to-day thousands of acres of land lying idle that could be made extremely valuable in years to come by planting seeds of pine trees.

A series of papers on "Local Horticultural Conditions" were read, Professor Macoun, of Ottawa, giving an exhaustive report on conditions in Canada. He stated that when the last census was taken in 1901 the total number of fruit trees in Canada was 21,201,239, and it is thought the number has increased 10 per cent. since; there is an annual export of apples from Canada of from 1,200,000 to 1,500,000 barrels.

John K. M. L. Farquhar, of Boston, reported for the East and L. A. Goodman for the Central West.

Other papers read were: "Our National Forests," by W. L. Hall, of Washington, D. C.; "Landscape Gardening," by John C. Olmstead; "Civic Horticulture," by Warren H. Manning; "Federation and Co-operation," by J. C. Vaughan. E. J.

Breeding and Propagation of Florists' Flowers.

By WILLIS N. RUDD.

Read before the Congress of Horticulture, Jamestown Exposition, Norfolk, Va., September 23-27, 1907.

The coupling of these two subjects together seems eminently proper, as the present situation—especially with regard to the carnation—is that the breeders are yearly producing new and better varieties, and the grower is just as rapidly destroying them by improper methods of propagating and growing.

Perhaps a short summary of the extent, or better, the limitation, of the writer's experience may be of use in estimating the value of any ideas advanced in this paper. For some eighteen years I have been actively engaged in growing cut flowers for market purposes, largely carnations and chrysanthemums, and for the last thirteen years have been interested in the breeding of carnations, with no very striking success so far as the putting out of phenomenal new things is concerned. The work has been conducted strictly from the commercial standpoint and, like all work of this kind conducted from this standpoint, has but little value in a scientific way. Questions of economy, the saving of time, labor and greenhouse space compel the dropping of any line so soon as it shall appear not to offer reasonable chances for gain. We cannot study retrograde or degenerate movements. Failures—that is, undesirable types—are at once destroyed and replaced by what seems to give more chance of gain, and no proper study is, or can be

Prof. H. C. Irish,
Secretary National Council of Horticulture

made of the causes of the retrogression or degeneracy. This same commercial pressure and desire to economize time, leads us to keep incomplete records and lays us open to more than a suspicion of inaccuracy. General statements, summaries or conclusions, no matter how positively put forth by us, are open to suspicion also, because we have no true conception of what scientific accuracy means. Many of us entirely fail to study the scientific work which has been done, or is being done in breeding and heredity, while the best of us can hardly lay claim to more than a superficial knowledge of it, gained through digests, reviews and summaries.

On the other hand, the scientific student of these matters is not primarily concerned about the commercial value of his products, and will preserve for careful study degenerate or sickly individuals which the commercial breeder will promptly discard. Failures are failures, simply, to the one, while to the other they are often subjects for careful study as possibly containing the key to the cause. The one is concerned solely with the value of the resulting individual, and has neither the time, knowledge nor inclination to search deeply into the cause. To the other, the cause is the main matter of interest, and the possible commercial value of the result is a subordinate one. The commercial breeder has a thorough knowledge of commercial values, and a highly cultivated, almost instinctive selective sense for

progressive or valuable traits. The scientific student is quite generally deficient in knowledge of commercial values.

These conditions of wide variance between the two classes of men as to knowledge, methods and aims will explain the state of mild contempt frequently shown by each for the other. The commercial breeder takes a tumble when he attempts to draw scientific conclusions from his work, and the scientist is often left at the post when he ventures to discuss or assign commercial values.

It is far from my intent to belittle the work of the scientist. He has worked miracles and is doing so daily. What future work in the close study of the breeding of plants will do, no man can say. It is safe to believe, however, that many problems the answers to which we cannot even guess at present, will be solved. At the risk of being called a Philistine, however, I am compelled to say that, so far as regards the commercial breeder of florists' plants, the scientist, so far as science has been assimilated, has done little more for him than to enable him in certain cases to make a little shrewd guess. The term scientific breeding, as applied to our subject, is a misnomer. The breeding of florists' flowers remains to-day almost a pure art.

Methods of Breeding.

There are two principal recognized methods of breeding florists' flowers, by selection to fix a type and by cross breeding. The two methods are not so different as they might seem. Success in each depends—barring occasional accident—on the same qualities in the operator. The cross may almost be considered a minor matter. It is the fine, almost instinctive, power for the perception of minute variations, both progressive and retrogressive, on which largely depends success, and the lack of it in either case means failure.

This same power of minute observation enables the cross breeder to become acquainted, as it were, with his subjects, to learn their individual potencies and combining powers, and, year by year, if he is careful about introducing foreign blood, to predict more and more closely the results of his crosses; and yet he will often be unable to give to you or me any good and sufficient reason why he selects or rejects, or why he makes or avoids certain crosses, any more than the painter can give you rule or reason for all the varying form or color in his masterpiece.

Breeding and propagating in floriculture have widely varying objects. One is a process for producing (I had almost said creating) new forms; the other is a process for increasing the number of individuals of one form. An attempt to discuss methods of propagation is unnecessary.

Florists' plants that are propagated by seed do not generally deteriorate for long periods, as the seed is commonly grown by expert specialists, carefully rogued and kept up to standard. In the plants commonly propagated from cuttings, rapid deterioration is often noticed. This is due to one or several of many causes. A poor cutting may be taken from a good plant, or an apparently good cutting from a starved, sickly or overfed plant. The cutting may be weakened by too high a temperature in the propagating bed, or by having to sustain itself too long without roots by reason of too low a temperature in the sand, or by remaining too long after rooting without potting. Attacks of disease or improper growing, of course, hasten the deterioration of a variety but do not concern us at this time.

Granting that the mechanical part of the work is properly done, the sand good and clean, watering and ventilation properly attended to and soil and after culture all that can be asked, there is still deterioration in many cases. A sickly or diseased plant gives its own warning, and only the most careless grower will take cuttings from it. By far the most insidious danger lies in the strong, vigorous plant producing fine blooms, but overfed. Here is the great danger and here, I believe, lies the prime cause of deterioration, especially in the carnation. A plant once overfed seems a changed individual, and this changed condition extends to its progeny by cuttings, to a great degree.

When we have taken cuttings from healthy plants in vigorous growing condition, and which we know to have not been over stimulated; when we have given them perfect conditions and perfect care, from cutting to flowering time and back again, year after year, there will often be noted a steady decline in productiveness with a possible retention of good health and vigor. We have failed to learn our lesson of the breeder, we have selected with only one object in view and have overlooked the difference in productiveness of our individual plants. When we learn to scrutinize every cutting as to its quality, and every plant from which a cutting is made, not only as to its health and vigor, but also as to its flower producing qualities, and to reject all but the very best, then will we hear less of the deterioration of varieties.

In a word, success in breeding, success in propagating, in fact, success in all floricultural operations is due to that quality by which some writer has defined genius—an infinite capacity for taking pains.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail florist firms advertising under this heading will accept and fill orders for flowers and floral designs forwarded them by mail, telegraph or telephone, the usual commission of 25 per cent. being allowed.

\$25.00, payable quarterly in advance, will entitle the advertiser to a four-line card, under this heading, for one year, 52 insertions. For every line additional to four, \$5.00 will be charged. Four lines will average 32 words; each additional line, 9 words. Each advertiser receives one copy, free, of our Florists' Telegraph Code.

New York.

YOUNG & NUGENT, 42 West 28th St. We are in the theatre district and also have exceptional facilities for delivering flowers on outgoing steamers. Wire us your orders; they will receive prompt and careful attention.

MYER, 611 Madison Ave. My facilities for delivering flowers for any and all occasions are unexcelled. Can give prompt service to steamer and theatre trade. Telegraphic orders solicited. Telephone, 5297 Plaza.

Kansas City, Mo.

SAMUEL MURRAY, 1017 Broadway. I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers always on hand. Wire me your orders.

Washington, D. C.

GUDE BROS., 1214 F Street, N. W. We excel in high-class flowers and design work of every description; quick service, reasonable charges and liberal treatment have placed us on top. Try us.

Detroit, Mich.

JOHN BREITMEYER'S SONS, Broadway and Gratiot Avenue. We cover all Michigan points and large sections of Ohio, Indiana and Canada. Retail orders placed with us will receive careful attention.

Denver, Colo.

THE PARK FLOEAL CO., 1706 Broadway, J. A. Valentine, Pres. Orders by wire or mail carefully filled; usual discounts allowed. Colorado, Utah, Western Nebraska and Wyoming points reached by express.

Cincinnati, O.

HARDESTY & CO., 150 East Fourth, sell the best grade of flowers grown. Retail orders from distant points for delivery in Cincinnati or surrounding territory will receive prompt attention. Telegraph us.

Dayton, O.

W. G. MATTHEWS, FLOEIST, 16 West Third Street. Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

Dallas, Texas:

LANG, THE FLOEIST, the largest flower store in the South. Floral designs and all flowers in season; personal supervision and prompt service in Oklahoma, Texas, Louisiana. Mail and telegraphic orders solicited.

Louisville, Ky.

JACOB SCHULZ, 644 4th Avenue. Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of seasonable flowers always in stock; delivery facilities perfect.

Indianapolis, Ind.

BERTERMANN BROS. CO. Our facilities for executing orders in an efficient manner are unexcelled. Our shipping territory includes the surrounding states. High grade flowers; expert workmanship.

Albany, N. Y.

EYES, 11 North Pearl Street, cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Chicago, Ill.

HAUSWIRTH, The Auditorium Florist, 232 Michigan Avenue. The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

Retailers desiring a share of out of town trade should be represented by a card in this column.

Our London Letter.

By A. HEMSLEY.

ZONAL PELARGONIUMS.—I have not seen anything very startling in the way of new varieties of these this season. The semi-doubles are favorites with market growers for pot plants, and we are getting good plants now (September 14). *Hermoine* is still one of the best whites. Mrs. Lawrence comes very good in the Autumn. The improved *F. V. Kaspail* has not yet been displaced; it is undoubtedly the best of the crimson scarlets. For bedding *Paul Crampel* has proved the finest scarlet; in all the public parks it is now largely grown and is much appreciated. Mrs. Brown-Potter is becoming one of the most popular of the pink varieties being a good shade of color, very free, dwarf, with large trusses of bloom. *Henry Jacoby* is a favorite with many; and the variety *King Edward VII.* does well in some ground, but I find it fails in poor soils.

FUCHSIAS.—While about bedding plants, I may refer to those which have been very gay this season. In the

Royal Horticultural Society's meeting. A few good cactus sorts have been certificated; of these, *Flame*, bright scarlet, comes from H. Shoemith; also *Elsa Ullrich*, white with creamy center. Messrs. Stredwick & Son are again to the front with cactus varieties, and have gained certificates for *C. E. Wilkins*, *Ivonia*, *Rev. Arthur Bridge*, and *Mercury*. In the various exhibits, W. Marshall, Amos Perry, H. Shoemith, Thomas Perkins, Mrs. Shoemith, D. Staples, Dr. G. G. Gray, Cockatoo, Mont Blanc, Dainty, Lustre, W. T. Rogers Nelson, Conrad, and a good many of the older sorts sustained their reputation.

We have nothing new in the show or fancy varieties, and in pompons there has been only one added to certificated kinds; this was *Hildegard*, a pretty shade of mauve, from C. Turner. Messrs. Cheal & Sons gained certificates for *Brilliant* and *Peggy*, two pretty single varieties. The Dean memorial medal (in open class) was given for the best show varieties and was won by J. Walker of Thame, Oxford. I may add that out of 250 entries at the London Union show there was not an exhibit but what was highly creditable, and in many instances it was most difficult for the judges to come to a decision as to which were the best exhibits.

THE AUCTION SALES.—If we may judge from the number of buyers and the keen competition at the an-

Exterior View of Hoffman's Store, Boston, Mass.

parks and several private gardens that I have visited I find that the better sorts do equally as well as those of the *Riccartoni gracilis* and *globosa* types, but these are good in their way. L. R. Russell of Richmond has made quite a specialty of the hardy sorts and has some pretty varieties. Of the choicer sorts the singles may be the most reliable as the heavy flowers of the doubles suffer more from bad weather, but I have noted *Molesworth* and *Ballet Girl*, (both double white corolla varieties) doing well. The old sort, *Madame Cornellison*, is one of the best for bedding. One of the best single crimsons I noted in Regent's Park was named *Tower of London*, and *Arabella* improved, a good light variety. Almost any of the free growing sorts seem to do well.

Lantana delicatissima, in large bushes covered with soft mauve flowers, was very attractive. *Calceolaria Burbridgei* is another plant which grows rather tall and is very effective. Tall plants of *heliotropes* are much favored. The flat beds are now quite out of fashion; where such dwarf plants as *Begonia semperflorens* are used some tall stand-up plants are introduced. *Violas* as an undergrowth, with taller plants. *Verbenas venosa* is another which makes a good carpet. For an edging *Alyssum maritimum* is now much used, and for the sea coast it does especially well, but it is a dwarfier variety than the ordinary form.

DAHLIAS.—The two principal shows—those of the National Dahlia Society and the London Dahlia Union—are now over, but as owing to the cold nights we have had, many of the flowers are very late this season, and we shall expect to see more new varieties at the

annual auction sales of pot plants, trade in the provinces has not been so bad as it was represented, for the attendance was larger than usual and the prices were in many instances above previous averages. Palms sold well at advanced prices. Ferns cleared well at fair figures; but it was the ericas that were most in demand, and though they did not reach high prices they were all sold and in some instances more were wanted. It is rather surprising to find that though we have had such sunless weather, the heaths are well set with bloom and many of them more forward than usual. *Gracilis* and the white variety are in full flower with some growers, and I noted some *hyemalis* at one nursery with flowers expanding, and these were growing out-of-doors. It may be that the cold nights which we had a few weeks ago gave them a check and caused them to set early; it certainly was not the sunny weather.

The new varieties of *nephrolepis* were much in demand, and though they did not make big prices many extra lots were sold. But as regards most of the choice sorts of ferns there was not much competition. Anything new that is likely to be of use for market finds ready buyers, while choice things, only of use where collections are kept up, do not attract much attention.

A Progressive Boston Retailer.

Our illustrations represent views of the interior and exterior of the store of Hoffman, retail florist, at 61 Massachusetts avenue, Boston, Mass. Mr. Hoffman started in business on a small scale about four years ago, and has succeeded in working up a large and profitable trade. A range of greenhouses, well stocked with select plants, forms a very useful adjunct to the store.

CHANGES IN BUSINESS.

LAS CRUCES, N. M.—John H. Brown, Springfield, Ill., and his brother have bought a 21-acre ranch here, and will raise flowers for market. Mr. Brown and his family will move here October 1.

WEST BRIDGEWATER, MASS.—George P. Presby of North Elm street is having a greenhouse, 30 by 52 feet, built for him. Mr. Presby has left the shoe business and intends to go into the florist business.

MINNEAPOLIS, MINN.—James Souden, who has for many years been in the flower department of Donaldson's Glass Block, is now located in his new store at 106 Sixth street south. The store is beautifully decorated and admirably adapted to the purposes of a florist's shop.

HUNTSVILLE, ALA.—The Fraser Nursery Company has been incorporated under the laws of Alabama with a capital stock of \$30,000 to operate the Fraser Nursery, one of the oldest and largest fruit nurseries in this section. John Fraser is president; James Fraser, vice-president, and John Fraser, Jr., secretary and treasurer.

KANSAS CITY, MO.—The People's Floral Company has opened a store at 321 Walnut street. Max Eller, the proprietor, has made much headway in the two and one-half years he has been in business here controlling as he does this new establishment, a greenhouse at Twenty-sixth and Holmes and the store at Twelfth and Main, which will be continued as a branch.

Thirty cents is the minimum charge for advertisements on this page.

CANADIAN NEWS

MONTREAL.—Trade is improving all along the line; weddings and teas use up a lot of stock. The supply of cut flowers, such as they are, is heavy. Roses are short in stem and of poor quality. Carnations show nice blooms, but also on very short stems. Asters will soon be finished, especially if a good hard frost comes along which will also settle other outdoor grown stock. Chrysanthemums have made their appearance but do not sell alongside of such fine asters as we have. Boston and Scottii ferns are selling well.

Joseph Bennett is completing a new house for plants. P. McKenna & Son are building a new house. C. A. Smith, Lachine, has completed a house, 100 x 25 feet. Wilshire Bros. have rebuilt one house. The greenhouse men are changing their glass from the lapped to the butted style.

Wm. Gray, formerly with D. J. Sinclair and lately with The Wright Floral Company, is now wholesaling on his own account. Mr. Gray is the only wholesaler we have in Montreal.

Miss Carmichael, formerly with Mr. Bennett, has opened a store on St. Catherine street, West.

Geo. Hopton of Harris & Hopton is building a new residence adjoining their greenhouses at Westmont.

Hall & Robinson have brought in their first chrysanthemums, Opah, which sold at \$3 per dozen retail—just half the price of Marquis de Montmort blooms in New York.

W. C. H.

EDMONTON, ALBERTA.—With the return of many of our residents from their holidays, trade begins to show signs of life again. Our Summer has been an unusually cool and wet one. The Spring was very late and the Fall seems already to be on us. The past two weeks have seen almost continual cold rain—an unusual condition in this locality at this time of year. All outside flowers are now frost-killed. Roses are doing well; the cool Summer nights gave them a dose of mildew. A couple of Campbell's sulphur vaporizers were procured and used as per directions; the result was entirely satisfactory.

The old carnations did so well all Summer that they have only been thrown out a short time. The young stock was planted on freshly cleared ground, and although not put out till very late did finely. When brought in they were lifted with a big ball of the peaty soil adhering and planted in a hole made with a spade instead of the trowel. The operation was rather a slow one, but the plants suffered no check and continued growing as though they had never been moved.

The tarnished plant bug has been very troublesome on the chrysanthemums all Summer and has done considerable damage. The pest seems to be decreasing in numbers now, and the plants are going ahead again.

Walter Ramsay has made extensive additions to his plant this year; it now covers a block 150 x 200 feet, all latest model King construction.

Considerable disappointment is expressed at the failure of the Civic Improvement Society to hold the proposed horticultural exhibition. Too many business men on the board of management, with more important interests, seem to be about the seat of the trouble. A straight horticultural society is promised very shortly.

FRED. BENNETT.

Syracuse, N. Y.

Jottings.

In my notes on the State Fair at Syracuse I omitted to say that Arthur Cowee's splendid exhibit of gladiolus was not for competition. The fair was a great success despite the fact that there were two rainy days; \$20,000 have been handed over to the State treasurer.

A matter of much interest to landscape architects is that by a new law the commissioners of the Fair are empowered to spend ten thousand dollars in improving the grounds, and making plans for new buildings. A meeting of the commissioners will be held in Syracuse, October 5, to meet those who wish to submit plans. Full information may be obtained by addressing A. E. Perten, Chairman State Fair Commissioners, Syracuse, N. Y.

Miss Jessie Gertrude Quinlan, daughter of P. R. Quinlan, was married on September 23 to Hugh McCarthy of Syracuse.

FOR SALE

PIPE Good serviceable second hand. No Junk, with new threads, 1 in. 3 1/2 c.; 1 1/2 in. 4 1/2 c.; 2 in. 5 1/2 c.; 2 1/2 in. 10 c.; 3 in. 14 c.; 4 in. 19 c.; per ft. All kinds of fittings for 1 in. cast iron and all sizes wrought iron.
